PREFACE TO THE SIXTEENTH EDITION.

When Mr. Joseph Haydn first published this work (in 1811), it was well received, as in some degree supplying a public want; and six editions had been sold, in 1855, when I was earnestly requested by the publisher, Mr. Edward Moxon, to superintend the printing of a new edition. This led eventually to my undertaking its thorough renovation, which has been effected by long continued labour in revision and in selection from an abundance of valuable materials, and now little of the original work remains; the present edition containing about twice as much matter as the sixth, published in 1853, at the same price. The new features include Chronological Tables at the beginning of the volume, innumerable literary, scientific, topographical, and geographical facts inserted in the body of the work, and a Dated Index. To make room for these additions the size of the page has been greatly enlarged, many articles have been condensed or printed in smaller type, and much useless matter has been expunged. The Fifteenth Edition was published in October, 1876.

This SIXTEENTH EDITION has been thoroughly revised, and includes the general history of the last two years, continued under the heads of the respective countries; the more important events being noticed in separate articles. Especial attention has been given to the affairs of our own country, political, ecclesiastical, social, commercial, and philanthropic, and to the general history of France, Spain, Germany, Russia, Italy, Turkey, and the United States. This includes especially the great constitutional struggle in France, and the recent war between Russia and Turkey, with the preliminary and subsequent negotiations, culminating in the treaty of

vi PREFACE.

Berlin. Many small articles have been inserted relating to topics liable to arise in general conversation, and the progress of science and its applications (such as the telephone, microphone, phonograph, the liquefaction of gases, the electric light, and the discovery of the satellites of Mars) have been specially noticed. This edition contains thirty-four more pages than the last, published in 1876, and ninety-eight more than that published in 1873.

Nearly a quarter of a century has clapsed since my first connection with this work, and I still feel encouraged to labour to maintain the reputation which it has attained, by sedulously endeavouring to make it, not a mere Dictionary of Dates, but a dated Cyclopædia, a digested summary of every department of human history, brought down to the eve of publication. I have endeavoured to act under the influence of the old maxims, "Homo sum; humani nihil a me alienum puto," and "Nulla dies sine linea;" and gratefully acknowledge the kindness of those friends who have pointed out some of the errors and omissions, which are almost unavoidable in a work of such scope and magnitude.

The more important events that have occurred during the printing of this edition are noticed in the Addenda.

A DICTIONARY OF BIOGRAPHY has been prepared as a suitable companion to this DICTIONARY OF DATES.

PREFACE TO THE FIRST EDITION.

The design of the Author has been to attempt the compression of the greatest body of general information that has ever appeared in a single volume, and to produce a Book of Reference whose extensive usefulness may render its possession material to every individual—in the same manner that a London *Directory* is indispensable, on business affairs, to a London merchant.

The Compiler persuades himself that the Dictionary of Dates will be received as a useful companion to all Biographical works, relating, as it does, to *things* as those do to *persons*, and affording information not included in the range or design of such publications.

On 6 Oct. 1850, the Bois de Boulogne, near Paris, was opened as a zoological garden, containing only acclimatised animals. An English acclimatisation society was founded to June, 1860, by hon. Grantley Berkeley, Mr. J. Cræckford, Mr. F. Buckland, &c., and the prince of Wales became president in April, 1805. It was not successful. ACIDS (now defined as salts of hydrogen) are generally soluble in water, redden organic blues, decompose carbonates, and destroy the properties of alkalies, forming alkaline salts. The number of acids was increased by the Arabs; Geber (8th century) knew nitric acid and sulphuric acid. Theories of the constitution of acids were put forth by Becher (1669), Lemery (1675), and Stahl (1723). After the discovery of oxygen by Priestley, 1 Aug. 1774, Lavoisier (1778), concluded that oxygen was a constituent of all acids; but about 1810 Davy, Gay-Lussac, and others, proved the existence of acids free from oxygen. In 1816 Dulong proposed the binary or hydrogen theory of acids, and in 1837 Liebig applied the theories of Davy and Dulong to explain the constitution of several organic acids. Oxygen acids were termed anhydrides by Gerhardt (died 1856). Many acids have been discovered through the advance of organic chemistry. Watts.

ACRE, a land measure, formerly of uncertain quantity, and differing in various parts of the country, was reduced to a standard by Edward L. about 1305. In 1824 the standard acre was ordered by statute to contain 4840 square yards.

ACRE, Acca, anciently Ptolemais, in Syria, was taken by the Saracens in 638; by the crusaders under Baldwin I. in 1104; by Saladin in 1187; and again by Richard I. and other crusaders, 12 July, 1191, after a siege of 2 years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named St. Jean d'Acre. It was retaken by the Saracens in 1291, when 60,000 Christians perished, and the nuns, who had mangled their faces, to preserve their chastity, were put to death. Acre was gallantly defended by Djezzar Pacha against Bonaparte, till relieved by sir Sidney Smith, who resisted twelve attempts by the French, between 16 March and 20 May, 1709, when Bonaparte retreated. Acre, as a Turkish pachalic, was seized 27 May, 1832, by Ibrahim Pacha, who had revolted. On 3 Nov. 1840, it was stormed by the allied fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000 prisoners, while the British had but 12 killed and 42 wounded; see Syria and Turkey.

ADELAIDE, the capital of South Australia. was founded in 1836. It contained 14,000 inhabitants in 1850, and 18,259 in 1855; about 30,000 in 1875. It was made a bishopric in 1847. It was visited by the duke of Edinburgh, 1 March, 1869.

ADELPHI (Greek for brothers) several streets on the south side of the Strand, London, crected about 1768 by the brothers, John, Robert, James, and William Adam, after whom the streets are named. Adelphi Theatre, built 1800, rebuilt 1858; see under Theatres.

ADEN, a free port on the S. W. corner of Arabia, where in Dec. 1836 a British ship was wreeked and plundered. The sultan promised compensation, and agreed to code the place to the English. The sultan's son refusing to fulfil this agreement to captain Haynes, a naval and military force, under captain H. Smith, of the Volage, was dispatched to Aden, which captured it, 19 Jan. 1839. It is now a garrison and coal depot for Indian steamers, &c.

ADIAPHORISTS (from advaptor a, indifferent things), a term applied to Melanchthon and others, who were willing to give up certain things to the Romanists as indifferent, about 1548.

ADIGE, a river in N. Italy, near which the Austrians defeated the French on 26, 30 March, and 5 April, 1799.

ADMINISTRATIONS OF ENGLAND AND OF GREAT BRITAIN. Until the Restoration, 1600. there was not any cabinet in the modern sense. The sovereign was aided by privy councillors, varying in number, the men and offices being frequently changed. The separation of the cabinet from the privy council became greater during the reign of William III., and the control of the chief, now termed the "premier," began in the reign of "The era of ministries may most properly be reckoned from the day of the meeting of the parliament after the general election of 1698." Macaulay.+ For a fuller account of each, since 1700, see

† Till 1850 the cabinet council usually consisted of the following twelve members: First lord of the treasury: lord chancellor; lord president of the council; chancellor of the exchanger; lord pray seat; home, foreign, and colonial secretaries; list lond of the admiralty; president of the board of trade; president of the board of control; chancellor of the ducky of Lancaster. In 1850 the number was fifteen, and included the secretary-state are the postmaster-general, and the chief secretary for Ireland. In the Palmerston-Russell cabinet (which see), the president of the poor-law-board replaced the secretary for Ireland. In 1868 the Gladstone cabinet consisted of 15: that of Mr. Disraeli in Feb., 1874, of 12. The variage direction of a ministry has been set down at four, five, and six years; but instances have occurred of the duration of a ministry for much longer periods; sir Robert Walpole was minister from 1721 to 1742 (21 years);

Born 1757; became viscount Sidmouth, Jan. 1805; held various offices afterwards, and died in 1844. His circular to the lords lieutenants, dated 27 March, 1817, direction them to adopt severe measures against the authors of blasphenous and seditions pumphlets, was greatly censured, and not carried into effect.

ADMIRAL. The title does not appear to have been adopted in England until about 1300, but was previously in use in France. Sir Harris Nicolas. Alfred, Athelstan, Edgar, Harold, and other kings, were commanders of their own fleets. French admiral is said to have been appointed 1284. The rank of admiral of the English seas was first given to William de Leybourne by Edward I. in 1297. Spelman; Rymer. The first Lond High ADMIRAL in England was created by Richard II. in 1385: there had been previously high admirals of districts—the north, west, and south. The duties have generally been executed by lords commissioners; see Admiralty. A similar dignity existed in Scotland from the reign of Robert III. : In 1673, Charles II, bestowed it upon his natural son Charles Lennox, afterwards duke of Richmond, then an infant, who resigned the office to the crown in 1703: after the union it was discontinued .-- The dignity of lord high admeral of Ireland (of brief existence) was conferred upon James Butler by Henry VIII., in May, 1534. The Admiral of the Fleet is the highest rank in the Royal Navy, corresponding to that of marshal in the army. We have now 3 admirals of the fleet, 16 admirals, 17 vice-admirals, 28 rear admirals, and 173 captains, (July 1878). The first admiral of the United States of America, David G. Farragut, was nominated in 1866.

ADMIRALTY, COURT OF, a court for the trial of causes relating to maritime affairs, said to have been erected by Edward III., in 1357. It was enacted in the reign of Henry VIII., that criminal causes should be tried by witnesses and a jury, some of the judges at Westminster (or, as now, at the Old Bailey) assisting. The judgeship of the admiralty was constituted in 1514, and was filled by two or more functionaries until the Revolution, when it was restricted to one. Beatson. The judge has usually been an eminent doctor of the civil law. In 1844 the criminal jurisdiction of this court was removed, and by 20 & 21 Viet. c. 77 (1857), the judge of the Probate court was to be also judge of the Admiralty court. The judge of the Admiralty court, Dr. Stephen Lushington (appointed in 1838), resigned t July, 1867, and was succeeded by Sir Robert Phillimore. The jurisdiction of this court was extended in 1861, see Supreme Court.

ADMIRALTY OFFICE dates from 1512, when Henry VIII. appointed commissioners to inspect his ships of war. During the Commonwealth the admiralty affairs were managed by a committee of the parliament; and at the restoration in 1600, James, duke of York, became lord high admiral. In 1662 the admiralty was first put into commission, the great officers of state being the commissioners; see succeeding changes below. In 1688-9 the admiralty was put into commission, and the board appears to have assembled at admiral Herbert's lodgings, in Channel-row, Westminster, he being at that time first lord. In 1830, 1832, and 1836 various changes were made in the civil departments, several offices being abolished or consolidated with others. In March, 1861, a royal commission recommended the abolition of the board of admiralty and the appointment of a minister of the

navy department. The board was reconstituted 14 Jan. 1869, and 4 May, 1872.

ADMIRALTY, Whitehall. "At the south end of Duke-street, Westminster, was seated a large house made use of for the admiralty office, until the business was removed to Greenwich, and thence to Wallingford house, against Whitchall." It was re12

built by Ripley about 1726; the screen was creeted, to conceal the ugliness of the building, by the brothers Adam, in 1776.—Lord Nelson lay in state in one of the apartments on 8 Jan. 1806; and on the next day was buried at St. Paul's.

"ADMONITION TO THE PARLIAMENT," condemning all religious ceremonies but those commanded by the New Testament, was published by certain Puritans in 1571. Its presumed authors, Field and Wilcox, were imprisoned. A second Admonition by Thomas Cartwright was answered by archbishop Whitgift.

ADORNO AND FREGOSO, two families, of which the doges were frequently members, disturbed Genoa from the 14th to the 16th centuries, the former favouring the emperor, the latter the French king. Their power was annihilated by Andrea Doria about 1528.

ADRIAN'S WALL (to prevent the irruptions of the Scots and Picts into the northern counties of England, then under the Roman government) extended from the Tyne to Solway frith, and was eighty miles long, twelve feet high, and eight feet in thickness, with watch-towers; built 121. It was repaired and strengthened by Severus, 207-210.

ADRIANOPLE, in Turkey, so named after its restorer the emperor Adrian (who died to July, 138). Near here Constantine defeated Licinius and gained the empire, 3 July, 323; also, near here the emperor Valenswas defeated and slain by the Goths, 9 Aug. 378. Adrianople was taken by the Turks under Amurath in 1361, and was their capital till the capture of Constantinople in 1453. It was taken by the Russians on 20 Aug. 1829; and restored 14 Sept. same year; occupied by the Russians, without resistance, 20 Jan. 1878. See Turkey.

ADRIATIC. The ceremony of the doge of Venice wedding the Adriatic sea (instituted about 1173), took place annually on Ascension-day. The doge dropped a ring into the sea from his buccutaur, or state barge, being attended by his nobility and foreign ambassadors. The ceremony was first omitted in 1797

ADULLAM, a cave to which David fled from xxii 1, 2). Mr. Horsman, Mr. R. Lowe, carl Grosvenor, lord Elcho, and other liberals who opposed the Franchise bill in 1866 were termed "Adullamites." During a debate on this bill on 13 March, 1866, Mr. Bright said of Mr. Horsman, that he "had retired into what may be called his political cave of Adullam, to which he invited every one who was in debt, and every one who was discontented," &c. On 19 April, lord Elcho said, " No improper motive has driven us into this cave, where we are a most happy family, daily-I may say, hourly-increasing in number and strength, where we shall remain until we go forth to deliver Israel from oppression." Although their opposition led to the defeat and resignation of the Russell ministry, they declined to take office under lord Derby in July, 1866. They did not vote together uniformly in 1867, and (lord Elcho and Mr. Wyld excepted) voted with Mr. Gladstone, for the disestablishment of the Irish church, I May, 1868.

ADULTERATION. That of food was pro-hibited in England in 1267, and punishments for it enacted, 1581, 1604, 1836, 1851, &c. Much attention was drawn to it in 1822, through Mr. Accum's book, called "Death in the Pot," and in 1855 through Dr. Hassall's book, "Food and its Adulterations." By an act for preventing the adulteration of food, passed in 1860, parochial chemical analysts

Penalties for adulterating liquors were imposed by the new hoensing act passed same time. The report of a commission, issued in July, 1874, declared that the public "were cheated rather than poisoned." All the anti-adulteration acts were repealed by the Sale of Food and Drugs Act, passed 11 Aug., 1875.

ADULTERY was punished with death by the law of Moses (1400 B.C.; Lev. xx.10)—and by Lycurgus (884 B.C.). The early Saxons burnt the adulteress, and erected a gibbet over her ashes whereon they hanged the adulterer. The cars and nose were cut off under Canute, 1031. Adultery was ordained to be punished capitally by the parliament, May 14, 1650 but there is no record of this law taking effect; and it was repealed at the restoration. In New England the punishment for adultery was made capital to both parties, and several suffered for it, 1602. Handle, Till 1857 the legal redress against the male offender was by civil action for a money compensation, the female being liable to divorce. By 20 & 21 Vict. c. 85 (1857) the "action for criminal conversation" was abolished, and the Court for Divorce and Matrimonial Causes established with power to grant divorces for adultery and ill usage; see *Dirace*. An act was passed in 1860 permitting parties to saits for adultery to give evidence.

It consisted of hovels, erected on the site of the grounds of councillor Agar, after 1841, which, from their lifty and uncivilised condition, were termed by Charles Dickens, in 1851, the English Connemals. The entire district was cleared by the Midland Railway Company.

AGE. Chronologers have divided the time between the creation and the birth of Christ into ages. Hestod (about 850 n.c.) described the Golden, Silver, Brazen, and Iron Ages; see Duck Ages.

On 22 May, 1856, Thomas Robinson sought to recover the possession of his child from the care of its mother (from whom he had separated), the application was refused by the vice-characelor, to "save the child from the pollution of the parent's teaching "—On 21 Aug. 1858, Miss Louisa Jane Nottidge died, having transferred her property to Mr H. J Prince Her brother, Mr. Nottidge, by an action, recovered from Prince 5728L, as having been fraudulently obtained. Extraordinary disclosures were made during the trial, 25 July, 1866. In the autumn of 1866, the Rev. Mr. Price, after several vain attempts, succeeded in rescuing his wife from the Agapeinone.

AGE. In Greece and Rome twenty-five was full age for both sexes, but a greater age was requisite for the holding certain offices: e.g. thirty for tribunes; forty-three tor consuls. In England the minority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, tixed at eighteen years; previously to completing which age, his father, Henry VIII., had assumed the reins of government, in 1500.—A mole of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the statute of wills, 7 Will. IV. and I Vict. c. 26, 1837, no will made by any person under the age of twenty-one years shall be valid. A female at twelve may consent to a marriage, at fourteen she may choose a guardian, and at twenty-one she is of age.

AGINCOURT, OR AZINCOUR (N. France), a village, where Heary V. of England, with about 0,000 French on St. Crispin's day, 25 Oct. 1415. Of the French, there were, according to some accounts, 10,000 killed, including the dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 1500 knights; and 14,000 prisoners, among whom were the dukes of Orleans and Bourbon, and 7000 barons, knights, and gentlemen. The English lost the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Henry V. soon after obtained the kingdom of France.

AGINCOUR, iron-clad. See Nary, 1851.

AGITATORS (or Adjutators), officers appointed by the Parliamentary army in 1647, to take care of its interests: each troop or company had two. The protector Cromwell was eventually obliged to repress their seditious power. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions and the forces on the ground, and thus restored discipline. Hume.—Daniel O'Connell, the agitator of Ireland, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, 5 July, 1828; the election being declared void, he was re-elected 30 July, 1829. After the passing of the Catholic emancipation bill, he agitated in vain for the repeal of the union, 1834 to 1843. He died 15 May, 1847.—Richard Cobden and John Bright were the chief Anti-corn-law agitators, 1841-45.—Mr. Bright became a Reform agitator in 1866.

AGNADELLO (N. E. Italy). Here Louis XII. of France gained a great victory over the Venetians, some of whose troops were accused of cowardice and treachery; 14 May, 1509. The conflict is also termed the battle of the Rivolta.

AGNOITÆ (from agnoia, Greek, ignorance). I. A sect founded by Theophronius of Cappadocia about 370: said to have doubted the omniscience of God. II. The followers of Themistius of Alexandria, about 530, who held peculiar views as to the body of Christ, and doubted his divinity.

AGNOSTICS, name given to philosophers who assert that we have no knowledge but what we acquire by means of our senses, about 1876.

AGRA (N. W. India), founded by Akbar in 1506, was the capital of the Great Mogul; see Mansoleums. In 1658 Aurungzebe removed to Delhi.—The fortress of Agra, "the key of Hindostan," in the war with the Mahrattas surrendered to the British forces, under general Lake, 17 Oct. 1803, after one day's siege: 162 pieces of ordnance and 240,000%, were captured.—In June, 1857, the city was abandoned to the mutineers by the Europeans, who took refuge in the fort, from which they were rescued by major Montgomery and colonel Greathed. Visit of the prince of Wales, 25 Jan., 1870.—Allahabad was made capital of the N.W. provinces of India, instead of Agra, in 1861.

AGRARIAN LAW (Agraria lex), decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by the consul Spurius Cassius, 480 B.C., and occasioned his judicial murder when he went out of office in 485.- An agrarian law was passed by the tribune Licinius Stolo, 376; and for proposing tur-ther amendments Tiberius Gracchus in 133, and his brother Cornelius in 121, were murdered. Livius Drusus, a tribune, was murdered for the same cause, 91. Julius Casar propitiated the plebeians by passing an agrarian law in 59.—In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as Gracehus Babeul, editor of the Tribun du Peuple, in 1794. In 1796 he conspired against the directory with the view of obtaining a division of property, was con-demned, and killed himself, 27 May, 1797.

In Aug. 1855, a committee presented a report on the best mode of obtaining accurate Agricultural Statistics.

Admictitural, Societies—The earliest mentioned in the British Isles was the Society of Improvers of Agriculture in Scotland, instituted in 1723. A Dublin Agricultural Society (1749) gave a stimulus to agricul-ture in Ireland; its origin is attributed to M. Prior of Rathdowney, Queen's County, in 1731. The Bath and West of England Society established, 1777; and the Highland Society established, 1777; and the tural Societies are now numerous

AGRICULTURAL CHEMISTRY—Sir Humphry Davy de-hvered lectures on this subject (afterwards published), at the instance of the Board of Agriculture, in 1812; but it excited little attention till the publication of Liebig's work in 1840, which made a powerful impression. Boussingault's "Economic Ruiale," an equally important work, appeared in 1844. The immoderate expectations from this study having been somewhat disappointed, a partial reaction took place. Liebig's "Letters on Agriculture" appeared in 1850.

AGRICULTURAL GANGS.—In the spring of 1867, most painful exposures were made of the prevalence of much cruelty and immorality in the gang system (in which boys and girls are employed) in several of the estern and midland counties; and in consequence an act was passed 20 Aug. for regulating these gangs, licensing gang-masters, &c.

A Union of Agricultural Labourers, managed chiefly by Joseph Arch, formerly a labourer, afterwards a Methodist preacher, was mangurated at Learnington, War-wickshire, 29 March, 1872. The movement spread, being countenanced by Auberon Herbert, M.P., and others. The Union met in London, Arch re-elected president, 16, 17 May 1877.

Lock-out of agricultural labourers belonging to the

Union (lasted 18 weeks, costing the Union much money), began at Alderton, Suffolk, March, 1872. Dispute between Lincolnshire farmers and labourers settled, 18-20 May; Suffolk and Norfolk farmers settled, 18-20 May; Suffolk and Norfolk farmers refuse compromise about 25 May; the Union ceased to support the locked-out labourers, leaving them to emigration, or to seek employment, 27 July, 1872. The agitation subsided; the labourers were employed autumn, 1875; agricultural return for Great Britain, 1873; reported steady increase in prosperity, 1875. The delegates of the National Agricultural Labourer Union part of the 1824.

AGRIGENTUM (now Girgenti), a city of Sicily, built about \$82 s.c. It was governed by tyrants from 560 to 470; among these were—Phalaris (see Brazen Bull); Alcamanes; Theron who, with his step-father Gelon, defeated the Carthaginians at Himera, 480: and Thrasydeaus, his son, expelled in 470; when a republic was established. It was taken by the Carthaginians in 405 B.C., and held, except during short intervals, till gained by the Romans in 262 B.C. From A.D. 825 till 1086 it was held by the Saracens.

AHMEDNUGGUR (W. India), once capital of a state founded by Ahmed Shah, about 1493. After having fallen into the hands of the Moguls and the Mahrattas, it was taken from the latter by Arthur Wellesley, 12 Aug. 1803, and restored to the British dominions, June, 1817.

AID TO THE SICK AND WOUNDED, NATIONAL SOCIETY FOR. On 4 Aug. 1870, soon after the breaking out of the Franco-Prussian war, a meeting was held in London, which established this society, for immediate communication with the international society established at Geneva: see Geneva Convention. The queen became patron and the prince of Wales president; the duke of Manchester, the earl of Shaftesbury, lords Overstone and Bury, sir John Burgoyne, and col. Loyd Lindsay being very energetic supporters. The operations were directed chiefly by capt. H. Brackenbury and sir Vincent Eyre. Capt. Douglas Galton and Mr. Henry Bonham Carter went to the scat of war as commissioners, in Sept. A meeting to promote the incorporation of the society was held 1 Aug. 1871. It was then reported that 290,298l had been received; together with stores valued at 45,000l.

Lower Development of Prussa wrote to colonel Loyd Lindsay: "In this, as on other occasions of distress, the help of the English public has been poured out with a liberal and an impartial hand. The gifts which have been offered in a trily clinistian spirit have everted a feeling of healtful gratifuld among those on whose behalf I speak." Nov.

AIR or ATMOSPHERE. Anaximenes of Miletus (530 B.C.) declared air to be a self-existent derty, and the first cause of everything created. Posidonius (about 79 B.c.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lbs. to the square inch, was discovered by Galileo, 1564, and demonstrated by Torricelli, (who invented the barometer) about A. D. 1643, and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others, the AIR-GUN of Guter of Nuremberg about 1656; the AIR-PUMP, invented by Otto von Guericke of Magdeburg about 1650; improved by Robert Boyle in 1657, by Robert Hooke about 1659; * and the Air-PIPE, invented by Mr. Sutton, a brower of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light and sound by Hooke, Newton, and Derham. The extension of our atmosphere above the surface of the earth, has been long considered as about 45 miles.—Its composition, + about 77 parts of nitrogen, 21 of oxygen, and 2 of

other matters (such as carbonic acid, watery vapour, a trace of ammonia, &c.) was ascertained by Priestley (who discovered oxygen gas in 1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737. The researches of Dr. Schönbein, a German chemist of Basel, between 1840 and 1859, led to his description of two states of the oxygen in the air, which he calls ozone and antozone. Dr. Stenhouse's Air-filters (in which powdered charcoal is used) were first set up at the Mansion-house, London, in 1854. In 1858, Dr. R. Angus Smith made known a chemical method of ascertaining the amount of organic matter in the air, and published his "Air and Rain" in 1872. See Oxygen, Nitrogen, Ozone, Atmospheric Railway, Balloons, and Pneumatic Despat. h.— Isaac Wilkinson patented a method of compressing air by a column of water in 1757, and William Mann patented stage pumping by compressed air in 1829. The force of compressed air has been employed in boring the Cenis tunnel (uhich see). An airtelegraph, in which the waves of air in a tube are employed instead of electricity, invented by sig. Guattari, was exhibited in London in 1870. obtained a gold medal in Naples.

AIX-LA-CHAPELLE (Aachen), a Roman city, now in Rhenish Prussia. Several ecclesiastical councils held here (799-1165). Here Charlemagne was born, 742, and died, 814; having built the minster (796-804), and conferred many privileges on the city, in which fifty-five emperors have since been crowned. The city was taken by the French in Dec. 1792; retaken by the Austrians, March, 1793; by the French, Sept. 1794 ceded to Prussia, 1814.

First Treaty of Peace signed here was between France and Spain, when France yielded Franche Conite, but retained her conquests in the Netherlands, 2 May, 1668. The second celebrated treaty between Great Britain, France, Holland, Germany, Spain, and Genoa (By it the treaties of Westphalia in 1648, of Nimeguen in 1678, and 1679, of Ryswick in 1697, of Utrecht in 1713, of Baden in 1714, of the Triple Alliance in 1713, of the Quadruple Alliance in 1718, and of Vienna in 1738, were renewed and confirmed.) Signed on the part of England by John, carl of Sandwich, and sir Thomas Robinson, 7 Oct. 1748.

Congress of the sovereigns of Austria, Russia and Prussia, assisted by ministers from England and France, met at Aix-la Chapelle, and a convention signed, 9 Oct. 1818, which led to the withdrawal of the army of occupation from France.

ALBANIA, a province in European Turkey, formerly part of the ancient Epirus. The Albanians became independent during the decline of the Greek empire. They were successfully attacked by the Turks in 1388. About 1443, under George Castriot (Scanderbeg), they baffled the efforts of Mahomet II. to subdue them till the siege of Scutari in 1478, when they submitted. Ali Pucha, of Janina, in 1812, defeated the Turkish pachas, and governed Albania ably, but cruelly and despotically, till Feb. 1822, when he and his two sons were slain, after surrendering under a solemn promise of safety. A revolt in Albania was suppressed in 1843.

ALBANS, ST. (Hertfordshire), near the Roman Verulam, derived its name from Alban the British protomartyr, said to have been beheaded during the persecution by Diocletian, 23 June, 286. A stately monastery to his memory was erected about 795, by Offa, king of Morcia, who granted it many privileges. Its superior sat as premier abbot in parliament till the dissolution in 1539. A meeting was held 22 June, 1871, to raise a fund for the

restoration of the abbey, the earl of Verulam, chairman. The results were favourable, and the work was confided to Mr. G. Gilbert Scott, who issued a report in June, 1872. Verulam was built on the site of the capital of Cassivelaunus, taken by Julius Cæsar, 54 B. C. It was retaken after much slaughter by Boadicea or Bunduica, queen of the Iceni, A. D. 61.

ALBERT MEMORIALS. (See under England.) The Prince Consort died on 14 Dec. 1861, deeply lamented by the whole civilised world. His remains were transferred to the mausoleum of Frogmore, 18 Dec. 1862. The sarcophagus is composed of the largest known block of granite without flaw. A meeting to organise a method of receiving contributions for a great national memorial was held at the Mansion-house, 14 Jan. 1862; and a large sum was quickly subscribed. 36,000l. had been received on 1 March; 50,220l. on 11 June, 1862; and parliament voted 50,000l., in addition to the 60,000/, received by voluntary contributions, 23 April, 1863.

The nature of the memorial was referred to the queen herself. In a letter to the lord mayor, dated 19 Feb. 1862, sir Charles Grey says, on behalf of her majesty, "It would be more in accordance with her own feelings, and she believes with those of the country in general, that the mountent should be directly personal to its object. After giving the subject her maturest consideration, her majesty has come to the conclusion, that nothing would be more appropriate, provided it is on a scale of sufficient grandeur, than an obelisk to be erected in Hyde-park on the site of the Great Exhibition of 1851, or on some spot immediately configuous to it. Nor would any proposal that could be made be more gratifying to the queen herself personally, for she can never forget that the prince himself had highly approved of the idea of a memorial of this character bong aised on the same spot in remembrance of the Great Exhibition." In a second letter the queen expressed her intention of personally contributing towards erect-ing the memorial, that "it might be recorded in future age as raised by the queen and people of a grateful country to the memory of its benefactor." Shortly after a committee was appointed to fulfil her majesty's desire. As a suitable block of granite could not be obtained, the proposal for an obelisk was given up. The queen approved of the design of Mr. Gilbert G. Scott

The sculptors employed were M'Dowell, Foley, Theed, John Bell, and Armistead: material, Sicilian marble. (Jan. 1865.) The glit statue by Foley uncovered 9 March 1876.

The memorial, complete, except the statue, by Foley (delayed through illness), was given up to her majesty privately, 1 July, 1872.

ATRIGENSES a name given to various porsons who opposed the doctrines and corruptions of the church of Rome, living at Albi, in Languedoc, and at Toulouse in the 12th century. They were persecuted as Manicheans, 1163, and a crusade (proclaimed by pope Innocent III.) against them commenced in 1207. Simon de Montfort commanded 500,000 men and at Bezieres, 1209, he and the pope's legate nut friends and fees to the sweet survey. legate put friends and foes to the sword, saying, "God will find his own!" * At Minerba he burnt 150 of the Albigenses alive; and at La Vaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering other women. He next defeated the count of Toulouse, but was himself killed in 1218. Louis VIII. and IX., kings of France, patronised the crusade; count Raymond was subdued, and abdicated in 1229;

ALBION. Britain is so called by Aristotle (died 322 B. C.). Julius Casar and others, are said to have given it the name (from albas, white) on account of its chalky chiffs.

ALBUERA OR ALBUHERA, Estremadura, Spain. Here a battle was fought between the French, commanded by marshal Soult, and the British and Anglo-Spanish army, under marshal, afterwards lord Beresford, 16 May, 1811. The allies obtained a brilliant victory. The French loss exceeded 8000 men previously to their retreat; but the allies lost a large number. The chief brunt of the action fell on the British; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had mounted a hill, fell,-out of the 57th regiment alone; the other regiments were scarcely better off, not one-third being left standing; "1500 unwounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill." Napier.

ALBUFERA (Spain, East Central), a lagoon, near which the French marshal Suchet (afterwards duke of Albufera) defeated the Spaniards under Blake, 4 Jan. 1812: this led to his capture of Valencia on o Jan.

ALCALA, Spain, near the Roman Complutum. At the university here was printed the Complutensian Polyglott bible, at the expense of cardinal Ximenes, 1502-15.

ALCANTARA, a town on the Tagus, W. Spain. A fine bridge was built here by Trajan about 104. The duke of Alva acquired Portugal for Spain by defeating the Portuguese army here, 24 June, 1580. The Spanish military order of knighthood of Alcantara was established in 1150. The sovereign of Spain has been grand master since 1495.

ALCAZAR-QUIVER, near Fez, N. W. Africa, where the Moors totally defeated the Portuguese, whose gallant king Sebastian was slain, 4 Aug. 1578. The Portuguese disbelieved his death and long expected his return; this led to the appearance of five impostors.

ALCHEMY, the forerunner of chemistry; its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an alkahest or universal men-struum, and the clixir of life.* The alchemists assert that their founder was Hermes Trismegistus (thrice greatest), an ancient Egyptian king .- Pliny says, the emperor Caligula was the first who prepared natural arsenie, in order to make gold of it, but left it off, because the charge exceeded tho profit.

Zosimus wrote on the subject about 410.

The Arabians cultivated alchemy and were followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, Raymond Lullius, Basil Valentine (born 1394), Paracelsus (died 1541), and others.

In 1404 the craft of multiplying gold and silver was made felony by 5 Hen. IV. c. 4, which act was repealed in 1689. A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1476. Rymer's Fad

ALCOHOL. Pure spirit of wine or hydrated alcohol is said to have been obtained by the distillation of fermented liquors by Abucasis in the 12th century; and the dehydration of this liquor to have been partially effected by Raymond Lullius in the 13th century by carbonate of potassium. Alcohol has never been reduced to the solid state, but becomes viscid at very low temperatures. In 1820, Faraday and Hennell obtained traces of alcohol by passing olefiant gas (bi-carburetted hydrogen) through sulphuric acid; and in 1862 this process was examined and confirmed by Berthelot; see Distillation, Spirits, Brandy, Gin, Rum. About 250 medical men, including the president of the Royal College of Physicians, and many hospital officials, issued a cautionary declaration concerning the use of alcohol in medicine, Dec. 1871.

ALCOLEA (Andalusia, S. Spain). Near the bridge a sharp engagement took place between the royalists under general Pavia y Lacy, marquis de Novaliches, and the insurgents under marshal Serrano, 27 Sept. 1868. The former was defeated, and, being severely wounded, surrendered 28 Sept. About 600 were killed on both sides.

AL-CORAN OR AL-KORAN, see Koran, Mahometanism, &c.

ALDERMAN. The Saxon carldorman was next to the king and frequently a viceroy; but after the settlement of the Danes the title was gradually displaced by that of carl. Aldermen in corporations are next in dignity to the mayor. They were appointed in London (where there are twenty-six) in 1242; and in Dublin (where there are twenty-four) in 1323. Aldermen chosen for life, instead of annually, 17 Rich. II. 1304. Present mode of election established, 11 Geo. I. 1725. Aldermen made justices of the peace, 15 Geo. II. 1741. London aldermen are elected by the wards In 1877 the

court of aldermen exercised their ancient right of veto against Sir John Bennett (thrice chosen alderman for the ward of Cheap), and chose Mr. Edgar Breffitt, 23 Oct. 1877.

ALDERNEY (English Channel), with Jersey, &c., was acquired by William the Conqueror, 1066. The "Race" is celebrated for two fatal occurrences; William of Normandy, son of Henry I. of England, and many young nobles (140 youths of the principal families of France and Britain), were overtaken by a storm, and all lost, 25 Nov. 1120. The British man-of-war Victory, of 100 guns and 1160 men, was wrecked here, 5 Oct. 1744; the admiral, sir John Balchen, and all his crew perished. Through this strait the French escaped after their defeat at La Hogue by admirals Russell and Rooke, 19 May, 1692. The construction of a breakwater, in order to make Alderney a naval station, was begun in 1852, and after having cost 1,337,100l., was suspended by parliament in 1871. In 1874 the harbour and lands were transferred from the control of the board of trade to that of the admiralty and the war department.

ALDERSHOT CAMP, on a moor near Farnham, about 35 miles from London. In April, 1854, the War office, having obtained a grant of 100,000%. purchased 4000 acres of land for a permanent camp for 20,000 men.

Additional land purchased in 1856. Barracks since erected for 4000 infantry, 1500 cavalry, and several batteries of artillery Great improvements m military cookery introduced (see Cookery) under the superintendence of captain John Grant, 1857.

ALE, BEER, and Wine are said to have been invented by Bacchus. Ale was known as a beverage at least in 404 B.C. Herodotus ascribes the tirst discovery of the art of brewing barley-wine to Isis, the wife of Osiris, and a beverage of this kind is mentioned by Xenophon, 401 n.c. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. Tacitus. Ale-houses are mentioned in the laws of Ina, king of Wessex. Booths were set up in England, 728, when laws were passed for their regulation. None but freemen were allowed to keep ale-houses in London, 13 Edw. I. 1285. They were further subjected to regulation by 5 & 6 Edw. VI. c. 25 (1551). By I James I. c. 9 (1003), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excise duty on ale and beer was imposed by the parliament in 1643, and continued by Charles II. (1660); repealed, t Will.IV. c. 51 (1830); see Porter, Wine, Victuallers.

ALEMANNI, or ALL MEN (i.e. men of all nations), hence Allemand, German. A body of Suevi, who took this name, were defeated by Caracalla, 214. After several repulses, they invaded the empire under Aurelian, who subdued them in three battles, 271. They were again vanquished by Julian. 356, 357; by Jovinus, 368. They were defeated and subjugated by Clovis at Tolbiac (or Zulpich), 496. The Suabians are their descendants.

ALEPPO, North Syria, a large town named Berau by Seleucus Nictator, about 299 B.C. The pachalic of Aleppo is one of the five governments of Syria. It was taken by the Saracens, A.D. 638, who restored its ancient name Haleb or Chaleb; by Saladin, 1193; and sacked by Timour, Nov. 1400. Its depopulation by the plague has been frequent; 60,000 persons were computed to have perished by it in 1797; many in 1827. The cholera raged here in 1832. Aleppo suffered severely from the terrible

carthquakes in 1822 and 1830; and has often been the scene of functical massacres. On 16 Oct. 1850, the Mahometans attacked the Christians, burning everything. Three churches were destroyed, five others plundered, and thousands of persons slain. The total loss of property amounted to about a nullion sterling; no interference was attempted by the nacha.

ALESSANDRIA, a city of Piedmont, built in 1108 under the name of Casar by the Milanese and Cremonese, to defend the Tanaro against the emperor, and afterwards named after pope Alexander III. It has been frequently besieged and taken. The French took it in 1796, but were driven out by Suwarrow, 21 July, 1799. They re-overed it after the battle of Marengo, 14 June, 1806, and held it till 1814, when the strong fortifications erected by Napoleon were destroyed. These have been restored since June, 1850.

ALEXANDER, ERA OF, deted from the death of Alexander the Great, 12 Nov. 323 B.C. In the computation of this era, the period of the Creation was considered to be 5502 years before the birth of Christ, and, in consequence, the year LAD. was equal to 5503. This computation continued to the year A.D. 283, which was called 5786. In the next year (A.D. 285), which should have been 5787, ten years were discarded, and the date became 5777. This is still used in the Abyssinian era (which see). The date is reduced to the Christian era by subtracting 5502 until the year 5780, and after that time by subtracting 5492.

ALEXANDRIAN SCHOOLS OF PHILO-SOPHY. The first school arose soon after the foundation of Alexandria, 332 B.C. It flourished under the patronage of the Ptolemies till about 100 B.C. It included Euclid (300), Archimedes (287-212), Apollonius (250), Hipparchus (150), and Hero (150). The second school arose about A.D. 140, and lasted till about 400. Its most eminent members were Ptolemy, the author of the Ptolemaic system (150), Diophantus the arithmetician (200), and Pappus the geometer (350).

Schunck showed that all the finest madder colours contained only alazarine combined with alkalies and fatty acids. The manufacture of alkalies, very extensive in Lanca-shire and Cheshure, are based on the decomposition of common salt (chloude of sodium), by a process invented by a Frenchman named Lo Blanc, about 1792.

ALLEGORY abounds in the Bible and in Homer—see Jacob's blessing upon his sons, Genesis xlix. (1689 B.C.), Psalm Ixxx, and all the prophets. Spenser's Facric Queene (1500) and Bunyan's Pd-grim's Progress (1678) are allegatics throughout. The Spectator (1711), by Addison, Steele, and others, abounds in allegories. The allegorical interpretation of the scriptures is said to have begun with Origen in the 3rd century; but see Gal. iv. 24.

theon at Rome, and established by pope Gregory IV. (about 830) for the commemoration of all those saints and martyrs in whose honour no particular day is assigned. The reformers of the English church, 1540, struck out of their calendar a great number of anniversaries, leaving only those which at their time were connected with popular feeling or tradition.

ALMA, a river in the Crimea, near which was fought a great battle on 20 Sept. 1854. (See Russo-Tarkish War and Crimea.) The English, French, and Turkish army (about 57,000 men) moved out of their first encampment in the Crimea on 19 Sept., and bivouacked for the night on the left bank of the Bulganac. The Russians (commanded by prince Menschikoff), mustering 40,000 infantry, had 180 field-pieces on the heights, and on the morning of 20 Sept. were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces under lord Raglan, consisted of 26,000 men; the French of 24,000, under marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river Alma was crossed, while prince Napoleon took possession of the village under the fire of the Russian batteries; and at 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 5000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men killed, and 73 officers and 1539 men wounded (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed, and 54 officers and 1033 men wounded. Total loss of the allies about 3400.

ALMACK'S ASSEMBLY-ROOMS, Kingstreet, St. James's, London, at first very exclusive, were creeted by a Scotchman named Almack, and opened 12 Feb. 1765. They are now termed Willis's rooms from the name of the present proprietors.

ALMANACS (from the Arabic al manah, to count). The Egyptians computed time by instruments; the Alexandrians had almanues, and log calendars are ancient. In the British Museum and universities are specimens of early almanacs. Michael Nostradamus the astrologer, wrote an almanac in the style of Merlin, 1556. Dufresnoy. Professor Augustus De Morgan's valuable "Book of Almanacs, with an index of reference, by which the almanac may be found for every year," was published in March, 1851. The Stationers' company claimed the exclusive right of publishing almanaes in virtue of letters patent from James I, granting the privilege to them and the two Universities: but the monopoly was broken up by a decision of the Court of Common Pleas in 1775. A bill

to renew the privilege was lost in 1779.

The Stump Daty on English almanes first imposed in 1710, was abolished in August, 1844; since when alma naes have become immunerable, being issued by trades men with their goods. Of Moore's (under the management of Henry Andrews, the able computer of the Northeal Lphemeris) at one time upwards of 430,000 copies were annually sold. The died in 1859. Of Foreign Almanaes, the principal are the "Windmanach de France," first published in 1999, and the "Almanach de Gotha," 1764.

ALMANZA (S. E. Spain). Here on 25 April (o. s. 14), 1707, the English, Dutch, and Portuguese forces under the carl of Galway, were totally defeated by the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II.). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

ALMEIDA (Portugal), a frontier town, captured by Massena, 27 Aug. 1810. The French entered Span, leaving a garrison at Almeida, blockaded by the English, 6 April, 1811. Almeida was retaken by Wellington (11 May), and Massena retired from Portugal.

ALMENARA, a village N. E. Spain, where on 28 July, 1710, an English and German army defeated the Spanish army supporting Philip V., the grandson of Louis XIV. of France. Stanhope, the English general, killed the Spanish general, Amezaga, in single conflict; an act almost unexampled in modern warfare.

ALMOHADES, Mahometan partisans, followers of Mohammed ben Abdalla, surnamed El-Mchedi, in Africa, about 1120. They subdued Morocco, 1145; entered Spain and took Seville, Cordova, and Granada, 1140-56; and founded a dynasty and ruled Spain till 1232, and Africa till 1278.

ALMONER, an office anciently allotted to a dignified clergyman who gave the first dish from the royal table to the poor, or an alms in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France was the highest ecclesiastical dignity in that kingdom before the revolution, 1789. Queen Victoria's almoner (Rev. Dr. Wellesley, dean of Windsor, appointed 28 May, 1870) or sub-almoner distributes the queen's gifts on Maundy Thursday (which see).

ALMORAVIDES, Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohades in 1147.

ALMSHOUSES for aged and infirm persons have been erected by many public companies and

benevolent individuals, particularly since the abolition of religious houses at the Reformation in the 16th century. A list of them, with useful information, will be found in "Low's Charities of London," 1862; frequently re-published.

Cornelius Van Dun founded the Red Lion almshouses, Westminster Emmanuel College, Westminster, founded by Lady Whittington's almshouses founded in 1621, were rebuilt near Highgate-hill by the Mercers' company . ALNEY, an island in the Severn. near Gloucester. Here a combat is asserted to have taken place between Edmund Ironside and Canate the Great, in sight of their armies, 1010. The latter was wounded, and proposed a division of the kingdom, the south part falling to Edmund. Edmund was murdered at Oxford shortly after, it is said by Edric Streon; and Canute obtained possession of the whole kingdom.

ALNWICK (Saxon Ealnwic), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesci. It has long belonged to the Percies. Malcolm, king of Scotland, besieged Alnwick, and he and his sons were killed 13 Nov. 1093. It was taken by David I. in 1136, and attempted in July, 1174 by William the Lion, who was defeated and taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparing expense.

ALPACA (or Paco), a species of the S. American quadruped, the Llama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory (covering 11 acres), with a town, park, almshouses, &c., for the workpeople, was creeted at Saltaire, near Shipley, Yorkshire, by Mr. (afterwards sir) Titus Salt in 1852. A statue of him at Bradford was unveiled 1 Aug. 1874. He died 29 Dec. 1876.

ALPHABET. Athotes, son of Menes, is said to have been the author of hieroglyphics, and to have written thus the history of the Egyptians, 2122 B.C. Blair. But Josephus affirms that he had seen inscriptions by Seth, the son of Adam: this is deemed fabulous.

The Egyptian alphabet is ascribed to Memnon 1822 B.C. The first letter of the Phoenician and Hebrew alphabet was aleph, called by the Greeks alpha, and abbreviated by the moderns to A. The Hebrew is supposed to be derived from the Phœnician.

derived from the Phenician.

Cadmus the founder of Cadmea, 1493 B.C., is said to have brought the Phenician letters (lifteen in number) into Greece, viz.—A, B, F, A, I, K, A, M, N, O, II, P, X, T, T. Those letters were originally either Hebrew, Phenician, or Assyrian characters, and changed gradually in form till they became the ground of the Roman letters, now used all over Europe. Palamedes of Argos invented the double characters, B, X, \$\phi\$, \$\frac{1}{2}\$, about 1224 B.C.; and Simonides added, Z, Y, H, \(\Omega\$, about 489 B.C. \) Armalelian Marbles.—When the E was introduced is not precisely known. The Greek alphabet introduced is not precisely known. The Greek alphabet

ALPHONSINE TABLES, astronomical tables, composed by Spanish and Arab astronomers, and collected in 1253 under the direction of Alphonso X. of Castile, surnamed the Wise, who is said to have expended upwards of 400,000 crowns in completing the work; he himself wrote the preface. The Spanish government ordered the work of Alphonso to be reprinted from the best MSS.; the publication begun in 1863.

Mont Cenis or Col de Frijus Tunnel -A tunnel, 71 miles long, through mount Cents, connecting Savoy and Piedmont, was proposed by M. Medail, and, after long lying dormant, was discussed and plans drawn up in 1348 The execution was prevented by the war of 1849.

The work of excavation was begun by king Victor

Emmanuel, 31 Aug 1857. The boring was at first effected by ordinary piercing machinery; steam power was carployed in 1860; and latterly compressed air.

Engineers-Grattoni, Grandis, and Sommeiller; the

boring was completed, 25 Dec. 1870. The total cost was about 2,600,000l. As the Italians had executed the work within the given time, the French

government bore the chief expense. The first experimental trip was made in 40 minutes, 13 Sept., and the tunnel was solemnly inaugurated by the passage of 22 carriages in 20 minutes, 17 Sept 1871; regular trains pass through, 16 Oct. 1871.

A railway for locomotives over mount Cenis was con-

structed upon Mr. Fell's plan in 1867 (see Railways), and opened for traffic, 15 June, 1868.

Alsace was re-conquered by the Germans, Aug.-Sept. 1870; and annexed to their empire, May, 1871; by law, 9 June, 1871. The Alsatians were permitted to choose their nationality, before 30 Sept. 1872. Many emigrated into France, with much regret.—Alsace-Lorrane was constituted a province of the German empire, having been ceded by France by the treaty of peace concluded 10 May, 1871, see Belfort. The province sends 15 members to the German parliament. Population of Alsace-Lorraine, 1875. 1,529,408.

ALSATIA, a name given to the precinct of Whitefriars, London, is described in Scott's "Fortunes of Nigel." Its privilege of sanctuary was abolished in 1997.

ALTAR. One was built by Noah, 2348 n.c. (Gen. viii. 20); others by Abraham, 1921 (Gen. vii. 3). Directions for making an altar are given, Exod. XX. 24, 1491 B.C. Altars were raised to Jupiter, in Greece, by Cecrops, 1556 B.C. He introduced among the Greeks the worship of the deities of Egypt. Herodotus. The term "altar" was applied to the Lord's table for the first three centuries after Christ (Heb. xiii. 10). Christian altars in churches were instituted by pope Sixtus I. A.D. 135; and were first consecrated by pope Sylvester. The Church of England terms the table on which the elements are placed an altar. Since the time of Elizabeth there has been much controversy on the subject, and the Puritans in the civil war destroyed many of the ancient stone altars, substituting wooden tables. In Jan. 1845 it was decided in the Arches Court that stone altars were not to be erected in English churches.

ALTENKIRCHEN (Prussia). The French, who had defeated the Austrians here, 4 June, 1796, were themselves defeated, and their general, Marceau killed, 19 Sept. following.

ALTONA (Holstein, N. Germany), acquired by the Danes, 1060, and made a city, 1604. It was occupied first by the German federal troops, 24 Dec. 1863, and then by the Prussians (the federal diet protesting) 12 Feb. 1864.

ALT-RANSTADT (Prussia), where the treaty of peace dictated by Charles XII. of Sweden, to Frederick Augustus of Poland, was signed, 24 Sept. 1706, O.S. Frederick, deposed in 1704, regained the throne of Poland after the defeat of Charles XII., in 1709.

ALUM, a salt is said to have been first discovered at Roccha, in Syria, about 1300; it was found in Tuscany about 1470; its manufacture was brought to perfection in England by sir T. Challoner, who established large alum works near Whitby in 1608; it was discovered in Ireland in 1757; and in Anglesey in 1790. Alum is used as a mordant in dyeing; to harden tallow, to whiten bread, and in the paper manufacture.

ALUMBAGH, a palace with other buildings near Lucknow, Oude, India, taken during the nutiny from the rebels, 23 Sept. 1857, and heroically defended by the British under sir James Outram. He defeated an attack of 30,000 sepoys on 12 Jan. 1858, and of 20,000 on 21 Feb., and was relieved by sir Colin Campbell in March.

ALUMINIUM, a metal, the base of the earth alumina, which is combined with silica in clay, and which was shown to be a distinct earth by Marggraff in 1754, having been previously confounded with lime. Oerstedt in 1826 obtained the chloride of aluminium; and in 1827 the metal itself was got from it by F. Wöhler, but was long a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste. - Claire

Deville, who in 1856 succeeded in procuring considerable quantities of this metal. It is very light (sp. g. 2·25), malleable, and sonorous; when pure does not rust, and is not acted on by sulphur or any acid except hydrochloric. In March, 1856, it was 3l, the ounce; in June, 1857, 11s, or 12s,, and it is now much cheaper (1873). The eagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, "De l'Aluminium," was published in 1859. An aluminium manufactory was established at Newcastle in 1800, by Messrs, Bell. They obtain the metal from a French mineral, bauxite. Their aluminium bronze, an alloy of copper and aluminium, invented by Dr. John Percy, F.R.S., was made into watch cases, &c., by Messrs, Reid of Newcastle, in 1862.

AMADIS OF GAUL, a Spanish or Portugueso romance, stated to have been written about 13,12 by Vasco de Lobeira. It was enlarged by De Montalvo, about 1485; and first printed (in Spanish) 1519; in French, 1540-56.

AMALEKITES (descendants of Amalek, grandson of Esau, brother of Jacob) attacked the Israelites, 1491–18.C., when perpetual war was denounced against them. They were subdued by Saul about 1079, by David, 1058 and 1056; and by the Simeonites about 715 B.C.

AMALFI, a city on the gulf of Salerno, Naples, in the 8th century became the seat of a republic, and flourished by its commerce till 1075, when it was taken by Roger Guiscard, and eventually incorporated with Naples. The Pisms, in their sack of the town in 1135, are said to have found a copy of the Pandects of Justinian, and thus to have induced the revival of the study of Roman law in Western Europe; the story is now doubted. Flavio Gioia, a native of Amali, is the reputed discoverer of the mariner's compass, about 1302.

AMATEUR MECHANICAL SOCIETY (89, Stamford Street), issued its first prospectus, i Jan. 1869.

AMAZON, West India mail steam slnp, left Southampton on her first voyage, Friday, 2 Jan. 1852, and on Sunday morning, Jan. 4, was destroyed by fire at sea, about 110 miles W.S.W. of Seilly (ascribed to the spontaneous ignition of combustible matter placed near the engine-room). Out of 161 persons on board, 102 persons must have perished by fire or drowning. 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galliot. Eliot Warburton, a distinguished writer in general literature, was among those lost.

AMAZON, a river (S. America), was discovered by Pinzon, in 1500, and explored by Francisco Orellana, in 1540. Coming from Peru, he sailed down the Amazon to the Atlantic, and observing companies of women in arms on its bank, he called the country Amazonia, and gave the name of Amazon to the river, previously called Marañon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambuscades by their enemies. Their widows formed a female state, and decreed that matrimony was a shameful servitude. Quintus Curtius. They were said to have been conquered by

Theseus, about 1231 n.c. The Amazons were constantly employed in wars; and that they might throw the javelin with more force, their right breasts were burned off, whence their name from the Greek, a, no, mazos, breast. Others derive the name from maza, the moon, which they are supposed to have worshipped. About 330 B.c. their queen, Thalestris, visited Alexander the Great, whilst he was pursuing his conquests in Asia, with three hundred females in her train. Herodotus.

AMBASSADORS. Accredited agents, and representatives from one court to another, are referred to early ages. In most countries they have great privileges; and in England, they and their servants are secured against arrest. England usually has twenty-five ambassadors or envoys extraordinary, and about thirty-six chief consuls, resident at foreign courts, exclusive of inferior agents; the ambassadors and other chief agents from abroad at the court of London in 1865, were 47; in 1868, 43; in 1872, 42; in 1878, 39.

The Russian ambassador's being imprisoned for debt by a lace-merchant, 27 July, 1708, led to the passing the statute of 7 Anne, for the protection of ambassadors,

Two men, convicted of arresting the servant of an ambassador, were sentenced to be conducted to the house of the ambassador, with a label on their breists, to ask his pardon, and then one of them to be imprisoned three months, and the other fined, 12 May, 1780.

The first ambassador from the United States of America to England, John Adams, presented to the king, 1 June, 1785; the first from Great Britain to America was Mr Hammond, in 17)1.

AMBER, a carbonaceous mineral,* principally found in the northern parts of Europe, of great repute in the world from the earliest time; esteemed as a medicine before the Christian era: Theophrastus wrote upon it; 300 B.C. Upwards of 150 tons of amber have been found in one year on the sands of the shore near Pillau. Phillips,

AMBLEF, near Cologne, Germany. Here Charles Martel defeated Chilperic II., and Ragenfroi, mayor of the Neustrians, 716.

AMBOISE (Central France). A conspiracy of the Huguenots against Francis II., Catherine de Medicis, and the Guises, was suppressed at this place in Jan. 1560. On 19 March, 1563, the Pacification of Amboise was published, granting toleration to the Huguenots. The civil war was however soon renewed.

AMBOYNA, chief of the Molucca isles, discovered about 1512 by the Portuguese, but not wholly occupied by them till 1580. It was taken by the Dutch in 1605. The English factors at this settlement were cruelly tortured and put to death, 17 Feb. 1623-4, by the Dutch, on an accusation of a conspiracy to expel them from the island, where the two nations jointly shared in the pepper trade of Java. Cromwell compelled the Dutch to give a sum of money to the descendants of the sufferers. Amboyna was seized by the English, 16 Feb. 1796, but was restored by the treaty of Amiens, in 1802. was again seized by the British, 17-19 Feb. 1810; and again restored at the peace of May, 1814.

* Much diversity of opinion still prevails among naturalists and chemists respecting the origin of amber. It is considered by Berzelius to have been a resin dis-solved in volatile oil. It often contains delicately-formed insects. Sir D. Brewster concludes it to be indurated vegetable juice. When rubbed it becomes electrical, and from its Greek name, elektron, the term Electricity is derived. derived.

AMBROSIAN CHANT, sec Chant, Liturgy,

AMEN, an ancient Hebrew word meaning true, faithful, certain, is used in the Jewish and Christian assemblies, at the conclusion of prayer: see I Cor. xiv., 16 (A.D. 59). It is translated "verily" in the Gospels.

AMENDE HONORABLE, in France, in the oth century, was a punishment inflicted on traitors and sacrilegious persons the offender was delivered to the hangman: his shirt was stripped off, a rope put round his neck, and a taper in his hand; he was then led into court, and was obliged to beg pardon of God and the country. Death or banishment sometimes followed. These words also denote a recantation in open court, or in presence of the injured person.

AMERCEMENT, in Law, a fine assessed for an offence done, or pecuniary punishment at the mirry of the court: thus differing from a fine directed and fixed by a statute. By Magna Charta, 1215, a freeman cannot be amerced for a small fault. but in proportion to the offence he has committed; the mode was determined by 9 Hen. III., 1225.

AMERICA,* the great Western Continent, is about 9000 miles long, with an area of about 13,668,000 square miles. It is now believed to have been visited by the Norsemen or Vikings in the 10th and 11th centuries; but the modern discovery is due to the sagacity and courage of the Genoese navigator, Christopher Columbus. †

The name is derived from Amerigo Vespucci, a Florentine merchant, who died in 1512—He accompanied Ojeda in his voyage on the eastern coast in 1498; and described in his voyage on the eastern coast in 1498; and described the country in letters sent to his friends in Italy. He is charged with presumptuously inserting "Tierra de Amergo" in his maps. Irving discusses the question in the Appendix to the Life of Columbus, but comes to no conclusion. Humboldt asserts that the name was given to the continent in the popular works of Waldscemuller, a German geographer, without the knowledge of Vespucci. To America we are indebted, among other things, for maize, the turkey, the potato, Peruvian bark, and

† Christophoro Columbo was born about 1445; first went to sea about 1460: settled at Lisbon in 1470, where he married Felipa, the daughter of Perestrello, au Italian unvigator; whereby he obtained much geographical knowledge. He is said to have laid the plans of his voyage of discovery before the republic of Genoa, in 1485, and other powers, and finally before the court of Spain, where at learth the amount of the court of Spain, where at length the queen Isabella became his patron. After undergoing much ingratitude and cruel persecution from his own followers and the Spanish court, he died on and to the control of the spanish court, he area on a 20 May, 1506; and was buried with much point at Valladolid. His remains were transferred, in 1513, to Seville; in 1536 to San Domingo; and in Jan. 1706 to the Havanna, Cuba. The original inscription on his tomb is said to have been: "A Castilla y & Leon Nuevo Mundo dió Colon." "To Castile and Leon Colon gave a New World." AMERICA, BRITISH, see British America.

AMERICA, CENTRAL, includes the republies of Guatemala, San Salvador, Honduras, Nicaragua, and Costa Rica (which see). They declared their independence, Sept. 21, 1821, and separated from the Mexican confederation, 21 July, 1823. The states made a treaty of union between themselves, 21 March, 1847. There has been among them since much anarchy and bloodshed, aggravated greatly by the irruption of American filibusters under Kenny and Walker, 1854-5. In Jan. 1863, a war began between Guatemala (afterwards joined by Nicaragua) and San Salvador (afterwards supported by Honduras). The latter were defeated at Santa Rosa, 16 June, and San Salvador was taken, 26 Oct.; the president of San Salvador, Barrios, fled; and Carrera, the dictator of Guatemala, became predominant over the confederacy.—Population, 1869, about 2,700,000; see Nicaragua, Durien, and Panama.

AMERICA, RUSSIAN, sold to the United States for about 400,000l., March, 1867. See Alaska.

AMERICA, South, see Brazil, Argentine, Peru, Paraguay, Uruguay, &c.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, resembling the British Association, held its first meeting at Philadelphia 20 Sept. 1868,

AMERICANISMS: a dictionary of these expressions was compiled by John R. Bartlett, and first published in 1848.

AMERICANISTS, a name assumed by some persons devoted to the study of the archwology, ethnology, &c., of North and South America, who held their first international congress at Nancy in July 1875.

AMERICAN ORGAN, a free-reed keyed wind instrument, resembling the harmonium, with important differences; the principle was discovered about 1835 by a workman employed by Alexandre of Paris. The invention was taken to America, where instruments were made by Mason and Hamlin, of Boston, about 1860.

AMETHYST, the ninth stone upon the breastplate of the Jewish high priest, 1491 B.C. It is of a rich violet colour. One worth 200 rix-dollars, having been rendered colourless, equalled a diamond in lustre, valued at 18,000 gold crowns. *De Boot.*— Amethysts discovered at Kerry, in Ireland, in 1775.

AMIENS, a city in Picardy (N. France); the cathedral was built in 1220. It was taken by the Spanish, 11 March, and retaken by the French, 25 Sept. 1597. The preliminary articles of the peace between Great Britain, Holland, France, and Spain, were signed in London by lord Hawkesbury and M. Otto, on the part of England and France, 1 Oct. 1801; and the definitive treaty was subscribed at Amiens, on 27 March, 1802, by the marquis of Cornwallis for England, Joseph Bonaparte for France, Azara for Spain, and Schimmelpenninck for Holland. War was declared again in 1803.—After a conflict, in which the French were defeated, 27 Nov. 1870, the German general, Von Goeben entered Amiens, 28 Nov.

AMMERGAU PASSION PLAY, see Drama.

AMMONIA, the volatile alkali, mainly produced by the decomposition of organic substances. Its name is ascribed to its having been procured from heated camels' dung near the temple of Jupiter Ammon in Libya. The discovery of its being a compound of nitrogen and hydrogen is ascribed to Joseph Priestley in 1774. By the recent labours of chemists both the oxide of the hypothetical metal ammonium, and ammonium amalgam, have been formed; and specimens of each were shown at the Royal Institution in 1856 by Dr. A. W. Hofmann, who has done very much for the chemical history of ammonia.

AMMONITES, descended from Ben-Anmi, the son of Lot (1897 n.c.), invaded Canaan and made the Israelites tributaries, but were defeated by Jephthah, 1143 n.c. They again invaded Canaan, intending to put out the right eye of all they subdued; but Saul overthrew them, 1095 n.c. They were afterwards many times vanquished; and Antiochus the Great took Rabbah their capital, and destroyed the walls, 198 n.c. Josephus.

AMNESTY (a general pardon after political disturbances, &c.) was granted by Thrasybulus, the Athenian patriot, after expelling the thirty tyrants, 403 n.c. Acts of amnesty were passed after the civil war in 1651, and after the two rebellions in England in 1715 and 1745.—After his victorious campaign in Italy, Napoleon III. of France granted an amnesty to all political offenders, 17 Aug. 1850. An amnesty, with certain exemptions, was granted to the vanquished southern states of North America by president Johnson, 29 May, 1865. An amnesty for political offences was granted by the emperor of Austria at his coronation as king of Hungary, SJune, 1867; a rather sweeping annesty bill was passed in the United States regarding the rebellion, 10 April, 1871. An amnesty association on behalf of the Fenians was active in Britain, Oct. 1873.

AMOAFUL, near Coomassie, West Africa. After a severe conflict, 31 Jan. 1874, the Ashantecs were defeated at this place by Sir Garnet Wolseley. Captain Buckle was killed, and about 20 officers and 200 men were wounded. The 42nd Highland Regiment was very energetic.

AMOY, see China, 1853-5.

AMPHICTYONIC COUNCIL, asserted traditionally to have been established at Thermopylæ by Amphictyon, for the management of all affairs relative to Greece. This celebrated council, composed of twelve of the wisest and most virtuous

men of various cities of Greece, began 1498 [1113, Clinton] B.C., and existed 31 B.C. Its immediate office was to attend to the temples and oracles of Delphi. Its calling on the Greek States to punish the Photians for plundering Delphi caused the Sacred wars, 595-586, and 356-346.

AMPHION, a British frigate, of 38 guns, blown up while riding at anchor in Plymouth Sound, and the whole of her crew then on board, consisting of more than two hundred and fifty persons, officers and men, perished, 22 Sept. 1796.

AMPHIPOLIS, Maccdon (N. Greece). A city founded here by the Athenians, 437 n.C.; was seized by Brasidas the Spartan, 424, both he and the Athenian general, Cleon, were killed in a fruitless attempt at the capture of the city by the Athenians, 422.

AMPHITHEATRES, round or oval buildings, said to have been first constructed by Curio, 76 B.C., and by Julius Casar, 46 B.C. In the Roman amphitheatres, the people witnessed the combats of gladiators with wild beasts, &c. They were generally built of wood, but Statilius Taurus made one of stone, under Augustus Casar; see Coliseum. The amphitheatre of Vespasian (capable of holding 87,000 persons) was built between A.D. 70 and 80; and is said to have been a fortress in 1312. The amphitheatre at Verona was next in size, and then that of Nismes.

AMPHITRITE, THE SHIP, see Wrecks, 30 Aug. 1833.

AMPUTATION, in surgery was greatly aided by the invention of the tourniquet by Morel, a French surgeon in 1674, and of the flap-method by Lowdham of Exeter in 1679.

AMSTERDAM (Holland). The castle of Amstel was commented in 1100; the building of the city in 1203. Its commerce was greatly increased by the decay of that of Antwerp after 1609. The exchange was built in 1634; and the noble stadthouse in 1648; the latter cost three millions of guilders, then a large sum. It was built upon 13,650 piles. Amsterdam surrendered to the king of Prussia, when that prince invaded Holland, in favour of the stadtholder, in 1787. The French were admitted without resistance, 18 Jan. 1795. The Dutch government was restored in Dec. 1813. A crystal palace for an industrial exhibition was opened by prince Frederick of the Netherlands, 16 Aug. 1864. The canul, from Amsterdam to the North Sea, was inaugurated by the king, 1 Nov. 1876. A new university was opened, Dec. 1877.

AMULETS OR CHARMS, employed from the earliest times. Amulets were made of the wood of the true cross, about 328.

AMYI., a chemical alcohol radical (first isolated by professor Edward Frankland in 1849.)

AMYLENE, a colourless, very mobile liquid, first procured by M. Balard of Paris in 1844, by distilling fusel oil (potato-spirit) with chlorde of zinc. The vapour was employed instead of chloroform first by Dr. Snow in 1856. It has since been tried in many hospitals here and in France. The odour is more unpleasant than chloroform, and more vapour must be used.

ANABAPTISTS, those who baptize at full age, and reject infant baptism; see *Baptists*. The name was first given to Thomas Münzer, Storck, and other fanatics who preached in Saxony in 1521, and excited a rebellion of the lower orders in Germany, which was quelled with bloodshed in 1525.

A similar insurrection took place in Westphalia, headed by Matthias, 1533, and, after his assassination, by John Boccold of Leyden, who was crowned "king of Sion" in Munster, 24 June, 1534. Munster was taken in June, 1535; and John was executed 13 Feb. 1536. Several anabaptists were executed in England in 1535, 1538, and 1540. On 6 Jan. 1661, about 80 anabaptists in London appeared in arms, headed by their preacher, Thomas Venner, a wine-cooper. They fought desperately, and killed many of the soldiers brought against them. Their leader and sixteen others were executed, 19 and 21 Jan. Annals of England.

ANACHORETS, see Manachism.

ANACREONTIC VERSE, of the bacchanalian strain, named after Anacreon of Teos, the Greek lyric poet, whose odes are much prized. He is said to have been choked by a grape-stone in his eighty-fifth year, about 514 B.C. His odes have been frequently translated; Thomas Moore's version was published in 1800.

ANÆSTHETICS, see Opium, Chloroform, Ether, Amylene, Kerosolene, Nitrous acid. Intense cold has been also employed in deadening pain.

ANADOLIA (Asia Minor), comprises the ancient Lycia, Caria, Lydia, Mysia, Bithynia, Paphlagonia and Phrygia (which see).

ANAGRAMS, formed by the transposition of the letters of a word or sentence (as army from Mary), are said to have been made by ancient Jews, Greeks, &c. On the question put by Pilate to Our Saviour, "Quid est veritas?" (what is truth?) we have the anagram, "Est vir qui adest" ("The man who is here"); from "Horatio Nelson," is "Honor est a Nilo" (Honour from the Nile").

ANATHEMA, the sentence of excommunication (1 Cor. xvi. 22), used by the early churches, 365; see Excommunication. Pope Pius IX. propounded a series of anathemas, Feb. 1870.

ANATOMY (Greek, cutting up). The human body was studied by Aristotle about 350 k.c., and became a branch of medical education under Hippocrates, about 420 k.c. Erasistratus and Herophilus first dissected the human form, having been previously confined to animals: it is said that they practised upon the bodies of living criminals, about 300 and 293 k.c. Galen, who died A.D. 193, was a great anatomist. In England, the schools were long supplied with bodies unlawfully exhumed from graves; and until 1832, the bodies of executed murderers were ordered for dissection.* Pope Boni-

By 32 Hen. VIII. c. 42 (1540), surgeons were granted four bodies of executed malefactors for "anathomyes," which privilege was extended in following reigns: but in consequence of the crimes committed by resurrectionmen in order to supply the surgical schools (robbing churchyards and even committing murder, see Bucking), a new statute was passed in 1832, which abated the ignominy of dissection by prohibiting that of executed murderers, and made provision for the wants of surgeons by permitting, under certain regulations, the dissection of persons dying in workhouses, &c. The act also appointed inspectors of anatomy, regulated the schools, and required persons practising anatomy to obtain a licence. It repealed the clauses of the act of 1828, which directed the dissection of the body of an executed number.

face VIII. forbade the dissection of dead bodies, 1297.—The first anatomical plates, designed by Titian, were employed by Vesalius, about 1538. Leonardo da Vinci, Raphael, and Michael Angelo, studied anatomy. The great discoveries of Harvey were made in 1616. William and John Hunter were great anatomists: William died 1783, and John, 1793. Quain's and Wilson's large anatomical plates were published 1842, and Bourgery's great work by Jacob, 1830-55. Comparative anatomy has been treated systematically in the present century by Cuvier, Owen, Müller, Huxley, and others.—The anatomy of plants has been studied since 1680; see Botann.

ANCHORITES, see Monachism.

ANCHORS were invented by the Tuscans. Pliny. The second tooth, or fluke, was added by Anacharisis the Seythian (502 n.c.). Strabo. Anchors said to have been forged in England A.D. 578. The Admiralty anchor was introduced about 1841. Improved anchors were made by Pering and Rodgers about 1828; by Porter, 1838; by Costell, 1848; by Trotman, 1853; and by several other persons. ANHALT, HOUSE OF, in Germany, deduces its origin from Berenthobaldus, who made war upon the Thuringians in the sixth century. In 1606, the principality was divided among the four sons of Joachim Ernest, by the eldest, John-George. Thus began the four branches — Anhalt-Dessau (descended from John-George); Zerbst, extinct, 1703; Plotsgau or Coethen, extinct, 1847; and Bernburg, extinct, 1863; (the last duke died without issue, 22 Aug. 1863.) ANILINE, an oily alkaline body, discovered in 1826 by Unverdorben among the products of distillation of indigo. From benzole (which see) Bechamp, in 1856, obtained it by successive treatment with concentrated nitric acid and reducing agents. The scientific relations of aniline have been carefully examined by several chemists, especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was not till 1856 that Mr. W. A. Perkin showed how a violet oxidation-product (mauve) could be applied in dyeing. Aniline is now manufactured on a large scale for the commercial production of "Mauve" and "Magenta" (rosaniline) (which see), and several other colouring matters, aniline blue, 1861; violet, 1863; "night" green, &c. After much litigation, the patent of Simpson, Maule, and Nicholson, for aniline colours, was anyulled by the house of levie at Table 2006. nulled by the house of lords, 27 July, 1866.

ANIMALCULES, Leeuwenhoek's remarkable microscopical discoveries were published in his "Arcana Nature," at Leyden, 1696. The great works of Ehrenberg of Berlin on the Infusorial Animalculæ, &c., were issued 1838-57. Pritchard's Infusoria, ed. 1861, is a valuable summary of our present knowledge of animalcules. The Rev. W. H. Dallinger and Dr. Drysdale, by their unwearied continuous microscopical observations of becteria and other low forms of life, have greatly increased our knowledge . 1873-8.

ANIMAL MAGNETISM (to cure diseases

by sympathetic affection) was introduced by father Hehl, a Jesuit, at Vienna, about 1774, and had its dupes in France and England about 1788-89. Hehl for a short time associated with Mesmer, but they soon quarrelled.—Mr. Perkins (who died in 1790) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism; but Drs. Falconer and Haygarth put an end to his pretensions by performing many wonders with a pair of wooden tractors. Brande. See Mesmerism. Animal magnetism disproved by commissions of the French Academy of Sciences, 1837-8; investigation closed as of a "dead letter," 1840.

ANIMALS, CRUELTY TO, Mr. Martin, M.P., as a senator, zealously laboured to repress it; and in 1824, the Royal Society for the Preven-tion of Cruelty to Animals was instituted. It opposed vivisection in 1860, in unison with a French society, and in Oct. 1873, offered premiums for improved trucks for conveying cattle. A jubilee congress of this and similar societies met in London 17 June, 1874. Convictions obtained by the society 1835 to June, 1876, 28,200. See *Vivisection*. Mr. Martin's act was passed 1822, and similar acts were passed in 1827, 1835, 1837, 1849, and 1854. Dogs were forbidden to be used for draught in 1839.

The antipodes of England lie to the south-east of New Zealand, near Antipodes Island.

The books were not in the Jewish canon, were rejected at the council of Laodicea about A.D. 366, but were re-ceived as canonical by the Roman Catholic church at the council of Trent on 8 April, 1546. Parts of the Apocrypha were admitted to be read as lessons by the church of England, by the 6th article, 1563. APOLLINARISTS, followers of Apollinaris, a reader in the church of Laodicea, who taught (366) that the divinity of Christ was instead of a soul to him; that his flesh was pre-existent to his appearance upon earth, and was sent down from heaven, and conveyed through the Virgin; that there were two sons, one born of God, the other of the Virgin, &c. These opinions were condemned by the council of Constantinople, 381.

APOLLO, the god of the fine arts, medicine, music, poetry, and eloquence, had many temples and statues, particularly in Greece and Italy. His most splendid temple at Delphi was built 1263 B.C.; see Delphi. APOLOGIES FOR CHRISTIANITY were addressed by Justin Martyr to the emperor Antoninus

^{*} Some ascribe the authorship to Cerinthus, the heretic, and others to John, the presbyter, of Ephesus. In the first centuries many churches disowned it, and in the 4th century it was excluded from the sacred canon by the council of Laodicca, but was again received by other councils, and confirmed by that of Trent, held in 1545, et seg. Although the book had been rejected by Luther, Michaelis and others and its authority, cuestioned in Michaelis, and others, and its authority questioned in all ages, from the time of Justin Martyr (who wrote his first Apology for Christians in A.D. 130), yet its canonical authority is still almost universally acknowledged.

Pius about 139, and to the Roman senate about 164. Other apologies were written by the early fathers of the Church.

APOSTLES (Greek, apostolas, one sent forth). Twelve were appointed by Christ, A.D. 31; viz. Simon Peter and Andrew (brothers), James and John (sons of Zebedee), Philip, Nathanael (or Bartholomew), Matthew (or Levi), Thomas, James the Less (son of Alpheus), Simon the Canaanite and Jude or Thaddeus (brothers), and Judas Iscariot. Matthias was elected in the room of Judas Iscariot, A.D. 32 (Alets i.); and Paul and Barnabas were appointed by the Holy Spirit, A.D. 45 (Alets xiii. 2).

APOSTLES' CREED, erroneously attributed to the apostles, is mentioned as the Roman creed by Rufinus, died about 410. Irenaws, bishop of Lyons, died 202, gives a creed resembling it. Its repetition in public worship was ordained in the Greek church at Antioch, and in the Roman church in the 11th century, whence it passed to the church of England.

APOSTOLICAL, see Canons and Fathers.

APOSTOLICI, a sect, at the end of the 2nd century, which renounced marriage, winc, flesh, &c. A second sect, founded by Sagarelli about 1261, wandered about, clothed in white, with long beard, dishevelled hair, and bare heads, accompanied by women called spiritual sisters, preaching against the growing corruption of the church of Rome, and predicting its downfall. They renounced baptism, the mass, purgatory, &c., and by their enemies were accused of gross licentiousness. Sagarelli was burnt alive at Panna in 1300, and his followers were dispersed in 1307, and extirpated about 1404.

APPEAL or Assize of Battle. By the old law of England, a man charged with murder might fight with the appellant, thereby to make proof of his guilt or innocence. In 1817, a young maid, Mary Ashford, was believed to have been violated and murdered by Abraham Thornton, who, on trial, was acquitted. In an appeal, he claimed his right by wager of battle, which the court allowed; but the appellant (the brother of the maid) refused the challenge, and the accused was discharged, 16 April, 1818. This law was struck off the statute-book, by 59 Geo. III. e, 46 (1810).

In 1631 lord Rea impeached Mr. David Ramsey of treason, and offered battle in proof; a commission

was appented, but the duel was prohibited by king James I.

APPEAIs. In the time of Alfred (869-901), appeals lay from courts of justice to the king in council; but being soon overwhelmed with appeals from all parts of England, he framed the body of laws which long served as the basis of English jurisprudence. The house of lords is the highest court of appeal in civil causes. Courts of appeal at the Exchequer Chamber, in error from the judgments of the superior and eminial courts, were regulated by statutes in 1830 and 1848. Appeals from English tribunals to the pope were first introduced about 1151, were long vainly opposed, and were abolished by Henry VIII. 1534; restored by Mary, 1554; again abolished by Elizabeth, 1550. A proposition for establishing an imperial count of appeal submitted to the house of lords by the lord chancellor Hatherley, 15 April; was referred to a select committee, 30 April, 1872. A similar proposition by lord chancellor Selbonne, 13 Feb. 1873. See Pricy Council, and Justices, Lord.

The jurisdiction of the House of Londs as a court of appeal was aboushed by the Judicature Act 1873. The abolition was suspended in 1875, and a provisional court established, which first sat 8 Nov 1875; present the Lord Chancellor, Lord Colendae, Baron Bramwell, and Justice Brett.

The House of Lords was reconstructed as a court of treal mead by the Actual Landschie Actualized.

The House of Lords was reconstructed as a court of hual appeal by the Appellate Jurisdiction Act introduced by Lord Carins, 11 Feb., and passed 11 Aug., 1886

APPIAN WAY, a Roman road, made by Appius Claudius Cacus, while censor, 312 B.C.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, fruiterer to Henry VIII., is said to have planted a great number of the orchards in Kent, and lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 78 varieties of apples in his day (1688). In 1866 there were 1500 varieties in the collection of the Royal Horticultural Society, many not worth cultivation.

APPORTIONMENT ACT (for rents) passed 1 Aug. 1870.

APPRAISERS. The valuation of goods for another was an early business in England; and so early as 1283, by the statute of merchants, or of Acton Burnel, "it was emacted that if they valued the goods of parties too high, the appraisers should take them at such price as they have limited." In 1845 their annual licence was raised from 10s. to 40s.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. Stow's Survey. The apprentice tax enacted 43 Goo. III. 1802. The term of seven years, not to expire till the apprentice was 24 years old, required by the statute of Elizabeth

(1563), was abolished in 1814 An act for the protection of apprentices, &c., was passed in 1851. The apprentices of London have been at times very riotous; they rose into insurrection against foreigners on Evil May-day (which see) 1 May, 1517.

APPROPRIATION CLAUSE, of the Irish Tithe Bill of 1835, brought forward by lord John Russell, whereby any surplus revenue that might accrue by the working of the act was to be appropriated for the education of all classes of the people. The principle was adopted by the commons, but rejected by the lords in 1835 and 1836, and was abandoned.

APPROPRIATIONS (property taken from the church), began in the time of William I. The parochial clergy, then commonly Saxons, were impoverished by the bishops and higher clergy (generally Normans) to enrich the monasteries possessed by the conqueror's friends. Where the tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV, complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. Lay appropriations began after the dissolution of the monasteries, 1536.

APRICOT, Prunus Armeniaca, from Asia Minor, said to have been first planted in England about 1540, by the gardener of Henry VIII.

After many changes of masters, it was absorbed into the kingdom of Naples, in 1265.

AQUARII, a sect said to have been founded by Tatian in the 2nd century, who forebore the use of wine even in the sacrament; during persecution they met secretly at night. For this they were censured by Cyprian (martyred, 258).

AQUARIUM or AQUAVIVARIUM, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as scavengers. In 1849, Mr. N. B. Ward succeeded in growing seaweeds in artificial sea-water; in 1850, Mr. R. Warister days the state of the same state. Warington demonstrated the conditions necessary for the growth of animals and plants in jars of water; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up by Mr. D. Mitchell. In 1854, Mr. Gosse published "The Aquarium." Mr. W. Alford Lloyd, late of Portlandroad, London, who by his enterprise in collecting specimens did much to increase the value and interest of aquaria, has been much employed in erecting aquaria. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860. He also constructed the accuarium at Hamburg. That also constructed the aquarium at Hamburg. at Brighton was inaugurated by prince Arthur, 30 March, and publicly opened by the mayor, to Aug.

1872. The great aquarium at the Crystal Palace was opened, Jan. 1872.

The Royal Aquarium and Summer and Winter Garden

The Royal Aquarium and Summer and Winter Garden Society was established 1874; the building at Westminster, planned by Mr. Wybrow and Mr A. Bedloriough, was opened by the duke of Edinburgh, 22 Jan. 1876. AQUATINT, see Engraving.

AQUEDUCT, an artificial watercourse on an inclined plane. Appins Claudius advised and constructed the first Roman aqueduct, as well as the Appian way, about 312 B.C.* There are now some remarkable aqueducts in Europe: that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Versalles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England (1007 feet in length, and 126 feet high) was completed by T. Tellord, and opened 26 Dec. 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830. An aqueduct to supply London with water from the Welsh lakes was proposed by Mr. J. F. Bateman in 1865.

Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a s, nod there in 381. In 452 Aquileia was almost totally destroyed by Attila the Hun, and near it in 480 Theodoric and the Ostrogoths totally defeated Odoacer, the king of Italy.

AQUITAINE, the Roman province Aquitania (S. W. France), conquered by the Romans 28 B.C.; by the Visigoths, A.D. 418; taken from them by Clovis in 507. Henry II. of England obtained it with his wife Eleanor, 1152. It was erected into a principality for Edward the Black Prince in 1302; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1418. The province was lost in the reign of Henry VI.

ARABIA (W. Asia). The terms Petraa (stony), Felix (happy), and Deserta are said to have been applied to its divisions by Ptolemy, about A. D. 140. The Arabs claim descent from Ishmael, the eldest son of Abraham, born 1910 B.C. Gen. xvi. Arabia

Arabia was conquered by the Ottomans 1518-39. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. The Koran was written in Arabic (622-632). The Bible was printed in Arabic in 1671. See Wahabees. The aggression of the Turks on the South Arabs excited jealousy in England, and was checked by the sultan, Nov. 1873.

ARABIAN NIGHTS' ENTERTAIN-MENTS (or 1001 Tales) were translated into French by Galland, and published in 1704; but their authenticity was not acknowledged till many years after. The best English translation from the Arabic is that of Mr. E. W. Lane, published in 1839, with valuable notes and beautiful illustrations.

ARAM, the ancient name of Syria (which see).

ARANJUEZ (Central Spain), contains a fine royal palace, at which several important treaties were concluded. It was ascended by Dr. Parrot, 27 Sept., 1829; by Major Stuart, 1856, and by others since. Mr. James Bryce, who ascended 11, 12 Sept., 1876, described the summit as a little plain of snow, silent and desolate, with a bright, green sky above; the view stern, green, and monotonous.

ARAUCANIA, a province in S. America. Its inhabitants maintained almost unceasing war with the Spaniards from 1537 to 1773, when their independence was recognised. They are now nominally subject to Chili.

ARBELA. The third and decisive battle between Alexander the Great and Darius Codomanus decided the fate of Persia, I Oct. 33I B.C., on a plain in Assyria, between Arbela and Gaugamela. The army of Darius consisted of 1,000,000 foot and

40,000 horse; the Macedonian army amounted to only 40,000 foot and 7000 horse. Arrian. The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory, amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. Plutarch.

Submissions to arbitration may be made rules of any court of law or equity, and arbitrators may compel the attendance of witnesses, 3 & 4 Will. IV. c. 42 (1833); see Ouzel Galley. The Common Law Procedure Act (1854) authorises the judges of superior courts to order compulsory arbitration; and, by an act passed in 1859, railway companies may settle disputes with each other by arbitration. The Arbitration (Masters and Workmen) Act was passed 6 Aug. 1872. See Prud'hommes.

ARBUTUS. The Arbutus Andrachne, oriental strawberry-tree, was brought to England from the Levant about 1724.

ARCADIA, in the centre of the Peloponnesus, Greece, named after Arcas, a king. The Arcadians regarded their nation as the most ancient of Greece, and older than the moon (Proseleni, which word Döderlein conjectures to mean Pre-Hellenic). Pelasgus is said to have taught them to feed on acorns, as being more nutritious than herbs, their former food; for which they honoured him as a god, 1521 B.C. Arcadia had twenty-five kings, whose history is altogether fabulous.

ARCH. It appears in early Egyptian and Assyrian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, con-

structed under the early kings, about 588 B.C. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention. *-The TRIUMPHAL arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks in London were erected about 1828. The Marble Arch, which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851) was modelled from the arch of Constantine; see Hyde Park.

ARCHÆOLOGY, the science of antiquities; see Antiquaries.

ARCHÆOPTERYX (ancient bird); the name given to the earliest known remains of a bird, found in the lithographic slate of Solenhofen, by Herman von Meyer and Dr. Haberlein in 1861. Its structure approximated more to that of a reptile than that of modern birds does. It was described by Owen in 1863.

ARCHANGEL (N. Russia), a city, is thus named from a monastery founded here, and dedicated to St. Michael in 1584. The passage to Archangel was discovered by the English navigator Richard Chancellor in 1553, and it was the only seaport of Russia till the formation of the docks at Cronstadt, and foundation of St. Petersburg in 1703. The dreadful fire here, by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1793.

ARCHBISHOP (Greek archiepiscopos), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople, who presided over the other metropolitans and bishops in the districts attached to those places. The word is first found in the Apology against the Arians by Athanasius, who died 373. The Eastern archbishops have since been styled patriarchs. Riddle.

Before the Saxons came to England, there were three archbishops: London, York, and Caerleon-upon-Usk; but soon after St. Augustin settled the metropolitan see at Canterbury, 602; see Canterbury

York continued archiepiscopal; but London and Caerleon lost the dignity; see 8t Ducud's.

The bishoprics in Scotland were under the jurisdiction of

the archbishop of York until the erection of the archiepiscopal sees of St. Andrew's and Glasgow in 1470 and 1491; these last were discontinued at the Revolution;

1491; these last were discontinued at the Revolution; see thissop and St. Andrews.
The bishop of Moray, &c., is now (1878) styled Primus.
The rank of archbishop was early in Ireland; see Ferns.
Four archbishops were constituted, Armagh, Cashel, Dublin, and Tuam; (until then the archbishop of Canterbury had jurisdiction over the Irish as well as English bishops, in like manner as the archbishop of York had invisible to over the proof Section 1. York had jurisdiction over those of Scotland), 1151.

chamberlain of the German empire by the golden bull of Charles IV. in 1356, and in that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France (418-986), and when their territories were divided, the archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and

ARCHDEACON, a name early given to the first or eldest deacon, who attended on the bishop without any power; but since the council of Nice, his function has become a dignity above a priest. The appointment in these countries is referred to the eighth century. There are seventy-five arch-deacons in England (1878). The archdeacon's court is the lowest in ecclesiastical polity; an appeal lies from it to the consistorial court, by 21 Henry VIII. (1532).

ARCHERY is ascribed to Apollo, who communicated it to the Cretans.

The long bow was six feet long, and the arrow three feet; the usual range from 300 to 500 yards. Robin Hood is said to have shot from 600 to 800 yards. The cross-bow was fixed to a stock, and discharged with a trigger.

ARCHES, COURT OF, the most ancient consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow (Sancta Maria de Arcubus), London, where it was formerly held, and whose top is raised on stone pillars built archwise. Cowell. Appeals from this court lie to the judicial committee of the privy council, by statute, 1832. The judge, Dr. Stephen Lushington, (appointed in 1828) resigned I July, 1867; succeeded by sir Robert J. Phillimore, who resigned, 1875. Lord Penzance then became judge in the court of arches.

ARCHONS. When royalty was abolished at Athens, in memory of king Codrus, killed in battle, 1044 or 1068 B.C., the executive government was vested in elective magistrates called archons, whose office continued for life. Medon, eldest son of Codrus, was the first archon. The office was limited to ten years, 752 B.C., and to one year 683 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshal Alvinzi, fought 14-17 Nov. 1796. The Austrians lost 18,000 men in killed, wounded, and prisoners, four flags and eighteen guns. The French lost about 15,000, and became masters of Italy. In one contest Bonaparte, in most imminent danger, was rescued by the impetuosity of his troops.

AREIOPAGUS or AREOPAGUS, a Greek tribunal, said to have heard causes in the dark, because the judges should be blind to all but facts, instituted at Athens about 1507 B.C.; also ascribed to Cecrops, 1556. The name is derived from the Greek Arcios pagos, the hill of Mars, through the tradition that Mars was the first who was tried there for the murder of Halirrhotius, who had violated his daughter Alcippe. The powers of this court were enlarged by Solon, about 594 B.C., and diminished by Pericles, 401 B.C. Paul preached on Mars' hill A.D. 52. (Acts xvii.)

AREOMETER or ARÆOMETER, (from Greek arasos, thin), an instrument for measuring the density and specific gravity of fluids. Baume described his arcometer in 1768. Others have been made by Nicholson and Mohr.

The new building was eventually converted into shops.

ARIAN or ARYAN (in Sanskrit signifying noble, warlike), a term now frequently applied to the hypothetical Indo-Germanic family of nations, including the Greek, Roman, and Teutonic races.

ARIANS, followers of Arius of Alexandria, who preached against the divinity of Christ, about 315, and died in 336. The controversy was taken up by Constantine, who presided at the council of Nice, June to Aug. 325, when the Arians were condemned; but their doctrine long prevailed. It was favoured by Constantius II. 341; and carried into Africa by the Vandals in the 5th century, and into Asia by the Goths. Servetus published his treatise against the Trinity, 1531, and was burnt, 1553. Leggatt, an Arian, was burnt at Smithtield in 1614; see Athanasian Creed, Socioians, and Unitarians.

ARISTOTELIAN PHILOSOPHY: the most comprehensive ever devised by man. Aristotle was born at Stageira (hence termed the Stageirite), 384 B.O.; was a pupil of Plato from 364 to 347; became preceptor of Alexander, son of Philip of Macedon, in 342; and died in 322. He flivided the circle of knowledge into metaphysics and logic, physics (including part of the science of mind), and ethics. His philosophy was too much exalted by the schoolmen during the middle ages, and too much depreciated after the Reformation. His works on natural science contain a vast collection of facts and an extraordinary mixture of sound and chimerical opinions. To him is attributed the assertion that nature abhors a vacuum, an opinion now maintained by eminent modern philosophers.

ARITHMETIC is said to have been introduced from Egypt into Greece by Thales, about 600 B.C. The Chinese used the abacus, or swanpan, at an early period. It is asserted that the ancient Hindus adopted a system having ten as a basis.

ARK. Mount Ararat (which sec) is venerated from a belief of its being the place on which Noah's Ark rested, after the universal deluge, 2349 n.c.; see Gen. vi. vii. Some assert Apanca, in Phrygia, to be the spot; and medals have been struck there with a chest on the waters, and the letters NOE, and two doves; this place is 300 miles west of Ararat. The Ark of the Covenant, made by Moses to contain the two tables of the law, 1491 n.c. (Exod. xxv.), was placed in Solomon's temple, 1004 b.c. (I Kings viii).

ARMAGH, N. Ireland, of which it was the metropolis from the 5th to the 9th century, the seat of the first ecclesiastical dignity in Ireland, founded by St. Patrick, its first bishop, about 441, and said to have built the first cathedral, 450. Six saints of the Roman calendar have been bishops of this sec. In the king's book, by an extent taken 15 James I., it is valued at 400% sterling a year; and until lately was estimated at 15,000%, per annum. The see was re-constituted (see Pallium) in 1151. Beatson.

Armagh was ravaged by the Danes on Easter-day,

852, and by O'Neil in 1564.

ARMAGNACS, a political party in France, followers of the duke of Orleans, murdered by the Burgundians, 23 Nov. 1407, derived their name from his father-in-law, the count of Armagnae. About 3500 of this party were massacred at Paris in June, 1418, by their opponents, the followers of the duke of Burgundy.

ARMED NEUTRALITY, the confederacy against England, formed by Russia, Sweden, and Denmark, 1780; ended, 1781; renewed, and a treaty ratified in order to cause their flags to be respected by the belligerent powers, 16 Dec. 1800. The principle that neutral flags protect neutral bottoms being contrary to the maritime system of England, the British cabinet remonstrated, war ensued, and Nelson and Parker destroyed the fleet of Deumark before Copenhagen, 2 April, 1801. This event and the murder of the emperor Paul of Russia led to the dissolution of the Armed Neutrality.

ARMENIA, Asia Minor. Here Noah is said to have resided when he left the ark, 2347 B.C. Armenia, after forming part of the Assyrian, Median, and Persian empires, became subject to the Greek kings of Syria, after the defeat of Antiochus the Great,

190 B.C. The Romans established the kingdoms of Armenia Major and Minor, but their influence over them was frequently interrupted by the aggressions of the Parthiaus. In all their political troubles the Armenians have maintained the profession of Christianity, and their church is governed by patriarchs, not subject to Rome. Since 1715 an Armenian convert has existed at Venice, where books on all subjects are printed in the Armenian language.

ARMENIAN ERA, commenced on 9 July, 552; the ecclesiastical year on 11 Aug. To reduce this last to our time, add 551 years and 221 days; and in leap years subtract one day from 1 March to 10 Aug. The Armenians used the old Julian style and months in their correspondence with Europeans.

ARMILLARY SPHERE, an astronomical instrument composed of bruss circles disposed in such a manner that the greater and lesser circles of the sphere may be seen in their natural position and motion. It is said to have been invented by Eratosthenes, about 255 B.C.; and was employed by Tycho Brahe and others.

ARMINIANS, or REMONSTRANTS, derive their former name from James Arminius (or Harmensen), a Protestant divine of Leyden, Holland (died 19 Oct. 1609); the latter name from his followers having presented a Remonstrance to the states-general in 1610. They separated from the Calvinists, objecting to their views respecting predestination, &c. Their doctrines were condemned

in 1619, at the synod of Dort (which see); they were exiled till 1625. The Calvinists were sometimes styled Gomarists, from Gomar, the chief opponent to Arminius. James I. and Charles I. favoured the Arminian dectrine.

ARMORIAL BEARINGS became hereditary in families at the close of the 12th century. They were employed by the crusaders, 1100. The lines to denote colours in arms, by their direction or intersection, were invented by Columbière in 1639. The armorial bearings of the English sovereigns are given under the article England. Armorial bearings were taxed in 1798, and again in 1808. The tax produced 64,515% in the year ending 31 March, 1808; 1872, 04,228%; 1876, 83,527%; 1878, 83,104%. The tax is now 2%. 2s.; if not on carriages, it is 1%. 1s. annually (1878). Sir Bernard Burke's "General Armory," 1878, contains the arms of above 65,000 British families.

ARMORICA, now Brittany, N. France, was conquered by Julius Cassar, 56 B.C. Many Gauls retired there and preserved the Celtic tongue, A.D. 584; see Brittany.

ARMOUR. That of Goliath is described (about 1063 B.C.) I Sam. xvii. 5. Skins and padded hides were early used, and brass and iron armour, in plates or scales, followed. The body armour of the Britons was skins of wild beasts, exchanged, after the Roman conquest, for the well-tanned leathern cuirass. Tacitus. Hengist is said to have had scale armour, A.D. 449.

The Norman armour formed breeches and jacket 1056
The hauberk had its hood of the same piece 1100
John wore a surtout over a hauberk of rings set edgeways
The heavy cavairy covered with a coat of mail.
Some horsemen had vizous and scull-caps, about 1216
Armour exceedingly splendid, about 1350
Armour of plate commenced 1407
Black armour, used not only for battle, but for mourning, Henry VI. consisted of a cuirass of steel, in the form of a pair of stays, about 1500
Armour cased to reach below the knees, Charles I. 1625
In the reign of Charles II. officers wore no other armour than a large gorget, which is commenorated in the dimunitive ornament known at the present day. Meyrick.

ARMOUR PLATES, see Iron, and Navy of England.

ARMS. The club was the first offensive weapon; then followed the mace, battle-axe, pike, spear, javelin, sword and dagger, bows and arrows. Pliny ascribes the invention of the sling to the Phennicians; see articles on the various weapons throughout the volume.

ARMS, see Armorial bearings, and Heraldry.

ARMS BILLS, for the repression of crime and insurrection in Ireland, were passed 1807, 1810. 1823, 1829, and 15 Oct. 1831. The guns registered under the last act at the close of the first year scarcely amounted to 3000, and the number was equally small of all other kinds of arms. The new Arms bill, passed 22 Aug. 1843, has been since renewed, but was not rigidly enforced till 1867.

ARMSTRONG GUN, see under Cannon.

ARMY. Ninus and Semiramis had armics amounting to nearly two millions of fighting men, 2017 n.c. The first guards and regular troops as a standing army were formed by Saul, 1093 B.C. Eusebius. The army of Xerxes invading Greece is said to have been 1,700,000 foot and 80,000 horse:

O Calo But tanding and a fembiol
480 B.c. One of the first standing armies of which
we have any account, is that of Philip of Macedon.
The army which Darius opposed to Alexander the
Great (332 B.c.) is set down as between 750,000 and
a million. The first standing army which existed
as such, in modern times, was maintained in France
by Charles VII, in 1445. The chief European
nations have had in their service the following
armies. Spain, 150,000 men; Great Britain, 310,000;
Prussia, 350,000; Turkey, 450,000; Austria, 500,000;
Russia, 500,000; and France, 1,000,000. Estimated
number in Europe in 1863, 6,000,000 soldiers,
1,000,000 horses, 11,000 guns. The European
powers are still increasing their armies.

ARMY, BRITISH, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1633 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1685 the army consisted of 7000 foot and 1700 cavalry. Standing armies were introduced by Charles I. in 1638; they were declared illegal in England, 31 Car. II. 1679; but one was then gradually forming, which was maintained by William III. 1689, when the Mutiny Act was passed. Grose's "History of the British Army" was published in 1801. See Regiments, Militia, and Volunteers.

ARMY OF OCCUPATION. By treaty, signed 20 Nov. 1815, the allied powers established the boundaries of France, and stipulated for the occupation of certain fortresses by foreign troops for three years. -The departure of the German army of occupation began about 20 Sept. 1871; completed 16 Sept. 1873.

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person standing mut-was declared convicted by an act passed 1772; but in 1827, the court was directed to enter a plea of "not guilty" in such cases; see Mute.

ARRAS (N. E. France), the country of the ancient Atrebates, the seat of a bishop since 390. Here a treaty was concluded between the king of France and duke of Burgundy, when the latter abandoned his alliance with England, 21 Sept. 1435. Another treaty was concluded by Maximilian of Austria with Louis XI. of France, whereby Burgundy and Artois were given to the dauphin as a marriage portion, 23 Dec. 1482. Velly. Arras was held by the Austrians from 1493 till 1640, when it was taken by Louis XIII.

ARRAY. On 23 Dec. 1324, Edward II. directed the bishop of Durham to make "arraier" his men of arms, horse and foot, and cause them to proceed' to Portsmouth; thence to proceed to the war in Gascony. Rymer's Fwdera. Hallam says that this was the earliest commission of array that he could find, and that the latest was dated 1557. The attempt of Charles I. to revive commissions of array in 1642, founded on a statute of Henry IV., was strenuously opposed as illegal.

ARSENIC, a steel-gray coloured brittle mineral, extremely poisonous, known in early times. Brandt, in 1733, made the first accurate experiments on its chemical nature. The heinous crimes committed by its means induced the legislature to enact regulations for its sale, 1851. In 1858 Dr. A. S. Taylor asserted that green paper-hangings and dresses prepared from arsenic are injurious to health; which is doubted by some chemists.

ARSON, punished with death by the Saxons, long remained a capital crime on the consolidation of the laws in 1827 and 1837. By the act of 1861 it is punishable by penal servitude for life and minor degrees of imprisonment. ARTESIAN WELLS (from Artesia, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water which has percolated from a higher level, and which rises to that level through the boring tube. The fountains in Trafalgar-square and government officer near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1841, after eight years of exertion, by M. Mulet at an expense of about 12,000%, and the well at Passy, which it is said will supply sufficient water for nearly 500,000 persons, was begun in 1855, and completed in 1860 by M. Kind. Messrs. Amos and Easton completed an Artesian well for the Horticultural Society's garden in 1862, which yielded 880,000 gallons of water, at the temperature of 81 Fahr., in twenty-four hours. The well at Kissingen was completed in 1850. Artesian wells are now common.

ARTICLES OF RELIGION. On 8 June, 1536, after much disputing, the English clergy in convo-cation published "Articles decreed by the king's highness" Henry VIII., who published in 1530 the "Statute of Six Articles," decreeing the acknowledgment of transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession. Offenders were punishable as heretics. In 1551 forty-two were prepared, and published in 1553. These were were prepared, and published in 1553. These were modified by the convocation, and reduced to THIRTY-MINE in Jan. 1563; and they received the royal authority and the authority of parliament in 1571. The Lambeth Articles, of a more Calvinistic character, proposed by archbishop Whitgift, were withdrawn in consequence of the displeasure of queen Elizabeth, 1595. One hundred and four Articles were drawn up for Ireland by archbishop Usher in 1614; but in 1635 the Irish church adopted the English articles. See Perth Articles. The 39 Articles were ordered to be removed from the studies at Oxford in Nov. 1871.

ARTICLES OF WAR were decreed in the time of Richard I. and John. Those made by Richard II. in 1385 appear in "Grose's Military Antiquities." The articles of war now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

ARTIFICERS AND MANUFACTURERS. Their affairs were severely regulated by the statutes

of labourers, 1349, 1350, 1360, 1540, and especially of 1562. They were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A fine of 100l., and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1736) and other statutes. The law was modified in 1824; see Artisans, Workmen, &c.

ARTILLERY, a term including properly all heavy missiles, now restricted to cannon. A small piece was contrived by Schwartz, a German cordelier, soon after the invention of gunpowder, in 1330. Artillery was used, it is said, by the Moors of Algesiras, in Spain, in 1343; and according to some historians, at the battle of Creey, in 1346, when Edward III. had four pieces of cannon. We had artillery at the siege of Calais, 1347. The Venetians employed artillery against the Genoese at sea, 1377. Voltaire. ASIA, the largest division of the globe, so called by the Greeks from the nymph Asia, daughter of Oceanus and Tethys, and wife of Japhet. Asia was the first quarter of the world peopled: here the law of God was first promulgated; here many of the greatest monarchies of the earth had their rise; and hence most of the arts and sciences have been derived. Its early history is derived from the Bible and from Herodotus, who relates the wars of Cresus, Cyrus, and others. See Jevs, China, India, Persia, Turkey, and the other countries.

ASIA MINOR, now ANATOLIA, comprised the Ionian colonics on the coast, the early scats of Greek civilisation, and the countries Mysia, Phrygia, Lycia, Bithynia, Caria, Lydia, Cappadocia, Galatia, &c., with the cities Troy, Ephesus, Smyrna (all which see). From the time of the rise of the Assyrian monarchy, about 2000 B.C., to that of the Turks under Osman, Asia Minor was the battle-field of the conquerors of the world.

The Austrian loss exceeded 20,000 men, and the French 30,000. Marshal Lannes, mortally wounded 22 May, died 31 May. The bridge of the Danube was destroyed, and Napoleon's retreat endangered; but the success of the Austrians was fruitless to them.

ASPHAIT, a solid bituminous substance, probably derived from decayed vegetable matter. It was used as a building material in ancient Babylon. Its application for this purpose was revived by Eirinus, a Greek physician, who discovered beds of it near Neufchatel in 1712. Asphalt stone was found at Seyssel near Geneva in 1802; and after several failures, count Sassenay brought it into use for pavement about 1832. The artificial asphalt obtained from gas-works began to be used as pavement about 1838. Claridge's patent asphalt was laid down in Trafalgar-square, Jan. 1804. Various kinds of asphalt pavement have been since laid on in London.

ASSAY OF GOLD AND SILVER, originated with the bishop of Salisbury, a royal treasurer in the reign of Henry I. Du Cange. But certainly some species of assay was practised as early as the Roman conquest. Assay early established in England was regulated by statutes, 1238, 1700, and 1705. Assay masters appointed at Newcastle, 1701; Sheffield and Birmingham, 1773. The laws respecting assay were amended in 1854 and 1855. The alloy of gold is silver and copper, that of silver is copper. Standard gold is 2 carats of alloy to 22 of fine gold. Standard silver is 18 dwts. of copper to 11 ozs. 2 dwts. of fine silver; see Goldsmiths' Company and Pyx.

This was Wellesley's first great battle, in which he opposed 50,000 with only 1500 men. The enemy fled, leaving their artillery, &c.

Two members were elected for each county. ASSESSED TAXES. The date of their introduction has been as variously stated as the taxes coming under this head have been defined-all coming under this head have been defined—all things have been assessed, from lands and houses to dogs and hair-powder. By some the date is referred to Ethelbert, in 991; to Henry VIII. 1522; and to William III. 1689, when a land-tax was imposed; see Land Tax. The assessed taxes yielded in 1815 (the last year of the war), evclusively of the land-tax, 6,524,766l., their highest amount. These imposts have varied in their nature and amount, according to the exigencies of the state. They were according to the exigencies of the state. They were considerably advanced in 1797 and 1801, et seq., but reduced in 1816, and in subsequent years. An act for the repeal of certain assessed taxes was passed 16 & 17 Vict. c. 90, 20 Aug. 1853, explained and amended by 17 & 18 Vict. c. 1, 17 Feb. 1854.—Acts for the better securing and accounting for the Assessed and Income Taxes, 10 Aug. 1854; see Taxes,

and Income Tax. Changes were made in the assessed taxes, their time of collection, &c., by the Revenue act, passed 24 June, 1869. Licences for servants, dogs, and armorial bearings were also introduced. An act to provide for uniformity in the assessment of rateable property in the metropolis was passed 9 Aug. 1869. The "Court of General received in the year ending 31 March, 1870, about 4,500,000/. Since then the assessed taxes include the land-tax and house duty only. Amount received, year 1871-2, about 2,330,000/.; 1874-5, 2,410,000/.; 1875-6, 2,490,000/.; 1876-7, 2,532,000/.; 1877-8, 2,670,000/.

ASSIENTO, a contract between the king of Spain and other powers, for furnishing the Spanish dominions in America with negro slaves, began with the Flemings. By the treaty of Utrecht, 13 July, 1713, the British government engaged to furnish 4800 negroes annually to Spanish America for thirty years. The contract was renewed in 1748, but given up in 1750; see Guinea.

ASSIGNATS, a forced paper currency, ordered by the National Assembly of France to support public redit during the revolution, April, 1790. At one period, eight milliards, or nearly 350 millions of pounds sterling, of this paper were in circulation in France and its dependencies. Allson. Assignats were superseded by mandats in 1790.

ASSIZE of BREAD, &c., see Bread, and Wool.

ASSIZE of JERUSALEM, a valuable code of laws compiled under the direction of Godfrey of Bouillon, king of Jerusalem, in 1100.

ASSIZE COURTS (from assideo, I sit) are very ancient in England, and in old law books are defined to be an assembly of knights and other substantial men, with the justice, to meet at a certain time and place: regulated by Magna Charta, 1215. The present justices of assize and Nisi Prius are derived from the statute of Westminster, 13 Edw. I. 1284. Coke; Blackstone. "The king doth will that no lord, or other of the country, shall sit upon the bench with the justices to take assize in their sessions in the counties of England, upon great forfeiture to the king." 20 Rich. II. 1396. Statutes, Brough Act. Assizes are general or special; general when the judges go their circuits, and special when a commission is issued to take cognisance of one or more causes; see Bloody Assize.

ASSUMPTION, FEAST OF THE, 15 Aug. It is observed by the church of Rome in honour of the Virgin Mary, said to have been taken up to heaven in her corporeal form, body and spirit, on this day, A.D. 45, in her 75th year. The festival was instituted in the 7th century, and enjoined by the council of Mentz, 813.

ASSURANCE, see Insurance.

ASSYRIA, an Asiatic country between Mesopotamia and Media, was the scat of the carliest recorded monarchy. Its history is mainly derived from Ctesias, an early Greek historian of doubtful authenticity, Herodotus, and the Holy Scriptures. The discovery by Mr. (aft. sir Austin) Layard of the Ninevite antiquities, now in the British Museum, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, air H. Rawlinson, and

other scholars, have drawn much attention to the Assyrians. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates they assign to events in Assyrian history.

It was much in vogue in Italy and France in the time of Catherine de Medicis (married to Francis I. of France, 1533). Hénault. It is said that Bede, 673-735, was addicted to it; and Roger Bacon, 1214-1292. Lord Burleigh is said to have calculated the nativity of Elizabeth, and she, and other princes, were dupes of Dee, the astrologer. It is stated that Lilly was consulted by Charles I. respecting his projected escape from Carisbrook castle in 1647. Ferguson. Astrological almanacs are still published in London.

ASTRONOMY. The earliest astronomical observations were made at Babylon it is said about 2234 B.C. The study was much advanced in Chaldeau under Nabonassar; was known to the Chinese about 1100 B.C.; some say many centuries before; see Eclipses, Planets, Comets, Sun, Moon, Jupiter, Venus, Saturn, Neptune, Mars, &c.

ASTURIAS (Oviedo, since 1833) N. W. Spain, an ancient principality. Here Polayo collected the Gothic fugitives, about 713, founded a new kingdom, and by his victories checked Moorish conquest. For his successors, see Spain. The heir-apparent of the monarchy has borne the title "prince of Asturias" since 1388, when it was assumed by Henry, son of John I. king of Leon, on his marriage with a descendant of Peter of Castile. In 1808, the junta of Asturias began the organised resistance to the French usurpation.

ASYLUMS, or PRIVILEGED PLACES, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. God commanded the Jews to build cities of refuge, 1451 B.C., Numbers xxv.—The posterity of Hereules are said to have built one at Athens, to protect themselves against such as their father had irritated. Cadmus is said to have built one at Thebes, 1490 B.C., and Romulus one at Mount Palatine, 751 B.C.; see Sanctuaries.

ATELIERS NATIONAUX (National Workshops), were established by the French previsional government in Feb. 1848. They interfered greatly with private trade, as about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the fearful conflicts in June following; and the system was abolished in July.

ATHANASIAN CREED. Athanasius, of Alexandria, was elected bishop, 326. He firmly opposed the doctrines of Arius (who denied Christ's divinity), was several times exiled, and died in 373.

Lumby, in "History of the Creeds" (1874), asserts that this creed, beginning "Quicunque vult," was not composed by Athanasius; that it is made up of two distinct parts, and was originally written in Latin and put into its present shape between 813 and 850; not connected with Athanasius's name by any trustworthy authority before 809; set forth first in Gaul, about 870; gradually extended into Italy, Britain, &c.; accepted by the Greek church about 1200.

This creed asserts the procession of the Holy Ghost from the Father and the Son, see Felloque. Dr. Waterland's Critical History of this creed published

Much agitation against the general use of this creed has arisen in the Church of England among both clergy and laity, 1870-73.

Modifications approved by several bishops were negatived by the lower house in convocation, (62-7) early in May, 1872. The vote was rejected by the bishops, and the agitation continued

In a letter to the carl of Shaftesbury, 22 July, 1872, the archbishops of Canterbury and York expressed their hope of devising a way for rendering the reading of the creed during public worship not compulsory

ATHEISM (from the Greek a, without, Theos, God, see Psalm xiv. 1). It was professed by Epicurus, Lucretius, and other philosophers. Spinoza was the defender of a similar doctrine (1632-1677). Lucilio Vanini publicly taught atheism in France, and was condemned to be burnt at Toulouse in 1619. Mathias Knutzen, of Holstein, openly professed atheism, and had upwards of a thousand disciples in Germany about 1674; he travelled to make proselytes, and his followers were called Conscience, because they held that there is no other deity than conscience. "Though a small draught of philosophy may lead a man into atheism, a deep draught will certainly bring him back again to the belief of a God." Lord Bacoa. Atheism was the ruling doctrine of the French republic, 1794 till 1804; see Materialism.

ATHENÆA were great festivals celebrated at Athens in honour of Minerva. One was called Panathenea, the other Chalcea; they are said to have been instituted by Erechtheus or Orpheus, 1397 or 1495 B.C.; and revived by Theseus, who caused them to be observed by all the Athenians, the first every fifth year, 1234 B.c. Plutarch.

ATHENÆUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. That of Rome, of great beauty, was erected by the emperor Adrian, 125.—The ATHENEUM CLUB of London was formed in 1823, for the association of persons of scientific and literary attainments, and artists, and noblemen and gentlemen, patrons of learning, &c., by the earl of Aberdeen, marquis of Lansdowne, Dr. T. Young, Moore, Davy, Scott, Mackintosh, Faraday, Croker, Chantrey, Lawrence, and others; the clubhouse was creeted in 1829-30 on the site of the late Carlton-palace; it is of Greeian architecture, and the frieze is an exact copy of the Panathenaic procession which formed the frieze of the Parthenon. -The Liverpool Athenæum was opened I Jan. 1799.—At Munchester, Bristol, and many other places, buildings under this name, and for a like purpose, have been founded .- The _1thencum, a weekly literary and scientific journal, first appeared in 1828. See Truals, 1875.

ATHENRY (Galway). Near here the Irish were totally defeated, and a gallant young chief, Feidlim O'Connor, slain 10 Aug. 1316.

ATHENS, the capital of ancient Attica, and of modern Greece. The first sovereign mentioned is Ogyges, who reigned in Bootia, and was master of Attica, then called Ionia. Tradition states that in his reign (about 1764 B.C.) a deluge laid waste the country, which so remained till the arrival of the Egyptian Cecrops and a colony, by whom the land was re-peopled, and twelve cities founded, 1556 B.C. The city, said to have been first called Cecronia.

was afterwards named Athens in honour of Minerva (Athene), her worship having been introduced by Erechtheus, 1383 B.C. Athens was ruled by seventeen successive kings (487 years), by thirteen perpetual archons (316 years), seven decennial archons (70 years), and lastly by annual archons (760 years). It attained great power, and no other city has had, in a short space of time, so great a number of illustrious citizens. The ancients called Athens Astu, the city, by eminence, and one of the eyes of Greece; see Greece.

ATMOLYSIS, a method of separating the constituent gases of a compound gas (such as atmospheric air) by causing it to pass through a vessel of porous material (such as graphite); first made known in Aug. 1863, by the discoverer, the late professor T. Graham, F.R.S., master of the mint.

ATMOSPHERE, see _lir.

ATMOSPHERIC RAILWAYS. The idea of producing metion by atmospheric pressure was conceived by Papin, the French engineer, about 1680. Experiments were made on a line of rail, laid down across Wormwood Scrubs, London, be-tween Shepherd's Bush and the Great Western railroad, to test the efficacy of atmospheric tubes, the working of the air-pump, and speed of carriages upon this new principle on railroads in June, 1840. and then tried for a short time on a line between Croydon and London, 1845. Atmospheric pressure was also tried and abandoned, in 1848, on the South Devon line. An atmospheric railway was commenced between Dalkey and Killiney, in the vicinity of Dublin, in Sept. 1843; opened 29 Merch, 1844; discontinued in 1855. A similar railway was proposed to be laid down in the streets of London by Mr. T. W. Rammell, in 1857. Mr. Rammell's Pneumatic Railway was put in action successfully at the Crystal Palace on 27 Aug. 1864, and following days. An act for a pneumatic railway between the Waterloo railway station and Whitehall was passed in July, 1865. Atmospheric pressure was proposed for a submarine rankway from Dover to Calais, in 1809; see Preumatic Desputch.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The somewhat incoherent labours of his predecessors (such as Wenzel, in 1777) were reduced by John Dalton to four laws of combining proportion, which have received the name of "Atomic Theory." His "Chemical Philosophy," containing the exposition of his views, appeared in 1808. Dr. C. Daubeny's work on the Atomic Theory was published in 1850. In his standard of Atomic weights Dalton takes hydrogen as I. Berzelius, who commenced his elaborate researches on the subject in 1848, adopts oxygen as 100. The former standard is used in this country, the latter on the continent. The theory is accepted by some, and rejected by other chemists. In 1855 Hinrichs propounded a new hypothetical science, Atomechanics, in which pantagen, composed of panatoms, is regarded as the primary chemical principle.

ATOMS. Democritus (about 400 n.c.) held that the only existing things are innumerable indestructible atoms, varying in form, and combined in obedience to mechanical laws, and that the soul consists of free, smooth, round atoms like those of fire; and that nothing happens by chance. His philosophy was adopted by Epicurus (about 306 h.c.), whose doctrines are luminously expounded by Lucretius in his great poem, "De Rerum Natura" (On the Nature of Things), 57 n.c. The atomic philosophy, in a modified form, was recognised by Gassendi, who died 1655 A.D.

ATTAINDER, ACTS OF, whereby a person not only forfeited his land, but his blood was at-

tainted, have been numerous. Two witnesses in cases of high treason are necessary where corruption of blood is incurred, unless the party accused shall confess, or stand mute, 7 & 8 Will. III. 1694-5. The attainder of lord Russell, who was beheaded in Lincoln's-inn-fields, 21 July, 1683, was reversed under William, in 1689. The rolls and records of the acts of attainder passed in the reign of James II. were cancelled and publicly burnt, 2 Oct. 1695. Amongst the last acts reversed was the attaint of the children of lord Edward Fitzgerald (who was implicated in the rebellion in Ireland of 1798), 1 July, 1819. In 1814 and 1833 the severity of at-tainders was mitigated. Several attainders reversed about 1827, and one in 1853 (the earl of Perth).

ATTICA, see Athens.

ATTILA, surnamed the "Scourge of God," and thus distinguished for his conquests and his crimes, having ravaged the eastern empire from 445 to 450, when he made peace with Theodosius. He invaded the western empire, 450, and was defeated by Actius at Châlons, 451; he then retired into Pannonia, where he died through the bursting of a blood vessel on his nuptials with Ildico, a beautiful virgin, 453.

ATTRACTION, described by Copernicus, about 1520, as an appetence or appetite which the Creator impressed upon all parts of matter; by Kepler as a corporeal affection tending to union, 1605. In 1687, sir I. Newton published his "Principia," containing his important researches on this subject. There are the attractions of Gravitation, Magnetism, and Electricity (which see). Dr. C. William and Electricity (which sec). Dr. C. William Siemens exhibited and described his attractionmeter at the Royal Society, 1876.

ATWOOD'S MACHINE, for proving the laws of accelerated motion by the falling of weights invented by George Atwood; described 1784: he died 11 July, 1807.

AUBAINE, a right of the French kings, which existed from the beginning of the monarchy, whereby they claimed the property of every stranger who died in their country, without having been naturalised, was abolished by the national assembly in 1790-91; re-established by Napoleon in 1804, and finally annulled 14 July, 1819.

AUBEROCHE, Guienne, S. France. The earl of Derby defeated the French, besieging this place, 19 Aug. 1344.

AUCKLAND, capital of New Zealand (north island), was founded Sept. 1840. The population of the district, in 1857, was estimated at 15,000 Europeans, and 35,000 natives. The seat of government was removed to Wellington on Cook's Strait, Dec. 1861.

AUCTION, a kind of sale known to the Romans, mentioned by Petronius Arbiter (about A.D. 66). The first in Britain was about 1700, by Elisha Yale, a governor of Fort George, now Madras, in the East Indies, who thus sold the goods he had brought home. Auction and sales tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. c. 15 (1845), the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of 101." In 1858 there were 4358 licences granted, producing 43,580%. The abuses at auctions, termed "knock-outs," caused by combinations of brokers and others, excited much attention in Sept. 1866. An act regulating sales of land by auction was passed 15 July, 1867. Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland.

AUDIANI, followers of Audieus of Mesopotamia, who, having been expelled from the Syrian church on account of his severely reproving the vices of the clergy, about 338, formed a sect and became its bishop. He was banished to Scythia, where he is said to have made many converts. His followers celebrated Easter at the time of the Jewish passover, attributed the human figure to the Deity, and had other peculiar tenets.

AUDIT-OFFICE, Somerset House. Commissioners for auditing the public accounts were appointed in 1785, and many statutes regulating their duties have since been enacted.

AUGHRIM, near Athlone, in Ireland, where on 12 July, 1601, a battle was fought between the Irish, headed by the French general St. Ruth, and the English under general Ginekel. The former were defeated and lost 7000 men; the latter lost only 600 killed and 960 wounded. St. Ruth was slain. This engagement proved decisively fatal to the interest of James II., and Ginckel was created carl of Athlone.

AUGMENTATION OF POOR LIVINGS' OFFICE, established in 1704. 5597 clerical livings, not exceeding 50l. per annum, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established.

AUGSBURG (Bavaria), originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diets of the empire have been held. In A.D. 952, a council confirmed the order for the celibacy of the priesthood. Augsburg has suffered much by war, having been frequently taken by siege,—in 788, 1703, 1704, and, last, by the French, 10 Oct. 1805, who restored it to Bavaria in March, 1806.

AUGURY. Husbandry was in part regulated by the coming or going of birds, long before the time of Hesiod. Three augurs, at Rome, with vestals and several orders of the priesthood, were formally constituted by Numa, about 710 B.C. The number increased, and was tifteen at the time of Sylla, 81. The college of augurs was abolished by Theodosius about A.D. 390.

AUGUST, the eighth Roman month of the year (previously called Scattles, or the sixth from March), by a decree of the senate received its present name in honour of Augustus Casar, in the year 8 B.C., because in this month he was created consul, had thrice triumphed in Rome, added Egypt to the Roman empire, and made an end of the civil wars. He added one day to the month, making it 31 days. The appearance of shooting stars on the 10th of Aug. was observed in the middle ages, when they were termed "St. Lawrence's tears." Their periodicity was noticed by Mr. Forster early in the present century.

AUGUSTAN ERA began 14 Feb. 27 B.C., or 727 years after the foundation of Rome.

AUGUSTIN or AUSTIN FRIARS, a religious AUGUSTIN of AUSTIA FIGURES, a lengious order, which ascribes its origin to St. Augustin, bishop of Hippo, who died 430. They first appeared about the 11th century, and the order was constituted by pope Alexander IV., 1256. The rule requires poverty, humility, and chastity. Martin Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans. The order appeared in England soon after the conquest, and had 32 houses at the suppression, 1536. One of their churches, at Austin Friars, London, erected 1354, and since the Performation used by Dutch protestants, was partially destroyed by fire, 22 Nov. 1862. It was restored, and reopened, I Oct. 1865. A religious house of the order, dedicated to St. Monica, mother of Augustin, was founded in Hoxton-square, London, 1864.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., in 1535 by 27 Hen. VIII. c. 27, in relation to cap. 28 being one of the two courts, the first called the Imperial Chamber civil and criminal, instituted at Worms, 1495, and afterwards held at Spires and Wetzler, and the other the Aulic council at Vienna, 1506. These courts having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURAY (N. W. France). Here, on 29 Sept. 1304, the English, under John Chandos, defeated the French and captured their leader Du Gueselin. Charles of Blois, made duke of Brittany by the king of France, was slain, and a peace was made in April, 1305.

AURICULAR CONFESSION. The confession of sin at the ear (Latin, aucis) of the priest was an early practice, since it is said to have been forbidden in the 4th century by Nectarius, archbishop of Constantinople. It was enjoined by the council of Lateran in 1215, and by the council of Trent in 1551. It was one of the six articles of faith enacted by our Henry VIII. in 1530, but was abolished in England at the Reformation. Its revival here has been attempted by the church party called Pusevites, Tractarians, or Ritualists.

The rev. Affied Poole, accurate of St. Barnabas, Karzhtsbudze, was suspended by his bushop from his office for practising auricular confession in June 1255, and the suspension was confirmed in Jan 1255. Much excite ment was created by a similar attempt by the rev. Temple West at Boyne Hill, in 85 pt. 1885.

In May, 1873, 484, clergymen of the Charch of England presented a pattorn to convocation for the coloration, selection, and heensing of duly qualified confessors, in accordance with the provisions of canon law. Louis le Gros was the first king who took this standard from the abbey to battle, 1124. Hénault. It appeared for the last time at Agincourt, 25 Oct. 1415. Tillet. Others say at Montlhery, 10 July, 1465.

AURORA FRIGATE, sailed from Britain in 1771, to the East Indies, and was never again heard of.

AURORÆ BOREALES AND AUSTRALES (Northern and Southern Polar Lights), though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March, 1716, an aurora borealis extended from the west of Ireland to the confines of Russia. The whole horizon lat. 57° N. was overspread with continuous haze of a dismal red during a whole night, Nov. 1705.—Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. The aurora is now attributed to the passage of electric light through the rarefied air of the polar regions. In August and September, 1859 (and about 24 Oct. 1870), when brilliant auroræ were very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroræ were seen at Rome and Basel, and also in Australia.

The killed and wounded exceeded 30,000 on the side of the allies, who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Presburg, signed 26 Dec. 1805; see Presburg.

AUSTRALASIA, the fifth great division of the world. This name, originally given it by De Brosses, includes Australia, Van Duemen's Land, New Guinea, New Zealand, New Britain, New Coledonia, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spannerds as early as 1526; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1606 explored a part of the coast of Papua or New Guinea. Torres, a Spaniard, passed through the straits which now bear his name, between that 1sl and and Australia, and gave the first correct report of the latter, 1606. The Dutch continued their discoveries. Grant in 1800, and Flinders again (1801-5) completed the survey. McCalloch.

*Gold Discovery. Mr Edward Hargraves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Comobolas, some thirty unless west of Bathurst. On his return home, he examined the soil, and after one or two months' digging, found a quantity of gold, 12 Feb. 1851. He applied to the colonnal government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places; and in the first week of July, 1851, and aboriginal inhabitant, formeily attached to the Wellington mission, and then in the service of Dr. Kerr, of Wallawa, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of quartz (from two to three hundred weight), found in the Murroo Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at 4000. The "Victoria nugget," a magnificent mass of virgin gold, weghing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb weight was also found. From the gold fields of Mount Alexander and Ballarat, in the district of Victoria, up to Oct 1853, there were found 2,532,422 ounces, or 105 tons to cwt of gold; and the gold exported up to the same date represented \$8,853,477, sterling. In Nov. 1856, the "James Baines" and "Lightning" brought gold from Melbourne valued as 1,200,000. The "Welcome nugget," weighed 2019 and 1861, gold to the value of 56,000,000. had been brought to England from New South Wales and Victoria.

AUSTRASIA, Estericah (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, 511, and ended by Carloman becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steamship, sailed from Southampton to New York 4 Sept. 1858, with 528 persons on board. On 13 Sept. in lat. 45° N., long. 41° 30′ W., it caught fire through the carelessness of some one in burning some tur to fumigate the steerage. Only 67 persons were saved—upwards of 60 by the Maurice, a French barque; the rest by a Norwegian barque. A heartrending account was given in the Times, 11 Oct. 1858, by Mr. Charles Brews, an English survivor.

AUSTRIA, Esterreich (Eastern Kingdom), anciently Noricum and part of Pannonia, was annexed to the Roman empire about 33; was overrun by the Huns, Avars, &c., during the 5th and 6th centuries, and taken from them by Charlemagne, 791-796. He divided the government of the country, establishing margraves of Eastern Bavaria and Austria. Louis the German, son of Louis le Débonnaire, about 817, subjugated Radbod, margrave of Austria; but in 883 the descendants of the latter raised a civil war in Bavaria against the emperor Charles the Fat, and eventually the margraves of Austria were declared immediate princes of the empire. In 1156 the margraviate was made an

AUTO DA FE (Act of faith), the term given to the punishment of a heretic, generally burning alive, inflicted by the Inquisition (which see).

AUTOMATON FIGURES (or An-DROIDES), made to imitate living actions, are of early invention. Archytas' flying dove was formed about 400 n.c. Friar Bacon is said to have made a brazen head which spoke, A.D. 1264. Albertus Magnus spent thirty years in making another. A coach and two horses, with a footman, a page, lady inside, were made by Camus for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1649. Vaucanson, in 1738, made an artificial duck, which performed many functions of a real one-eating, drinking, and quacking; and he also made a flute-player. The writing automaton, exhibited in 17(x), was a pentagraph worked by a confederate out of sight. The automaton chess-player, exhibited the same year, was also worked by a hidden person; so was the "invisible gurl," 1800. Maelzel made a trumpeter about 1809. Early in this century, an automaton was exhibited in London which pronounced several sentences with tolerable distinctness. The "anthropoglossus," an alleged talking-machine, exhibited at St. James's hall, London, July 1861. was proved to be a gross imposition. The exhibition of the talking-machine of professor Faber of Vienna, in London, began 27 Aug. 1870, at the Palais Royal, Argyll-street, W. The automatic chess-player at the Crystal Palace, 1873. Psycho, an automaton card-player, invented by J. N. Maskelyne and John Algernon Clarke, exhibited in London, Jan. 1875. An automaton hare was hunted at Hendon, near London, 9 Sept. 1876.

AUTOTYPOGRAPHY, a process of producing a metal plate from drawings, made known by Mr. Wallis, in April, 1863; it resembled Natureprinting (which see).

AVEBURY, or ABURY (Wiltshire). Here are the remains of the largest so-called Druidical work in this country. They have been surveyed work in this country. They have been surveyed by Aubrey, 1648; Dr. Stukeley, 1720; and sir R. C. Hoare, in 1812, and by others. Much information may be obtained from Stukeley's "Abury" (1743). and Hoare's "Ancient Wiltshire" (1812-21). Many theories have been put forth, but the object of these remains is still unknown. They are considered to have been set up during the "stone age, i.e., when weapons and implements were mainly formed of that material.

"AVE MARIA!" the salutation of the angel Gabriel to the Virgin (Luke i. 28), was made a formula of devotion by pope John XXI. about 1326. In the beginning of the 15th century Vincentius Ferrerius used it before his discourses. Bingham.

AVIGNON, a city, S. E. France, ceded by Philip III. to the pope in 1273. The papal seat was removed by Clement V. to Avignon, in 1309. In 1348 Clement VI. purchased the sovereignty from Jane, countess of Provence and queen of Naples. In 1408, the French, wearied of the schism, expelled Benediet XIII., and Avignon ceased to be the seat of the papacy. Here were held nine councils (1680-1457). Avignon was seized and restored several times by the French kings; the last time restored, 1773. It was claimed by the national assembly, 1791, and was confirmed to France by the congress of sovereigns in 1815. In Oct. 1791, horrible massacres took place here. See Popes, 1309-94.

AXE, WEDGE, LEVER, and various tools in common use, are said to have been invented by Dødalus, an artificer of Athens, to whom also is ascribed the invention of masts and sails for ships, 1240 B.C. Many tools are represented on the Egyptian monuments.

AYACUCHO (Peru). Here the Peruvians finally achieved their independence by defeating the Spaniards, 9 Dec. 1824.

AYDE, or AIDE, the tax paid by the vassal to the chief lord upon urgent occasions. In France and England an aide was due for knighting the king's eldest son. One was demanded by Philip the Fair, 1313. The aide due upon the birth of a prince, ordained by the statute of Westminster (Edward I.) 1285, was not to be levied until he was fifteen years of age, for the ease of the subject. The aide for the marriage of the king's eldest daughter could not be demanded in this country until her seventh year. In feudal tenures there was an aide for ransoming the chief lord; so when our Richard I. was kept a prisoner by the emperor of Germany, an aide of 20s., to redeem him, was enforced upon every knight's fee; see Benevolence.

AYLESBURY, Buckinghamshire, was reduced by the West Saxons in 571. St. O'Syth, beheaded by the pagans in Essex, was buried there, 600. William the conqueror invested his favourites with some of its lands, under the tenure of providing "straw for his bed-chambers; three cels for his use in winter; and in summer, straw, rushes, and two green geese thrice every year." Incorporated by charter in 1554.

AZOFF, SEA OF, the Palus Macotis of the ancients, communicates by the strait of Yenikale (the Bosporus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition, composed of British, French, and Turkish troops, commanded by sir G. Brown, arrived at Kertch, 24 May, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikalé, which also officred no resistance. On the same evening the allied fleet entered the Sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores was destroyed by the Russians to prevent them falling into the hands of the allies.

AZORES, or Western Isles (N. Atlantic), belonging to Portugal, the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by Vanderberg of Bruges, who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered and named Azores from the number of goshawks found on them. They were given by Alfonso V. to the duchess of Burgundy in 1466, and colonised by Flemings. They were subject to Spain 1580-1640. The isle Terceira, during the usurpation of dom Miguel, declared for Donna Maria, 1829, and a government was established at the capital Angra, 1830-33. A volcano at St. George's destroyed the town of Ursulina, May, 1808; and in 1811 a volcano appeared near St. Michael's, in the sea, where the water was eighty fathoms deep; an island then formed gradually disappeared. A destructive earthquake lasting 12 days, happened in St. Michael's, 1591.

BABEL, Tower of, built by Noah's posterity, 2247 B.C. (Genesis, ch. xi.) The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was defined after death. Blair. The Birs Nimroud, examined by Rich, Layard, and others, is considered by some persons to be the remains of the tower of Babel.

BABYLONIA, * an Asiatic empire (see Assuria), founded by Belus, supposed to be the Nimrod of Holy Writ, the son of Chus, and grandson of Ham, 2245 B.C. Lenglet.† Ninus of Assyria scized on Babylon, and established what was properly the Assyrian empire, by uniting the two sovereignties,

The city of Babylon was at one time the most magnificent in the world. The Henging timeless are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast aches ruised on other arches; and on the top were flat stones closely cemented together with plaster of bitmnen, and that covered with sheets of lead, upon which lay the mould of the garden, where there were large trees, shrubs, and flowers, with various sorts of vegetables. There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. Strabo: Diodones. Pliny said that in his time it was but a desolate wildenness. Mr. Rich visited the ruins in 1811, and sir R. Ker Porter in 1818. The laborious researches of Mr. Layard, sir H. Rawlinson, M. Botta, and others, and the interesting relies excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cunefform or wedge-like character have been translated, principally by col. (now sir Henry) Rawlinson, and published in the Journal of the Royal Asiatic Society. In the spring of 1855, he returned to England, bringing with him many valuable relies, drawings, &c., which are now in the British Museum. He gave discourses on the subject at the same place in 1877.

BABYNGTON'S CONSPIRACY, to assassinate queen Elizabeth, and make Mary of Scotland queen, was devised by John Savage, a soldier of Philip of Spain, and approved by Wm. Gifford and John Ballard, catholic priests. Anthony Baby ngton and others joined in the scheme. They were betrayed by Pooley Aspy, and fourteen were executed, 20, 21 Sept. 1880.

BABYSM, a new sect in Persia, founded in 1843 by Mirza Ali Mahomed, an enthusiast, at Shiraz. He termed himself the "Bāh," or "gate," of knowledge, and, giving a new exposition of the Koran, claimed to be the invarnate Holy Spirit. The destruction of himself and the greater number of his followers was due to Hossein, one of his disciples, combining political and warlike principles with their spiritual dogmas. The sect was tolerated by the shah Mohammed, but nearly exterminated by his successor in 1848-9. The Bāb himself was executed 15 July, 1849. The present head of the sect, still numerous, Beheyah Allah, imprisoned in a Turkish fortress, is said to be well conversant with the Bible, and to propound a doctrine based on it, termed "Bāb el Huk," gate of truth.

BACCHANALIA (games in honour of Bacchus) arose in Egypt, and were brought into Greece by Melampos, and called *Dionysia*, about 1415 B.C. Diodorus. In Rome the Bacchandlia were suppressed, 186 B.C. The priests of Bacchus were called Bacchanals.

The original committee included W. Sterndale Bennett, Sir G. Smart, J. Hullah, C. Potter, and other eminent musicians. The society was dissolved, 21 March, 1870, and the music given up to the Royal Academy of Music.

BACHELORS. The Roman censors frequently imposed fines on unmarried men; and men of full age were obliged to marry. The Spartan women at certain games laid hold of old bachelors, dragged them round their altars, and inflicted on them various marks of infamy and disgrace. Vossius. A tax laid upon bachelors in England, twenty-five years of age (varying from 12l. 10s. for a duke, to 1s. for a common person), lasted from 1695 to 1706. Bachelors (Romanist priests excepted) were subjected to an extra tax on their male and female servants in 1785.

BACKGAMMON. Palamedes of Greece is the reputed inventor of this game, about 1224 B.C. It is said to have been invented in Wales before its conquest. Henry.

BACTRIANA, a province in Asia, was subjugated by Cyrus and formed part of the Persian empire, when conquered by Alexander, 330 n.c. About 251 B.C., Theodotus or Diodotus, a Greek, threw off the yoke of the Scleucida, and became king. Eucratides I. reigned prosperously about 181 B.C., and Menander about 126 W.C. The Greek kingdom appears to have been broken up by the irruption of the Seythians shortly after.

BADAJOZ (S.W. Spain). An important barrier fortress, surrendered to the French, under Soult, 11 March, 1811; invested by the British, under lord Wellington, on 16 March, 1812, and stormed and taken on 6 April following. The French retreated in haste.

BAIL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1275) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated in later reigns. It is now accepted in all cases, except felony; and where a magistrate refuses bail, it may be granted by a judge. Acts respecting bail passed 1826 and 1852.

BAILIFF, or SHERIFF, said to be of Saxon origin. London had its shire-rere prior to the conquest, and this officer was generally appointed for counties in England in 1079. Hen. Cornehill and Rich, Reynere were appointed bailiffs or sheriffs in London in 1189. Store. Sheriffs were appointed in Dublin under the name of bailifts, in 1308; and the name was changed to sheriff in 1548. There are still places where the chief magistrate is called bailift, as the high bailift of Westminster. Bumbailiff is a corruption of bound-bailiff, every bailiff being obliged to enter into bonds of security for his good behaviour. Blackstone.

Peter Woulfe gave the first lecture in 1705. Latterly it has been the custom to nominate as the lecture a paper written by one of the fellows. Davy, Faraday, Tyndall, and other eminent men have given the lecture.

The passage, deemed impracticable, was completed by the Russians under Diebitsch, during the Russian and Turkish war, 26 July, 1829. An armistice was the consequence; and a treaty of peace was signed at Adrianople, 14 Sept. following. The Balkans were crossed by the Russians under Gourko, 13 July, 1877, see Russo-Turkish War II. By the treaty of Berlin, 13 July, 1878, the Balkans became the frontiers of the Sultan's European dominions.

BALLADS may be traced in the British history to the Anglo-Saxons. *Turner*. Adhelme, who died 709, is mentioned as the first who introduced ballads into England. "The harp was sent round, and those might sing who could." Bede. Alfred sung Malmesbury. Canute composed one. Minstrels were protected by a charter of ballads. Edward IV.; but by a statute of Elizabeth they were made punishable among rogues and vaga-bonds, and sturdy beggars. Viner. "Give me the writing of the ballads, and you may make the laws." Fletcher of Sattoun. The sea-ballads of Dibdin were very popular in the French war; he died 20 Jan. 1833.

BALLOONS.* A just idea of the principle of the construction of balloons was formed by Albert of Saxony, an Augustine monk in the 14th century, and adopted by a Portuguese Jesuit, Francesco Mendoza, who died at Lyons in 1626. The idea is also attributed to Bartolomeo de Guzmao, who died in 1724. The principles of aeronautics include:—
1, the power of a balloon to rise in the air; 2, the velocity of its ascent; and 3, the stability of its suspension at any given height. The application of sails and rudders has been duly considered, and judged to be futile; but in 1872 Helmholtz thought they might be steered, if moving slowly. Fatal accidents to the voyagers have been estimated at 2 or 3 per cent. The Aeronautical Society of Great Britain, founded with the object of fostering and developing aeronautics and aerology, by the duke of Argyll, Mr. James Glaisher, sir Charles Bright, and others, 12 Jan. 1866.

BANISHMENT, an ancient punishment. By 39 Eliz. c. 4 (1597) dangerous rogues were to be banished out of the realm, and to be liable to death if they returned; see *Transportation*.

BANK. The name is derived from banco, a bench, creeted in the market-place for the exchange of money. The first was established in Italy, 808, by the Lombard Jews, of whom some settled in Lombard-street, London, where many bankers still reside. The Mint in the Tower of London was anciently the depository for merchants' cash, until Charles I. laid his hands upon the money and destroyed the credit of the Mint in 1640. The traders were thus driven to some other place of security for their gold, which, when kept at home, their apprentices frequently absconded with to the army. In 1645, therefore, they consented to lodge it with the goldsmiths in Lombard-street, who were provided with strong chests for their own valuable wares; this became the origin of banking in England; see Bank of England; Bankers' Books; Drafts; Savings Banks.

BANK of England was projected by William Paterson, a Scotch merchant (see Davien), to meet the difficulty experienced by William III. in raising the supplies for the war against France. By the influence of Paterson and Michael Godfrey, 40 merchants subscribed 500,000l. towards the sum of 1,200,000l. to be lent to the government at 8 per cent., in consideration of the subscribers being incorporated as a bank. The scheme was violently opposed in parliament, but the bill obtained the royal assent 25 April, 1694, and the charter was granted 27 July following, appointing sir John Houblon the first governor, and Michael Godfrey the first deputy-governor. The bank commenced active operations on 1 Jan. 1695, at Grocers' Hall, Poultry,† issuing notes for 20l. and upwards, and discounting bills for 4½ to 6 per cent. The charter was renewed in 1697, 1708, 1713, 1716, 1721, 1742, 1746, 1749, 1764, 1781, 1800, 1808, 1816, 1833, 1844. Lauxon.

It now occupies the site of the church, and nearly all the parish of St. Christopher-le-Stocks. The churchyard is now termed "the garden."

BANK OF IRELAND. On 9 Dec. 1721, the Irish house of commons rejected a bill for establishing a national bank. Important failures in Irish banks occurred in 1727, 1733, and 1758: this led gradually to the establishment of the Bank of Ireland at St. Mary's abbey, Dublin, I June, 1783. The business was removed to the late parliament house, in College-green, in May, 1808. Branch banks of this establishment have been formed in most of the provincial towns in Ireland, all since 1828. Irish Banking Act passed, 21 July, 1845.

BANKS, JOINT STOCK. Since the act of 1826, a number of these banks have been established. In 1840, the amount of paper currency issued by joint-stock banks amounted to 4,178,6181; the amount in circulation by private banks, same year, was 6,973,613l.—the total amount exceeding eleven millions.* In Ireland similar banks have

* The Royal British Bank was established in 1849, by Mr. John McGregor, M.P., and others, under six R. Peel's joint-stock banking-act, 7 & 8 Vict. c. 113 (1844); as an attempt to introduce the Scotch banking system of cash credits into England. On 3 Sept. 1856, it stopped payment, occasioning much distress and rum to many small tradesmen and others. In consequence of strong evidence of the existence of fraud in the management of the bank, elicited during the examination before the court of bankruptcy, the government instructed the attorney-general to file ex-oficio informations against the manager, Mr. H. Innes Cameron, and several of the directors. They were convicted 27 Feb. 1858, after 13 days trial, and sentenced to various degrees of imprisonment. Attempts to mitigate the punishment failed (May, 1858); but all were released except Cameron and Esdaile, in July, 1858. In April, 1860, dividends had been paid to the amount of 15s. in the pound. The attorney-general brought in a bill called the Fraudulent Trustees' Act, 20 & 21 Vict. c. 54, to prevent the recur-

The note-circulation of joint-stock banks, on 1 Oct. 1855, was, in England, 3,990,8001.; in Scotland, 4,280,0001.; and in Ireland, 6,785,0001.; total, with English private banks, about 19,000,0001.; and with the bank of England, above 39,000,0001.

BANKRUPT (signifying either bank or bench broken), a trader declared to be unable to pay his just debts. The laws on the subject (1543, 1571 et seq.) were consolidated and amended in 1825, 1849, 1852, 1854, 1861, 1868, and 1869. See Debtors.

Lord Chancellor Thurlow refused a bankrupt his certificate, because he had lost five pounds at one time in gaming. 17 July, 1788 Enacted that members of the house of commons becoming bankrupt, and not paying their debts in full, should vacate their seats. 1812 New Bankruptey Court creted by 2 Will. Mr. George Pullinger, a cashier, confessed himself guilty of forgery and fraud, and was sentenced to 20 years' imprisonment.—On 18 Feb. 1861, it was discovered that John Durden, a clerk of the 'ommercial Rank of London, had robbed his employers of 67,000/., of which 46,000. might be recovered.—In Dec. 1864, J. W. Terry and Thomas Burch, manager and secretary of the Unity Bank, were committed on a charge of conspiracy for fabricating accounts; but acquitted on their trial.

By the Bankruptcy Act passed 5 Aug. 1869, a new bankruptcy count was established in place of the commissioners', which sat last time, when above 300 petitions of bankruptcy were received, 31 Dec. 1869. The new judge, the hon James Baron, sat Jan. Justice Giffard, the judge of the Bankruptcy Appeal Court, decided (in the case of the duke of Newcastle) that a peer can be made a bankrupt, Nov. 1869, which decision was affirmed on appeal to the house of fords in the following year; other petitions against peers have been filled. BANNATYNE CLUB, named after George Bannatyne (the publisher), was established in 1823 by sir Walter Scott and others, for printing works illustrative of the history, antiquities, and literature of Scotland, of which about 113 volumes were issued: dissolved, 1860.

BANNERET, KNIGHT, a dignity between baron and knight, anciently conferred by the king under the royal standard on the field of battle. Its origin is of uncertain time: Edmondson dates it 736; but it was probably created by Edward I. John Chandos is said to have been made a hunneret by the Black Prince and the king of Castile at Najara, 3 April, 1367. The dignity was conferred on John Smith, who rescued the royal standard at Edgehill fight, 23 Oct. 1642. It fell into disuse, but was revived by George III. for sir William Erskine, in 1764, and for admiral Pye and captains Knight, Bickerton, and Vernon, in 1773.

BANNERS were common to all nations. The Jewish tribes had standards or banners—Num. ii. (1491 n.c.) The standard of Constantine bore the inscription, In hoe signo vinces—"By this sign thou shalt conquer," under the figure of the cross. See Cross. The magical banner of the Danes (said to have been a black raven on a red ground) was taken by

Alfred when he defeated Hubba, 878. St. Martin's cap, and afterwards the celebrated aurillanma, or oriflamme, were the standards of France about 1100; see Auriflamma, Standards, &c.

BANNOCKBURN (Stirlingshire), the site of two battles: (1) between Robert Bruce of Scotland and Edward II. of England, 24 June, 1314. The army of Bruce consisted of 30,000; that of Edward of 100,000 men, of whom 52,000 were archers. The English crossed a rivulet to the attack, and Bruce having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete: the English king narrowly escaped, and 50,000 were killed or taken prisoners. (2) At Sauchieburn, near here, James III. was defeated and slain on 11 June, 1488, by his rebellious nobles.

BANNS, in the feudal law, were a solemn proclamation of any kind: hence arose the present custom of asking banns, or giving notice before marriage; said to have been introduced into the English church about 1200. The proper time of publishing banns in the church was the subject of much discussion in 1867.

BANQUETING-HOUSE, Whitehall, London, built by Inigo Jones, about 1619.

BANTAM (Java). Here a British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683. Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814.

BANTINGISM, see Corpulence.

BANTRY BAY (S. Ireland), where a French fleet, bringing succour to the adherents of James II., attacked the English under admiral Herbert, I May, 1689: the latter retired to form in line and were not pursued. A French squadron of seven suil of the line and two frigates, armed we fleet, and seventeen transports, anchored here for a few days, without effect, Dec. 1796. MUTINY of the Bantry Bay squadron under admiral Mitchell was in Dec. 1801. In Jan. 1802, twenty-two of the mutineers were tried on board the Gladiator, at Portsmouth, when seventeen were condemned to death, of whom eleven were executed; the others were sentenced to receive each 200 lashes. The executions took place on board the Majestic, Centaur, Formidable, Téméraire, and L'Achille, 8 to 18 Jan. 1802.

BAPAUME, N. FRANCE, the site of severe indecisive engagements between the French army of the north under Faidherbe, and the Germans under Manteuffel; the French retreated, 2, 3 Jan. 1871.

BAPTISM, the ordinance of admission into the church, practised by all Christian sects except Quakers. John the Baptist baptized Christ, 30. (Matt. iii.) Infant baptism is mentioned by Iremeus about 97. In the reign of Constantine, 319, baptisteries were built and baptism was performed by dipping the person all over. In the west sprinkling was adopted. Much controversy has arisen since 1831 (particularly in 1849 and 1850), in the church of England, respecting baptismal regeneration, which the Arches' Court of Canterbury decided to be a doctrine of the church of England. See Trials, 1849, and note. Demanding fees for baptisms was made unlawful by an act passed 18 July, 1872.

^{&#}x27;According to a return to parliament made at the close of Feb. 1826, there had become bankrupt in the four months preceding, 50 banking-houses, comprising 144 partners; and 20 other banking establishments had been declared insolvent. Every succeeding week continued to add from seventy to a hundred merchants, traders, and manufacturers to the bankrupt list. This was the period of bubble speculation, and of unprecedented commercial embarrassment and ruin.

BAPTISTS (see Anabaptists). A sect distinguished by their opinions respecting (1) the proper subjects, and (2) the proper mode of baptism: the former they affirm to be those who are able to make a profession of faith; the latter to be total immersion. There are seven sections of Baptists—Arminian, Calvinistic (or Particular), &c. The first Baptist church formed in London was about 1608. They published their confession of faith in 1643; revised in 1689. In 1851 they had 130 chapels in London and 2789 (with sittings for 524,353 persons) in England and Wales. Rhode Island, America, was settled by Baptists in 1635.

Baptist College, Regent's Park, founded 1810 Mr. C. H. Spurgeon's great Baptist tabernacle, Newington Butts, opened 1912 1813 A Baptist Pastors' College near it, founded by Mr. Spurgeon 14 Oct. 1873

BAR SUR AUBE, N. E. France. Here the French, under Oudinot and Macdonald, were defeated by the allies, 27 Feb. 1814.

BARBADOES, a West India Island, one of the Windward isles discovered by the Portuguese about 1600, taken possession of by the English 1605, and settled by sir Wm. Courteen, who founded Jamestown, 1625. As many royalists settled here, the island was taken by the parliamentarians in 1652. Population, 1876, 162,042: white, 16,560; coloured, 145,482.

BARBARY, in N. Africa, considered to comprise Algeria, Morocco, Fez, Tunis, and Tripoli, with their dependencies. Piratical states (nominally subject to Turkey) were founded on the coast by Barbarossa, about 1518.

BARBERS lived in Greece in the 5th century, and at Rome in the 3rd century n.c. In England, formerly, the business of a surgeon was united to the barber's, and he was denominated a Barber-Surgeon. A London company was formed in 1308, and incorporated, 1402. This union was partially dissolved in 1540, and wholly so in 1745. "No person using any shaving or barbery in London shall occupy any surgery, letting of blood, or

other matter, except only drawing of teeth." 32 Hen. VIII. 1540.

BARCA (N. Africa), the Greek Barce, a colony of Cyrene. It was successively subjugated by the Persians, Egyptians, and Saracens. In 1550 the sultan Solyman combined Barca with the newly conquered pashalik of Tripoli.

BARCELONA (N. E. Spain), an ancient maritime city, said to have been rebuilt by Hamilcar Burca, father of the great Hannibal, about 233 n.c. It was held by the Romans, Goths, Moors, and Franks, and, with the province of which it is the capital, was made an independent country about A.D. 864, and incorporated with Aragon, 1164, the last count becoming king. The city has suffered much by war. The siege by the French in 1604, was relieved by the approach of the English fleet, commanded by admiral Russell; but the city was taken by the carl of Peterborough in 1706. It was bombarded and taken by the duke of Berwick and the French in 1714, and was taken by Nipoleon in 1808, and retained till 1814. It revolted against the queen in 1841, and was bombarded and taken in Dec. 1842, by Espartero. Frequent insurrections here; one suppressed Jan. 1874. An exhibition opened by the king Alfonso XII. 4 March 1877.

BARCLAY, CAPTAIN, see Pedestrianism.

BARDESANISTS, followers of Bardesanes, of Mesopotamia, who embraced the errors of Valentinus, after refuting them, and added denial of the incarnation, resurrection, &c., about 175.

BARDS. Demodocus is mentioned as a bard by Homer; and we find bards, according to Strabo, among the Romans before the age of Augustus. The Welsh bards formed an hereditary order, regulated, it is said, by laws, enacted about 940 and 1078. They lost their privileges at the conquest by Edward I. in 1284. The institution was revived by the Tudor sovereigns; and their Eisteddfodds for meetings) have been and are frequently held; at Swansea, Aug. 1863; at Llandudno, Aug. 1864; in the vale of Conway, 7 Aug. 1805; at Chester, 4 Sept. 1866; at Carmarthen, 3 Sept. 1867; at Ruthin, 5-7 Aug. 1868; at Rhyl, 8-12 Aug. 1870; at Portmadoc, Aug. 1872; at Mold, Aug. 1873; at various places in 1874-1876; at Carnarvon, 21 Aug. 1877; at Llanwrst, 1-3 Aug.; and at Menai Bridge, Aug. 1878. The Gwyneddigion Society of Bards was founded in 1770. Turlogh O'Carolan, the last of the Irish bards, died in 1738. Chambers.

BAREBONE'S PARLIAMENT. Cromwell, supreme in the three kingdoms, summoned 122 persons, such as he thought he could manage, who, with six from Scotland and five from Ireland, met, as a parliament, 4 July, 1653. It obtained its appellation from a nickname given to one of its members, a leather-seller, named "Praise-God Barbon." The majority evinced much sense and spirit, proposing to reform abuses, improve the administration of the law, &c. The parliament was suddenly dissolved, 13 Dec. 1653, and Cromwell made lord protector.

BAREILLY, province of Delhi (N. W. India). ceded to the East India company by the ruler of Oude in 1801. A mutiny at Bareilly, the capital, was suppressed in April, 1816. On 7 May, 1858, it was taken from the cruel sepoy rebels.

BARFLEUR (N. France), where William, duke of Normandy, equipped the fleet by which he

conquered England, 1066. Near it, William, duke of Normandy, son of Henry I., in his passage from Normandy, was shipwrecked, 25 Nov. 1120, when the prince, his bride, and many others perished. Barfleur was destroyed by the English in the campaign in which they won the battle of Creey, 1346. The French navy was destroyed near the cape by admiral Russell, after the victory of La Hogue, 19 May, 1602.

BARI (S. Italy), the Barium of Horace, was, in the 9th century, a stronghold of the Saracens, and was captured by the emperor Louis II., a descendant of Charlemagne, in 871. In the 10th century it became subject to the eastern empire, and remained so till it was taken by Robert Guiseard, the Norman, about 1060. A great ecclesiastical council was held here on I Oct. 1008, when the filiogue article of the creed and the procession of the Holy Spirit were the subjects of discussion.

BARING ISLAND, Arctic Sea, discovered by captain Penny in 1850-1, and so named by him after sir Francis Baring, first lord of the admiralty in 1849.

BARIUM (Greek, barys, heavy), a metal found abundantly as carbonate and sulphate. The oxide baryta was first recognised as an earth distinct from lime by Scheele, in 1774; and the metal was first obtained by Humphry Davy, in 1808. Watts.

BARK, see Jesuits' Bark.

BARLAAMITES, followers of Barlaam, a learned Calabrian monk of the order of St. Basil, who maintained various peculiar tenets, attacked the Greek monks, supported the Latin against the Greek church in a controversy at Constantinople, 1337, and acted as the emperor's envoy in an attempt to reconcile the churches in 1339. He died about 1348.

BARMECIDES, a powerful Persian family, c lebrated for virtue and courage, were massacred through the jealousy of the caliph Haroun-al-Raschid, about 802. His visir Giafar was a Barmecide. The phrase Barmecide (or imaginary) feast originated in the story of the barber's sixth brother, in the Arabian Nights' Entertainments.

BARNABITES, an order of monks, established in Milan about 1530, were much engaged in in-structing youth, relieving the sick and aged, and converting heretics.

BARNARD'S, SIR JOHN, ACT (7 Geo. II., c. 8), entitled, "an act to prevent the infamous practice of stock-jobbing," was passed in 1734, and repealed in 1860. Sir John Barnard (born 1685, died 1764) was an eminent lord mayor of London.

BARNARDO HOMES. Dr. T. J. Barnardo, of German extraction, born in Ireland, came to London, and in 1866 began energetically to promote the welfare of homeless children.

His home for boys at Stepney, founded 1870, was followed by one for girls, at Barkingside, Essex, with infirmary, schools, &c.; all were reported successful

in 1874. His disinterestedness and management having been impugned, he gave up the management to trustees, and invited investigation. The arbiters (Canon Miller and Messrs. J. B. Maule and Wm. Graham) in their report, after commenting on the imperfect evidence, commended the charities, and generally exonerated Dr. Barnardo, 15 Oct. 1877.

BARNET, Hertfordshire. Here, at Gladsmore heath, Edward IV. gained a decisive victory over the Lancastrians, on Easter-day, 14 April, 1471, when the earl of Warwick and his brother the marquis of Montacute, or Montague, and 10,000 men were slain. A column commemorative of this battle has been erected at the meeting of the St. Alban's and Hatfield roads.

BAROMETERS. Torricelli, a Florentine. knowing that water did not rise in a pump through what was supposed to be nature's abhorrence of a vacuum, imitated the action of a pump with mercury, and made the first barometer, about 1643. Pascal's experiments (1646) enhanced the value of the discovery by applying it to the measurement of heights. Wheel barometers were contrived in 1668; pendent barometers in 1695; marine in 1700; and many improvements have been made since. In the aneroid barometer (from a, no, and neros, watery) no liquid is employed; the atmospheric pressure being exerted on a metallic spring. Its invention (attributed to Conté, in 1798, but due to Vidi, who died in April, 1860), excited much attention in 1848-9. Barometers were placed at N.E. coast stations in 1860, by the duke of Northumberland and others.

BARON, formerly the only title in our peerage, now the lowest. Its original name in England. Varasour, was changed by the Saxons into Thane, and by the Normans into Baron. Many of this rank had undoubtedly assisted in, or been summoned to parliament (in 1205); but the first precept found is of no higher date than the 49 Hen. III. 1265. The first raised to this dignity by patent was John de Beauchamp, created baron of Kidderminster, by Richard II., 1387. The barons took arms against king John, and compelled him to sign the great charter of our liberties, and the charter of our forests, at Runnymede, near Windsor, June, 1215. Charles II. granted a coronet to barons on his restoration, 1660.

BARONETS, the first in rank among the gentry, and the only knighthood that is hereditary, were instituted by James I., 1611. The rebellion in Ulster seems to have given rise to this order, it having been required of a baronet, on his creation, to pay into the exchequer as much as would maintain "thirty soldiers three years at eightpence a day in the province of Ulster in Ireland." It was further required that a baronet should be a gentleman born, and have a clear estate of 1000l. per annum. The first baronet was sir Nicholas Bacon (whose successor is therefore styled Primus Baronettrum Anglia, 22 May, 1611. The baronets of Ireland were created in 1619; the first being sir Francis Blundell.—Baronets of Nova Scotia were created, 1625; sir Robert Gordon the first baronet. -All baronets created since the Irish union in 1801 are of the United Kingdom.

BARONS' WAR, arose in consequence of the faithlessness of Henry III. and the oppression of his favourites in 1258. The barons, headed by Simon de Montfort, earl of Leicester, and Gilbert de Clare, earl of Gloucester, met at Oxford in 1262, and enacted statutes to which the king objected. In 1263 their disputes were in vain referred to the decision of Louis IX. of France. War broke out, and on 14 May, 1264, the king's party was totally defeated at Lewes; and De Montfort became the virtual ruler of the kingdom. The war was renewed; and at the battle of Evesham, 4 Aug. 1265, De Montfort was slain, and the barons were defeated; but they did not render their final submission till 1268. A history of this war was published by Mr. W. H. Blaauw, in 1844; 2nd ed., 1871.

BAROSSA, see Barrosa.

BARRACKS (from "Baraque—Hutte que font les soldats en campagne pour se mettre à couvert,") were not numerous in this country until about 1789. A superintendent-general was appointed in 1793, since when commodious barracks have been built in the various gurrison towns and central points of the empire.—A report, censuring the condition of many barracks, was presented to parliament in 1858; and great improvements were effected under the direction of Mr. Sidney (afterwards lord) Herbert; see Aldershot.

BARREL-ORGANS, see Organs.

BARRICADES, mounds formed of trees and earth, for military defence. During the wars of the League in France, in 1588, the people made barricades by means of chains, casks, &c., and compelled the royal troops to retire. During the war of the Fronde, a barricade was erected in Paris on 27 Aug. 1648. Barricades composed of overturned vehicles, &c., were creeted in Paris in the insurrections of 27-30 July, 1830, and 23-26 June, 1848, when sanguinary conflicts took place.

BARRISTERS are said to have been first appointed by Edward I., about 1291, but there is earlier mention of professional advocates. They are of various ranks, as king sor queen's counsel, serjeants, &c., which see. Students for the bar must keep a certain number of terms at the inns of court, previously to being called; and by the regulations of 1853 must pass a public examination. Irish students must keep eight terms in England.

The British army, commanded by major-general sir Thomas Graham, afterwards lord Lynedoch, totally defeated the French under marshal Victor, 5 March, 1811, the French leaving nearly 3000 dead, six pieces of cannon, and an eagle, the first that the British had taken; the loss of the British was 1169 men killed and wounded.

On 19 Sept. 1867, new docks were opened in the presence of the dukes of Devonshire and Buccleuch (proprietors of the land), Mr. Gladstone, and others.

Wm. Greenwell, who published his elaborate work, "British Barrows," in December, 1877.

BARS in music appear in Agricola's "Musica Instrumentalis," 1520; and in Morley's "Practical Music," 1507, for score music. Henry Lawes used them in his "Ayres and Dialogues," 1653.

1813, between the French, commanded by Napoleon, and the allies under the emperor of Russia and the king of Prussia. The struggle commenced on the 19th, with a contest on the outposts, which cost each army a loss of above 2000 men. On the 20th (at Bautzen) the French were more successful; and on the 21st (at Wurschen) the allies were compelled to retire; but Napoleon obtained no permanent advantage. BAY ISLANDS (the chief, Ruatan), in the bay of Honduras, central America, belonged to Spain till 1821; then to Great Britain, which formed them into a colony in 1852, but ceded them to Honduras, 28 Nov. 1859, see Honduras.

BAYEUX TAPESTRY, said to have been wrought by Matilda, queen of William I. (?) It is 19 inches wide, 214 feet long, and is divided into compartments showing the events from the visit of Harold to the Norman court to his death at Hastings; it is now preserved in the public library of Bayeux near Cuen. A copy, drawn by C. Stothard, and coloured after the original, was published by the Society of Antiquaries in 1821-3. It was reproduced by autotype process by F. R. Fowke, with notes, 1875.

BAYLEN (S. Spain), where on 20 July, 1808, the French, commanded by generals Dupont and Wedel, were defeated by the Spaniards under Reding, Coupigny, and other generals.

BAYONET, the short dagger fixed at the end of fire-arms, said to have been invented at Bayonne, in France, about 1647, 1670, or 1690. It was used at Killieerankie in 1689, and at Marsaglia by the French, in 1693, "with great success, against the enemy unprepared for the encounter with so formidable a novelty." The ring-bayonet was adopted by the British, 24 Sept. 1693.

In the neighbourhood of Bayonne was much desperate fighting between the French and British armies, 9-13 Dec. 1813. Bayonne was invested by the British, 14 Jan. 1814; on 14 April, the French made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and lieut.-gen. sir the British was considerable, and lieut.-gen. sir John Hope was wounded and taken prisoner.—A Franco-Spanish industrial and fine arts exhibition was opened at Bayonne in July 1864.

BAYREUTH (N. Germany), a margraviate, held formerly by a branch of the Brandenburg family, was with that of Anspach abdicated by the reigning prince in favour of the king of Prussia, 1790. The archives were brought (in 1783) from Plassenburg to the city of Bayreuth, which was incorporated with Bayaria by Napoleon in 1806.

BAZAAR, or covered market, a word of Arabic origin. The magnificent bazaar of Ispahan was excelled by that of Tauris, which has held 30,000 men in order of battle. In London the Soho-square bazaar was opened by Mr. Trotter in 1816 to relieve the relatives of persons killed in the war. The Queen's Bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000l., 27 May, 1829. It was rebuilt, and converted into the Princess's Theatre, It was opened 30 Sept. 1841. The St. James's bazaar (built by Mr. Crockford) in 1832. The Pantheon, made a bazaar in 1834; see Pantheon. BAZEILLES, a village in the Ardennes, N.E. France. During the dreadful battle of Sedan, I Sept. 1870, Bazeilles was burnt by the Bavarians, and atrocious outrages are said to have been committed. Of nearly 2000 inhabitants scarcely fifty remained alive, and these indignantly denied having given provocation. Much controversy ensued, and in July, 1871, gen. Von der Tann asserted that the number of deaths had been exaggerated, that there had been much provocation, and denied the alleged cruelties.

BAZOCHE-DES-HAUTES, near Orleans, central France. Here a part of the army of the Loire, under gen. D'Aurelle de Paladines, was defeated after a severe action, by the Germans under the grand-duke of Mecklenburg, 2 Dec. 1870. See Orleans.

BEACHY HEAD, a promontory, S. E. Sussex, near which the British and Dutch fleet, commanded by the earl of Torrington, was defeated by a supe-rior French force under admiral Tourville, 30 June,

^{*} The abdication of Charles-Louis was mainly caused his addication of Chartes-Louis was mainly caused by his attachment to an intriguing woman, known throughout Europe by the assumed name of Lola Montes, who, in the end, was expelled the kingdom for her interference in state affairs, and afterwards led a wandering life. She delivered lectures in London, in 1859; thence proceeded to the United States; and died at New York, 12. Jun 1864. 17 Jan. 1861.

1690; the allies suffered very severely. The Dutch lost two admirals, 500 men, and several ships—sunk to prevent them from falling into the hands of the enemy; the English lost two ships and 400 men. The admirals on both sides were blamed; ours, for not fighting; the French for not pursuing the victory.

BEACONS, see Lighthouses.

BEACONSFIELD ADMINISTRATION, see Disracti.

BEADS were early used in the east for reckoning prayers. St. Augustin mentions them 366. About 1090, Peter the Hermit is said to have made a series of 55 beads. To Dominic de Guzman is ascribed the invention of the Rosary (a series of 15 large and 150 small beads), in honour of the Blossed Virgin, about 1202. Beads soon after were in general use. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited. Beads have been found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weighmaster, who was to do justice between buyer and scales, with weights and measures, were ordered to be examined by the justices at quarter sessions, 35 Geo. III. 1794; see Weights and Measures.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The precept of Pythagoras to abstain from beans, abstine a fabis, has been variously interpreted. "Beans do not favour mental tranquillity." Cicero. The finer kinds of beans were brought here with other vegetables, in Henry VIII.'s reign.

BEAR-BAITING, an ancient popular English sport, prohibited by parliament in 1835.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews, who were forbidden to mar their beards, 1490 B.C. Ler. xix. 27. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards till the time of Alexander, who ordered the Maccodonians to be shaved, lest the beard should give a handle to their enemies, 330 B.C. Beards were worn by the Romans, 390 B.C. The emperor Julian wrote a diatribe (entitle "Misopogon") against wearing beards, A.D. 362.—In England, they were not fashionable after the conquest, 1066, until the 13th century, and were discontinued at the Restoration. Peter the Great

enjoined the Russians, even of rank, to shave, but was obliged to keep officers on foot to cut off the beard by force. Since 1851 the custom of wearing the beard gradually increased in Great Britain.

BEARN, S. France, the ancient Benecharnum, was held successively by the Romans, Franks, Goths, and Gascons, and became a hereditary viscounty in 819, under Centule I., son of Loup, duke of Gascony. From his family it passed to the houses—of Gabaret, 1134; of Moncade, 1170; of Foix, 1290; and of Bourbon, 1550. Its annexation to France was decreed by Henry IV., 1594; affirmed by Louis XIII., 1620.

BEAUMONT, a village near Sedan, department of Ardennes, N.E. France. Near here a part of the army of marshal MacMahon under De Failly, which, after vainly endeavouring to reach Mctz, was retreating before the Germans under the crown prince of Prussia, was surprised, defeated, and driven across the Mcuse at Mouzon, 30 Aug. 1870. The French loss included about 7000 prisoners, many guns, and much camp equipage. The victory was chiefly gained by the Bavarians.

BEAUNE-LA-ROLLIANDE, a village in the Loiret, France. Here the French army of the Loiret, under general D'Aurelle de Paladines, was defeated by the Germans, under prince Frederick Charles, in an attempt to march in the direction of Fontainebleau to relieve Paris, 28 Nov. 1870. The French loss was reported by the Germans to be 1000 dead, 4000 wounded; above 1700 prisoners. Their own loss was heavy.

^{*} Thomas Becket was born in 1119. His father Gilbert was a London trader, and his mother is stated to have been a convert from Mahomedanism. He was educated at Oxford, and made archdeacon by Theobald, archbishop of Canterbury, who introduced him to the king, Henry II. He became chancellor in 1155, but on being elected archbishop of Canterbury in 1162, he resigned the chancellorship, to the great offence of the king. He opposed strenuously the constitutions of Clarendon in 1164, and fied the country; and in 1166, excommunicated all the clergy who agreed to abide by them. He and the king met at Fretville, in Touraine, on 22 July, 1270, and were formally reconciled. On his return he re-commenced his struggle with the king, which led to his tragical death.

The Merchant Adventurers were at one time termed "the Brotherhood of St. Thomas à Becket." Roman catholic church at Canterbury, dedicated to him, was opened by cardinal Manning, 13th April,

BED. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. An air-cushion is said to have been used by Heliogabalus, 218-222; air-beds were in use in the 16th century. Feather-beds were in use in England in the reign of Henry VIII. The bedsteads of the Egyptians and later Greeks, like modern couches, became common among the Roman upper classes.

The ancient great bed at Ware, Herts, capable of holding twelve persons, was sold, it is said, to Charles Dickens, 6 Sept. 1864.
A bedstead of gold was presented to the queen on 2 Nov. 1859, by the Maharajah of Cashmere.

"BEEF STEAKS, the Sublime Society of," was established in 1735 by Rich, an actor at Covent Garden Theatre, in the painting room of which the members dined upon beef-steaks. The society became fashionable, and long included among its members the prince of Wales, royal dukes, and other eminent persons, who submitted to its some-what ludicrous regulations. It became extinct in 1867, its last place of meeting being a room in the Lyceum theatre. Its history was published by Brother Arnold in 1871.

The economy of bees was admired in the carliest ages; and Eumelus, of Corinth, wrote a poem on bees, 741 n.c. Bees were introduced into Boston, New England, in 1670, and have since spread over the continent. Mundeville's satirical "Fable of the Bees" appeared in 1723. Huber published his observations on bees in 1792. The Apiarian Society had an establishment at Muswell Hill, near London (1860-2). BEET-ROOT is of recent cultivation in England. Beta vulgaris, red beet, is used for the table as a salad. Margraff first produced sugar from the white beet-root in 1747. M. Achard produced excellent sugar from it in 1799; and the chemists of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. 60,000 tons of sugar, about half the consumption, are now manufactured in France from beet. It is also largely manufactured in other countries. A refinery of sugar from beet-root has been erected at the Thames bank, Chelsea. The cultivation of beetroot in England and Ireland much advocated, 1871.

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. modern times severe laws have been passed against them. In 1572, by 14 Eliz., c. 5, sturdy beggars were ordered to be "grievously whipped and burnt through the right car;" punished capitally for the third offence. By the Vagrant Act (1824), 5 Geo. IV. c. 83, all public beggars are liable to a month's imprisonment. About 30,000 tramps in England and Wales. Judicial Statistics, 1865. See Poor Laws and Mendicity Society. BEGUINES, a congregation of nuns first established at Liège, and afterwards at Nivelle, in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive. Some of these nuns imagined that they could become sinless. The council of Vienne condemned this error, and abolished a branch of the order in 1311. They still exist in Germany and Belgium, acting as nurses to the sick and wounded, &c.

BEHEADING, the Decollatio of the Romans, introduced into England from Normandy (as a less ignominious mode of putting high criminals to death), by William the Conqueror, 1076, when Waltheof, earl of Huntingdon, Northampton, and Northumberland, was first so executed. Since then this mode of execution became frequent, particularly in the reigns of Henry VIII., Mary, and Elizabeth, when even women of the noblest blood thus perished.*

^{*} Lady Jane Grey was beheaded 12 Feb. 1554. The venerable countess of Salisbury was executed 27 May, 1541. When directed to lay her head on the block, she refused to do it: saying that she knew of no guilt, and would not submit to die like a criminal. The executioner pursued her round the scaffold, aiming at her hoary head, and at length took it off, after mangling the neck and shoulders in a horrifying manner. She was daughter of George, duke of Clarence. Hume.

This treaty arose out of the conference held in London on the Belgian question, by the decision of which, the treaty of 15 Nov. 1831, was maintained, and the pecuniary compensation of sixty millions of francs offered by Belgium for the territories adjudged to Holland was declared inadmissible.

[†] At the revolution in 1830, the Roman Catholic clergy lost the administration of the public charities, which they have struggled to recover ever since. In April, 1857, M. Decker, the head of the ministry, brought in a bill for this purpose, the principle of which was carried. This led, however, to so much agitation, that the ministry were compelled to withdraw the bill, and eventually to resign.

BELGRADE, an ancient city in Servia, on the right bank of the Danube. It was taken from the Greek emperor by Solomon, king of Hungary, in 1086; gallantly defended by John Huniades against the Turks, under Mahomet II., July to Sept. 1456, when the latter was defeated, with the loss of 40,000 men. Belgrade was taken by sultan Solyman, Aug. 1521, and retaken by the Imperialists in 1688, from whom it was again taken by the Turks, 1690. It was besieged in May, 1716, by prince Eugene. In that year the Turkish army, 200,000 strong, approached to relieve it, and on 5 Aug. a sanguinary battle was fought at Peterwara-dein, in which the Turks lost 20,000 men. Eugene defeated the Turks here, 16 Aug. 1717, and Belgrade surrendered 18 Aug. In 1739 it was coded to the Turks, after its fine fortifications had been demolished. It was retaken in 1789, and restored at the peace of Reichenbach, in 1790. The Servian insurgents had possession of it, 1806-13. In 1815 it was placed under prince Milosch, subject to Turkey. The fortifications were restored in 1820. On 19 June, 1862, the Turkish pasha was dismissed for firing on the town during a riot. The university was established by private munificence, 1863. The fortress was surrendered by the Turks to the Servians, 18 April, 1867. The independence of Servia proclaimed here, 22 Aug. 1878. See Servia.

BELL, BOOK, AND CANDLE: in the Romish ceremony of excommunication (which see), the bell is rung, the book is closed, and candle extinguished; the effect being to exclude the excommunicated from the society of the faithful, divine service, and the sacraments. Its origin is ascribed to the 8th century.

BELL ROCK LIGHTHOUSE, nearly in front of the Frith of Tay, one of the finest in Great Britain; it is 115 feet high, is built upon a rock that measures 427 feet in length, and 200 feet in breadth, and is about 12 feet under water.* It was erected in 1806-10. It has two bells for hazy weather.

BELLAIR, North America. The town was attacked by the British forces under sir Peter Parker, who, after an obstinate engagement, was killed, 30 Aug. 1814.

BELLEISLE, an isle on the south coast of Brittany, France, erected into a duchy for marshal Belleisle, in 1742, in reward of his military and diplomatic services, by Louis XV. Belleisle was taken by the British forces under commodore Keppel and general Hodgson, after a desperate resistance, 7 June, 1761, but was restored to France in 1763.

BELLEVILLE, the red republican stronghold tured by L'Admirault and Vinoy, 27, 28 May, 1871, when the insurrection was suppressed.

^{*} Upon this rock, tradition says, the abbots of the ancient monastery of Aberbrothock fixed a bell (the Inchospe bell) in such a manner that it was rung by the impulse of the sea, thus warning mariners of their impending danger. Tradition also tells us that this apparatus was carried away by a Dutchman, who was afterwards lost upon the rock, with his ship and crew.

BELLMEN, appointed in London to proclaim the hour of the night before public clocks became general, were numerous about 1556. They were to ring a bell at night, and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead."

BELLOWS. Anacharsis, the Scythian, is said to have been the inventor of them, about 569 B.C.; and to him is ascribed the invention of tinder, the potter's wheel, anchors for ships, &c. Bellows were not used in the furnaces of the Romans. The great bellows of our foundries must have been early used; see Blowing Machines.

BELLS were used among the Jews, Greeks, and Romans. The responses of the Dodonavan oracle were in part conveyed by bells. Strabo. The monument of Porsenna was decorated with pinnacles, each surmounted by bells. Pliny. Said to have been introduced by Paulinus, bishop of Nola, in Campagnu, about 400; and first known in France in 550. The army of Clothaire II., king of France, was frightened from the siege of Sens by the ringing of the bells of St. Stephen's church. The second excerption of our king Egbert commands every priest, at the proper hours, to sound the bells of his church. Bells were used in churches by order of pope John IX., about 900, as a defence, by ringing them, against thunder and lightning. Bells are said to have been cast by Turketul, about of England, about 941. The celebrated "Song of the Bell," by Schiller (died 1805), has been frequently translated. The following list is that given by Mr. E. Beckett Denison (afterwards sir Edmund Beckett) in his discourse on bells at the Royal Institution, 6 March, 1857. Weight.

BIBLIOMANIA (or book madness) very much prevailed in 1811, when Dr. Dibdin's work with this title was published; see *Boccaceio*, and *Printing*, 1450-5.

BICOCCA, N. Italy. Lautree and the French were here defeated by Colonna and the Imperialists, 29 April, 1522, and Francis thereby lost his conquests in Milan.

BICYCLE, see Velocipede.

BIDASSOA. The allied army under lord Wellington, having driven the French from Spain, effected the passage of this river 8 Oct. 1813, and entered France.

BIDDENDEN MAIDS. A distribution of bread and cheese to the poor takes place at Biddenden, Kent, on Easter Mondays, the expense being defrayed from the rental of twenty acres of land, in 1875 yielding about 20%, a year, the reputed bequest of the Biddenden maids, two sisters named Chulkhurst, said to have been joined together like the Siamese twins, and to have died in the 12th century. In 1656, Win. Horner, the rector, was non-suited in an attempt to add the "Bread and Cheese lands" to his glebe.

BIGAMY. The Romans branded the guilty party with an infamous mark; and in England the punishment, formerly, was death. An act respecting it was passed 5 Edw. I. 1276. Viner's Statutes. Declared to be felony, without benefit of clergy, I James I. 1603. Punishable, by imprisonment or transportation, 35 Geo. III. 1794.

BIG BETHEL (Virginia, U.S.). On 10June, 1861, the Federals were defeated in an attack on some Confederate batteries at this place.

BILBAO (N.E. Spain), founded about 1300; was taken by the French and held a few days, July, 1705. It was delivered from the Carlists by Espartero, assisted by the British, 24 Dec. 1836. It was besieged by Carlists from Feb. to May, 1874, when the siege was raised by marshal Concha, who entered Bilbao 2 May.

BILL OF EXCEPTIONS. The right of tendering such a bill to a judge, either to his charge, to his definition of the law, or to other errors of the court, at a trial between parties, provided by the 2nd statute of Westminster, 13 Edw. I. 1284, was abolished by the Judicature Act, 1875.

BILL OF PAINS, &c.; see Queen Caroline. BILL OF RIGHTS, &c.; see Rights.

BILLIARDS. The French ascribe their invention to Henrique Devigne, an artist, about 1571. Slate billiard tables were introduced in England in 1827.

BILLINGSGATE, the fish-market in London, is said to have derived its name from Belinus Magnus, a British prince, the father of king Lud, 400 B.C., but Stow thinks from a former owner. It was the old port of London, and the customs were paid here under Ethelred II., A.D. 979. Stow. Billingsgate was made a free market, 1699. Chamberlain. Fish by land-carriage, as well as sca-borne, now arrives daily here. In 1849, the market was extended and improved, and a new one was erected in 1852, Mr. Bunning, architect. Another new one, creeted by

Horace Jones, founded 27 Oct. 1874; completed Sept. 1876.

BILLS OF EXCHANGE were invented by the Jews as a means of removing their property from autons where they were persecuted, 1160. Anderson. Bills are said to have been used in England, 1307. The only legal mode of sending money from England, 4 Richard II. 1381. Regulated, 1608, first stamped, 1782; duty advanced, 1797; again, June 1801; and since. It was made capital to counterfeit bills of exchange in 1734. In 1825, the year of disastrous speculations in bubbles, it was computed that there were 400 millions of pounds sterling represented by bills of exchange and promissory notes. The present amount is not supposed to exceed 50 millions. The many statutes regarding bills of exchange were consolidated by act 9 Geo. IV. 1828. An act regulating bills of exchange passed 3 Vict. July, 1830. Great alterations were made in the law on the subject by 17 & 18 Vict. c. 83 (1854), and 18 & 19 Vict. c. 66 (1855). Days of grace were abolished in the case of bills of exchange payable on sight in Aug. 1871. Forgery of bills to obtain discount was detected by the bank of England, 28 Feb., after 102,217l. had been paid. The culprits (Americans) were tried and condemned to penal servitude for life, 26 Aug. 1873. See Trials, Aug. 1873.

BILLS OF MORTALITY FOR LONDON-These bills were first compiled by order of Cromwell, about 1538, 30 Hen. VIII., but in a more formal and recognised manner in 1603, after the great plague of that year. No complete series of them has been preserved. They have been superseded by the weekly returns of the registrar-general, since 1837. See Public Health. BINARY ARITHMETIC, that which counts by twos, for expeditiously ascertaining the property of numbers, and constructing tables, was invented by Leibnitz of Leipsic, about 1703. For the Binary theory in chemistry, see Compound Radical.

BINOMIAL ROOT, in Algebra, composed of only two parts connected with the signs plus or minus; a term first used by Recorda, about 1550, when he published his Algebra. The celebrated binomial theorem of Newton is said to have been discovered in 1663.

BIOGRAPHY (from the Greek bios, life, and graphō, I write), defined as "history teaching by example." The book of Genesis contains the biography of the patriarchs; and the Gospels that of Christ. Plutarch wrote the Lives of Illustrious Men; Cornelius Nepos, Lives of Military Commanders; and Suctonius, Lives of the Twelve Casars (all three in the first century after Christ); Diogenes Laërtius, Lives of the Philosophers (about 205).—Boswell's Life of Johnson (published in 1790) is the most remarkable English biography.

BIOLOGY, termed the science of life and living things, by Treviranus, of Bremen, in his work on Physiology, published 1802-22. Biology includes zoology, anthropology, and ethnology (which see). Herbert Spencer's "Principles of Biology," published 1865-67.

BIRCH TREE. The black (Betula nigra), brought from North America, 1736. The birch tree known as the Betula pumila, introduced into Kew gardens, England, by Mr. James Gordon, from North America, 1762. Hardy's Annals.

BIRDS were divided by Linneus into six orders (1735); by Blumenbarch into eight (1805); and by Cuvier, into six (1817). The most remarkable works are those published by John Gould, F.R.S.; they now consist of nearly 40 folio volumes of coloured plates, &c. They now include the birds of Europe, Asia, Australia, Great Britain, and New Guinea, besides monographs of the humming-birds, &c. (1878). Dr. John Latham's "Synopsis of Birds," 1781-90. John James Audubon's "Birds of America," 1826-40. See Wild Birds.

BIRKENHEAD (Cheshire), a modern town on the Mersey, opposite to Liverpool. The great dock here was projected by Mr. John Laird, constructed by Mr. Rendell, and opened in Aug. 1847 by lord Morpeth. In 1861 Birkenhead was made a parliamentary borough, and Mr. Laird was elected first representative. He died 29 Oct. 1874. Birkenhead received a charter of incorporation in 1878. Population in 1831, 200; in 1861, 51,649; in 1871, 65,971. See Wrecks, 1852.

BIRMAN EMPIRE or EMPIRE OF AVA, see Burmese Empire and India.

BIRMINGHAM, formerly Bromwicham and Brummegem (Warwickshire), existed in the reign of Alfred, 872; and belonged to the Bermengehams, at Donesday Survey, 1086. There were "many smythes" here in the time of Henry VIII. (Leland), but its great importance commenced in the reign of William III.

BISHOPS IN IRELAND are said to have been consecrated in the 2nd century; see Church of Ireland.

Prelacies were constituted, and divisions of the bishoptics in Ireland made, by cardinal Paparo, legate from pope Eugene III. . . 1151 Several prelates deprived by queen Mary . 1554 Bp Atherton suffered death ignomimously . 1640 Two bishops deprived for not taking the oaths to William and Many Church Temporalities Act, for reducing the number of bishops in Ireland, 3 & 4 Will IV., c. 37, passed 14 Aug 1833

By this statute, of the four archbishoprics of Armagh, Dublin, Tuam, and Cashel, the last two were to be abolished on the decease of the then archprelates, which has since occurred, and it was cancided that eight of the then eighteen bishopries should, as they became void, be henceforth united to other sees, which was accomplished in 1850; so that the Irish church at present consists of two archbishops and ten bishops. BISHOPS IN SCOTLAND were probably nominated in the fourth century.

The Reformers, styling themselves "the Congregation of the Lord," having taken up arms and defeated the queen-mother, Mary of Guise, called a parliament, which set up a new form of church

1856.

An order in council, Oct. 1838, directed the sees of Bangor and St. Asaph to be united on the next vacancy in either, and Manchester, a new see, to be created thereupon; this order, as regarded the union of the sees, was rescinded 1846.

Episcopacy formally abolished, and the bishops' revenues seque strated. 19 Sept. The Episcopal church was thus reduced to the condition of a Non-conformist body, at first barely tolerated. It opened its first congress, 19 May. Bishop. BISHOPS, AMERICAN. The first was Samuel Seabury, consecrated bishop of Connecticut by four nonjuring prelates, at Aberdeen, in Scotland, 14 Nov. 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, 4 Feb. 1787, and the bishop of Virginia in 1790. Several American bishops formed part of the Pan-Anglican synod, at Lambeth, 24-27 Sept. 1867. The first Roman Catholic bishop of the United States was Dr. Carroll, of Maryland, in 1780.

BISHOPS, COLONIAL, &c.* By 15 & 16 Vict. c. 52 (1852), and 16 & 17 Vict. c. 49 (1853), the colonial bishops may perform all episcopal functions in the United Kingdom, but have no jurisdiction.

* Between 1847-59, Miss (now baroness) Burdett-Coutts gave 60,000l. to endow colonial bishoppres. In 1866 she petitioned parliament, on account of some of the bishops professing independence of the church of England. Since then, colonial bishops have been appointed without intervention of the civil power. Much discussion took place in 1867, through the deposition of Dr. Colenso, bishop of Natal, by his metropolitan, Dr. Gray, bishop of Capetown, and the attempts of the latter to consecrate a new bishop, in opposition to the law; see under Africa, and Church of England.

BISHOPS, Suffragan, to assist metropolitans, existed in the early church. Twenty-six, appointed by Henry VIII. 1534, were abolished by Mary, 1553, and restored by Elizabeth, 1558. The last appointed is said to have been Sterne, bishop of Colchester, 1606. The appointment of suffragan bishops was revived in 1809, and archdeacon Henry Mackenzie, suffragan bishop of Nottingham (diocese of Lincoln) was consecrated 2 Feb. 1870, and archdeacon Edward Parry, suffragan bishop of Dover (diocese of Canterbury), 23 March, 1870. Others have been appointed since.

BISMUTH was recognised as a distinct metal by Agricola, in 1529. It is very fusible and brittle, and of a yellowish white colour.

BITHYNIA, a province in Asia Minor, previously called Bebricia, is said to have been invaded by the Thracians under Bithynus, son of Jupiter, who gave it the name of Bithynia. It was subject successively to the Assyrians, Lydians, Persians, and Maccdonians. Most of the cities were rebuilt by Grecian colonists.

BLACK BOOK (Liber Niger), a book kept in the exchequer, which received the orders of that court. It was published by Hearne in 1728.

A book was kept in the English monasteries, wherein details of the scandalous enormities practised in religious houses were entered for the inspection of visitors, under houses were entered for the inspection of visitors, in her Hen. The name was given to the list of pensioners, printed 1831; and to other books. See *Rady*, 1876. The title *Rack. Rook* was given to a list of Habital Criminals, 1865-76; published by heut.-col. Du Cane of Brixton, March, 1877.

BLACKBURN, Lancashire, so called in Domesday-book. The manufacture of a cloth called Blackburn cheque, carried on in 1650, was superseded by Blackburn greys. BLACKFRIARS BRIDGE, London. The first stone of the late bridge was laid 31 Oct. 1760, and it was completed by Mylne, in 1770. It was frequently repaired, 1834-50, and began to sink. In 1864 it was pulled down, and a temporary bridge creeted. The foundation of a new five-arched bridge, designed by Mr. Joseph Cubitt was laid by lord mayor Hale, 20 July, 1865, and the bridge was opened by the queen 6 Nov. 1869. The first railway train (London, Chatham, and Dover) entered the city of London over the new railway bridge, Blackfriars, 6 Oct. 1864.

BLACK FRIDAY, 11 May, 1866, the height of the commercial panic in London, through the stoppage of Overend, Gurney, & Co. (limited), on 10 May. Messrs. John Heury and Edmund Gurney, and their partners, committed for trial for conspiracy to defraud, 21 Jan. 1869, were tried and acquitted, 13-23 Dec. 1869.

BLACKHEATH, Kent, near London. Here Wat Tyler and his followers assembled 12 June, 1381; and here also Jack Cade and his 20,000 Kentish men encamped, I June, 1450; see Tyler and Cade. Here the Cornish rebels were defeated and Flammock's insurrection quelled, 22 June, 1497. The ancient cavern, on the ascent to Black-

heath, popularly termed "the retreat of Cade," and of banditti in the time of Cromwell, was re-discovered in 1780. Several daring highway robberies were committed near the heath, and the youthful culprits punished, in 1877. See Trials.

BLACK-HOLE, see Culcutta.

BLACK LEAD, see Graphite.

BLACK LETTER, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469: Pliny's Natural History was then printed in the new characters.

BLACK-MAIL, a compulsory payment for protection of cattle, &c., made in the border counties, was prohibited by Elizabeth in 1601. It was exacted in Scotland from the lowlanders by the highlanders, till 1745. It checked agricultural improvement.

BLACK MONDAY, Easter Monday, 14 April, 1360, "so full dark of mist and hail, and so bitter cold that many men died on their horsebacks with the cold." Stow. In Ireland, Black Monday was the day on which a number of the English were slaughtered at a village near Dublin, in 1209.

BLACK ROD has a gold lion at the top, and is carried by the usher of the order of the knights of the garter (instituted 1340), instead of the mace. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords and acts as their messenger to the commons.

BLANKETEERS. A number of operatives who, on 10 March, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. See Derby. Eventually the ringleaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKETS are said to have been first made at Bristol by Thos. Blanket, in the 14th century. This is doubtful.

BLASPHEMY was punished with death by the law of Moses (Lev. xxiv.) 1491 B.C.; and by the code of Justinian, A.D. 529. It is punishable by the eivil and canon law of England, regulated by 60 Geo. III. c. 8 (1819). Daniel Isaac Eaton was tried and convicted in London of blasphemy, 6 March, 1812. Robert Taylor, a protestant clorgyman, was tried twice for the same crime. He was sentenced to two years' imprisonment, and largely fined, July, 1831. In Dec. 1840, two publishers of blasphemous writings were convicted.

BLAZONRY. Bearing coats-of-arms was introduced and became hereditary in France and England about 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. *Dugdale*.

BLEACHING was known in Egypt, Syria, India, and Gaul. Pliny. An improved chemical system was adopted by the Dutch, who introduced

it into England and Scotland in 1768. There were large bleach-fields in Lancashire, Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dumbarton. The application of the gas chlorine to bleaching is due to Berthollot's discovery, about 1785. Its combination with lime (as chloride of lime) was devised by Mr. Tennant, of Glasgow, who took out a patent for the process in 1708, and by his firm it is still extensively manufactured. In 1822 Dr. Ure published an elaborate series of experiments on this substance. In 1800 bleaching and dycing works were placed under the regulations of the Factories Act.

BLENHEIM (or Plintheim) a village in Bavaria on the left bank of the Danube, near the town of Hochstett, the site of a battle fought 2 Aug. (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria. The latter were defeated with the loss of about 12,000 killed, and 13,000 prisoners (including Tallard). Bavaria became the prize of the conquerors. The British parliament gave Marlborough the honour of Woodstock and hundred of Wotton, and creeted for him the house of Blenheim.*

BLIND. The first public school for the blind was established by Valentine Hauy, at Paris in 1784. The first in England was at Liverpool, in 1791; in Scotland, at Edinburgh, in 1792; and the first in London in 1799. Printing in raised or embossed characters for the use of the blind was begun at Paris by Hauy in 1786. The whole Bible was printed at Glasgow in raised Roman characters about 1848. A sixpenny magazine for the blind, edited by the late rev. W. Taylor, F.R.S., so eminent for his forty years' exertions on behalf of these sufferers, was published in 1855-6. He aided the establishment of a college for the blind of the upper classes at Worcester, in 1866. There is hardly any department of human knowledge in which blind persons have not obtained distinction. Laura Bridgman, born in 1820, became dumb and blind two years after, she was so well taught by Dr. Howe, of Boston, U.S., as to become an ablo instructor of blind and dumb persons. By the census of 1851, there were in Great Britain, 21,487 blind persons; 11,273 males, 10,214 females; about one in 975 blind. Royal Normal College and Academy of Music for the Blind, established 1873.

BLINDING by consuming the cycballs with lime or scalding vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. A whole army of Bulgarians was deprived of sight by the emperor Busil, 104. Several of the castern emperors had their eyes torn from their heads.

BLISTERS, used by Hippocrates (460-357 B.c.), made, it is said, of cantharides, (which see).

† James Holman, the "blind traviler" (born 1786, died 1857), visited almost every place of note in the world. His travels were published in 1825 In April, 1858, a blind clergyman, rev. J. Spairow, was elected chaplain to the Meicers' Company, London, and read the service, &c., from embossed books. Viscount Cranborne (blind) was the author of many interesting historical cessays. He died in June, 1865. On 13 July, 1865, Henry Fawcett, the blind professor of political economy at Cambridge, was elected M.P. for Brighton.

BLOCKADE is the closing an enemy's ports. BLOCKADE is the closing an enemy's ports to all commerce; a practice introduced by the Dutch about 1584. The principle recognized by the European powers is that every blockade, in order to be binding, must be effective. The Elbe was blockaded by Great Britain, 1803; the Baltic, by Denmark, 1848-49 and 1864; the gulf of Finland by the Allies, 1854; and the ports of the Southern States of North America by president Lincoln, April 19, 1861. See Orders in Council, and Berlin.

BLOCK BOOKS, see Printing.

BLOCKS employed in the rigging of ships were much improved in their construction by Walter Taylor, about 1781. In 1801, Mark I. Brunel in-vented a mode of making blocks by machinery which was put into operation in 1808, and in 1815 was said to have saved the country 20,000l. a year.

BLOIS, France, the Roman Blesum. The count Guy II. sold it with his domains to Louis duke of Orleans in 1391, and eventually it accrued to the crown. The states-general were held here 1576 and 1588, on account of the religious wars; and here Henry duke of Guise was assassinated by order of the king, Henry III., 23 Dec. 1588. The empress Maria Louisa retired here in 1814.

BLOOD. The circulation of the blood through the lungs was known to Michael Servetus, a Spanish physician, in 1553. Caesalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, or Father Paolo (real name Peter Sarpi), discovered the valves which serve for the circulation; but the honour of the positive discovery of the circulation belongs to William Harvey, between 1619 and 1628. A memorial window in the church at Folkestone, his birthplace, was uncovered 9 April, 1874.

EATING BLOOD was prohibited to Noah, Gea. ix., to the the apostles at an assembly at Jerusalem, A.D. 52, Acts xy.

Blood-Drinking was anciently fried to give vigour to the system. Louis XI in his last illness, drank the warm blood of infants, in the vain hope of restoring his decayed strength, 138; Ill-drant!

In the 15th century an opinion prevailed that the declining vigour of the aged might be repaired by transfersive into their vens the blood of young persons. It was countenanced in France by the physicians about 1669, and previded for many years, till the most fatal effects having ensued, it was suppressed by an edict. "An English physician (Louver, or Lower) practised in this way, he died in 1691." Freind. It was attempted again in France in 1797, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. Tried at Philadelphia, U. S., April, 1877; in Loudon, unsuccessful, 10 May, 1877. successful, to May, 1877.

BLOOD'S CONSPIRACY. Blood, a discarded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, intending to hang him, and had got him to Tyburn, when he was rescued by his friends, 6 Dec. 1670. Blood afterwards, in the disguise of a clerg nan, attempted to steal the regal crown from the Jewel-office in the Tower, 9 May, 1671; yet, notwithstanding these and other offences, he was not only pardoned, but had a pension of 500, per annum settled on him by Charles II. 1671. He died 24 Aug. 1680.

"BLOODY ASSIZES," held by Jeffreys in the west of England, in Aug. 1685, after the defeat of the duke of Monmouth in the battle of Sedgmoor. Upwards of 300 persons were executed after short

trials; very many were whipped, imprisoned, and fined; and nearly 1000 were sent as slaves to the American plantations.

BLOWING-MACHINES, the large cylinders, used in blowing machines, were creeted by Mr. Smeaton at the Carron iron works, 1760. One equal to the supply of air for forty forge fires was erected at the king's dockyard, Woolwich. The hot-air blast, a most important improvement, causing great economy of fuel, was invented by Mr. James B. Neilson, of Glasgow, and patented in 1828. He died 18 Jan. 1865.

BLOW-PIPE. An Egyptian using one is among the paintings on the tombs at Thebes. It was employed in mineralogy, by Antony Von Swab, a Swede, about 1733, and improved by Wollaston and others In 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newman's improved blow-pipes, in 1816, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. A work on the blow-pipe by Plattner and Muspratt, published 1854; by G. Plympton, 1874.

BLUE was the favourite colour of the Scotch covenanters in the 17th century. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "Edinburgh Review," first published in 1802. The Prussian blue dye was discovered by Diesbach, at Berlin, in 1710. Fine blues are now obtained from coal-tar; see Aniline. BLUE-COAT SCHOOLS, so called in reference to the costume of the children. The Blue-coat school in Newgate-street, London, was instituted by Edward VI. in 1552; see *Christ's Hospital*. Blue-stocking, a term applied to literary ladies, was originally conferred on a society comprising both sexes (1760, ct seq.). Benjamin Stillingheet, the naturalist, an active member, were blue worsted stockings; hence the name. The beautiful Mrs. Jerningham is said to have worn blue stockings at the conversaziones of Mrs. Montague.

BOATS. Flat-bottomed boats, made in England in the reign of William I.; again brought into use by Barker, a Dutchman, about 1690; see Life-Boat. A mode of building boats by the help of the steamengine was invented by Mr. Nathan Thompson of New York in 1800, and premises were erected for its application at Bow, near London, in 1801. Charles Clifford's valuable Boat-lowering apparatus was invented 1860. See Canal-Boats.

Boccaccio lived 1313-75. A copy of the first edition (that of Valdarfer, in 1471) was knocked down at the duke of Roxburgh's sale, to the duke of Marlborough, for 22601, 17 June, 1812. This copy was afterwards sold by public auction, for 375 guineas, 5 June, 1819

BODLEIAN LIBRARY, Oxford, founded in 1598, and opened in 1602, by sir Thos. Bodley (died, 28 Jan. 1612). It is open to the public, and claims a copy of all works published in this country. BCOTIA, a division of Greece, north of Attica, known previously as Aonia, Messapia, Hyantis, Ogygia, and Cadmeis. Thebes, the capital, was celebrated for the exploits and misfortunes of its kings and heroes. The term Borotian was used by the Athenians as a synonym for dulness; but unjustly,—since Pindar, Hesiod, Plutarch, Democritus, Epaminondas, and Corinna, were Borotians. BOGOTA, SANTA Fix DE, capital of New Grenada (which see), founded 1538.

BOGS, probably the remains of forests, covered with peat and loose soil. An act for the drainage of Irish bogs, passed March, 1830. The bog-land of Ireland has been estimated at 3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1849, Mr. Rees Reece took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London. Fuel for railway engines and other purposes was made from peat (April, 1873); and a peat, coal, and charcoal company established.

Much destruction has been caused by the motion of logs. Leland (about 1546) speaks of Chat Moss doing

BOHEMIA, formerly the Hereynian forest (Boiemum, Tacitus), derives its name from the Boii, a Celtic tribe. It was governed by dukes (Borzivoi the first, 891), till Ottocar assumed the title of king, 1198. The kings at first held their territory from the empire: and the crown was elective till it came to the house of Austria, in which it is now hereditary. The original Bohemians term themselves Czechs, and, following the example of Hungary, now call for autonomy. Prague, the capital, is famous for sieges and battles. Population in 1857, 4,705,525; in 1870, 5,140,544; see Prague.

BOHEMIAN BRETHREN, a body of Christians in Bohemia, appear to have separated from the Calixtines (which see), a branch of the Hussites in 1467. Dupin says "They rejected the sacraments of the church, were governed by simple laies, and held the scriptures for their only rule of faith. They presented a confession of faith to king Ladislas in 1504 to justify themselves from errors laid to their charge." They appear to have had communication with the Waldenses, but were distinet from them. Luther, in 1533, testifies to their purity of doctrine, and Melanchthon commends their discipline. They were dispersed during the religious wars of Germany in the 17th century.

BOKHARA, the ancient Sogdiana, after successively forming part of the empires of Persia, of Alexander, and Bactriana, was conquered by the Turks in the 6th century, by the Chinese in the 7th, and by the Arabs about 705. After various changes of masters it was subdued by the Uzbek Tartars, its present possessors, in 1505. The British envoys, colonel Stoddarf and captain Conolly, were murdered at Bokhara, the capital, by the khan, about June, 1843. In the war with Russia, begun in 1866, the emir's army was defeated several times in May, ct seg. Peace was made 11 July, 1867. The Russians were again victors, 25 May, 1868, and occupied Samarcand the next day. Further conquests were made by the Russians, and Samarcand was secured by treaty, Nov. 1868. BONES. The art of softening bones was discovered about 1688, and they were used in the cutlery manufacture, &c., immediately afterwards. The declared value of the bones of cattle and of other animals, and of fish (exclusive of whale-fins) imported into the United Kingdom from Russia, Prussia, Holland, Denmark, &c., amounted to 363,613l. in 1851, to 628,535l. in 1870, and to 741,809l. in 1877. Bone-dust has been extensively employed in manure since the publication of Liebig's researches in 1840.

BONE-SETTING cannot be said to have been practised scientifically until 1620.

BONN, a town on the Rhine (the Roman Bonna), was in the electorate of Cologne. It has been frequently besieged, and was assigned to Prussia in 1814. The academy founded by the elector in 1777, made a university, 1784; abolished by Napo-leon; re-established and enlarged 1818. Here Albert, our late prince consort, was entered as a student, May, 1837.

BOOK (Anglo-Saxon, boc; German, buch). Books were originally made of boards, or the inner bark of trees: afterwards of skins and parchment. Papyrus, an indigenous plant, was adopted in Egypt. Books with leaves of vellum were invented by Attalus, king of Pergamus, about 198 B.C., at which time books were in volumes or rolls. The MSS. in Herculaneum consist of papyrus, rolled and charred and matted together by the fire, and are about nine inches long, and one, two, or three inches in diameter, each being a separate treatise. The most ancient books are the Pentateuch of Moses and the poems of Homer and Hesiod. The first PRINTED BOOKS (see Printing) were printed on one side only, the leaves being pasted back to back.

BOOK-KEEPING. The system by doubleentry, called originally Italian book-keeping, was taken from the course of algebra published by Burgo, in the 15th century, at Venice. John Gowghe, a printer, published a treatise "on the kepyng of the famouse reconynge . . Debitor and Creditor," London, 1543. This is our earliest work on book-keeping. James Peele published his Book-keeping in 1569. John Mellis published "A Briefe Instruction and Manner how to Keepe Bookes of Accompts," in 1588. Improved systems were published by Benjamin Booth in 1789 and by Edw. Thos. Jones in 1821 and 1831.

BOOKSELLERS, at first migratory like hawkers, became known as stationarii, from their practice of having booths or stalls at the corners of streets and in markets. They were long subject to vexatious restrictions, from which they were freed in 1758.

The earliest bookseller's catalogue is said to be that published by Andrew Maunsell, of Lothbury, dedicated to Queen Elizabeth, 1505 "Booksellers' Provident Institution" founded 1837; "Retreat" Abbot's Langley, Herts, 1843.

BOOKSELLERS' ASSOCIATION. The chief publishers in London formed themselves into an association and fixed the amount of discount to be allowed, 29 Dec. 1829, and for some years restricted the retail booksellers from selling copies of works under the full publishing price. A dispute arose as to the right of the latter to dispose of books which had become theirs by purchase, at such less profit as they might deem sufficiently remunerative. The dispute was referred to lord chief justice Campbell, at Stratheden House, 14 April, 1852. His lordship gave judgment against the association, which led to its dissolution, 19 May following.

BOOTHIA FELIX, a large peninsula, N.W. point of America, discovered by sir John Ross in 1830, and named after sir Felix Booth, who had presented him with 20,000l. to fit out his polar expedition. Sir Felix died at Brighton in Feb. 1850.

BOOTS, said to have been the invention of the Carians, were mentioned by Homer, 907 R.C., and frequently by the Roman historians. A variety of forms may be seen in Fairholt's "Costume in England." An instrument of torture termed "the boot" was used in Scotland upon the covenanters about 1666.

BORAX (Boron), known to the ancients, used in soldering, brazing, and casting gold and other metals, was called chrysocolla. Borax is produced naturally in the mountains of Thibet, and was brought to Europe from India about 1713. Homberg in 1702 discovered in borax boracic acid, which latter in 1808 was decomposed by Gay-Lussac, Thénard, and H. Davy, into oxygen and the previously unknown element, boron. Borax has lately been found in Saxony. It is now largely manufactured from the boracic acid found by Hæfer to exist in the gas arising from certain lagoons in Tuscany; and an immense fortune has been made by their owner M. Lardarel since 1818.

BORDEAUX (W. France), the Roman Burdigalla, in Aquitania, was taken by the Goths, 412; by Clovis, 508. It was gained by Henry II. on his marriago with Eleanor of Aquitaine, 1151. Edward the Black Prince brought John, king of France, captive to this city after the battle of Poietiers, 19 Sept. 1356, and here held his court eleven years: his son, our Richard II., was born at Bordeaux, 1366. After several changes Bordeaux finally

surrendered to Charles VII. of France, 14 Oct. 1453. The fine equestrian statue of Louis XV. was erected in 1743. Bordeaux was entered by the victorious British army after the battle of Orlnes, fought 27 Feb. 1814.—13 vessels were burnt and others injured in the port, through the ignition and explosion of petroleum spirit, 28 Sept. 1869. The French delegate government and the representatives of foreign powers removed here from Tours, 11 Dec. 1870. M. Gambetta remained for a time with the army of the Loire. By the "pacto do Bordeaux," between the different parties of the national assembly, M. Thiers became chief of the executive power, 17 Feb. 1871. The French Association for the Advancement of Science held its first meeting here, 5 Sept. 1872; M. Quatrefages, president.

Burgesses were first admitted into the Scottish parliament by Robert Bruce, 1326; and

BOSCOBEL, near Donington, Shropshire. Charles II. (after his defeat at Worcester, 3 Sept. 1651), disguised in the clothes of the Pendrills, remained from 4 to 6 Sept. at White Ladies; on 7 and 8 Sept. he lay at Boscobel house, near which exists an oak, said to be the scion of the Royal Oak in which the king was part of the time hidden with col. Careless. Sharpe. The "Boscobel Tracts" were first published in 1660. In 1801 Mr. F. Manning published "Views," illustrating these tracts. W. H. He was defeated by the Turks in 1380, and became their vassal. Bosnia was incorporated with Turkey in 1463. Many efforts have been made by the Bosnians to recover their independence. A rebellion, begun in 1840, was quelled by Omar Pasha in 1851. The Bosnians joined the insurgents in Herzegovina, Sept. 1875; revolt was subdued, Aug. 1877. Bosnia and Herzegovina are to be occupied and administered by the Austro-Hungarian government, in conformity with the Berlin treaty; signed, 13 July, 1878. The Austrian occupation was fiercely resisted by the begs, and other insurgents, said to have been supported by Turkish soldiers. The Austrians were generally successful, and entered Seravejo, the capital, 19 Aug. 1878. See Additions.

BOTANY. Aristotle is considered the founder of the science (about 347 B.C.). Historia Plantarum of the science (about 347 B.C.). Instoria Frantarium of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the 15th century. Fuchsius, Bock, Bauhin, Gesalpinus, and others, wrote between 1535 and 1600. The system and arrangement of the great Linneaus was made known about 1735; and Jussieu's system, founded on Tournefort's, and called "the natural system," in 1788. At Linneaus's death. 1778. the species of in 1758. At Linnæus's death, 1778, the species of plants actually described amounted in number to 11,800. The number of species now recorded cannot fall short of 100,000. J. C. Loudon's "Encyclopadia of Plants," a most comprehensive work, first appeared in 1829. De Candolle's "Prodromus appeared in 1829. The Contability" (of which Systematis Naturalis Regni Vegetabilis" (of which Vol. I. appeared in 1818), is now complete (1870). BOTANY BAY, Australia, discovered by captain Cook, 28 April, 1770, received its name from the great variety of plants growing on the shore. It was fixed on for a colony of convicts from Great Britain. The first governor, captain Arthur Phillip, who sailed from England in May, 1787, arrived at the settlement in Jan. 1788. The colony was eventually established at Port Jackson, about thirteen miles to the north of the bay; see New South Wales, and Transportation.

BOTHWELL BRIDGE, Lanarkshire. The Scotch covenanters, who took up arms against the intolerant government of Charles II., and defeated the celebrated Claverhouse at Drumclog, I June, 1679, were totally routed by the earl of Monmouth at Bothwell Bridge, 22 June, 1679, and many prisoners were tortured and executed.

BOTTLE-CONJURER. In accordance with a wager, a person having advertised that he would jump into a quart bottle at the Haymarket theatre, on 16 Jan. 1749, the house was densely crowded and besieged by thousands anxious to gain ad-mitance. The pickpockets had a rich harvest, and the duped crowd nearly pulled down the edifice.

BOTTLES in ancient times were made of other. The art of making glass bottles and drinking-glasses was known to the Romans at least before 79; for these articles and other vessels have been found in the ruins of Pompeii. Bottles were made in England about 1558. A bottle which contained two logsheads was blown, we are told, at Leith, in Scotland, in Jan. 1747-8; see Glass.

BOUILLON, Belgium, formerly a duchy, was sold by Godfrey its ruler, to Albert, bishop of Liége, to obtain funds for the crusade, 1095. The Bourbon family fled from Kaples (6 Sept. 1860), and Francis II lost his kingdom; expelled from Spain, Sept. 1868; restored by Alfonso XII 31 Dec. 1874; see France, Spain, Naples, Ocleans, Parma, Condé, and Legitimists

It surrendered to the British, under admiral Rowley, 21 Sept. 1809, and was restored to France in 1815. Alison. An awful hurricane in Feb. 1829, did much mischief. Bourbon was named "l'Ile de la Réunion" in 1848; see Mauritius.

BOURDEAUX, see Bordeaux.

BOURIGNONISTS, a sect founded by Antoinette Bourignon, who, in 1658, took the Augustine habit and travelled in France, Holland, England, and Scotland; in the last she made many converts about 1670. She maintained that Christianity does not consist in faith and practice, but in inward feeling and supernatural impulse. A disciple named Court left her a good estate. She died in 1680, and her works, 21 volumes 8vo, were published 1686.

BOUVINES (N. France), the site of a desperate battle, 27 July, 1214, in which Philip Augustus of France was victorious over the emperor Otho and his allies, consisting of more than 150,000 men. The counts of Flanders and Boulogne were taken prisoners, and the earl of Salisbury brother of king John.

BOX-TREE, indigenous to this country, and exceedingly valuable to wood-engravers. In 1815 a large box-tree at Box-hill, Surrey, was cut down, and realised a large sum. Macculloch says, that "the trees were cut down in 1815, and produced upwards of 10,000!." About 1820 the cutting of all the trees on the hill produced about 6000!.

BOYDELL'S LOTTERY for his Shakspeare gallery of paintings got up (1786), by alderman Boydell, lord mayor of London. Every ticket was sold at the time the alderman died, 12 Dec. 1804, before the decision of the wheel.

BOY-BISHOP. During the middle ages a choir-boy was frequently elected on St. Nicholas' day, 6 Dec., and held office till the 28th. The custom was suppressed in England in July, 1542; but lingered for some time after.

BOYLE LECTURES, instituted by his will (18 July, 1691), by Robert Boyle (son of the great carl of Cork), a philosopher, distinguished by his genius, virtues, and benevolence, who died 30 Dec. 1691. Eight lectures (in vindication of the Christian religion) are to be delivered. The office of lecturer is tenable for three years.

BOYNE, a river in Ircland, near which William III. defeated his father-in-law, James II., I July, 1690. The latter lost 1500 (out of 30,000) men; the Protestant army lost about a third of that number (out of 30,000). James fled to Dublin, thence to Waterford, and escaped to France. The duke of Schomberg was killed by mistake by his own soldiers as he was crossing the river, and here also was killed the rev. George Walker, who defended Londonderry, in 1689. Near Drogheda is a splendid obelisk, 150 feet in height, creeted in 1736 by the Protestants of the empire in commemoration of this victory.

BRABANT, part of Holland and Belgium, an ancient duchy, part of Charlemagne's empire, fell to his son Charles, 806. It became a separate duchy (called at first Lower Lorraine) in 959. It descended to Philip II. of Burgundy, 1429, and in regular succession to the emperor Charles V. In the 17th century it was held by Holland and Austria, as Dutch Brabant and the Walloon provinces, and underwent many changes through the

wars of Europe. The Austrian division was taken by the French in 1746 and 1794. It was united to the Netherlands in 1814, but South Brabant was given to Belgium, 1830. The heir of the throne of Belgium is styled duke of Brabant; see Belgium.

BRADSHAW'S RAILWAY GUIDF was first published by Mr. G. Bradshaw, assisted by Mr. W. J. Adams, in Dec. 1841. He had previously published occasionally a Railway Companion. The Continental Bradshaw was established in 1848.

BRAGANZA, a city in Portugal, gave title to Alfonso, natural son of John I. of Portugal (in 1422), founder of the house of Braganza. When the nation, in a bloodless revolution in 1640, threw off the Spanish yoke, John, duke of Braganza, was called to the throne as John IV., and his descendants now reign over *Portugal* and *Brazil* (which see).

BRAHMINS, Hindoo priests, the highest of the four castes. Pythagoras is thought to have learned from them his doctrine of the Metempsychosis; and it is affirmed that some of the Greek philosophers went to India on purpose to converse with them. The Brahmius derive their name from Brahmah, one of the three beings whom God, according to their theology, created, and with whose assistance he formed the world. See Vedas.

BRAINTREE CASE (in Essex) was decided in 1842 by Dr. Lushington, who determined that a minority in a parish vestry cannot levy a church rate.

BRAKES, see under Railways.

BRAMHAM (W. R. York): near here the carl of Northumberland and lord Bardolf were defeated and slain by sir Thomas Rokeby, the general of Henry IV., 19 Feb. 1408; and Fairfax was defeated by the royalists under the earl of Newcastle, 29 March, 1643.

BRANDENBURG, a city in Prussia, founded by the Slavonians, who gave it the name of Banber, which signified Guard of the Forest, according to some; others explain the name as Burg, or city, of the Brenns. Henry I., surnamed the Fowler, after defeating the Slavonians, fortified "Brannibor," 926, as a rampart against the Huns, and bestowed the government on Sigefroi, count of Ringelheim, with the title of margrave, or protector of the marches or frontiers. The emperor Sigismund gave perpetual investiture to Frederick IV. of Nuremburg, of the house of Hohenzollern, ancestor of the royal family of Prussia, made elector in 1417. For a list of the margraves since 1134, see Prussia.

BRANDENBURG HOUSE, Hammersmith, see Queen Caroline.

BRANDY (German Branntwein, burnt wine), the spirit distilled from wine. Alcohol appears to have been known to Raymond Lully in the 13th century, and to have been manufactured in France early in the 14th. It was at first used medicinally, and miraculous cures were ascribed to its influence. In 1852, 3,959,452; in 1806, 5,621,930; in 1870, 7,912,965; in 1874, 3,378,057; in 1876, 7,913,002; in 1877, only 2,962,697 gallons were imported into the United Kingdom. It is now largely manufactured in Britain.

BRANDYWINE, a river in N. America, near which a battle took place between the British, under Howe, and the Americans under Washington, in which the latter (after a day's fight) were defeated with great loss, 11 Sept. 1777. Philadelphia fell into the possession of the victors.

BRASS. That mentioned in the Bible was most probably bronze. When Lucius Munnius burfit Corinth to the ground, 146 n.c., he found immense riches, and during the confagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as Corinthian Brass. This is well doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper. Du Fresnoy. Some of the English sepulchral engraved brasses are said to be as old as 1277; a white brass produced by Mr. P. M. Parsons, about 1875.

BRAURONIA, festivals in Attica, at Brauron, where Diana had a temple. The most remarkable that attended these festivals were young virgins in yellow gowns, dedicated to Diana. They were about ten years of age, and not under five; and therefore their consecration was called "dekatenein," from deka, ten; 600 n.c.

BRAVO CASE. Mr. Charles Delauncy Turner Bravo, barrister, died suddenly and mysteriously (at Balham, Surrey), suicide suspected, 18 April, 1876; open verdict at inquest; new inquest ordered, 26 June, 1876; began 10 July. Verdict: "Wilful murder by administration of tartar emetic; but not sufficient evidence to fix the guilt upon any person," 11 Aug. 1876.

BRAY, Berks. Fuller says that its vicar, Symon Symonds, was twice a papist and twice a Protestant—in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth (1533—1558). Upon being called a turn-coat, he said he kept to his principle, that of "of living and dying the vicar of Bray." The modern song refers to the political changes of the 17th and 18th centuries.

BRAY'S ASSOCIATES for founding clerical libraries and supporting negro schools. This society began in 1723, by Dr. Thomas Bray, rector of Sheldon, appointing trustees to expend 900l. bequeathed by Mr. D'Allone for the instruction of negroes. In 1733 these trustees received their present name, and their fund was increased by legacies in 1767 and 1768.

Dr. Bray, who was one of the founders of the Society for Propagating the Gospel, and who had acted energetically as commissary in Maryland for the bishop of Loudon, about 1696, died 15 Feb. 1730, bequeathing part of his books to Sion College and part to found a parochial library, under certain conditions, complied with at Maidstone; and also money for other religious purposes. The associates assist schools and libraries in the colonies, and parochial libraries at home.

BRAZEN BULL, said to have been contrived

by Perillus, at Athens, for Phalaris, tyrant of Agrigentum, 570 B.c. It had an opening in the side to admit the victims, and a fire was kindled undermenth to roast them to death; their groaus resembled the roaring of a bull. Phalaris admired the invention, but ordered the artist to make the first experiment. The Agrigentes revolted against Phalaris, cut his tongue out, and roasted him in the brazen bull, 549 B.C.

BRAZII., an empire in South America, was discovered by Vincent Pinzon in Feb. 1500. Pedro Alvarez de Cabral, a Portuguese, driven upon its coasts by a tempest, April following, called it the land of the Holy Cross; but it was subsequently named Brazil, on account of its red wood. The French having seized on Portugal in 1807, the royal family and nobles embarked for Brazil, and Roman Catholic; but others are tolerated. Population, Aug. 1872, 10,093,978 (above 1½ million slaves and aborigines); see Portugal.

BREAD. Ching-Noung, the successor of Fohi, is reputed to have been the first who taught men (the Chinese) the art of husbandry, and the method of making bread from wheat, and wine from rice, 1998 B.C. Univ. Hist. Baking of bread was known in the patriarchal ages: see Exodus xii. 15. lt became a profession at Rome, 170 B.C. After the conquest of Macedon, 148 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained a monopoly. During the siege of Paris by Henry IV., owing to famine, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1594. Hénault. In the time of James I., barley bread was used by the poor; and now in Iceland, cod-fish, beaten to powder, is made into bread; potato-bread is used in Ireland. The London Bakers' Company was incorporated in 1307. Bread-street was once the London market for bread. Until 1302, the London bakers were not allowed to sell any in their own shops. Store. Bread was made with yeast by the English bakers in 1634. In 1856 and 1857 Dr. Dauglish patented a mode of making "aerated bread," in which carbonic acid gas is combined with water and mixed with the flour, and which is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1862 a company was formed to encourage Stevens' bread-making machinery. act for regulating bakehouses was passed in July, 1863. A strike of the journeyman bakers of the metropolis, 23 Sept., was settled by concessions, 9 Oct. 1872.

The chief justiciary, and a baker commissioned by the king, had the inspection of the assize. Matthew Paris. The assize was further regulated by statute in 51 Hen 111. 1266, and 8 Anne, 1710. Bread Act, Ireland, placing its sale on the same footing as in England, 1 Vict. 1838. Bread was directed to be sold by weight in London in 1822; the

May, 1875

statute "Assessa Panis" was repealed in 1824; and the sale of bread throughout the country was regulated in 1846.

BREAD-FRUIT TREE, a native of the South Sea islands. A vessel under captain Bligh was fitted out to convey some of these trees to various British colonies in 1789 (see Bounty), and again in 1791. The number taken on board at Otaheite was 1151. Some were left at St. Helena, 352 at Jamaica, and five were reserved for Kew Gardens, 1793. The tree was successfully cultivated in French Guiana, 1802.

BREAKWATERS. The first stone of the Plymouth breakwater was lowered 12 August, 1812. It stretches 5280 feet across the sound, is 360 feet in breadth at the bottom and more than 30 at the top, and consumed 3,660,000 tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half sterling. The architects were Mr. John Rennie and his son sir John. The first stone of the lighthouse on its western extremity was laid 1 Feb. 1841. Breakwaters have been constructed at Holyhead, Portland, Pover, &c.

BREAST-PLATE. One was worn by the Jewish high priest, 1491 B.C. (Exod. XXXIX.) Goliath "was armed with a coat of mail," 1063 B.C. (I Sam. XVII.) Breast-plates dwindled to the diminutive gorgets. Ancient breast-plates are mentioned as made of gold and silver.

BRECHIN, Scotland; sustained a siege against the army of Edward III., 1333. The battle of Brechin or Huntly-hill was fought between the earls of Huntly and Grawford, the latter defeated, 18 May, 1452. The see of Brechin was founded by David I. in 1150. One of its bishops, Alexander Campbell, was made prelate when but a boy, 1556. The bishopric, discontinued soon after the revolution in 1688, was revived in 1731.

BREDA, Holland, was taken from the Spaniards by prince Maurice, of Nassau, in 1500; retaken by the Spaniards, under Spinola, June, 1625; and by the Dutch, Oct. 1637. The "Compromise of Breda" was a proposal to Philip II., deprecating his harsh measures in the Netherlands, presented and refused in 1566. Our Charles II, resided here at the time of the restoration, and here he issued his declaration of a free general pardon, 4 April, 1660; see Restoration. Breda was taken by the French in 1793. The French garrison was expelled by the burgesses in 1813.

BREECHES. Among the Greeks, this garment indicated slavery. It was worn by the Dacians, Parthians, and other northern nations; and in Italy, it is said, was worn in the time of Augustus Casar. In the reign of Honorius, about 394, the braccarii, or breeches-makers, were expelled from Rome. The "Geneva Bible," termed the "Breeches Bible" (from the rendering in Gen. iii. 7), published 1560.

BREECH-LOADERS, see under Cannon and Firearms.

BREHONS, ancient judges in Ireland, are said to have administered justice with religious impartiality, but in later times with a tendency to love of country. It was enacted by the statute of Kilkenny, that no English subject should submit to the Brehon laws, 40 Edw. III., 1365. These laws, however, were recognised by the native Irish till 1650. A translation of them was proposed in 1852, and a commission appointed. The publication of the "Ancient Laws of Ireland" by the government, began 1865.

BREITENFELD, see Leipsic.

BREMEN (N. Germany), said to have been founded in 788, and long an archbishopric, and one of the leading towns of the Hanseatic League, was allowed a seat and a vote in the college of imporial cities in 1640. In 1648 it was secularised and erected into a duchy and held by Sweden till 1712, when it was taken possession of by Denmark, by whom it was sold to Hanover in 1731. It was taken by the French in 1757, who were expelled by the Hanoverians in 1758. Bremen was annexed by Napoleon to the French empire in 1810; but its independence was restored in 1813, and all its old franchises in 1815. It became a member of the North German Confederation in 1866. International agricultural exhibition opened 13 June, 1874. Population of the province, 1871, 122,402; see Hunse Towns. BRENNEVILLE, N.W. France. Here Henry I. of England defeated Louis VI. of France, who supported William Cliton, son of Robert, duke of Normandy, 20 Aug. 1119.

BRENTFORD, county town of Middlesex. Here Edmund Ironside defeated the Danes, May, 1016. It was taken by Charles I., after a sharp fight, 12 Nov. 1642.

BRESCIA, N. Italy (the ancient Brixia), became important under the Lombards, and suffered by the wars of the Italian Republics, being attached to Venice. It was taken by the French under Gaston de Foix, Feb. 1512, when it is said 40,000 of the inhabitants were massacred. It was retaken 26 May, 1516. It surrendered to the Austrian general Haynau, 30 March, 1849, on severe terms. It was annexed to Sardinia in 1849.

BRESLAU, in Silesia, was burnt by the Mongols in 1241, and conquered by Frederick II. of Prussia, Jan. 1741. A fierce battle took place here between the Austrians and Prussians, the latter under prince Bevern, who was defeated 22 Nov. 1757. Breslau was taken; but was regained 21 Dec. same year. It was besieged by the French, and surrendered to them, Jan. 1807, and again in 1813.

BRESSA PRIZE. Dr. Cesare Antonio Bressa, by will of 4 Sept. 1835, bequeathed property to the Royal Academy of Sciences, Turin, to give a prize every two years for some important discovery or valuable work published relating to physics, natural history, geography, history, statistics, &c. The first prize (about 1200L), to be awarded in 1879 to a foreigner; the second to an Italian, and so on alternately.

BREST, a seaport, N. W. France, was besieged by Julius Casar, 54 n.c.—possessed by the English, A.D. 1378—given up to the duke of Britanny, 1390. Lord Berkeley and a British fleet and army were repulsed here with dreadful loss in 1694. The magazine burnt, to the value of some millions of pounds sterling, 1744. The marine hospitals, with fifty galley slaves, burnt, 1766. The magazine again destroyed by fire, 10 July, 1784. From this great depôt of the French navy, numerous squadrons were equipped against England during the late war, among them the fleet which lord Howe defeated on 1 June, 1794. England maintained a large blockading squadron off the harbour from 1793 to 1815; but with little injury to France. It is now a chief naval station, and is considered impregnable. The British fleet visited Brest, Aug. 1865.

BRETAGNE, sec Brittany.

BRETHREN, see Bohemian and Plymouth Brethren.

BRETIGNY, PEACE OF, concluded with France, 8 May, 1360, by which England retained Gascony and Guienne, and acquired other provinces; renounced her pretensions to Maine, Anjou, Touraine, and Normandy; was to receive 3,000,000 crowns, and to release king John, long a prisoner. The treaty not being carried out, the king remained and died in England.

BRETON, see Cape Breton.

BRETWALDA (wide-ruling chief), one of the kings of the Saxon heptarchy, chosen by the others as a leader in war against their common enemies. The following are mentioned by Bede (492 to 642), Ella, king of Sussex; Ceawlin of Wessex; Ethelbert of Kent; Redwald of East Anglia; Edwin, Oswald, and Oswy of Northumber-Anglia; Edwin, Oswald, and Oswy of Northumberland. The title was bestowed upon Egbert, 828; see Britain.

BREVIARY (so called as being an abridgment of the offices used in the Roman Catholic service), contains the seven canonical hours, viz., matins or lauds (began about 3 a.m.), primes (about 6), tierce (about 6), sexts (about 12), nones (about 3 p.m.), vespers (about 4), complines (about 7). The breviary is ascribed to pope Gelasius I. about 492. It was first called the custos, and afterwards the breviary; came into use among the ecclesiastical orders about 1080; and was reformed by the councils of Trent and Cologne, and by Pius V., Urban VIII., and other popes. The quality of type in which the breviary was first printed gave the name to the printing type called brevier.

BREWERS are traced to Egypt. Brewing was known to our Anglo-Saxon ancestors. *Tendal*. "One William Murle, a rich maltman or bruer, of Dunstable, had two horses all trapped with gold, 1414." Stow. In Oct. 1851, there were 2305 licensed brewers in England, 146 in Scotland, and 97 in Ireland; total, 2548; these are exclusive of tetail and intermediate brewers. There were 40,418 licensed brewers in the United Kingdom in 1858; the revenue from whom to the state was in that year 81,0301. In 1858 in England there were 205 great browers; see Ale, Porter.

BRIAR'S CREEK (N. America), near which the Americans, 2000 strong, under general Ashe, were totally defeated by the English under general Prevost, 3 March, 1779.

BRIBERY forbidden (Deut. xvi. 19). Samuel's sons were guilty of it, 1112 B.C. (1 Sam. viii. 3.) Thos. de Weyland, a judge, was banished for bribery in 1288; he was chief justice of the common pleas. William de Thorpe, chief justice of the king's bench, was hanged for bribery in 1351. Another judge was fined 20,000. for the like offence, 1616. Mr. Walpole, secretary-at-war, was sent to the Tower for bribery in 1712. Lord Strangford was suspended from voting in the Irish house of lords, for soliciting a bribe, Jan. 1784.

BRIBERY AT ELECTIONS. In 1854 an important act was passed consolidating and amending previous acts relating to this offence, from 7 Will. III. (1695) to 5 & 6 Vict. c. 184.

The duties and drawbacks of excise on bricks were repealed in 1850. In 1839 Messrs. Cooke and Cunningham brought out their machinery by which, it is said, 18,000 bricks may be made in ten hours. Messrs. Dixon and Corbett, near Newcastle, in 1861, were making bricks by steam at the rate of 1500 per hour. The machinery is the invention of Clayton & Co., London.

BRIDEWELL, once a palace of king John, near Fleet-ditch, London, 1210, was given to the city for a workhouse by Edward VI., 1553.* The New Bridewell prison, erected in 1829, was pulled down in 1864; that of Tothill-fields was rebuilt in 1831.

BRIDGES were first of wood. There are ancient store bridges in China. Abydos is famous for the bridge of boats which Xerxes built across the Hellespont, 480 n.c. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built m A.D. 105. Brotherhoods for building bridges existed in S. France about 1180. The Devil's bridge in the Canton of Uri was built on two high rocks; and many stories have been invented to account for it. At Schaffhausen an extraordinary

bridge was built over the Rhine, 400 feet wide: there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it; a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. The bridge was destroyed by the French in 1799.

BRIDGEWATER, Somersetshire, was incorporated by king John, in 1200. In the war between Charles I. and the parliament, the king's forces burnt part of the town, 1643. Here stood an ancient castle in which the ill-advised duke of Monmouth lodged when proclaimed king in 1685. The town was disfranchised for bribery, 1870.

BRIDGEWATER CANAL, the first great work of the kind in England, was begun by the duke of Bridgewater, the father of canal navigation in this country, in 1759, and opened 17 July, 1761. James Brindley was the engineer. It commences at Worsley, seven miles from Manchester; and at Barton Bridge is an aqueduct which, for upwards of 200 yards, conveys the canal across the river Irwell. The length of the canal is about twentynine miles.

BRIDGEWATER TREATISES. The rev. Francis, carl of Bridgewater, died in April, 1829, leaving by will 8,000. to be given to the author or authors, appointed by the president of the Royal Society, who should write an essay "on the power, wisdom, and goodness of God, as manifested in the creation." The essays (by sir Charles Bell, Drs. T. Chalmers, John Kidd, William Buckland, William Prout, Peter M. Roget, and the revs. William Whewell and William Kirby) were published 1833-35.

BRIEFS are the letters of the pope despatched to princes and others on public affairs, and usually written short, without preface or preamble, and on paper; in which particulars they are distinguished from bulls. The latter are ample, and written on parchment. Briefs are scaled with red wax and the seal of the fisherman, or St. Peter in a boat, and always in the presence of the pope. The queen's letters, called "briefs," authorising collections in churches for charitable purposes are now discontinued. A lawyer's brief is an abridgment of his client's case.

BRISTOL (W. England), built by Brennus, a British prince, 380 B.C., is mentioned in A.D. 430 as a fortified city. It was called Caer Oder, a city in the valley of Bath; and, sometimes Caer Brito, the British city, and by the Saxons Brightstowe, pleasant place. Gildas and Nennius speak of Bristol in the 5th and 7th centuries. From the 12th to the 18th century it was, next to London, the most flourishing port in England; it has since been surpassed by Liverpool. See under Orphan-houses.

BUCCANEERS, cruel piratical adventurers, French, English, and Dutch, who commenced their depredations on the Spaniards of America soon after the latter had taken possession of that continent and the West Indies. Their numbers were much in-creased by a twelve years' truce between the Spaniards and Dutch in 1609, when many of the discharged sailors joined the buccaneers. The first levy of ship-money in England in 1635 was to defray the expense of chastising these pirates. The principal commanders of the first buccaneers were Montbar, Lolonois, Basco, and Morgan. Van Horn, of Ostend, captured Vera Cruz, 1603; Morgan took Panama, 1670; Gramont seized Campeachy, 1685; and Pointis took Carthagena, 1697; all gained enormous booty. The buccameer confederacy was broken up through the peace of Ryswick, 10 Sept. 1697.

In 1761 it Shetheld, duke of Buckingham, in 1705. In 1701 was bought by George III., who in 1775 settled it on his queen, Charlotte. She made it her town residence; and here all her children, except the cldest, were born. Here were married the duke of York and princess Frederica of Prussia, in 1701; the duke of Gloucester and princess Mary, 1816; the mine of Here. Hereburg and princess Eligathe prince of Hesse-Homburg and princess Eliza-beth, 1818; and the duke of Cambridge and princess of Hesse the same year. Further improvements were made in 1853. The marble arch, taken down from the exterior of this palace, was re-creeted at Cumberland-gate, Hyde-park, 29 March, 1851.

BUCKLERS, used in single combat, are said to have been invented by Prectus and Acricius of Argos, about 1370 B.c. When Lucius Papirius defeated the Samnites, he took from them bucklers of gold and silver, 309 B.C.

BUCKLES were worn instead of shoc-strings in the reign of Charles II., and soon became fashionable and expensive; about 1791 they fell out of use. Ornamental buckles became fashionable, 1873.

BUDA (or OFEN), the ancient Aquincum, on the W. bank of the Danube opposite Pesth, and with it (termed Buda-Pesth) the capital of Hungary. It was taken by Churlemagne in 799; and sacked by Solyman II. after the battle of Mohatz, when the Hungarian king, Louis, was killed, and 200,000 of his subjects carried away captives, 1526. Buda was sacked a second time, when the inhabitants were put to the sword, and Hungary was annexed to the Ottoman empire, 1541. Retaken by the Imperialists, under the duke of Lorraine, and the Mahometans delivered up to the fury of the soldiers, 1686. It suffered much in 1848; was entered without resistance by the Austrians, 5 Jan. 1849; stormed, 20 May; given up by Russians to Austrians, July, 1849. BUDDHISM, the chief religion in Asia beyond the Ganges, and in China, Japan, and Ceylon, originated with Sakya Muni, generally termed Buddha, or "the enlightened," a prince of Kapalivastu in Central India, 6th or 7th century, s.c. Disgusted with the behaviour of the Brahmins, he retired from the world for a time, and on coming forth, preached a new religion so successfully that it predominated in India till the 10th century, A.D. Buddhism incul-entes strict morality; it forbids killing, stealing, adultery, lying, and drunkenness, and every shade of these vices, and asserts charity or love to be the source of all virtues. Some writers assert that Buddhism includes belief in the transmigration of souls, and the absorption of good souls into God himself, from whom they have emanated; others reckon annihilation or eternal sleep among Buddhist tenets. A form of Buddhism, termed the religion of Fo, exists in China, beside the system of Confucius and Laot-se. It is said to have been introduced in the reign of Ming-ti, A.D. 68-81. "Le Bouddha et ses Religions," by M. J. B. St. Hilaire, was published in 1860. The Buddhists in the world are estimated at 455,000,000.

BUDE LIGHT (so named from Bade in Cornwall, the residence of Mr. aft. sir Goldsworthy Gurney, its inventor), consists of two or more concentric argand gas-burners, one rising above another, which produce a most brilliant flame, like the petals of a rose. The illuminating powers were increased by subjecting manganese, &c., to the action of the flame, in order to produce oxygen and hydrogen gas. This light was patented 1839 and 1841.

BUDGET (from the French bongette, Latin bulga, a small bag), a term applied to the English chancellor of exchequer's annual statement of the finances of the country, from the documents having been formerly presented in a leather bag. The budgets of sir R. Peel in 1842 (including the incometax) and 1846 (free trade), and of Mr. Gladstone in 1860 (in connection with the treaty with France), are the most important in recent times. A surplus of about 6,000,000l. was announced by sir Stafford Northcote, 16 April, 1874. See Revenue.

BUENOS AYRES, a province of S. America, now part of the Argentine republic. The country was explored by Sebastian Cabot in 1526, and the

BUFFOONS were originally mountebanks in the Roman theatres. Their shows were discouraged by Domitian, and abolished by Trajan, 98; see Jesters.

BUILDING. In early times men dwelt in caves; wood and clay were the first building materials. Building with stone was early among the Tyrians. In Ireland a castle was built of stone at Tuam by the king of Connaught, in 1161; and it was "so new and uncommon as to be called the Wonderful Castle." Building with brick was introduced by the Romans into their provinces. Alfred encouraged it in England in 886. It was adopted by the earl of Arundel, about 1508, London being then almost wholly built of wood; see Architecture.

Building acts were passed by Elizabeth in 1562, 1580, and 1592, and by Charles II in 1667. Recent acts are very numerous The Building Act for the Metropolis, 7 & 8 Vict. c. 84 (1844), was amended in 1855, 1860, 1869, and 1871.

Building societies, formed to enable a person to purchase a house by paying money periodically to a society for a certain number of years, instead of

paying rent to a landlord, began about 1836, when an act was passed for their regulation; a new act was passed 30 July, 1874.

BULGARIA, the ancient Mosia Inferior, now part of European Turkey. The Bulgarians were a Slavonian tribe, who harassed the Eastern empire and Italy from 499 to 678, when they established a kingdom. They defeated Justinian II., 687; but were subdued, after several conflicts, by the emperor Basil, in 1018. After defeating them in 1014, and

taking 15,000 Bulgarian prisoners, he caused their eyes to be put out, leaving one eye only to every hundredth man, to enable him to conduct his countrymen home. The kingdom was re-established in 1186; but after several changes was conquered by Bajazet and annexed to the Ottoman empire, 1396. Bulgaria was a chief site of the Russo-Turkish war (which see), 1877-8.

BULL, or Edict of the Pope. The bulla is properly the seal, either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul; and on the other the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Pius V. published a bull against Elizabeth, 25 April, 1570; in 1571 bulls were forbidden to be promulgated in England. The bull Uniquenitus (beginning with this word) against the Jansenists was issued by Clement XI., 1713; confirmed by Benedict XIII., 1725. The Golden Bull of the emperor Charles IV., so called from its golden seal, was made the fundamental law of the German empire, at the dict of Nuremburg, 1356; see Brazen Bull. Pius IX. published an encyclical letter censuring modern errors, 8 Dec. 1864; see under Rome; see Stocks.

BULL-BAITING or BULL FIGHTING, was an amusement at Stamford in the reign of John, 1200; and at Tutbury, 1374. In the Sports of England, we read of the "Easter fierce hunts, when foaming boars fought for their heads, and lusty bulls and huge bears were baited with dogs;" and near the Clink, London, was the Paris, or Bear Garden, be celebrated in the time of Elizabeth for the exhibition of bear baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of the late Mr. Windham, who made a speech in favour of the custom, 24 May, 1802. It was made illegal in 1835; see Cruelty to Animals. Bullfights were introduced into Spain about 1260: abolished there, "except for pious and patriotic purposes," in 1784. Bull-fights are very common in Spain. A bullfight at Lisbon, attended by 10,000 spectators, on Sunday, 14 June, 1840; one took place at Havre, 5 July, 1868. Somewhat theatrical fights with Spanish bulls, at the Agricultural Hall, London, were stopped 28 March, 1870, for cruelty.

BULLETS of stone were in use, 1514. Iron ones are mentioned in the Fædera, 1550. Leaden bullets were made before the close of the 16th century. The conoidal cup rifle-ball was invented by capt. Minié, about 1833; a modification of this (conoidal but without cup), by Mr. Pritchett (1853), is used with the Enfield rifle. Other bullets have been since devised.

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1810, principally guided by Mr. Horner and Mr. (afterwards sir R.) Peel, established the conclusion, that paper money is always liable to be over-issued, and consequently depreciated, unless it be at all times immediately convertible into gold. This principle hus been adopted in British monetary arrangements. Value of bullion imported into Great Britain

in 1858: gold, 22,793,120l.; silver, 6,700,064l.; total, 20,493,190l.;—in 1868: gold, 17,136,177l.; silver, 7,716,418l.; total, 24,852,595l.—in 1870: gold, 18,806,728l.; silver, 10,648,940l.—in 1874: gold, 18,081,019l.; silver, 12,298,109l.; in 1876, gold, 23,475,075l.; silver, 13,578,269l.; ii: 1877, gold, 15,441,085l.; silver, 21,710,814l. See under Bank of England.

BULWER-CLAYTON TREATY, ratified 4 July, 1850, by which sir Henry Lytton Bulwer on behalf of the British, and Mr. Clayton on behalf of the American government, declared that neither should obtain exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty, and the connection of Great Britain with the Mosquito territory (which see), which were settled in 1857.

BUNDSCHUH, see Jacquerie.

BUNHILL-FIELDS (originally Bonhill-Field), a burial-ground near Finsbury-square, E. London, termed by Southey the "Campo Santo of the Dissenters;" first used in 1665. Here were interred Thomas Goodwin (1679), John Owen (1683), Isaae Watts (1748), John Bunyan (1688), George Fox, the Quaker (1690), general Flectwood, son-inlaw of Cromwell (1692), and Daniel De Foe (1731). Cunningham. An act for the preservation of the ground as an open space was passed, 15 July, 1867, and it was re-opened by the lord mayor, 14 Oct., 1869; and a monument to De Foe, subscribed for by boys and girls, was inaugurated, 16 Sept. 1870.

BUNKER'S HILL, more properly Breed's hill (near Boston, U.S.). Here the British (nearly 3000), after severe loss, compelled the revolted Americans (about 5000) to retreat, after a desperate conflict, 17 June, 1775. Ralph Farnham, who was present at the battle, died on 28 Dec. 1860, aged 10.1 years. He was introduced to the prince of Wales when in America. Centenary of the battle celebrated June, 1875.

BURFORD CLUB, the appellation given (according to Mr. Layer, the barrister, a conspirator, see Layer) by the Pretender and his agents to a pretended Jacobite club, of which lord Orrery was chairman, and lord Strafford, sir Henry Goring, carl Cowper, Mr. Hutcheson, the bishop of Rochester, sir Constantine Phipps, general Webb, lord Bingley, lord Craven, Mr. Dawkins, lord Scarsdale, lord Bathurst, Mr. Shippen, and lord Gower, were members. This story was set aside by the solemn declarations of lord Cowper and lord Strafford. The list of this club was published in the Weekly Journal, printed in Whitefriars; but when Read, the printer, was ordered to appear at the bar of the house, he absconded. March, 1722. Salmon.

BURGESSES, from the French Bourgeois, a distinction coeval in England with corporations. They were called to parliament in England, 1265; in Scotland in 1326; and in Ireland about 1365. Burgesses to be resident in the places they represented in parliament, I Hen. V. (1413); see Borough.

BURGHERS AND ANTI-BURGHERS. In 1732 Ebenezer Erskine and others seceeded from the church of Scotland. Differing in regard to the interpretation of the burgess oath, they divided into two sections with the foregoing names in 1747. In 1820 they were reunited as the United Associate Synod of the Secession church, which, on 13 May,

1847, joined the Relief church, together forming the United Presbyterian church.

BURGOS (Spain), the burial place of the Cid, 1999. Lord Wellington entered Burgos on 19 Sept. after the battle of Salamanca (fought 22 July, 1812). The castle was besieged by the British and allied army, but the siege was abandoned 21 Oct. same year. The fortifications were blown up by the French, 12 June, 1813.

BURGUNDY, a large province in France, derives its name from the Burgundians, a Gothic tribe who overran Gaul in 275, and were driven out by the emperor Probus: they returned in 287, and were defeated by Maximin. In 413 they established a Kingdom, comprising the present Burgundy, large parts of Switzerland, with Alsace, Savoy, Provence, &c. Gondiear, their leader, the first king. It was conquered by the Franks, 534.—The second kingdom, consisting of a part of the first, began with Gontran, son of Clotaire I. of France, in 561. The kingdom of Ailes, Provence, and Trans-Jurane Burgundy, were formed out of the old king-dom.—Duchty. In 877 Charles the Bald made his brother-in-law Richard the first duke of Burgundy. In 938, Hugh the Great, count of Paris, founder of the house of Capet, obtained the duchy. His descendant, Henry, on becoming king of France, conferred it on his brother Robert, in whose family it remained till the death of Philippe de Rouvre, without issue, in 1361. In 1363, king John of France made his fourth son, Philip, duke; see Austria and Germany.

BURIALS. Abraham buried Sarah at Machpelah, 1800 B.C., Gen. xxiii. Places of burial were consecrated under pope Calixtus I. in A.D. 210. The Greeks had their burial-places at a distance from their towns; the Romans near the highways; hence the necessity for inscriptions. The first Christian burial-place, it is said, was instituted in 596; burial in cities, 742; in conse-crated places, 750; in churchyards, 758. Many of the early Christians are buried in the catacombs at Rome ; see Catacombs, Cemeteries, and Dissenters.

His victims were killed by pressure or other modes of suffocation, and the bodies, which exhibited no marks of violence, were sold to the surgeons for dissection. He was executed at Edinburgh, 28 Jan. 1829. A monster named Bishop was apprehended in Nov. 1831, and executed in London 5 Dec. with Williams, one of his accomplices, for the murder of a poor friendless Italian boy, named Carlo Ferrari. They confessed to this and other similar murders.

In 1866, sites for buildings for the University of London and the Royal Academy were granted in the grounds of Burlington House. Our first dispute with this formidabl, power in 1795 was amicably adjusted by general Erskine. Hos-tilities were commenced by the British in 1824, and they took Rangoon on May 11. The fort and pagoda of Syriam were taken in 1825. After a short armistice, hostilities were renewed, I Dec. same year, and pursued until the successive victories of the British led to the cession of Arracan, and to the signature of peace, 24 Feb. 1826. For the events of this war, and of the war in 1851, see India. Pegu was annexed to our Indian empire, 20 Dec. 1852. The war ended 20 June, 1853.

Various amounts have been paid to Dr. W. L. Brown, to rev. J. B. Summer, afterwards archbishop of Canterbury, 1815; to rev. R. A. Thompson, and to Dr. J. Tulloch, 1855.

BURNING ALIVE was inflicted among the Romans, Jews, and other nations, and was counternanced by bulls of the pope; see Witches. Many persons have been burned alive as heretics. Sir William Sawtre, priest of St. Osyth, London, suffered 12 Feb. 1401. In the reign of Mary numbers were burned; see Protestants. Elizabeth Gaunt, an Anabaptist, was burnt at Tyburn for treason (concealing rebels under Monmouth), 23 Oct. 1682.

BURNING THE DEAD was practised among the Greeks and Romans, and Homer gives descriptions. It was very general about 1225 n.c., and was revived by Sylla about 78 n.c. It is still practised in parts of the East Indies, and has been advocated in this country by the eminent surgeon, sir Henry Thompson, and others, 1873; see Suttees, Barrows.

BURNING-GLASS AND CONCAVE MIR-RORS. Their power was known to Archimedes, and it is even asserted that by their aid he burnt a fleet in the harbour of Syracuse, 214 B.C. Their powers were increased by Settalla; Tschirnhausen, 1680; Buffon, 1747; and Parker and others more recently. The following experiments were made about 1800, with Mr. Parker's lens or burning mirror, which cost 700l., and is said to have been the largest ever made. It was sold to capt. Mackenzie, who took it to China, and left it at Pekin.

Lord Bacon gives instances of the resurrection of persons who had been buried alive; Duns Scotus being of the number. Butter forming an important article of commerce as well as food in these countries, various statutes have passed respecting its package, weight, and sale; the principal of which are the 36th & 38th Geo. CABBALA, a Jewish system of philosophy or theosophy, deriving its name from a Hebrew word, signifying reception or tradition, said to have been given by God to Adam, and transmitted from father to son by his descendants. It is said to have been lost at the Babylonian captivity (587 n.c.), but to have been revealed again to Ezra. Its supporters assert that the cabbalistic book "Sohar," or "Splendour," a mystic commentary on the Pentateuch, was first committed to writing by Simon Ben Jochai, A.D. 72-110. The true date of the books containing the cabbala is now considered to range from 9th to the 14th centuries, and their origin to be the mingling of talmudism with the Greek philosophy termed Neo-Platonism. Some of their dogmas are akin to Christian tenets, such as the trinity, the incarnation, &c. The cabbala exercised much influence upon the mental development of the Jews, and even captivated the greatest thinkers of the 16th and 17th centuries.

Previous to throwing open the trade, the number of hackney carriages was limited to 1200, when there were few omnibuses See Hackney Coaches.

Cah Strike —On 28 Jane, 1853, an act (called Mi. FitzRoy's act) was passed for "the better regulation of metropolitain stage and hackney carriages, and for prohibiting the use of advertising vehicles," by which the cab fares were reduced to 6d a mile. It came into operation 11 July, and on the 27th a general strike of the London cobinen took place. Much inconvenience was felt, and every kind of vehicle was employed to supply the deliciency. Some alterations having been made in the act, the cabs re appeared on the stands on the 30th.

The case of Alice O'Neal, an Irishwoman, who survived the section, which was performed by a female, is authenticated by Dr. Gabriel King, of Armagh, and surgeon Duncan Stewart, of Dungannon. In Jan. 1847, the operation was performed in St. Bartholomew's hospital, London, on a young woman of diminutive stature, under the influence of ether: but she died the next day. On o Dec. 1860, a similar operation was successfully performed by Dr. James Edmunds at Bethnal Green. On the continent the operation is said to have been more frequent and more successful. Cooper's Surgical Dictionary (ed. 1861) contains a table, which, out of 2009 cases, gives a mortality of 55.4 per cent. of the mothers and 29.45 per cent. of the children.

CALCIUM, the metallic base of lime, was discovered at the Royal Institution, London, by Humphry Davy in 1808.

CALCULATING MACHINES. To avoid errors in computing and printing logarithms and tables of figures, machines to calculate and print have been devised. Pascal, when nineteen years of age, invented one about 1650. The construction of Mr. C. Babbage's differential machine was commenced at the expense of government in 1821, and continued till 1833, when the work was suspended after an expenditure of above 15,000/. The portion completed was placed in the library of King's College, London; it is now at South Kensington. Professor Clifford, in his lecture at the Royal Institution, 24 May 1872, stated that Babbage expended 20,000l. upon his machines, and that the analytical machine was nearly finished, and would eventually be much used. In 1857, Messrs. E. and G. Scheutz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Scheutz brought their machine to England in 1854. It was bought for 1000/. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857, Messrs. Scheutz were engaged to make one for the British government, which is now completed. Mr. Wiberg's machine, exhibited at Paris, Feb. 1863, was much commended. Tables constructed by means of Scheutz's machine, and edited by Dr. W. Farre, were published by the government in 1864. Thomas de published by the government in 1864. Colmar's arithmometer, patented 1822 (?), exhibited at the International exhibitions, 1851 and 1862, is said to be in use in assurance offices. Geo. B. Grant described a simpler machine in the "American Journal of Science," Oct. 1874.

CALEDONIA (now Scotland). The name is supposed by some to be derived from Gacl, or Gaelmen or Giadel-doine, corrupted by the Romans. Tacitus, who died 90, distinguishes this portion of Britain by the appellation of Caledonia. Venerable Bede says that it retained this name until 258, when it was invaded by a tribe from Ireland, and called Scotia. The ancient inhabitants appear to have been the Caledonians and Piets, tribes of the Celts, who passed over from the opposite coast of Gaul. About the beginning of the 4th century of the Christian cra they were invaded (as stated by some authorities) by the Scuyths or Sey thins (since called Scots), who, having driven the Piets into the north, settled in the Lowlands, and gave their name to the whole country; see Scotland.

CALENDAR, see Jewish Era and Calendar. The Roman calendar was introduced by Romulus, who divided the year into ten months, comprising 304 days, 738 s.c. This year was of fifty days' less

duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not correspond with any fixed season. Nuna Pompilius, 713 n.c., added two months; and Julius Cesar, 45 n.c., to make it more correct, fixed the solar year at 365 days 6 hours, every fourth year being bissextile or leap-year; see Leap-year. This calendar was defective, as the solar year consists of 305 days, 5 hours, 49 minutes, and not of 365 days 6 hours. This difference, in the 16th century amounted to 10 entire days, the vernal equinox falling on 11th instead of 21st March. To obviate this error, pope Gregory XIII. ordained, in 1582, that that year should consist of 355 days only (5 Oct. became 15 Oct.); and to prevent further irregularity, it was determined that a year ending a century should not be bissextile, with the exception of that ending each fourth century; thus 1700 and 1800 have not been bissextile, nor will 1900 be 50: but the year 2000 will be a leap-year. In this manner three days are retrenched in 400 years, because the lapse of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided. See New Style and French Revolutionary Colendar.

CALENDER, a machine used in glazing various kinds of cloth, was introduced into England by the Huguenots, who were driven by persecution from France, Holland, and the Netherlands to these countries, about 1685. *Anderson*.

CALENDS were the first days of the Roman months. The Nones of March, May, July, and Oct., fell on the 7th; and their Ides on the 15th. The other months had the Nones on the 5th and the Ides on the 13th. As the Greeks had no Calends, "on the Greek Calends," ad Græcas Calendas, meant never.

CALICO, cotton cloth, named from Calicut, a city of India, visited by the Portuguese in 1498. Calico was first brought to England by the East India Company in 1631. Calico-printing and the Dutch loom engine were first used in 1676, when a Frenchman established a factory at Richmond, near London. Anderson. Calicoes were prohibited to be printed or worn in 1700; and again in 1721, a penalty of 5½ was laid on the wearer, and 20% on the seller of calico. In 1831, by the exertions of Mr. Poulett Thompson, afterwards lord Sydenham, and others, the consolidated duty of 3½d on the square yard of printed calico was taken off. Since 1834, the manufacture has been greatly increased by the applications of science. Cylinders for printing are now engraved by galvanism, and many new dyes have been introduced by the discoveries of Liebig, Hofmann, Perkin, &c.; see Cotton and Dyeing.

CALICUT (now Kolikod), S.W. India, the first Indian port visited by Vasco da Gama, 20 May, 1498. It was seized by Hyder Ali, 1766, taken by the English, 1782; destroyed by Tippoo Saib, 1789; coded to the English, 1792.

CALIFORNIA (from the Spanish, Caliente Fornalla, hot furnace, in allusion to the climate), was discovered by Cortez in 1537; others say by Cabrillo in 1542; and visited by sir Francis Drake, who named it New Albion, in 1570. California was admitted into the United States in 1850. It is advancing rapidly in wealth and importance, but society is still in a very disorganised state. The population in 1856 was 506,067; in 1870, 560,247.

CALIPPIC PERIOD, invented by Calippus, about 330 B.C., to correct the Metonic cycle, consists of four cycles, or of seventy-six years, at the expiration of which he incorrectly imagined the new and full moons return to the same day of the solar year. This period began about the end of June, third year or 112th Olympiad, year of Rome 424, and 330 B.C.

See Ommundes and Abhasides.

CALIXTINS, 1. A sect derived from the Hussites, about 1420 demanded the cup (Greek, Kalix) in the Lord's supper. They were also called Utaquists as partaking of both elements. They were reconciled to the Roman church at the council of Basle, 1433. 2. The followers of George Calixtus, a Lutheran, who died in 1656. He wrote against the celibacy of the priesthood, and proposed a re-union of Catholics and Protestants based on the Apostles' creed.

CALI YUGA, the Hindoo cra of the Deluge, dates from 3101 B.C. (according to some, 3102), and begins with the entrance of the sun into the Hindoo sign Aswin, now on 11 April, N.S. In 1600 the year began on 7 April, N.S., from which it has now advanced four days, and from the precession of the

equinoxes, is still advancing at the rate of a day in sixty years. The number produced by subtracting 3102 from any given year of the Cali Yuga cra will be the Christian year in which the given year begins.

CALLAO (Peru). After an earthquake, the sea retired from the shore, and returned in mountainous waves, which destroyed the city in 1687, and on 28 Oct. 1746. The attempt of the Spanish admiral Nuñez to bombard Callao, 2 May, 1866, was defeated by the Peruvians.

CALLIGRAPHY (beautiful writing). Callicrates is said to have written an elegant distich on a sesanuum seed, 472 m.c. In the 16th century Peter Bales wrote the Lord's Prayer, Creed, and Decalogue, two short Latin prayers, his own name, motto, day of the month, year of our Lord, and of the reign of queen Elizabeth (to whom he presented them at Hampton Court), all within the circle of a silver penny, enchased in a ring and border of gold, and covered with crystal, so accurately done, as to be plainly legible. *Holinshed*.

CALMAR, UNION OF. The treaty whereby Denmark, Sweden, and Norway, were united under one sovereign, Margaret, queen of Sweden and Norway, "the Semiramis of the north;" June, 1397, see Sweden. The union was dissolved by Gustavus Vasa in 1523.

CALMUCKS, see Tartary.

CALOMEL ("beautiful black") a compound of mercury, sulphuric acid, and chloride of sodium, first mentioned by Crollius early in the 17th century. The first directions given for its preparation were by Beguin in 1608.

CALORESCENCE. In Jan. 1865 Professor Tyndall rendered the ultra-red rays of the spectrum of the electric light visible by causing a focus of them to impinge on a plate of platinum, which they raised to a white heat. He termed the phenomenon Calorescence; see *Fluorescence*.

CALORIC, see Heat.

CALVARY, MOUNT, the place where the Redeemer suffered death, 5 April, A.D. 30; (Hades, 31; Clinton, 29; others 38); see Luke xxiii. 33. Adrian, at the time of his persecution of the Christians, erected a temple of Jupiter on Mount Calvary, and a temple of Adonis on the manger at Bethlehem, 142. The empress Helena built a church here about 326; see Holy Places.

CALVINISTS, named after John Calvin (or Chauvin), who was born at Noyon, in Picardy, 10 July, 1509. Adopting the reformed doctrines he fled to Angouleme, where he composed his Institutio Christianæ Religionis in 1533; published in 1536. He retired to Basle, and settled in Geneva, where he died, 27 May, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. In France (see Huguenots) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the Edict of Nantes in 1508 (which see). Calvinistic doctrines appear in the articles of the Church of Scotland, and are held by many protestant sects.

CAMDEN (N. America). Here 16 Aug. 1780, lord Cornwallis defeated the revolted Americans, under Gates. At a second buttle (also called Hobkirk's hill), between general Greene and lord Rawdon, the Americans were again defeated, 25 April, 1781. Camden was evacuated and burnt by the British, 13 May, 1781.

CAMDEN TOWN, N.W. London, begun by land let for building 1400 houses by earl Camden in 1791; received his name a few years after.

CAMEL, DAY OF THE, 4 Nov. 656 (according to some 658 or 659) when Talha and Zobeir, rebel Arab chiefs, were defeated and slain by the caliph Ali. Ayesha, Mahomet's widow, friend of the chiefs, was present in a litter, on a camel, hence the name.

CAMERA LUCIDA, invented by Dr. Hooke about 1674; another by Dr. Wollaston in 1807. Camera Obscura, or dark chamber, constructed, it is said, by Roger Bacon in 1297; improved by Baptista Porta, about 1500; and remodelled by sir Isaac Newton. By the invention of M. Daguerre, in 1839, the pictures of the camera are fixed; see Photography.

CAMERONIANS, a name frequently given to the Reformed Presbyterian church of Scotland, the descendants of the covenanters of the 17th century, the established church, 1638-50.* Charles II. signed the Leugue and Covenant in 1650, in hopes of recovering his kingdoms, but renounced it in 1661, and revived episcopacy. A revolt ensued in 1666, when many covenanters were slain in battle (in the Pentland hills, &c.), and many refusing to take the oaths required, and declining to accept the king's indulgence, died on the scaffold, after undergoing cruel tortures. The name Cameronian is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. In 1689 they raised a body of soldiers to support William III., who enrolled them under the command of lord Angus, as the 26th regiment, since so famous. In 1712 they renewed their public covenants, and are

They were frequently called hill-men ormountain men, and society prople (from the places and modes of worship to which they were frequently reduced), and McMillanites, from John McMillan, their first minister, after their secession from the church of Scotland on account of its subservency to the English government, and its declining from its original rigid principles. They assumed the name of the "Reformed Presbyterian Church," on May 25, 1876. This church has united with the Free Church of Scotland.

described in one of their tracts as "the suffering anti-popish, and anti-prelatical, anti-crastian, true presbyterian church of Scotland." They have now between thirty and forty congregations in Scotland.—The 79th regiment (Cameron Highlanders), raised in 1793 by Allan Cameron, has no connection with the Cameronians.

CAMISARDS (from chemise, Latin camisa, a shirt, which they frequently wore over their dress in night attacks), a name given to the French Protestants in the neighbourhood of the Cévennes (mountain chains in S. France), who after cuduring much severe persecution in consequence of the revocation of the edict of Nantes, 22 Oct. 1685, took up arms in July, 1702, to rescue some imprisoned brethren. They revenged the cruelties of their enemies, and maintained an obstinate resistance against the royalist armies commanded by marshal Montrevel, and other distinguished generals, till 1705, when the insurrection was suppressed by marshal Villars. After futile conciliatory efforts, several of the heroic leaders suffered death rather than surrender. Cavalier, an able general, unable to carry out a treaty made with Villars, seceded in 1704, entered the British service, and died governor of Jersey, 1740.

CAMLET, formerly made of silk and camel's hair, but now of wool, hair, and silk. Oriental camlet first came here from Portuguese India, in 1600. Anderson.

Many Camorristi seized in the markets at Naples, 30 Aug. and 1 Sept., ct seq., 1877.

CAMPAGNA, near Rome. Its drainage and planting were authorised by the Italian senate, 31 May 1878.

To compel railway companies to make compensation for injuries by culpable accudents, 9 & 10 Vict. c. 93 (1846). 3. Against obscene publications, prints, &c., 20 & 21 Vict. c. 83 (1857). In accordance with the second act, the family of a gentleman killed through the breaking of a rail, obtained a verdict for 13,000/. from the Great Northern Railway Company. On appeal the sum was reduced.

CAMPRELLITES, or Rowites, a name given to the followers of the rev. John McLeod Campbell, minister of Row, Dumbartonshire, who, on 24 May, 1831, was deposed by the general assembly of the church of Scotland for teaching the universality of the atonement, and other doctrines contrary to the

CAMPO FORMIO (X. Italy). Here a treaty was concluded between France and Austria; the latter yielding the Low Countries and the Ionian Islands to France, and Milan, Mantua, and Modena to the Casalpine republic, 17 Oct. 1797. By a secret article the emperor gained the Venetan dominions.

CANDLEMAS DAY, 2 Feb. is kept in the church in memory of the purification of the Virgin, remers in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, Luke ii. 32, "a Light to lighten the Gentiles," &c.), this festival was called Candlemas, as well as the Purification. Its origin is ascribed by Bede to pope Gelasius in the 5th century. The practice of lighting the churches was feabildless by order featural. forbidden by order of council, 2 Edw. VI. 1548; but is still continued in the church of Rome.

CANDLES. The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fatted were used for light among the lower classes in England, about 1300. Wux candles were little used, and dipped candles were usually burnt. The Wax Chandlers' company was incorporated 1484. Mould candles are said to be the invention of the sieur Le Brez, of Paris. Spermaceti candles are of modern manufacture. The Chinese make candles from wax obtained from the candleberry-tree (myrica cerifora). The duty upon candles made in England, imposed in 1709, amounted to about 500,000/. annually when it was repealed in 1831. Very great improvements in the manufacture of candles are due to the researches on oils and tats, carried on by "the father of the fatty acids," Chevreul, since 1811, and published in 1823. At Price's manufactory at Lambeth, the principles involved in many patents are carried into execution; including those of Gwynne (1840), Jones and Price (1842), and Wilson in 1844, for candles which require no snuffing (termed composite). Palm and cocoa-nut oils are now extensively used. In 1860, at the Belmont works 900 persons were employed, and in winter 100 tons (7000/. worth) of candles are manufactured weekly. Candles are manufactured at Belmont from the mineral oil of tar brought from Rangoon in the Burmese empire, and from Trinidad. In 1870 the manufacture of candles from a mineral substance named ozokerit began.

CANDLESTICKS (or lamp-stands) with seven branches were regarded as emblematical of the priest's office, and were engraven on their seals, cups, and tombs. Bezaleel made "a candlestick of pure gold" for the tabernacle, B.C. 1491 (Exod. xxxvii. 17). Candlesticks were used in Britain in xxxvii. 17). Candlesticks were used in Britain in the days of king Edgar, 959 ("silver candelabra and gilt candelabra well and honourably made").

CANDY (Ceylon), was taken by a British detachment, 20 Feb. 1803, who capitulated 23 June following, on account of its unhealthingss, and many were treacherously massacred at Colombo, 26 June. The war was renewed in Oct. 1814; the to Feb. 1815; and the sovereignty was vested in Great Britain, 2 March, 1815.

CANICULAR PERIOD, see Dog-star.

CANNÆ (Apulia). Here, on 2 Aug. 216 B.C., Hannibal with 50,000 Africans, Gauls, and Spaniards, defeated Paulus Æmilius and Terentius Varro, with 88,000 Romans, of whom 40,000 were slain. The victor sent to Carthage three bushels of rings, taken from the Roman knights. The place is now denominated by some "the field of blood."

CANNIBAL, an Indian term, thought to be a form of Carribal; as Columbus, in 1493, found the Caribs of the West Indies gross cannibals. Anthropophagi (man-eaters) are mentioned by Homer and Herodotus; and the practice still exists

in some of the South Sea Islands and other savage countries.

CANONICAL HOURS, see Breviary.

CANONISATION of pious men and martyrs as saints, was instituted by pope Leo III., 800. Talleut. Every day in the calendar is now a saint's day. The first canonisation by papal authority was of St. Udalricus, Ulric, in 903. Previously canonisation was the act of the bishops and people. Hénault. On 8 June, 1862, the pope canonised 27 Japanese, who had been put to death on 5 Feb. 1597, near Nagasaki, and 25 others, on 29 June, 1867. Among persons canonised by pope Pius IX. in Oct. 1872, was the late queen of Naples.

The present Canons and Constitutions of the Church of England, collected from former ordinances, were established in 1603 by the clergy in convocation, and ratified by king Jumes I., 1604. An intermediate class of religious, between priests and monks, in the 8th century, were termed canons, as living by a rule. Canons in some of our cathedrals and collegiate churches resemble the prebendaries in others. The endowment of canonries was facilitated by the Cathedrals Act, 1873.

CANOPUS, see Alexandria.

CANOSSA, a castle in Modena. Here the emperor Henry IV. of Germany, submitted to penance imposed by his enemy, pope Gregory VII. (Hildebrand), then living at the castle, the residence of the great countess Matilda. Henry was exposed for several days to the inclemency of winter, Jan. 1077, till the pope admitted him, and granted absolution. Matilda greatly increased the temporal power of the papacy by bequeathing to it her large estates, to the injury of her second hus-band, Guelph, duke of Bayaria. A Canossa monument, near Harzburg, against the papacy, was inaugurated 26 Aug. 1877.

CANTERBURY (Kent), the *Durovernum* of the Romans, and capital of Ethelbert, king of Kent, who reigned 560-616. St. Martin's church is said to be the oldest Saxon church in Britain. The riot at Boughton, near Canterbury, produced by a fanatic called Tom or Thom, who assumed the name of sir William Courtenay, occurred 28-31 May, 1838; see Thomites. The rail-way to London was completed in 1846.—The Arcu-BISHOP is primate and metropolitan of all England, and the first peer in the realm, having precedency of all officers of state, and of all dukes not of the blood royal. Canterbury had formerly jurisdiction over Ireland, and the archbishop was styled a patriarch. CAPITOI, said to have been so called from a human head (caput) found when digging the foundations of the fortress of Rome, on Mons Tarpeius. Here a temple was built to Jupiter Capitolinus. The foundation was laid by Tarquinius Priscus, 616 n.c.; the building was continued by Servius Tullius; completed by Tarquinius Superbus, but not dedicated till 507 n.c. by the consul Horatius. It was destroyed by lightning 6 July, 183; burnt during the evil wars, 83; rebuilt by Sylla, and dedicated again by Latatius Catulus, 60; again burnt a.d. 60, 80; rebuilt 70, 82; sacked by Genserie, June, 455. The Roman consuls made large donations to this temple, and the emperor Augustus bestowed on it 2000 pounds weight of gold, of which metal the roof was composed: its thresholds were of brass, and its interior was decorated with shields of solid silver. The Capitoline games, instituted 387 n.c. to commemorate the deliverance from the Gauls, were revived by Domitian, A.d. 80. The Campidoglio contains palaces of the senators, creeted on the site of the Capitol by Michael Angelo soon after 1546.

CAPS AND HATS. About 1738, Sweden was much distracted by two factions thus named, the former in the interest of the Russians, and the latter in that of the French. In 211, when the Romans retook the city, they scourged and beheaded all the surviving senators; the others had poisoned themselves after a banquet previous to the surrender of the city. Only two persons escaped; one woman who had prayed for the success of the Romans, and another who succoured some prisoners. During the middle ages Capua was successively subjugated by the Greeks, Saracens, Normans, and Germans. It was restored to Naples in 1424, and captured by Casar Borgia, 24 July, 1501; was taken by Garibaldi 2 Nov. 1860.

CARBOLIC ACID (or phenic acid), obtained by the distillation of pit-coal, by Laurent, 1846-7, is a powerful antiseptic. It is largely manufactured for medical purposes, and has been advan-tageously used at Carlisle and Exeter in the deodorisation of sewage (1860-1); and as a disinfectant during the prevalence of cholera in London in 1866. It was successfully used for embalming by professor Seely in 1868. Professor F. Crace Calvert, a great manufacturer of this acid, died 1873.

The society spread in France, and doubtless hastened the revolutions in 1830 and 1848.

On exposing the liquid to the air it be solid, resembling snow, through vaporisation. On exposing the liquid to the air it becomes

Those of RAPHAEL (twenty-five in number) were designed (for tapestries) in the chambers of the Vatican under Julius II. and Leo X. about 1510 to 1516. The seven preserved were purchased in Flanders by Rubens for Charles I. of England, for Hampton-court palace in 1629. They were removed to South Kensington 28 April, 1865.—The tapestries executed at Arras from these designs are at Rome. They were twice carried away by invaders, in 1526 and 1798, and were restored in 1815.—The Cartoons for the British Houses of Parliament were exhibited in July, 1843.

The true Cashmere shawls, first brought to England in 1666, are well imitated at Bradford and Huddersfield. Shawls of Thibetian wool, for the omrahs, cost 150 rupees each, about 1650. The prince of Wales was warmly received by the maharajah, an able prince and favourer of education and literature, at Jummoo, 20 Jan. 1876.

CAT. The generally received opinion that our domestic cat is derived from the European wild cat is doubted by Mr. T. Bell (1827). Ruppell (died 1791) found a wild cat in Nuba, whose conformation agreed with that of the Egyptian cat mummies. Cats fetched high prices in the middle ages, and were protected by law in Wales, about 948. Great cat shows were held at the Crystal Palace, 13 July and 2 Dec. 1871; 26-29 Oct. 1872; and since. A cat interrupted the debates in the commons, 9 July, 1874.

CATACOMBS. The early depositories of the dead. The first Christians at Rome met for worship in the catacombs; and here are said to have been the tombs of the apostles Peter and Paul. Belzoni in 1815-18 explored many Egyptian catacombs, built 3000 years ago. He brought to England the sarcophagus of Psammetichus, formed of oriental alabaster, exquisitely sculptured. In the Parisian catacombs (formerly stone quarries), human remains from the cemetery of the Innocents were deposited in 1785; and many of the victims of the revolution in 1792-4, are interred in them.-On 31 May, 1578, some labourers digging on the Via Salaria, two miles from Rome, discovered the celebrated catacombs of which an account with engravings was published by Antonio Bosio, in his "Roma Sotteranea" (1632), and by Aringhi (1659), and others. John Evelyn saw them in 1645. Elaborate accounts have been published recently by De Rossi; an abstract of whose researches will be found in the "Roma Sotteranea" of the Rev. J. S. Northcote and W. R. Brownlow, 1869.

CATALONIA (E. Spain), was settled by the Goths and Alani, about 409; conquered by the Saracens, 712; recovered by Pepin, and by Charlemagne (788). It formed part of the Spanish marches and the territory of the count of Barcelona (which sec). The natives were able seamen: being frequently unruly, their peculiar privileges were abolished in 1714.

CATALYTIC FORCE. The discovery in 1810 by Thenard of the decomposition of peroxide of hydrogen by platinum, and by Döbereiner in 1825 of its property to ignite a mixture of hydrogen and oxygen, formed the groundwork of the doctrine of catalytic force, also termed "action of contact or presence," put forth by Berzelius and Mitscherlich. Their view has not been adopted by Liebig and other chemists.

CATAMARANS (or carcases), fire-machines for destroying ships; tried in vain by sir Sydney Smith, 2 Oct. 1804, on the Boulogne flotilla destined by Bonaparte to invade England.

CATANIA (the ancient Catana), a town near Etna, Sicily, was founded by a colony from Chalcis, about 753 n.c. Ceres had a temple here, open to none but women. Catania was almost totally over-thrown by an eruption of Etna in 1669 and in 1693 was nearly swallowed up by an carthquake: in a moment more than 18,000 of its inhabitants were buried in the ruins. An earthquake did great damage, 22 Feb. 1817. In Aug. 1862, the town was held by Garibaldi and his volunteers, in opposition to the Italian government. He was captured on 29 Aug.

CATAPHRYGIANS, heretics in the second century, who followed the errors of Montanus. They are said to have baptized their dead, forbidden marriage, and mingled the bread and wine in the Lord's supper with the blood of young children.

CATAPULTÆ, military engines of the crossbow kind, for throwing huge stones as well as darts and arrows; invented by Dionysius, the tyrant of Syracuse, 399 B.C.

CATCH CLUB, NOBLEMEN AND GENTLEMEN'S, formed in 1761, included eminent musicians of the time. Prizes were given occasionally; sometimes, since 1821, for a composition, a gold or silver cup.

CATEAU CAMBRESIS (N. France), where, on 2, 3 April, 1559, peace was concluded between Henry II. of France, Philip II. of Spain, and Elizabeth of England. France ceded Savoy, Corsica, and nearly 200 forts in Italy and the Low Countries

CATECHISMS are said to have been compiled in the 8th or 9th century. Luther's were published 1520 and 1529. The catechism of the church of England in the first book of Edward VI. 7 March, 1549, contained merely the baptismal vow, the creed, the ten commandments, and the Lord's prayer, with explanations; but James I. ordered the bishops to add an explication of the sacraments, 1612. The catechism of the council of Trent was published in 1566; those of the Assembly of Divines at Westminster 1647 and 1648.

A conference of the higher elergy to consider cathedral institutions, was held at Lambeth, I March, 1872. The act 3 & 4 Vict. c. 113 for the regulation of cathedrals passed in 1840 was amended and the endowment of canonries facilitated in 1873.

CATHERINE. The order of knights of St. Catherine was instituted in Palestine, 1063. An order of ladies of the highest rank in Russia was founded by Peter the Great, 1714, in honour of the bravery of his empress Catherine. They were to be distinguished, as the name implied (from katharos, pure), for purity of life and manners; see *Docks* and *Katharine*.

CATHOLIC MAJESTY. This title was given by pope Gregory III. to Alphonso I. of Spain, 739, and to Ferdinand V. and his queen in 1474 by Innocent VIII. on account of their zeal for religion, and their establishment of the Inquisition.

CATHOLICS, see Roman Catholics.

CATHOLIC UNION OF GREAT BRI-TAIN, president, the duke of Norfolk, was constituted in 1871. A Catholic union in Dublin was formed Dec., 1873. See Roman Catholics.

CATILINE'S CONSPIRACY. Lucius Sergius Catiline, a dissolute Roman noble, having been refused the consulship (65 B.c.), conspired to kill the senate, plunder the treasury, and set Rome on fire. This conspiracy was timely discovered and frustrated. A second plot (in 63), was detected by the consul Cicero, whom he had resolved to murder. Catiline's daring appearance in the senate-house, after his guilt was known, drew forth Cicero's celeon 8 Nov. On seeing five of his accomplices arrested, Catiline fled to Gaul, where his partisans were assembling an army. Cicero punished the conspirators at home, and Petreius routed their forces; Catiline being killed in the engagement, Jan. 62 B.C.

CATTLE. The importation of horned cattle from Ireland and Scotland into England was prohibited by a law, 1603; but the export of cattle from Ireland became very extensive. In 1842 the importation of cattle into England from foreign countries was subjected to a moderate duty, and in 1846 they were made duty free; and since then the numbers imported have enormously increased. Horned cattle imported into the United Kingdom 1849, 53,480; 1853, 125,523; 1855 (war), 97,527; 1860, 104,5(4); 1805, 283,271; 18(6), 237,739; 1867, 177,048; 1868, 130,688; 1869, 220,190; 1870, 202,172; 1874, 193,862; 1876, 27,1576; 1877, 201,103. CAUCASUS, a lofty mountain, a continuation of the ridge of Mount Taurus, between the Euxine and Caspian seas. In Mythology, Prometheus was said to have been tied on the top of Caucasus by Jupiter, and continually devoured by vultures (1548 n.c.) The passes near the mountain were called Caucasiae Porta, and it is supposed that through them the Sarmatians or Huns invaded the provinces of Rome, A.D. 447; see Circassia.

CAUCUS. An American term applied to a private meeting of the leading politicians of a party to agree upon the plans to be pursued during an election or session of congress. This institution is now a very powerful antagonist to public opinion. The word is said to be derived from "ship"-caulkers' meetings. A "caucus club" is mentioned by John Adams, in 1763. Bartlett. Similar meetings are occasionally held in London by conservatives and liberals; one was held by Mr. Gladstone respecting

the ballot bill, 6 July, 1871. Jealousy respecting the system was aroused in 1878.

CAUDINE FORKS, according to Livy, the Fuveulæ Cuadinæ (in Samniun, S. Italy), were two marrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 321 n.c. (after a fruitless contest, according to Cicero). The Roman senate broke the treaty.

CAULIFLOWER, said to have been brought from Cyprus to England about 1603.

CAUSTIC IN PAINTING, a method of burning colours into wood or ivory, invented by Gausias of Sicyon. He painted his mistress Glycere sitting on the ground making garlands with flowers; the picture was hence named Stephanoplocon. It was bought by Lucullus for two talents, 335 B.C. Pliny.

CAUTIONARY TOWNS (Holland), (the Briel, Flushing, Rammekins, and Walcheren), were given to queen Elizabeth in 1585 as security for their repaying her for assistance in their struggle with Spain. They were restored to the Dutch republic by James I. in 1616.

Attached to each Roman legion was a body of 300 horse, in ten turme; the commander always a veteran.—The Persians had 10,000 horse at Marathon, 490 B.C.; and 10,000 Persian horse were slain at the battle of Issus, 333 B.C. Plutarch. In the wars with Napoleon I. the British cavalry reached to 31,000 men. Our cavalry force, in 1840, was, in household troops, 1209; dragoons, hussars, and lancers, 9524; total, 10,733. In 1867, horse guards, 1317; cavalry of the line, 10,023; in depots, 838; in India, 5421; total, 17,599; see Horse Guards, &c.

CAVENDISH EXPERIMENT. In 1798 the Hon. Henry Cavendish described his experiment for determining the mean density of the earth, by comparing the force of terrestrial attraction with that of the attraction of leaden spheres of known magnitude and density, by means of the torsion balance. Brande. The Cavendish Society, for the publication of chemical works, which ceased with Gmelin's Chemistry (1848-67), was established 1846.

CAVENDISH COLLEGE, Cambridge (founded to give cheap university education to youths younger than those admitted at other colleges, and leaving earlier), was inaugurated by the duke of Devonshire, 26 Oct. 1876.

CAVES are frequently mentioned in the Bible as dwellings, refuges, and burying-places. Mr. W. B. Dawkins' "Cave-hunting; Researches on the evidence of caves respecting the early inhabitants of Europe' was published 1874. Oreston cave, Devon, discovered 1816; Kirkdale, Yorkshire, 1821; Kent's Hole, Torquay, 1825; Brixham cave, 1858; Wookey Hole, Somerset, 1859; and many others; have been well explored.

An adopted son of the old Peishwa Bajee Rao, Nana Sahib, who had long lived on friendly terms with the British, came apparently to their assistance, but joined the rebels. He took the place after three weeks' siege, 26 June; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, 16 July, at Futtehpore, and retook Cawn-pore, 17 July. Sir Colin Campbell defeated the rebels here on 6 Dec. following. A column was erected here, in memory of the sufferers, by their relatives of the 32nd regiment. In Dec. 1860, Nana was said to be living at Thibet; and in Dec. 1861 was incorrectly said to have been captured at Kurrachee; see India, 1857.

The doctrine was rejected in the council of Nice, 325. Celibacy was enjoined on bishops only in 692. The decree was opposed in England, 958-978. The Romish clergy generally were enjoined a vow of celibacy by pope Gregory VII. in 1073-85, and its observance was established by the council of Placentia, held in 1095. Marriage was restored to the English clergy in 1547. CHANCELLORSVILLE, Virginia, U.S., a large brick hotel, once kept by a Mr. Chancellor, was the site of severe sanguinary conflicts between the American federal army of the Potomae under general Hooker, and the confederates under general Lee. On 28 April, 1863, the federal army crossed the Rappahannock; on 2 May, general "Stonewall" Jackson furiously attacked and routed the right wing, but was mortally wounded by his own party firing on him by mistake. Gen. Stuart took his command, and after a severe conflict on 3 and 4 May, with great loss to both parties, the federals were compelled to recross the Rappahannock. The struggle was compared to that at Hougomont during the battle of Waterloo. Jackson died to May.

CHANCERY, COURT OF, is said to have been instituted either in 605, or by Alfred, 887; refounded by William I., 1067 (Now) or 1070. This court had its origin in the desire to render justice complete, and to moderate the rigour of other courts that are bound to the strict letter of the law. It gives relief to or against infants, not-withstanding their minority; and to or against married women, notwithstanding their coverture; and all frauds, deceits, breaches of trust and confidence, for which there is no redress at common law, are relievable here. Blackstone; see Chancellors of England. The delays in chancery proceedings having long given dissatisfaction, the subject was brought before parliament in 1825, and frequently since; which led to the passing of important acts in 1852, 1853, 1855, 1858, and 1807, to amend the practice in the court of chancery. See Accountant, County Courts, and Supreme Court.

The Chancery division of the high court of justice now consists of the lord chancellor and five judges.

Airfilters, based on this property, have been successfully applied to public buildings, sewers, &c. Dr. Stenhouse also invented charcoal respirators. See Fireman's Respirators.

CHARTER-PARTY, a covenant between merchants and masters of ships relating to the ship and cargo, said to have been first used in England about 1243.

CHARTERS, granted to corporate towns to protect their manufactures by Henry I. in 1132; modified by Charles II. in 1682; the ancient charters restored in 1698. Alterations were made by the Municipal Reform Act in 1835. See Magna Charta and Boroughs. Ancient Anglo-Saxon charters are printed in Kemble's "Codex Diplomaticus," 1829.

CHARTISTS, the name assumed by large bodies of the lower classes, shortly after the passing of the Reform Bill in 1832, from their demanding the people's Charter,* the six points of which were Universal Suffrage, Vote by Ballot, Annual Parlia-ments, Payment of the Members, the abolition of the Property Qualification (which was enacted, June, 1858), and Equal Electoral Districts. In 1838 the chartists assembled in various parts of the country, countrists assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags. A proclamation was issued against them, 12 Dec. Their petition (agreed to at Birmingham, 6 Aug. 1838) was presented to parliament by Mr. T. Attwood, 14 June, 1830. They committed great outrages at Birmingham, 15 July, 1839, and at Newport (which see), 4 Nov. 1839. They held for 50 ne time a sort of parliament called the "National Convention," the leading men being Feargus O'Connor, Henry Vincent, Mr. Stephens, &c. On 10 April, 1848, they proposed to hold a meeting of 200,000 men on Kennington common, London, to march thence in procession to Westminster, and present a petition to parliament; but only about 20,000 came. The bank and other establishments were fortified by military, preventive measures adopted, and not less than 150,000 persons of all ranks (including Louis Napoleon, afterwards emperor) were voluntarily sworn to act as special constables. The chartists dispersed after slight en-counters with the police, and the monster petition, in detached rolls, was sent in cabs to the house of commons. From this time the proceedings of the chartists became insignificant.

CHARTREUSE, LA GRANDE, chief of the monasteries of the Carthusian order, situated among the rugged mountains near Grenoble, in France, was founded by Bruno of Cologne, about 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery after the rostoration of 1815.

CHARTS AND MAPS. Anaximander of Miletus is said to have been the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. The first tolerably accurate map of England was drawn by George Lilly, who died in 1559. Gerard Mercator published an atlas of maps in 1505; see Mercator. The daily papers published in their columns maps illustrating the wars of 1870-1, 1876-7, &c.

CHASSEPOT RIFLE, a modified needlegun, and a breech-loader (named after its inventor, Alphonse Chassepot), adopted by the French government in 1866. In April, 1867, 10,000 had been issued to the troops. In his report on the battle of Mentana (which see), 3 Nov. 1867, gen. De Failly said, "the chassepot has done wonders." It was generally considered successful in the war, 1870-1. "The range of the chassepot being 1800 puces, and that of the needle-gun only between 600 and 700, the Germans in all their charges had to traverse 1200 paces before their arms could be used to pur-

pose." Many Germans were armed with the chassepot after the surrender of the French army at Sedan, 2 Sept. 1870.

CHASTITY. The Roman laws justified homicide in defence of one's self or relatives; and our laws justify a woman for killing a man in defence of her chastity; and a husband or a father in taking the life of him who attempts to violate his wife or daughter. In 1000 years from Numa, 710 B.C., to Theodosius, A.D. 394, only eighteen Roman vestals had been condemned for incontinence. See Vestals, Aere, and Coldingham.

CHÂTEAUDUN, an old city, N. C. France, the residence of the heroic Dunois, who died 1468. Here were massacred, 20 July, 1183, about 7000 Brabançons, fanatic mercenaries who had been hired to exterminate the Albigenses by the cardinal Henry, abbot of Clairvaux, in 1181. They had become the seourge of the country, and the "Capuchons" were organised for their destruction. Châteaudun was captured by the Germans after a severe conflict of about nine hours, 18 Oct. 1870. Barricades had been erected in the town, and the Garde Mobile fought bravely. The town was reoccupied by the French, 6 Nov.

CHATHAM (Kent), a principal station of the roxal navy, the dockyard, commenced by queen Elizabeth, has been recently much extended (1872). The Chatham Chest, for the relief of the wounded and decayed scamen, originally established here by the queen and admirals Drake and Hawkins, in 1588, was removed to Greenwich in 1803. On 10 June, 1607, the Dutch fleet, under admiral De Ruyter, sailed up to this town, and burnt several men-of-war; but the entrance into the Medway is now defended by Sheeness and other forts, and additional fortifications were made at Chatham. On 8-11 Feb. 1861, a violent outbreak of the convicts was suppressed by the military, and many rioters flogged. About 1000L worth of property was destroyed, and many persons were seriously hurt. New docks and a basin, said to be the largest and finest in the world, opened by Mr. Göschen, 21 June, 1871.

CHATHAM ADMINISTRATION,* succeeded the first Rockingham administration in Aug. 1766: after several changes it terminated Dec. 1767. See Grafton.

CHATILLON (on the Seine, France). Here a congress was held by the four great powers allied

William Pitt, earl of Chatham (the "great commoner") born 15 Nov. 1708, entered parliament in 1735; became secretary of state (virtually the premier) in the Devon-shire administration, Nov. 1756, secretary in the Newcastle administration, Jan. 1757. In 1766 he became premier, lord privy seal, and afterwards earl of Chatham, which lord Chesterheld called a full upstairs. He opposed the taxation of the American colonies, but protested against the recognition of their independence, 7 April, 1778, and died 11 May following.

against France, at which Caulaincourt attended for Napoleon, 4 Feb. 1814: the negotiations for peace were broken off on 19 March following.

CHAT MOSS (Lancashire), a peat bog, twelve miles square, in most places so soft as to be incapable of supporting a man or horse, over which George Stephenson, the railway engineer, carried the Liverpool and Manchester railway, after overcoming difficulties considered invincible. The road (literally a floating one) was completed by 1 Jan. 1830, when the first experimental train, drawn by the Rocket locomotive, passed over it. See Bogs.

CHATTANOOGA (Tennessee). Near here the federal generals, Sherman and Thomas, defeated the confederate general Bragg, after storming the entrenchments, 24-25 Nov. 1803. Bragg retreated into Georgia, and Longstreet into Virginia.

CHAUMONT (on the Marne, France), TREATY OF, entered into between Great Britain, Austria, Russia, and Prussia, 1 March, 1814. This treaty was succeeded by that of Paris, 11 April, by which Napoleon renounced his sovereignty; see Paris.

CHAUVINISM, a term derived from Chauvin, the principal character in Scribe's "Soldat Laboureur," a veteran soldier of the first empire, filled with intense admiration for Napoleon and for all that belonged to him. Scribe was born 24 Dec. 1794, died 20 Feb. 1861.

CHEAP TRAINS ACT, 7 & 8 Viet. c. 85, 1844. See Radways.

CHEATS were punishable by pillory, imprisonment, and fine, and a rigorous statute was enacted against them in 1542. Persons cheating at play, or winning at any time more than 101. or any valuable thing, were deemed infamous, and were to suffer punishment as in cases of perjury, 9 Anne, 1711. Blackstone.

CHEE-FOO CONVENTION, see China, 1876.

CHEESE is mentioned by Aristotle, about 350 B.C. It is supposed by Camden and others that the English learned cheese-making from the Romans about the Christian era. Wilts, Gloucester, and Cheshire make vast quantities; the last alone, annually, about 31,000 tons. In 1840 we imported from abroad about 10,000 tons; in 1855, 384,192 cwt.; in 1866, 872,342 cwt.; in 1870, 1,044,281 cwt.; in 1876, 1,531,204 cwt.; in 1877, 4,771.393 cwt. The duty on foreign cheese, producing annually about 50,000l., was taken off in 1860. Large quantities are imported from the United States.

CHELSEA (Middlesex). A council held here 27 July, 816. Nicolas. A theological college here founded by James I. in 1600, was converted by Charles II. in 1682 to an asylum for wounded and superannuated soldiers. The erection was carried on by James II., and completed by William III. in 1600. The projector was sir Stephen Fox, grandfather of the orator C. J. Fox; the architect was sir Christopher Wren; and the cost 150,000. In 1850 there were 70,000 out- and 539 in-pensioners.—The body of the duke of Wellington lay here in state, 10-17 Nov. 1852.—The physic garden of sir Hans Sloane, at Chelsea, was given to the Apothecaries' company, 1721.—The Chelsea waterworks were incorporated, 1722.—The first stone of the Military Asylum, Chelsea, was laid by Frederick, duke of York, 19 June, 1801.—The bridge, constructed by Mr. T. Page to connect Chelsea with Battersea-park, was opened March, 1858. The

Albert-bridge was opened 31 Dec. 1872. The parliamentary borough of Chelsea, created by the Reform act, 15 Aug. 1867, consists of Chelsea, Kensington, Fulham, and Hammer smith. The Chelsea embankment was opened by the duke and duches of Edinburgh, 9 May, 1874. See *Trials*, July, 1870 and 1872. Cremorne public gardens closed, 1877.

CHELTENHAM (Gloucestershire). Its celebrated mineral spring was discovered in 1718. The king's-well was sunk in 1778; and other wells by Mr. P. Thompson in 1806. Magnesian salt was first found in the waters in 1811. The theatre was creefed in 1804. Grammar school and almshouses, endowed by Richard Pates, 1574. Cheltenham was incorporated, 1876.

CHEMICAL SOCIETIES. One formed in London in 1780, did not long continue. The present Chemical society of London was established in 1841; that of Paris in 1857; that of Germany at Berlin, 1867.

CHEMICAL WORKS. Royal commission appointed to inquire into the management of chemical works, to ascertain the effect of gases and vapours given off, and the means of prevention. The commissioners are lord Aberdare, earl Percy, professors Abel, A. Williamson, Roscoe, and others, 18 July, 1876. In their report, issued Aug. 1878, they recommend increased inspection, and more stringent regulations. See Alkalies.

CHEMISTRY was introduced into Spain by the Moors, about 1150. The Egyptians and Chinese claim an early acquaintance with chemistry. The first chemists were the Alchemists (see Alchemy); but chemistry was not a science till the 17th century; during which its study was promoted by Bacon, Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of Pneumatic Chemistry, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Bergman, Stahl, Black, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, animonia, &c.; and thus commenced a new chemical cra. He was ably seconded by Cavendish, Scheele, Lavoisier, Chaptal, and others. The 19th ceatury opened with the brilliant discoveries of Davy, continued by Dalton, Faraday, Thomson, &c. Organic Chemistry has been very greatly advanced by Berzelius, Liebig, Dumas, Laurent, Hofmann, Cahours, Frankland, and thers, since 1830; see Pharmacy, Electricity, Galvanism. For the analytical processes termed "Spectrum analysis," invented by Kirchhoff and Bunsen (1861), and "Dialysis" (1861), and "Almolysis" (1863), invented by Mr. T. Graham, see those articles.—The Royal College of Chemistry, Oxford-street, London, was established in 1845 (now at South Kensington)—Henry Watts' great "Dictionary of Chemistry," begun 1863, has supplements. M. Ad. Wurts's equally great "Dictionary of Great Britain formed; professor Edward Frankland first president, 1877; first meeting, 1 Feb. 1878.

' In 1828 Wohler produced artificially nem, a body latherto known only as a product of the animal organism. Since then, acetic acid, alcohol, grape sugar, various essential oils, similar to those of the pine apple, per, garlic, &c, have been formed by combinations of the gases, oxygen, hydrogen, and carbonic acid. The barrier formed by chemists between organic and inorganic bodies is thus broken down. Indigo artificially formed by Bayer, 1878.

CHEQUE BANK, opened in Pall Mall East, 23 July, 1873. It issued cheques for fixed sums (down to 1/.) available for paying and transmitting small sums, and is suited for persons not having a banker. The plan, due to Mr. James Hertz, a director, has been modified.

CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V in 1418, and lost in 1450. Under the direction of Louis XIV., some works were creeted here by the great Vauban, which with some shipping, &c., were destroyed by the British, 6, 7 Aug. 1758. The works resumed by Louis XVI., were interrupted by the revolution. The breakwater, commenced in 1783, resumed by Napoleon I. about 1803, and completed in 1813, forms a secure harbour, affording anchorage for nearly the whole navy of France, and protected by strong fortifications. On 4, 5 Aug. 1858, the railway and the Grand Napoleon docks were opened, the latter in the presence of the queen of England and court. The British fleet visited Cherbourg, 15-17 Aug. 1865, receiving much hospitality.

CHERITON DOWN (Hants). Here sir Wm. Waller defeated the royalists under lord Hopton, 29 March, 1644.

CHERRY, the Prunus Cerasus (from Cerasus, a city of Pontus, whence the tree was brought by Lucullus to Rome, about 70 B.C.), first planted in Britain, it is said, about 100. Fine kinds were brought from Flanders, in 1540, and planted in

CHESAPEAKE. At the mouth of this river a contest took place between the British admiral Greaves and the French admiral De Grasse aiding the revolted states of America; the former was obliged to retire, 1781. The Chesapeake and Dela-ware were blockaded by the British fleet in the American war of 1812, and the bay was, at that period, the scene of great hostilities of various results.

CHESAPEAKE, an American frigate, in Boston bay, commanded by capt Lawrence (50 guns, 376 men), struck to the Shannon, British frigate (38 guns, 336 men) commanded by capt. Eleven minutes clapsed between the firing of the first gun and the boarding, and in four minutes more the Chest gun and the boarding, and in four minutes more the Chest get has the Shannon's prize. Capt. Lawrence died of his wounds.

CHESHUNT COLLEGE, Herts, founded by Sclina, countess of Huntingdon, for the educa-tion of ministers of her "connexion," Calvinistic methodists. The college was first opened at Tre-vecca-house, Talgarth, near Brecon, by the countess and George Whitfield, 1768. It was removed to Cheshunt in 1792. She died 17 June, 1791.

CHESTER (England, N. W.), the British Caerleon and the Roman Deva, the station of the twentieth legion, Valeria Victrix, quitted by them about 406. The city wall was first built by Edelfleda, about 908; and Hugh Lupus, the earl, nephew of William I., rebuilt the Saxon castle in 1084, and the abbey of St. Werburgh. Chester was incorporated by Henry III, and made a distinct county. The palatine jurisdiction was abolished by parliament, 23 July, 1830. The SEE, anciently part of Lichfield, one of whose bishops, Peter, removing the seat hither in 1075, occasioned his successors to be styled bishops of Chester; but it was not made a distinct bishopile until Henry VIII. in 1541 raised it to this dignity, and allotted the church of the abbey of St. Wer-burgh for the cathedral. After extensive repairs, the cathedral was re-opened, 25 Jan. 1872. see is valued in the king's books at 420%. 18. 8d. per annum. Present income 4500%.

CHICAGO, Illinois, United States, a flourishing city settled in 1831; incorporated 1837; population, 1867, above 200,000; in 1872, about 400,000.

Chicago was nearly destroyed by fire, occasioned by the upsetting of a paraffin lamp, 8, 9, 10, 11 Oct. 1871 About 250 pershed, and 98,500 were rendered destitute. The loss was reckoned at 290,000,000 dollars. Large sums were collected for relief of the sufferers in London (10,000l in a few hours) and other British cities, as well as in North America. The area of the fire was computed at from three to five square inites, and about 25,000 buildings were destroyed. The heart of the city was composed of old wooden buildings. CHICHESTER (Sussex), built by Cissa, about 540. The cathedral was completed about 1108, burnt with the city in 1114, and rebuilt by bishop Seffrid about 1187. The present cathedral was creeted during the 13th century. The spire fell 20 Feb. 1861; the foundation of a new one was laid 2 May, 1865, completed June, 1866. The cathedral re-opened after repairs, 14 Nov. 1867. The bishopric originated thus: Wilfrid, archbishop of York, compelled to flee by Egfrid, king of Northumberland, preached the gospel in this country, and built a church in the Isle of Selsey, about 673. In 681 Selsey became a bishopric, and so continued until it was removed to Chichester, then called Cissan-Caester, from its builder, Cissa, by Stigand, about 1082. This see has yielded to the church two saints, and to the nation three lord chancellors. It is valued in the king's books at 677l. 18. 3d. per annum. Present income, 4200l.

CHICORY, the wild endive, or Cichorium Intybus of Linnœus, grows wild in calcarcons soils. It was for many years so largely mixed with coffee in England, that it became a matter of serious complaint, the loss of rovenue being estimated at 100,000l. a year. An excise order was issued, interdicting the mixture of chicory with coffee, 3 Aug. 1852. The admixture, however, has since been permitted, provided the word "chicory" be plainly printed on each parcel sold. In 1800 a duty of 3s. per cwt. was put upon English-grown chicory until April, 1861; after that date to be 5s. 6d. per cwt.

CHILDERMAS DAY, 28 Dec., of ancient observance by the Roman Church, in memory of the slaughter of the Holy Innocents. (Matt. ii.)

CHILDREN. Many ancient nations exposed their infants,—the Egyptians on the banks of rivers, and the Greeks on highways,—when they could not support or educate them; in such cases, they were protected by the state. The old custom of English parents selling their children to the

Irish for slaves, was prohibited by Canute, about 1017. See Foundling, Fuctory Acts, and Infanticide.

CHILI (S. America), discovered by Diego de Almagro, one of the conquerors of Peru, 1535. When Almagro crossed the Cordilleras, the natives, regarding the Spaniards on their first visit as allied to the Divinity, collected for them gold and silver amounting to 290,000 dueats, a present which led to the subsequent cruclties and rapacity of the invaders. Chili was subdued, but not wholly, in 1546. Population in 1805, 1,068,447; in 1875, 2,068,447.

CHILLIANWALLAH, BATTLE OF, India, between the Sikh forces in considerable strength, and the British commanded by lord (afterwards viscount) Gough, fought 13 Jan. 1849. The Sikhs were completely routed, but the loss of the British was very severe: 26 officers were killed and 64 wounded, and 731 rank and file killed, and 1446 wounded. The Sikh loss was 3000 killed and 4000 wounded. On 21 Feb. lord Gough attacked the Sikh army, under Shere Singh, in its position at Goojerat, with complete success; and the whole of the enemy's camp fell into the hands of the British.

CHIMNEY-TAX, see Hearth.

CHIMNEYS. Chafing-dishes were in use previous to the invention of chimneys, which were first introduced into these countries, in 1200, when they were confined to the kitchen and large hall. The family sat round a stove, the funnel of which passed through the ceiling, in 1300. Chimneys were general in domestic architecture in 1310. At the chemical works, Glasgow, is a chimney (there termed a stalk) 420 feet in height; the height of the monument in London being 202 feet; of St. Paul's, 404 feet. CHINA (TSING), the "Celestial Empire," in Eastern Asia, for which the Chinese annals claim an antiquity of from 80,000 to 100,000 years B.C., is said to have commenced about 2500 n.c.; by others to have been founded by Fohi, supposed to be the Nouh of the Bible, 2240 n.c. We are told that the Chinese were acute astronomers in the reign of Yao, 2357 B.C. Towards the close of the 7th century B.C., the history of China becomes more distinct. Twenty-two dynastics have reigned, including the present. The population of the empire of China was estimated at 190, 348,228 in 1757; at 414,607,000 in 1860; and at 433,500,000 in 1877.

An insurrection broke out in consequence, Aug. 1850, and quickly became of alaniming importance. The insugents at first proposed only to expel the Tartaus; but in March, 1851, a pretender was announced among them, first by the name of Tien-teh (Celestial Virtue), but afterwards assuming other names. He de-clared himself to be the monarch of all beneath the sky, clared himself to be the monarch of all beneath the sky, the true lord of Chima (and thus of all the world), the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin in Nov. 1860. His followers are termed Tacpings, "princes of peace," a title utterly beheld by their atrocious deeds. The rebellion was virtually terminated, 18 July, 1864, by the gapture of Nankin, the suicide of the Tien-Wang, and the execution of the niltrary leadors.

CHIVALRY arose out of the feudal system in the latter part of the 8th century (chevalier, or knight, being derived from the caballarius, the equipped feudal tenant on horseback). From the 12th to the 15th century it tended to refine manners. The knight swore to accomplish the duties of his profession, as the champion of God and the ladies, to speak the truth, to maintain the right, to protect the distressed, to practise courtesy, to fulfil obligations, and to vindicate in every perilous adventure his honour and character. Chivalry expired with the feudal system. See Knighthood and Tournaments. By letters patent of James I. the earl-marshal of England had "the like jurisdiction in the courts of chivalry, when the office of lord high constable was vacant, as this latter and the marshal did jointly exercise," 1623.

CHLORINE (Greek chloros, pale green), a gas first obtained by Scheele in 1774, by treating man-

ganese with muriatic (hydrochloric) acid. Sir II. Davy, in 1810, proved this gas to be an element, and named it chlorine. Combined with sodium it forms common salt (chloride of sodium), and combined with lime it forms the bleaching powder and disinfectant, chloride of lime; see *Bleaching*. In 1823 Faraday condensed chlorine into a liquid.

CHLOROFORM (the ter-chloride of the hypothetical radical formyl) is a compound of carbon, hydrogen, and chlorine, and was made from alcohol, water, and bleaching powder. It was discovered by Soubeiran in 1831, and independently by Liebig in 1832; and its composition was determined by Dumas in 1834. The term "chloric other" was applied in 1820 to a mixture of chlorine and olefiant gas. Chloroform was first applied as an amesthetic experimentally by Mr. Jacob Bell in London, in Feb., and Dr. Simpson of Edinburgh in Nov. 1847; and was administered in England on 14 Dec. 1848, by Mr. James Robinson, surgeon-dentist. A committee of the Royal Medical and Chirurgical Society in July, 1864, after examining statistics, reported that the use of anesthetics had in no degree increased the rate of mortality.

Andrew Noble (engaged by sir William Armstrong) invented an apparatus for determining the velocity of a projectile in a gun; a second of time is divided into millionths, and the electric spark is employed in recording the rate of the passage. The apparatus was exhibited at Newcastleon-Tyne in Aug. 1869, and in London in April, 1870.

CHURCH OF NORTH AMERICA, was established in Nov. 1784, when bishop Scabury, chosen by the churches in Connecticut, was consecrated in Scotland. The first convention was held at Philadelphia in 1785. On 4 Feb. 1787, two more American bishops were consecrated at Lambeth. In 1851 there were 37 bishops; see Pan-Anglican Synod.

After much discussion, for several years, the church convention passed a stringent canon against ritualism, 27 Oct. 1874.

CHURCH OF SCOTLAND, see Bishops in Scotland. On the abolition of Episcopacy, in 1638, Presbyterianism became the established religion. Its formulary of faith, said to have been compiled by John Knox, in 1560, was approved by the parby John Knox, in 1500, was approved by the par-liament and ratified in 1507, finally settled by an act of the Scottish senate in 1696, and secured by the treaty of union with England in 1707; see Discipline, Patronage, and Bishops. The church is regulated by four courts—the general assem-bly, the synod, the presbytery, and kirk ses-sions; see Presbyterians. For important secessions, see Burghers (1732), and Free Church (1843).

The first general assembly of the church was held,

The first general assembly or one cause were new, 20 Dec. 1560.

CHURCH - RATES. The maintaining the church in repair belongs to the parishioners, who have the sole power of taxing themselves for the expense when assembled in vestry. The enforcement of payment, which is continually disputed by dissenters and others, belonged to the ecclesiastical courts. Many attempts were made to abolish church-rates before Mr. Gladstone's "Compulsory Church-rate Abolition" Bill, passed 31 July, 1868.

Church Rate Abolition for Scotland repealed in the Commons (204-143) . 11 July, 1877

CHURCH SERVICES were ordered by pope Vitellianus to be read in Latin, 663; by queen Elizabeth in 1558 to be read in English.

CHURCH-WARDENS, officers of the church, appointed by the first canon of the synod of London in 1127. Overscers in every parish were also appointed by the same body, and they continue now nearly as then constituted. Johnson's Canons. Church-wardens, by the canons of 1003, are to be chosen annually.

CIBORIUM, in early Christian times, was a protection to the altar-table, first a tabernacle, and afterwards a baldachin over the altar, and also a canopy used at solemn processions. Ciborium also means the vessel in which the eucharist is reserved.

CIDER (Zider, German), when first made in England, was called wine, about 1284. The earl England, was carred wine, about 1224. The earlier of Manchester, when ambassador in France, is said to have passed off cider for vine. It was subjected to the excise in 1763 et seq. The duty was taken off in 1830. Many orchards were planted in Herefordshire by lord Scudamore, ambassador from Charles I. to France. John Philips published his poem "Cider" in 1706.

CIGAR SHIP, see under Steam, 1866.

CILICIA, in Asia Minor, partook of the fortunes of that country. It became a Roman provinc about 64 B.C., and was conquered by the Turks, A.D. 1387.

CIMBRI, a Teutonic race from Jutland, invaded the Roman empire about 120 B.C. defeated the Romans, under Cneius Papirius Carbo, 113 B.C.; under the consul, Marcus Silanus, 109 B.C., and under Capio Manlius, at Arausio, on the banks of the Rhine, where 80,000 Romans were slain, 105 B.C. Their allies, the Teutones, were defeated by Marius in two battles at Aque Sextia (Aix) in Gaul; 200,000 were killed, and 70,000 made prisoners, 102 B.C. The Cimbri were defeated by Marius and Catulus, at Campus Raudius, when about to enter Italy; 120,000 were killed, and 60,000 taken prisoners, 101 B.C. They were afterwards absorbed into the Teutones or Saxons.

founded in 1660, and the Academy of Sciences at Paris in 1666. The *Nuovo Cimento*, a scientific periodical, published at Pisa, began in 1855.

CINCHONA, or CHINCHONA, see Jesuits' Bark.

CINCINNATI. A society established by officers of the American army soon after the peace of 1783, "to perpetuate friendship, and to ruse a fund for relieving the widows and orphans of those who had fallen during the war." On the badge was a figure of Cincinnatus. The people dreaded military influence, and the society dissolved itself.

CINNAMON, a species of laurel, is mentioned among the perfumes of the sanctuary (*Exodus* xxx. 23) 1491 B.C. It was found in the American forests by don Ulloa, 1736, was cultivated in Jamaica and Dominica 1788, and is now grown in Ceylon.

CINQUE-CENTO (five hundred); ter cento, &c.; see note to article Italy.

CINQUE PORTS, on the south coast of England, were originally five (hence the name)—Dover, Hastings, Hythe, Romney, and Sandwich; Winchelsea and Rye were afterwards added. Jeake. Their jurisdiction was vested in barons, called wardens, for the better security of the coast, these ports being nearest to France, and considered the keys of the kingdom; said to have been instituted by William I. in 1078. Rapin. The latest lordwardens: the duke of Wellington, 1828-52; the marquis of Dalhouse, 1852-60; lord Palmerston, 1861-65; earl Granville, appointed Dec. 1865. Their peculiar jurisdiction was abolished in 1855.

CINTRA (Portugal). Here was signed an agreement on 22 Aug. 1808, between the French and English the day after the battle of Vimeira. As it contained the bases of the convention signed on 30 Aug. following, it has been termed the convention of Cintra. By it Junot and his army were permitted to evacuate Portugal free, in British ships. The convention was publicly condemned, and a court of inquiry was held at Chelsea, which exonerated the British commanders. Both Wellington and Napoleon justified sir Hew Dalrymple.

CIPHER, a secret manner of writing. Julius Caesar and Augustus when writing secret despatches are said to have employed the second or third letter instead of the first, and the same sequence with regard to the others. This cipher was in use till the reign of Sixtus IV. (1471-84), when the secret was divulged by Leon Battista Alberti, and a new sort of cipher sprang up. The father of Venetian cipher was Zuan Soro, who flourished about 1516. Rawdon Brown.—See Cryptograph.

CIRCASSIA (Asia, on N. side of the Caucasus). The Circassians, said to be descended from the Albanians, were unsubdued, even by Timour. In the 16th century they acknowledged the authority of the ezar Ivan II. of Russia, and about 1745, the princes of Kabarda took oaths of fealty. Many Circassians became Mahometans in the 18th century.

CIRCENSIAN GAMES were combats in the Roman circus (at first in honour of Consus, the god of councils, but afterwards of Jupiter, Neptune, Juno, and Minerva), said to have been instituted by Evander, and established at Rome, 732 B.C. by Romulus. Tarquin named them Circensian; their celebration continued from 4 to 12 Sept.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 1 to 3 and 72 decimals; and Lagny (1719) as 1 to 3 and 122 decimals.

CIRCLES OF GERMANY (formed by Maximilian I. about 1500, to distinguish the members of the dict of the empire) were, in 1512, Franconia, Bavaria, Upper Rhine, Suabia, Westphalia, and Lower Saxony, in 1512, Austria, Burgundy, Lower Rhine, the Palatinate, Upper Saxony and Brandenburg were added. In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, in 1806 (which see).

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 1176. They were afterwards divided into four, with five justices to each division, 1180. Rapin. They have been frequently altered. England and Wales were formerly divided into eight—each travelled in spring and summer for the trial of civil and criminal cases, the larger towns are visited in winter for trials of criminals only; this is called "going the circuit." The circuits were settled by order in council, 5 Feb. 1876. There are monthly sessions for the city of London and county of Middlesex.

CIRCULAR IRONCLADS. The design is attributed to the Russian admiral Popoff; one of these, named after himself, was launched at the port of Nicolaieff, 7 Oct. 1875. The admiral stated that he derived the idea from the works and views of Mr. E. J. Reed, late constructor of the British navy, who has expressed his approbation of the admiral's works.

CIRCULATING LIBRARY. Stationers lent books on hire in the middle ages. The public circulating library in England, opened by Samuel Fancourt, a dissenting minister of Salisbury, about 1740, failed; but similar institutions at Bath and in London succeeded, and others were established throughout the kingdom. There was a circulating library at Crane-court, London, in 1748, of which a catalogue in two vols. was published.—No books can be taken from the British Museum except for judicial purposes, but the libraries of the Royal Society and the principal scientific societies, except that of the Royal Institution, London, are circulating.—The London Library (circulating) which was founded 24 June, 1840, is of great value to literary men.—Of the subscription libraries belonging to individuals, that founded by Mr. C. E. Mudie, in New Oxford-street, is the most remarkable for the large quantity and good quality of the books: several hundreds, sometimes thousands, of copies

of a new work being in circulation. It began in 1842, and grew into celebrity in Dec. 1848, when the first two volumes of Macaulay's History of England were published, for which there was an unprecedented demand, supplied by this library. The hall, having the walls covered with shelves filled with new books, was opened in Dec. 1860. The "Circulating Library Company" was founded in Jan. 1862, and other companies since.

CIRCULATION OF THE BLOOD, see Blood.

CIRCUMCISION (instituted 1897 n.c.) was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christy, originally the octave of Christmas, is mentioned about 487. It was introduced into the liturgy in 1550.

CIRCUMNAVIGATORS. Among the most daring human enterprises at the period when it was first attempted, was the circumnavigation of the earth in 1510-22.

CIRCUS (Greek, Hippodrome.) There were cight (some say ten) buildings of this kind at Rome; the largest the Circus Maximus, was built by the elder Tarquin, 605 n.c. It was an oval figure: length three stadia and a half, or more than three English furlongs; breadth 960 Roman feet. It was enlarged by Julius Cæsar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Cæsar introduced into it large canals of water, which could be quickly covered with vessels, and represent a sea fight. Pliny; see Amphitheatres, and Factions.

CISALPINE REPUBLIC (N. Italy), formed by the French in May, 1797, from the Cispadane and Transpadane republics, acknowledged by the emperor of Germany by the treaty of Campo Formio (which see), 17 Oct. following. It received a new constitution in Sept. 1798; was remodelled, and named the Italian republic, with

Napoleon Bonaparte president, 1802; and merged into the kingdom of Italy in March, 1805; see Italy.

CISTERCIANS (the order of Citeaux), a powerful order of monks founded about 1098 by Robert, a Benedictine, abbot of Molesme, named from Citeaux, in France, the site of the first convent, near the end of the 11th century. The monks observed silence, abstained from flesh, lay on straw, and wore neither shoes nor shirts. They were reformed by St. Bernard; see Bernardines.

CITATE. The Russian general Gortschakoff, intending to storm Kalafat, threw up redoubts at Citate, close to the Danube, which were stormed by the Turks under Omer Pacha, 6 Jan. 1854. The fighting continued on the 7th, 8th and 9th, when the Russians were compelled to retire to their former position at Krajowa, having lost 1500 killed and 2000 wounded. The loss of the Turks was estimated at 338 killed and 700 wounded.

CITIZEN. It was not lawful to scourge a citizen of Rome. Livy. In England a citizen is a person who is free of a city, or who doth carry on a trade therein. Canaden. Various privileges have been conferred on citizens as freenen in several reigns.—The wives of citizens of London (not being addermen's wives, nor gentlewomen by descent) were obliged to wear minever caps, being white woollen knit three-cornered, with the peaks projecting three or four inches beyond their foreheads; aldermen's wives made them of velvet, 1 Eliz. 1558. Stove.—On 10 Oct. 1792, the convention decreed that "citoyen" and "citoyenne" should be the only titles in France.

CITY. (Latin civitas, French cité, Italian città.) The word has been used in England only since the conquest, when London was called Londonburgh. Cities were first incorporated 1079. A town corporate is called a city when made the seat of a bishop and having a cathedral church. Camden. Truro and St. Albans were made cities in 1877, having become bishoprics.

CIVIL LAW. See Codes. Civil law was restored in Italy, Germany, &c., 1127. Blair. It was introduced into England by Theobald, a Norman abbot, afterwards archbishop of Canterbury in 1138. It is now used in the spiritual courts only, and in maritime affairs; see Doctors' Commons, and Laws.

CLANSHIPS are said to have arisen in Scotland, in the reign of Malcolm II., about 1008. The legal power of the chiefs and other remains of heritable jurisdiction were abolished in Scotland, and liberty was granted to clausmen in 1747, in consequence of the rebellion of 1745. The following is a list of all the known claus of Scotland, with the badge of distinction anciently worn by each. The chief of each clan wears two eagle's feathers in his bonnet, in addition to the badge. Chambers. A history of the clans by Wm. Buchanan was published in 1775.

CLEARING-HOUSE. In 1775, a building in Lombard-street was set apart for the use of bankers, in which they might exchange drafts, bills, and securities, and thereby save labour and curtail the amount of floating cash requisite to meet the settlement of the different houses, if effected singly. By means of transfer tickets, transactions to the amount of millions daily are settled without the intervention of a bank note. In 1861, the clearing-house was used by 117 companies, and in May, 1864, it was joined by the Bank of England. In the year ending 30 April, 1868, 3,257,411,000.

CLERGY (from the Greek kleros, a lot or inheritance) in the first century were termed pres-byters, elders, or bishops, and deacons. The bishops (episcopoi or overseers), elected from the presbyters, in the second century assumed higher functions (about 330), and, under Constantine, obtained the recognition and protection of the secular power. Under the Lombard and Norman-French kings in the 7th and 8th centuries, the clergy began to possess temporal power, as owners of lands; and after the establishment of monachism, a distinction was made between the regular clergy, who lived apart from the world, in accordance with a regula or rule, and the secular (worldly) or beneficed clergy. The English clergy write clerk after their names in

legal documents. See Church of England (note) and Bishops.

The clergy were first styled clerks, owing to the judges being chosen after the Norman custom from the sacred order, and the officers being clergy; this gave them that denomination, which they keep to this day Black-

As the Druids kept the keys of their religion and of letters, so did the priests keep both these to the uselves they alone make profession of letters, and a man of letters was called a clerk, and hence learning went by

the name of clerkship. Pasquier.
Benefit of Clerkship. Privilegium Clericale arose in the regard paid by Christian princes to the church, and consisted of: 1st, an exemption of places consecrated to religious duties from criminal arrests, which was the foundation of sanctuaries, and, exemption of the persons of clergymen from criminal process before the secular judge, in particular cases, which was the original meaning of the privilenum chricale. The benefit of clergy was afterwards extended to everyone who could read, and it was enacted, that there should be a prerogative allowed to the clergy, that if any man who could read were to be condemned to death, the bishop of the diocese might, if he would, claim him as bishop of the doccese might, if he would, claim him as a clerk, and dispose of him in some places of the clergy as he might deem meet. The ordinary gave the prisoner at the bar a Latin book, in a black Gothic character, from which to read a verse or two, and if the ordinary said, "Legit at Chricias" ("He reads like a clerk"), the offender was only buint in the hand; otherwise, he suffered death, ; Edw 1 (1274). The privilege was restricted by Henry VIII in [489, and abolished, with respect to numberers and other great.

abolished, with respect to munderers and other great criminals, by Henry VIII., 1512. Slaw The reading was discontinued by 5 Anne. c. 6 (1706).

Benefit of Clergy was wholly repealed by 7 & 8 Geo IV e 28 (1827)

CLERKENWELL, a parish, N. E. London, so called from a well (fons clericorum) in Raystreet, where the parish clerks occasionally acted mystery-plays: once before Richard II. in 1390. Hunt's political meetings in 1817 were held in Spa-fields in this parish. In St. John's parish are the remains of the priory of the knights of St. John of Jerusalem. Clerkenwell prison was built in 1615, in lieu of the noted prison called the Cage, which was taken down in 1614; the then Bride-well having been found insufficient. The prison called the House of Detention, erected in 1775, was rebuilt in 1818; again 1844. For the explosion

here, see Fenians, Dec. 1867. At Clerkenwell-close formerly stood the house of Oliver Cromwell, At Clerkenwellwhere some suppose the death-warrant of Charles I. was signed, Jan. 1649.

CLERMONT (France). Here was held the council under pope Urban II, in 1095, in which the first crusade against the infidels was determined upon, and Godfrey of Bouillon appointed to command it. In this council the name of pope is said to have been first given to the head of the Roman Catholic church, exclusively of the bishops who used previously to assume the title. Philip I. of France was (a second time) excommunicated by this assembly. Hénault.

CLEVES (N. E. Germany). Rutger, count of Cleves, lived at the beginning of the 11th century. Adolphus, count of Mark, was made duke of Cleves by the emperor Sigismund, 1417. John William, duke of Cleves, Berg, Juliers, &c., died without issue, 25 March, 1600, which led to a war of succession. Eventually Cleves was assigned to the elector of Brandenburg in 1666; seized by the French in 1757; restored at the peace in 1763, and now forms part of the Prussian dominions.

CLIFTON SUSPENSION - BRIDGE, over the Avon, connecting Gloucestershire and Somersetshire, constructed of the removed Hungerford-bridge, was completed in Oct. and opened 8 Dec. 1864. It is said to have the largest span (702 feet) of any chain bridge in the world. In 1753 Alderman Vick, of Bristol, bequeathed 1000%. to accumulate for the erection of a bridge over the Avon. In 1831 Brunel began one, which was abandoned after the expenditure of 45,000%.

CLIMACTERIC, the term applied to certain periods of time in a man's life (multiples of 7 or 9), in which it is affirmed notable alterations in the health and constitution of a person happen, and expose him to imminent dangers. Cotgrave says "Every 7th or 9th or 63rd year of a man's life, all very dangerous, but the last most." The grand climacteric is 63. Hippocrates is said to have referred to these periods, 383 B.C.

CLINICAL SOCIETY OF LONDON, for the cultivation and promotion of practical medi-cine and surgery, established in Dec. 1867; first president, sir Thomas Watson. See Lectures (clinical).

The initials C. L. I. O., forming the name of the muse of history, were rendered famous from the most admired papers of Addison, in the Spectator, having been marked by one or other of them, signed consecutively, in 1713. Cibber.

CLOACA MAXIMA, the chief of the celebrated sewers at Rome, the construction of which is attributed to king Tarquinius Priscus (588 B.C.) and his successors.

CLOCK. The clepsydra, or water-clock, was introduced at Rome about 158 n.c. by Scipio Nasica. Toothed wheels were applied to them by Ctesibius, about 140 B.C. Clocks said to have been found by Casar on invading Britain, 55 B.C. The only clock supposed to be then in the world was sent by pope Paul I. to Pepin king of France A.D. 760. Pacificus, archdeacon of Genoa, invented one in the 9th century. Originally the wheels were three feet in diameter. The earliest complete clock of which there is any certain record was made by a Saracen mechanic in the 13th century. Alfred is said to have measured time by wax tapers, and to have

used lanterns to defend them from the wind about 887.

CLOGHER (Ireland). St. Macartin, a disciple of St. Patrick, fixed a bishopric at Clogher, where he also built an abbey "in the street before the royal seat of the kings of Ergal." He died in 506. Clogher takes its name from a golden stone, from which, in times of paganism, the devil used to pronounce juggling answers, like the oracles of Apollo Pythius. Sir James Ware. In 1041 the cathedral was built anew, and dedicated to its founder. Clogher merged, on the death of its last prelate (Dr. Totteuham), into the archiepiscopal see of Armagh, by the act of 1833.

CLONFERT (Ireland). St. Brendan founded an abbey at Clonfert in 558: his life is extant in jingling monkish metre in the Cottonian library at Westminster. In his time the cathedral, famous in ancient days for its seven altars, was erected; and Colgan makes St. Brendan its founder and the first bishop; but it is said, in the Ulster Annals, under the year 571, "Mæna, bishop of Clonfert-Brenain, went to rest." Clonfert, in Irish, signifies a wonderful den or retirement. In 1839 the see merged into that of Killaloe; see Bishops.

CLONTARF (near Dublin), the site of a battle fought on Good Friday, 23 April, 1014, between the Irish and Danes, the former headed by Bryan Boroimhe, monarch of Ireland, who defeated the invaders, after a long and bloody engagement, was wounded, and soon afterwards died. His son Murchard also fell with many of the nobility; 13,000 Danes are said to have perished in the battle.

CLOSTERSEVEN (Hanover) CONVENTION OF, was entered into 8 Sept. 1757, between the duke of Cumberland, third son of George II., hardly pressed, and the duke of Richelieu, commander of the French. By it 38,000 Hanoverians laid down their arms, and were dispersed. The treaty was disavowed by the king; the duke resigned all his commands, and the convention was soon broken.

CLOTH, see Woollen Cloth and Calico.

CLOUD, ST., a palace near Paris, named from prince Clodoald or Cloud, who became a monk there in 533, after the murder of his brothers, and died in 560. The palace was built in the 16th century, and in it Henry II. was assassinated by Clement, 2 Aug. 1589. This palace, long the property of the dukes of Orleans, was bought by Marie Antoinette in 1785. It was a favourite residence of the empress Josephine, of Charles X. and his family, and of the emperor Napoleon III It was burnt during the siege of Paris, having been fired upon by the French themselves, 13 Oct. 1870.

CLOUDS consist of minute particles of water, often in a frozen state, floating in the air. In 1803 Mr. Luke Howard published his classification of clouds, now generally adopted, consisting of three primary forms—cirrus, cumulus, and stratus; three compounds of these forms; and the nimbus or black rain clouds (cumulo-cirro-stratus.) A new edition of Howard's Essay on the Clouds appeared in 1865.

CLOVESHOO (now Clift), Kent. Here was held an important council of nobility and clergy concerning the government and discipline of the church, Sept. 747; and others were held here, 800, 803, 822, 824.

CLOYNE (S. Ireland), a bishopric, founded in the 6th century by St. Coleman, was in 1431 united to that of Cork, and so continued for 200 years. It was united with that of Cork and Ross, 1834; see *Bishops*.

CLUBMEN, associations founded in the southern and western counties of England, to restrain the excesses of the armies during the civil wars, 1642-9. They professed neutrality, but inclined towards the king, and were considered enemies by his opponents.

CLUBS, originally consisted of a small number of persons of kindred tastes and pursuits, who met tegether at stated times for social intercourse. The club at the Mermaid tavern, established about the end of the 16th century, consisted of Raleigh, Shakspeare, and others. Ben Jonson set up a club at the Devil tavern. Addison, Steele, and others, frequently met at Button's coffee-house, as described in the Spectator. The present London clubs, some comprising 300, others about 1500 members, possess handsome luxuriously furnished edifices in or near Pall Mall. The members obtain choice viands and wines at moderate charges, and many clubs possess excellent libraries, particularly the Atheneum (which see). The annual payment varies from 6l. to 11l. 11s.; the entrance fee from 9l. 9s. to 31l. 11s. The following are the principal clubs; several are described in separate articles:—

Rota (political) . 1659 Civil Club (professional and commercial-still cristing) . 19 Nov. 1669 White's (Tory), at White's Coffee house . 1698 Kit-Cat (literary) . 1700

CLUBS, FRENCH. The first arose about 1782. They were essentially political, and greatly con-cerned in the revolution. The Club Breton became the celebrated Club des Jacobins, and the Club des Cordeliers comprised among its members Dunton and Camille Desmoulins. From these two came the Mountain party which overthrew the Girondists in 1793, and fell in its turn in 1794. The clubs disappeared with the Directory in 1799. They were revived 1848 in considerable numbers, but did not attain to their former eminence, and were suppressed by decrees, 22 June, 1849, and 6 June, 1850. Bouillet.

CLUB-FOOT, a deformity due to the shortening of one or more of the muscles, although at-tempted to be relieved by Lorenz in 1784, by cutting the tendo Achillis, was not effectually cured till 1811, when Stromeyer of Erlangen cured Dr. Little by dividing the tendons of the contracted muscles with a very thin knife.

CLUGNY or CLUNY, ABBEY OF, in France, formerly most magnificent, founded by Benedictines, under the abbot Bern, about 910, and sustained afterwards by William, duke of Berry and Aquitaine. English foundations for Cluniac monks were instituted soon after.

CLYDE AND FORTH WALL was built by Agricola, 84. The Forth and Clyde CANAL was commenced by Mr. Smeaton, 10 July, 1768, and was opened 28 July, 1790. It forms a communication between the seas on the eastern and western coasts of Scotland.

COACH (from coche, Spanish). Beckmann states that Charles of Anjou's queen entered Naples in a caretta (about 1282). Under Francis I, there were but two in Paris, one belonging to the queen, the other to Diana, the natural daughter of Henry II. There were but three in Paris in 1550; and Henry IV. had one without straps or springs. John de Laval de Bois-Dauphin set up a coach on account of his enormous bulk. The first coach seen in England was about 1553. Coaches were introduced by Fitz-Alan, earl of Arundel, in 1580. Stow. A bill was brought into parliament to prevent the effeminacy of men riding in coaches, 43 Eliz. 1601. Carte. Repealed 1625. The coach of the duke of Buckingham had six horses, that of the earl of Northumberland eight, 1619. The coach-tax com-Northumberland eight, 1619. The coach-tax commenced in 1747. Horaco Walpole says that the present royal state coach (first used 16 Nov. 1762), cost 7528l. The lord mayor's old state coach was not used 9 Nov. 1867; see Car, Carriages, Chariots, Hackney Coaches, Mail Coaches, &c. G. Thrupp's "History of Coaches" published 1877.

COAL.* It is contended, with much seeming truth, that coal, although not mentioned by the Romans in their notices of Britain, was yet in use by the ancient Britons. Brandt. Henry III. is said to have granted a licence to dig coals near Newcastle-upon-Tyne in 1234; some say earlier, and others in 1239. Sea-coal was prohibited from being used in and near London, as being "prejudicial to human health;" and even smiths were obliged to burn wood, 1273. Stow. In 1306 the gentry petitioned against its use. Coal was first made an article of trade from Newcastle to London, 4 Rich II. 1381. Rymer's Fædera. Notwithstanding the many previous complaints against coal as a public nuisance, it was at length generally burned in London in 1400; but it was not in common use in England until the reign of Charles I. 1625. Coal was brought to Dublin from Newry in 1742.

The coal-fields of Great Britain are estimated at 5400 aguare miles; of Durham and Northumberland, 721 square miles. United States, 41,752,609 tons, obtained in Mr Sopwith, in 1855, computed the annual product of the coal-mines of Durham and Northumberland at 14 million tons: 6 millions for London, 2½ millions exported, 2½ millions for coke, 1 million for colliery engines, &c., and two millions for local consumption.

By a stipulation in the commercial treaty of 1860, in consequence of the French government greatly reducing the duty on imported coal, the British government (it is thought by many imprudently) engaged to lay no duty on exported coal for ten years. In 1859 about 7,000,000 tons of Butish coals were exported, of which 1,391,009 tons went to France

Cochineal was brought to Europe about 1523, but was not known in Italy in 1548, although the art of dyeing then flourished there. In 1858 it was cultivated successfully in Teneriffe, the vines having failed through disease. 260,000 lbs. of cochineal were imported into England in 1830; 1,081,776 lbs. in 1845; 2,360,000 lbs. in 1850; 3,034,976 lbs. in 1859; 47,790 cwt. in 1870; and 32,094 cwt. in 1877. COCK-FIGHTING, practised by the Greeks, was brought by the Romans into England. William Fitz-Stephen, in the reign of Henry II., describes cock-fighting as the sport of school-boys on Shrove-Tuesday. It was prohibited by Edward III. 1365; by Henry VIII.; and by Cromwell, 1653, and latterly in 1849. Part of the site of Drury-lane theatre was a cock-pit in the reign of James I.; and the Cock-pit at Whitehall was erected by Charles II. Formerly there was a Cock-pit-Royal in St. James's Park; but the governors of Christ's Hospital would not renew the lease for the building.* Cock-fighting is now forbidden by law. COHORT. A division of the Roman army consisting of about 420 men, with 300 envalry, divided into centuries. It was the sixth part of a legion.

COIF. The serjeant's coif was originally an iron scull-cap, worn by knights under their helmets. The coif was introduced before 1259, and was used to hide the tonsure of such renegado clergymen as chose to remain advocates in the secular courts, notwithstanding their prohibition by canon. Blackstone. The coif was at first a thin linen cover gathered together in the form of a skull or helmet, the material being afterwards changed into white silk, and the form eventually into the black patch at the top of the forensic wig, which is now the distinguishing mark of the degree of serjeant-at-law. Fows's Lives of the Judges.

COIMBRA was made the capital of Portugal by Alfonso, the first king, 1139. The only Portuguese university was transferred from Lisbon to Coimbra in 1308; finally settled in 1527. In a convent here, Alfonso IV. caused Incz de Castro, at first mistress and afterwards wife of his son Pedro, to be cruelly murdered in 1355.

COIN. Homer speaks of brass money, 1184 n.c. The invention of coin is ascribed to the Lydians, whose money was of gold and silver. Both were coined by Pheidon, tyrant of Argos, about 862 n.c. Money was coined at Rome under Servius Tullius, about 573 n.c. The most ancient known coins are Macedonian of the 5th century n.c. Brass money only was in use at Rome previously to 260 n.c. (when Fabius Pietor coined silver). Gold was coined 206 n.c. Iron money was used in Sparta, and iron and tin in Britain. Dufresnoy. In the earlier days of Rome the heads were those of deities, or of those who had received divine honours. Julius Ciesar first obtained permission of the senate to place his portrait on the coins, and the example was soon followed. The Britons and Saxons coined silver. Rev. Roger Ruding's "Annals of the Coinage of Great Britain," published 1817-40. The gold and silver coinage in the world is about 250,000,000! silver, and 150,000,000! gold. Times, and other coins under names. An international conference relative to a universal system of coinage met at Paris in 1867; and a royal commission was appointed in London, Feb. 1868.

The first coinage was at Camalodunum, or Colchester.

COINING. Originally the metal was placed between two steel dies, and struck by a hammer. between two steer dies, and struck by a manner. In 1553, a mill, invented by Antoine Brucher, introduced into England, 1562. An engine invented by Balancier, 1617. Great improvements effected by Boulton and Watt, at Solo, 1788. The erection of the Mint machinery, London, began 1811.

COLCHESTER (Essex), Camelodunum, a Roman station, obtained its first charter from Richard I., 1189. Its sixteen churches and all its buildings sustained great damage at the ten weeks' siege, June-Aug. 1648. Two of its defenders, sir George Lisle and sir Charles Lucas, were tried and shot after surrendering. The baize manufacture was established here, 1660. Anderson. The railway to London was opened in 1843.

COLD. The extremes of heat and cold are found to produce the same perceptions on the skin, and when mercury is frozen at forty degrees below zero, the sensation is the same as touching red-hot iron. During the hard frost in 1740, a palace of ice was built at St. Petersburg. Greig. Quicksilver was frozen hard at Moscow, 13 Jan. 1810. Perhaps the coldest day ever known in London was 25 Dec. 1796, when the thermometer was 16° below zero. On Jan. 1854, the thermometer marked 4° below zero, Fahrenheit; on 25 Dec. 1860, it fell in some places to 18° and in others to 15° below zero; at Torquay, Devon, 20° below zero. From 23 to 30 Dec. the cold was excessive. On 4 Jan. 1867, the thermometer stood at 3° below zero at Hammersmith and Hornsey, near London; on 7 Jan., at 55° above; see Frosts, Ice, Congelation, Regelation.

COLDINGHAM, near Berwick, is celebrated for the heroism of its nuns, who, on the attack of the Danes, in order to preserve their chastity, cut off their noses and lips. The Danes burnt them all, with the abbess Ebba, in their monastery, 870.

COLDSTREAM GUARDS. General Monk. before marching from Scotland into England to restore Charles II., raised this regiment at Coldstream, at the confluence of the Leet and Tweed. 1660. For its services in suppressing Venner's insurrection in 1661, it was not disbanded, but constituted the 2nd regiment of foot guards.

COLISEUM or COLOSSEUM, at Rome, an elliptical amphitheatre, of which the external diameter is 1641 Italian feet, supposed to have been able to contain 80,000 spectators of the fights with wild beasts, and other sports in the arena. It was creefed between 75 (some say 77) and 80, by the emperors Vespasian and Titus, at an expense sufficient to have built a metropolis. Its remains are very imposing. Excavations are proceeding, 1874-8.

COLLAR, a very ancient ornament. The Roman hero Titus Manlius slew a gigantic Gaul in single combat, and put his torques (twisted chain or collar) on his own neck, and was hence surnamed Torquatus, 361 n.c. A collar is part of the ensigns of the order of knighthood. That of the order of the garter is described, and its wearing enjoined, in the statutes of Henry VIII., 24 April, 1522; but a collar had been previously worn. Ashmole. The collar of SS. was adopted by Henry IV., and became a Lancastrian badge; some consider the letters stand for "souveraigne," in reference to his claim to the crown. Some writers consider SS. to be in honour of St. Simplicius, a martyr. The order of the Collar or Necklaec (or Annonciada) was instituted by Amadeus VI. of Savoy, about 1360.

COLLECTS, short prayers, very ancient, introduced into the Roman service by pope Gelasius, about 493, and into the English liturgy in 1548. The king of England coming into Normandy, appointed a collect for the relief of the Holy Land, 1166. Rapin.

COLLEGES. University education preceded the erection of colleges, which were munificent foundations to relieve the students from the expense of living at lodging-houses and at inns. Collegiate or academic degrees are said to have been first conferred at the university of Paris, 1140; but some authorities say not before 1215. In England, it is contended that the date is much higher, and some hold that Bede obtained a decree formally at Cambridge, and John de Beverley at Oxford, and that they were the first doctors of these universities; see Cambridge, Oxford, Aberdeen, Queen's Colleges, Heralds, Working Men's Colleges, &c.

COLONIAL SOCIETY, established to promote the interests of the colonies, lord Bury, president, held its first meeting 26 June, 1863, and first annual meeting 28 June, 1869, when it assumed the title "Royal." On 7 March, 1870, it became "The Royal Colonial Institute." The "Proceedings" have been published. The formation of a National and Colonial League was resolved on at a meeting held at Cannon-street, London, 5 Jan. 1870.

COLONIES. The Phonician and Greek colonies, frequently founded by political exiles, soon became independent of the mother country. The Roman colonies, on the contrary, continued in close connection with Rome itself; being governed almost entirely by military law.—The COLONIES OF GREAT BRITAIN partake of both these characters. The N. American colonies revolted in consequence of the attempt at taxation without their consent in 1764. The loyal condition of the present colonies now is due to the gradual relaxation of the pressure of the home government. The population of the British colonies in all parts of the world was estimated, in 1861, at 142,952,243; in 1877, 204,254,406. The revenue of the colonies was estimated in 1865 to be 51,492,000., the expenditure, 59,353,000. The act for the abolition of slavery in the British colonies, and for compensation to the owners of slaves (20,000,000. sterling), was passed in 1833. All the slaves throughout the British colonies were emancipated on 1 Aug. 1834. See Bishops (Colonial), Sceretaries, and Separate Articles.

COLORADO, a territory of the United States of North America, was organised 2 March, 1861; proclaimed a state, Aug. 1876; capital, Denver City.

Colorado Reelle (so named from its supposed native country), was first described by Thomas Say, and named dorgphora decembeneata, in 1824, when he found it near the Upper Missouri. It soon took to feeding on potators, as they were planted, and gradually proceeded, eastward through Nebraska, lowa, Illinois, Ohio, &c., to the New England states, destroying the crops, 1859 at seq. In 1873 it reached New York, and the Atlantic seaboard in 1874, swarming there in 1876, and attacking Canada. The fear of its invading Britain led to an order in council respecting its destruction, &c., 14 Aug. 1877. Very few specimens arrived.

COLOSSEUM, see Coliscum. The building in Regent's Park, London, was planned by Mr. Hornor, a land surveyor, and commenced in 1824, by Peto and Grissell, from designs by Decimus Burton. The chief portion is a polygon of 16 faces, 126 feet in diameter externally: the walls were three feet thick at the ground: the height to the glazed dome 112 feet. On the canvas walls of the dome was painted the panoramic view of London, completed in 1829 from sketches by Mr. Hornor taken from the summit of St. Paul's cathedral in 1821-2. The picture covered above 46,000 square feet, more than an acre of canvas. The different parts were combined by Mr. E. T. Parris, who in 1845 repainted the whole. In 1848 a panorama of Paris was exhibited; succeeded, in 1850, by the lake of Thorn in Switzerland; in

1851 the panorama of London was reproduced. In 1848 the theatre, with the panorama of Lisbon, was added. In 1831, when Mr. Hornor failed, the establishment was sold for 40,000l. to Messrs. Braham and Yates. In 1843 it was bought by Mr. D. Montague for 23,000 guineas. Timbs. After having been long closed, the building was opened to the public at Christmas, 1856, at one shilling. Under the charge of Dr. Bachhoffner, it continued open till the spring of 1864, when it was again closed. The sale of the site was announced 1870. It was announced in Dec. 1871, that a company was about to transform the building and grounds into club-chambers, baths, a winter garden, &c. In 1874, it was sold; large mansions to be erected on the site.

COLOSSUS OF RHODES, a brass statue of Apollo, seventy cubits high, esteemed one of the wonders of the world, was erected at the port of Rhodes in honour of the sun, by Chares of Lindus, disciple of Lysippus, 290 or 288 B.C. It was thrown down by an earthquake about 224 B.C. The figure is said traditionally to have stood upon two moles, a leg being extended on each side of the harbour, so that a vessel in full sail could enter between. The statue was in ruins for nearly nine centuries, and had never been repaired; when the Saracens, taking Rhodes, pulled it to pieces, and sold the metal, weighing 720,900 lbs., to a Jew, who is said to have loaded 900 camels in transporting it to Alexandria about 653. COLOUR is to light what pitch is to sound, according to the undulatory theory of Huyghens (about 1678), established by Dr. T. Young, and others. The shade varies according to the number of vibrations. 458 millions of millions of vibra-tions in a second attributed to the red end of the spectrum; to the violet, 727; see Spectrum.*

COLUMBIA, a federal district round the city of Washington in Maryland; established 1800. Slavery was abolished in 1862, see Brit. Columbia.

COLUMBIA MARKET, Bethnal Green, E. London; erected by Mr. Darbishire, architect, in the pointed Gothic style, and inaugurated by Miss (now lady) Burdett Coutts, the proprietor, 28 April, 1869. It cost her 200,000l. It was opened as a wholesale fish-market, 21 Feb. 1870, but was not successful. On 3 Nov. 1871, lady Burdett Coults presented the market to the corporation of London, and on 18 July, 1872, she received publicly the freedom of that city.

The market did not succeed, and the buildings were

COLUMBIUM, a metal discovered by C. Hatchett, in a mineral named columbite, in 1801. It is identical with niobium, and not with tantalum, as supposed by some chemists.

COMBAT, SINGLE. Trial by this commenced by the Lombards, 659. Baronius. It was introduced into England for accusations of treason, if neither the accuser nor the accused could produce good evidence; see High Constable, and Appeal of Battle.

'Some persons (about 65 out of 1154) cannot distinguish between colours, and are termed Colour blind. In 1859, professor J. A battle by single combat was fought before the king. William II, and the peers, between Geoffrey Bay-nard and William, earl of Eu, who was accused by Baynard of high treason; and Baynard having conquered, Eu was deemed convicted, and blinded and mutilated, 1096.

A combat proposed between Henry of Bolingbroke, duke of Hereford (afterwards Henry IV), and Thomas, duke of Norfolk, was forbidden by Richard H. Sept. 1308.

COMBINATION. Laws were enacted from the time of Edward I. downwards, regulating the price of labour and the relations between masters and workmen, and prohibiting the latter from combining for their own protection. All these laws were repealed, 6 Geo. IV. c. 129, in 1825, due protection being given to both parties. The act was amended in 1859 by 22 Vict. c. 34, when the subject was much discussed, in consequence of the strike in the building trades, see Sheffield and Strikes.

COMBS, found in Pompeii; Combmakers' company incorporated, 1636 or 1650.

COMBUSTION, see Spontaneous.

COMEDY. Thalia is the muse of comedy and lyric poetry. Susarion and Dolon, the inventors of theatrical exhibitions, 562 B.C., performed the first comedy at Athens, on a waggon or movable stage, on four wheels, for which they were rewarded with a basket of figs and a cask of wine; see Arundelian Marbles, and Drama.

Comedy, for libel, prohibited at Athens, 440 B.C. Austophanes called the prince of ancient comedy, 434 B.C., and Menander that of the new, 320 B.C. Of Plantus, 30 comedies are extant; he flourished 220 B.C.

Status Cacibus wrote upwards of 30 comedies; flourished at Rome 180 B C.

Comedies of Lacius and Terence first acted 154 B.C. First regular comedy performed in England about A.D.

It was said of Sheridan that he wrote the best comedy (the School for Scandal), the best opera (the Ducuna), and the best afterpiece (the Uritic), in the English language (1775-1779).

COMETS (Greek come, a hair). It is recorded that more than 600 have been seen. Mr. Hind, in his little work on comets, gives a chronological list. The first discovered and described accurately was by Nicephorus, 1337. There are said to be 17,500,000 in the solar system. Amédée Guillemin's "World of Comets," by J. Glaisher, published 1877.

At the birth of the great Mithridates two large comets appeared, which were seen for seventy-two days to-gether, whose splendour eclipsed that of the mid-day sun, and occupied the fourth part of the heavens, about 135 B.C. Justin.

133 B.C. Justo.
A grand comet seen, 1264. Its tail is said to have extended 100°. It is considered to have reappeared in 1556, with diminished splendour; and was expected to appear again about Aug. 1880 or Aug. 1860. Hind A remarkable one seen in England, June, 1337. Stor.

Tycho Brahe demonstrated that comets are extraneous

to our atmosphere, about 1577.
A comet which terrified the people from its near approach to the earth was visible from 3 Nov. 1679 to 9 March, 1680. It enabled Newton to demonstrate that comets, 1886. It enabled Newton to demonstrate that conters, as well as planets, are subject to the law of gravitation, and most probably move in elliptic orbits, 1704.
A most brilliant comet appeared in 1769, which passed within two millions of miles of the earth. This beauti-

in London; its tail stretched across the heavens like a prodigious humious arch, 36,000,000 miles in length. The computed length of that which appeared in 1811, and which was so remarkably conspicuous, was, on 15 Oct. according to the late Dr. Herschel, upwards of 100,000,000 miles, and its apparent greatest breadth, at the same time, 15,000,000 miles. It was visible all the autumn to the naked eye. Philos. Trans. Royal Soc.

for 1812. Another comet, Dec. 1823.

HALLEY'S COMET, 1682. Named after one of the greatest astronomers of England. He first proved that many of the appearances of comets were but the periodical returns of the same bodies, and he demonstrated that the comet of 1682 was the same with the comet of 1456, 1531, and 1607, deducing this fact from a minute observation of the flist-mentioned comet, and being struck vation of the first-mentioned comet, and being stille is by its wonderful resemblance to the connects described as having appeared in those years: Halley, therefore, first fixed the identity of connects, and predicted their periodica: etarins. Vinec's Astronomy. The revolution of Halley's comet is performed in about 75 years, it appeared (as he had predicted) in 1759, and came to its perihedion on March 13; its last appearance was 1835, its next will be 100. its next will be 1910

ENCKE'S COMET. First discovered by M. Pons, 26 Nov 1818, but justly named by astronomers after professor Encke, for his success in detecting its orbit, motions, and perturbations; it is, like the preceding, one of the three comets which have appeared according to prediction, and its revolutions are made in 3 years and 15 weeks. Thirteenth return observed at Copenhagen by M. d'Arrest, 20 July, 1863, observed in England, 14

Oct. 1871.

BILLA'S COMET has been an object of fear to many on account of the nearness with which it has approached, not the earth, but a point of the earth's path; it was first discovered by M. Biela, an Austrian officer, 28 Feb. 1826. It is one of the three comets whose re-appear-1826. It is one of the three comets whose re-appearance was predicted, its revolution being performed in 6 years and 38 weeks. Its second appearance was in 1842, when the time of its perihelion passage was 27 Nov.; its third was in 1839; its fourth in 1845; and its fifth in 1852, it has since vanished.

Donati's Comet, so called from its having been first observed by Dr. Donati, of Florence, 2 June, 1858, being then calculated to be 228,000,000 miles from our earth It was very brilliant in England in the end of September and October following, when the tail was said to be 40,000,000 miles long. On the roth of October it was 40,000,000 miles long. On the roth of October it was nearest to the earth; on the 18th it was near coming into collision with Venus. Opinions varied as to this comet's brilliancy compared with that of 1811.

The Great Comet of 1861 was first seen by Mr. Tebbutt at Sydney, in Australia, 13 May; by M. Goldschundt and others in France and England on 29, 30 June. The nucleus was about 400 miles in diameter, with a long bush-like tail, travelling at the rate of 10,000,000 miles in 24 hours. On 30 June, it was suggested that we were in the tail—there being "a phosphorescent auroral glare"

A tailless comet was discovered in the constellation Cassiopeda, by M. Seeling, at Athens, on 2 July, and by M. Tempel, at Marseilles, 2 and 3 July, 1862. A comet detected at Harvard by Mi Tuttle, 18 July, and

by Rosa, at Rome, on 25 July, 1862. It was visible by the naked eye in August and September.

Six telescopic comets were observed in 1863, and several

A fine comet appeared in the southern hemisphere, and was visible in South America and Australia, in Jan.-Feb 1865.

M. Babinet considered that comets had so little density that the earth might pass through the tail of one with-

out our being aware of it, 4 May, 1857. Schiaparelli, of Milan, discovered that the August meteors move round the sun in an orbit almost identical with the second comet of 1862-1866.

One discovered at Carlsruhe by Dr. Winnecke, 13 June, 1868; a bright one by Paul Henry, 23 Aug. 1873. Several small comets discovered by various astronomers,

1873-8.

COMET, discovered by him at Marseilles, COUCIA'S OGGLAS COMET, UNCOVERED by him at surrennes, 18 April, became visible (near Polar star) in London about 4 July; gradually increased in brightness, and passed out of sight in a few weeks, in Europe; and appeared brilliant at Melbourne, 1 Aug. 1874.

COMMENDAM, "a benefice or church living, which being void, is commended to the charge of some sufficient clerk, to be supplied until it may be conveniently supplied with a pastor."

COMMERCE early flourished in Arabia, Egypt, and among the Phoenicians, see the description of Tyre, 588 n.c., Ezek. xxvii. In later times it was spread over Europe by a confederacy of maritime cities, 1241 (see Hanse Towns); by the discoveries of Columbus; and by the enterprises of the Dutch and Portuguese; see Exports, Imports, and articles connected with this subject.

The first treaty of commerce made by England with any foreign nation was entered into with the Flemings, 1 Edw. I. 1272. The second was with Portugal and Spain, 2 Edw. II. 1308. Anderson; see Treatnes. Hertslett's Collection, in 12 vols. 8vo, published 1827-59, has a copious index. An important commercial treaty was concluded with English (see English Treath).

COMMISSION, see High Commission, Court of.

COMMISSIONNAIRES, street messengers Those in London were originally pensioned soldiers wounded either in the Crimea or India, first employed in the west-end. They were appointed by a society, founded in Feb. 1859 by capt. Edward Walter, which is now under the patronage of the queen and the commander-inchief. The charges are regulated by a tariff. In Jan. 1861 the society commenced the gratuitous issue of a Monthly Advertising Circular. In March, 1864, there were 250 commissionnaires in London; in Nov. 1866, about 340; in June, 1868, 377; in Oct. 1872, 500. On 17 June, 1865, capt. Walter resigned, and a permanent system of administration was formed. In 1865 commissionnaires were first engaged as private night-watchmen.

COMMON COUNCIL OF LONDON. Its organisation began about 1208. The charter of Henry 1. mentions the folk-mote, a Saxon appellation for a court or assembly of the people. The general place of meeting of the folk-mote was in the open air at St. Paul's-cross, St. Paul's churchyard. It was not discontinued till after Henry III.'s reign; when certain representatives were chosen out of each ward, who, being added to the lord mayor and aldermen, constituted the court of common council. At first only two were returned for each ward; but the number was enlarged in 1347, and since. This council, which needs every Thursday, is elected annually 21 Dec., St. Thomas's-day. A Common Hall is held occasionally. The common council supported the prince of Orange in 1688, and queen Caroline in 1820.

COMMON LAW OF ENGLAND, an ancient collection of unwritten maxims and customs (leges non scriptæ), of British, Saxon, and Danish origin, which has subsisted immemorially in this kingdom; and although somewhat impaired by the rude shock of the Norman conquest, has weathered the violence of the times. At the parliament of Merton, 1230, "all the earls and barons," says the parliament roll, "with one voice answered, that they would not change the laws of England, which have hitherto been used and approved;" eminently the law of the land; see Bastard. The process, practice, and mode of pleading in the superior courts of common law, were amended in 1852 and 1854.

COMMON PLEAS, COURT OF, IN ENG-LAND, in ancient times followed the king's person, and is distinct from that of the King's Bench; but on the confirmation of Magna Charta by king John, in 1215, it was fixed at Westminster, where it still continues. In 1833 the mode of procedure in all the superior courts was made uniform. In England, no barrister under the degree of serjeant could plead in the court of common pleas; but in 1846 the privilege was extended to barristers practising in the superior courts at Westminster. Sat last, July, 1875. The Common Pleas division of the high court of justice now consists of the chief justice and four judges. See Supreme Court.

COMMON PRAYER, BOOK OF, was ordered by parliament to be printed in the English language on i April, 1548. It was voted out of doors by parliament, and the Directory (which see) set up in its room in 1644, and a proclamation was issued against it in 1647. With a few changes the English Common Prayer-book is used by the episcopal churches in Scotland, Ireland, and North America.

COMMONS, HOUSE OF, originated with Simon de Montfort, carl of Leicester, who by the Provisions of Oxford ordered returns to be made of two knights from every shire, and deputies from certain boroughs, to meet such of the burons and clergy as were his friends, with a view thereby to

COMMONS. In 1685, of the 37,000,000 acres of land in England, about 18,000,000 were moorland, forest, and fen. In 1727, about 3,000,000 acres more had been brought into cultivation; and from that time to 1844, by means of 2000 private acts of parliament, about 7,000,000 acres more were enclosed. Since the Inclusive Act of 1845, which established commissioners, another 1,000,000 acres have been enclosed.

COMMUNALISTS, or COMMUNISTS, propose to divide France into about a thousand small thoroughly independent states, with councils elected by all the population, Paris to be the ruling head. They declare that capital and its holders must be adapted to nobler uses, or cease to exist. Their creed is stated to be atheism and materialism. They are intimately connected with the International Society of workmen (see \(\begin{align*}{loop} \text{Workmen} \), and with the communists or socialists (1871-3).

‡ By this oath they swore to be true and fuithful to the Commonwealth, without king or house of lords. The statues of Charles were next day demolished, particularly that at the Royal Exchange, and one at the west end of St. Paul's; and in their room the following inscription was conspicuously set up;—"Exit Tyrannus Regim ultimus, Anno Libertuits Anglice Restitute Primo, Anno Dom., 1648, Jan. 30."

§ M. Dufaure, in opposing the annesty, 17 May, 1876, asserted that the outbreak was organised by about 7000 communists and 1500 foreigners; 40,000 persons were inculpated; 10,000 tried; 25,000 dismissed. See France.

name was given to combinations of citizens, favoured by the crown, against the exactions of the nobles. In 1356 Stephen Marcel, during the English invasion, vainly endeavoured to establish a confederation of sovereign cities, having Paris as the governing head; and for six months it was really governed by a commune in 1588. After the insurrection of July, 1789, the revolutionary committee which replaced the city council took the name of "commune of Paris," Péthion being mayor. It met at the Hôtel de Ville, and was definitively constituted, 21 May, 1791. It had great power under Robespierre, and fell with him 17 July, 1794; being replaced by twelve municipalities. The commune of Paris was proclaimed 28 March, 1871, during the insurrection, which began 18 March, and ended with the capture of the city by the government troops, 28 May following. For the events of the communal rule in Paris, see France, 1871.

COMMUNION, a name given to the ordinance of the Lord's supper, 1 Cor. x. 16. Communicating under the form of bread alone is said to have had its rise in the west, under pope Urban II., 1096. The cup was first denied to the laity by the council of Constance, 1414-18. The fourth Lateran council, 1215, decreed that every believer should receive the communion at least at Easter. The communion service of the church of England was set forth in 1549.

COMORN, see Komorn.

COMPANIES.* Among the earliest commercial companies in England may be named the Steel-yard society, established 1232. The second company was the merchants of St. Thomas à Becket, in 1248. Stove. The third was the Merchant Adventurers, incorporated by Elizabeth, 1564. The following are the city companies of London; the first twelve are the chief, and are styled "the Honourable." Several companies are extinct, and many dates are doubtful. In 1869 the gross income of the endowed charities of the city companies was stated to be above 99,000. A motion in the Commons for inquiry into the revenues and other affairs of 89 companies, by Mr. W. H. James, withdrawn, 23 May, 1876.

^{*} Bubble companies have been formed, commonly by designing persons. Law's bubble, in 1720-1, was perhaps the most extraordinary of its kind, and the South Sea Bubble, in the same year, was scarcely less memorable for its ruin of thousands of families. Many companies were established in these countries in 1824 and 1825, and turned out to be bubbles. Inmense losses were incurred by individuals, and the families of thousands of speculators were totally ruined. Many railway enterprises (1844-5) were termed bubbles. See Law's Bubble; South Sea; Railways; Joint-Stock Companies.

COMPANIES' ACT, passed 1862, was amended and continued, 20 Aug. 1867; both amended by act, 2 July, 1877.

COMPASS, MARINER'S, said to have been early known to the Chinese, 1115 n.C., and brought to Europe by Marco Polo, a Venetian, 1260, A.D. Flavio Gioja, of Annalfi, a navigator, of Naples,* is said to have introduced the suspension of the needle, 1302. The compass is also said to have been known to the Swedes in the time of king Jarl Birger, 1250. Its variation was discovered first by Columbus, 1492; afterwards by Sobastian Cabot, 1540. The compass box and hanging compass used by navigators were invented by William Barlowe, an English divine and natural philosopher, in 1608; see Magnetism. The measuring compass was invented by Jost Bing, of Hesse, in 1602.

COMPETITIVE EXAMINATIONS, see Civil Service.

COMPIEGNE, a French city north of Paris, the residence of the Carlovingian kings. During the siege, Joan of Are was captured by the Burgundians, 25 May, 1430, and given up to the English for money. The emperor Napoleon III. and the king of Prussia met here on 6 Oct. 1861.

COMPUSING-MACHINES, see Printing and Times.

COMPOSITE ORDER, a mixture of the Corinthian and Ionic, and also called the Roman order, is of uncertain date.

Composite Portraits. By means of photography in 1877-8, Mr. Francis Galton combined from 2 to 9 separate portraits; the result was generally an improvement on the features of the components.

COMPOUND HOUSEHOLDERS (in regard to the payment of rates) were constituted by the Small Tenements act of 1851. Their position, with regard to the suffrage, caused much discussion during the passing of the Reform act in 1867; and their claims were rejected.

* The statement that the fleur-de-lis was made the ornament of the northern point of the compass in compliment to Charles, the king of Naples at the time of the discovery, has been contradicted.

COMPOUND RADICAL, in organic chemistry, is a substance which although containing two or more elements, in ordinary circumstances performs the part of an element. The Radical or Binary theory was propounded by Berzelius, 1833, and by Liebig, 1838; and modified in the nucleus theory of Aug. Laurent, 1836. The first compound radical isolated was cyanogen (which see), by Gay-Lussac, in 1815; see Amyl, Ethyl, and Methyl as other examples.

COMPROMISE, see Breda.

COMTE PHILOSOPHY, sec Positive Philosophy.

CONCEPTION, IMMACULATE. A festival (on 8 Dec.) appointed in 1389, observed in the Roman Catholic Church in honour of the Virgin Mary's having been conscived and born immaculate, or without original sin. Opposition to this doctrine was forbidden by decree of pope Paul V. in 1617, confirmed by Gregory XV. and Alexander VII. Hénault. On 8 Dec. 1854, pope Pius IX. promulgated a bull, declaring this dogma to be an article of faith, and charging with heresy those who should doubt it or speak against it.—The Concurtionists were an order of nuns in Italy, established in 1488; see Santiago.

CONCERTINA, a musical instrument invented by prof. afterwards sir Charles Wheatstone, about 1825, and improved by Mr. G. Case. The sounds are produced by free vibrating metal springs.

CONCERTS. The Filarmonia gave concerts at Vicenza in the 16th century. The first public subscription concert was performed at Oxford in 1665; the first in London is said to have been in 1672, by John Banister, afterwards by Thomas Britton till his death, 1714. The Academy of Ancient Music, which introduced concerts in London, began in 1710; the Concerts of Ancient Music in 1776; and the present Philharmonic Society in 1813; see others, under Music; Crystal Palace; and Handel. Colossal peace concerts were held at Boston, U.S., 15 June, &c. 1869; 17 June to 4 July, 1872; see Boston.

CONCHOLOGY, the science of shells, is mentioned by Aristotle and Pliny. It was first reduced to a system by John Daniel Major, of Kiel, who published his classification of the Testacea in 1675. Lister's system was published in 1685; and that of Largius in 1722. Johnson's Introduction (1850) and Sowerby's Manual of Conchology (1842), are useful. Forbes and Hanley's "British Mollusca and their Shells" (1848-53) is a magnificent work.

CONCILIATION COUNCILS, see Councils.

CONCLAVE. A range of small cells in the hall of the Vatican, or palace of the pope of Rome, where the cardinals usually meet to elect a pope, and also the assembly of the cardinals shut up for the purpose. Clement IV. having died at Viterbo in 1268, the cardinals were nearly three years unable to agree in the choice of a successor, and were on the point of breaking up, when the magistrates, by the advice of St. Bonaventura, shut the gates of their city, and locked up the cardinals till they agreed, 1271.

CONCORD (Massachusetts, N. America). Near here was fought the battle of Lexington (which see), 19 April, 1775.

CONCORDANCE. An index or alphabetical catalogue of all the words and also a chronological account of all the transactions in the Bible. The first concordance was made under the direction of Hugo de St. Caro, who employed as many as 500 monks upon it, 1247. "Ibbe Lenglet. It was based on one compiled by Anthony of Padua. Thomas Gibson's "Concordance of the New Testament" published, 1535. John Marbeck's "Concordance" (for the whole Bible), 1550. Two Concordances (with royal privileges), by Rob. F. Herrey, appeared in 1578. Cruden's Concordance was published in London in 1737. The Index to the Bible, published by the Queen's printers, prepared by B. Vincent, editor of this volume, was completed in May, 1848.

Verbal indexes accompany good editions of the ancient classics. An index to Shak-speare, by Ayscough, appeared in 1790; another by Twiss in 1805; and Mrs. Cowden Clarke's (late Mary Novello) concordance to Shak-speare's Plays (on which she spent 16 years' labour) in 1847. Mrs. Horace Furness's concordance to Shak-speare's Poems, 1874. Told's verbal index to Milton, 1809. Cleveland's concordance to Milton, 1867. Brightwell's concordance to Tennyson, 1869. Abbott's concordance to Poem, 1875.

CONCORDAT. An instrument of agreement between a prince and the pope, usually concerning benefices. The concordat between the emperor Henry V. of Germany and pope Calixtus II., in 1122, has been regarded as the fundamental law of the church in Germany. The concordat between Napoleon Bonaparte and Pius VII., signed at Paris, 15 July, 1801, re-established the Catholic church and the papal authority in France. Napoleon was made in effect the head of the Galliean church, as bishops were to have their appointments from him, and their investiture from the pope. Another concordat between the same persons was signed at Fontainebleau, 25 Jan. 1813. These were almost nullified by another, 22 Nov. 1817. A concordat, signed 18 Aug. 1855, between Austria and Rome, by which a great deal of the liberty of the Austrian church was given up to the papacy, caused much dissatisfaction. In 1868 it was virtually abolished by the legislatures of Hungary and Austria.

CONCUBINES were tolerated among the Jews, Greeks, and Romans, but strictly forbidden by Christ (Mark x., 1 Cor. vii. 2). They are mentioned as having been allowed to the priests, 1132; see Morganatic Marriages.

CONDENSATION, see Gas, Beer, Milk.

CONDOTTIERI, conductors or leaders of mercenaries, termed free companies or lances, which became so troublesome in Italy, that the cities formed a league to suppress them in 1342. Many ravaged France after the peace of Bretigny, in 1360.

CONDUITS. Two remarkable conduits, among a number of others in London, existed early in Cheapside. The "great conduit" was the tirst cistern of lead erected in the city, and was built in 1285. At the procession of Anna Bolevn, on the occasion of her marriage, it ran with white and claret wine all the afternoon, I June, 1533. Stow.

CONFEDERATE STATES OF NORTH AMERICA. The efforts of the Southern States for the extension of slavery, and the zeal of the Northern States for its abolition, with the consequent political dissensions, led to the great secession of 1860-1. On 4 Nov. 1860, Abraham Lincoln, the Republican or

Abolitionist candidate, was elected president of the United States. Hitherto, a president in the interest of the South had been elected. On 20 Dec., South Carolina seceded from the Union; and soon after Alabama, Florida, Mississippi, Georgia, Louisiana, Texas, Virginia (except West Virginia), Arkansas, Tennessee, and North Carolina also. Jefferson Davis was inaugurated president of the Southern Confederacy at Montgomery in Alabama, 18 Feb. 1861. For the events of the war which ensued, and the restoration of the Southern States to the Union, see United States, 1801-5.

CONFEDERATION AT PARIS, 14 July, 1790; see Champ do Mars, and Bastille.

CONFEDERATION OF THE RHINE, the League of the Germanic States, formed by Napoleon Bonaparte, 12 July, 1806, when he abolished the Holy Roman Empire, and the emperor of Germany became emperor of Austria. In Dec. it consisted of France, Bavaria, Wurtemberg, Saxony, and Westphalia; seven grand duchies; six duchies; and twenty principalities. The princes collectively engaged to raise 258,000 troops to serve in case of war, and established a diet at Frankfort. This league terminated with the career of Bonaparte in 1814; and in 1815 it was replaced by the Germanic Confederation (which see, and Germany).

CONFERENCES, ECCLESIASTICAL. One was held at Hampton Court palace, between the prelates of the church of England and the dissenting ministers, in order to effect a general union, at the instance of the king, James I., 14-16 Jan. 1604. It led to the new translation of the Bible, now in general use in England; executed in 1607-11. Some alterations in the church liturgy were agreed upon; but these not satisfying the dissenters, nothing more was done.—Another conference of the bishops and presbyterian ministers, with the same view, was held in the Savoy, 15 April to 25 July, 1661. The dissenters' objections were generally disallowed, but some alterations were recommended in the Prayer-book. See Westeyaus and Congresses.

CONFESSIONAL, see Auricular Confession.

CONFESSIONS OF FAITH, or CREEDS; see Apostles', Nicene (325), and Athanasian (about 434) Creeds. J. R. Lumby's "History of the Creeds," published 1874.

The confession of faith of the Greek church was presented to Mahommed II in 1453. This gave way in 1642 to one composed by Mogala, metropolitan of Kiev, which is the present standard of the Bress Chescherich is the present standard

of the Russo-Greek church.
The creed of Pus VI., composed of the Nu cne creed, with additional articles which embody all the peculiar dogmas of the Roman Catholic church, published by the council of Trent The church of England retains the Apostles', Nicene, and Athanasian creeds, with articles:

The confession of Augsburg (that of the Lutherans)
was drawn up principally by Melancthon, in
1530, and has since undergone modifications, the
last of which is called the "Form of Concord.". 157
The Westmington confession was accounted to the concord.".

CONFIRMATION, or laying on hands, was practised by the Apostles in 34 and 56 (Acts viii. 17; xix. 6), and was general, according to some church authorities, in 190. In the church of England it is the public profession of the Christian

religion by an adult person, who has been baptized in infancy. It is made a sacrament by the church of Rome.

CONFLANS (near Paris), TREATY OF, between Louis XI. of France and the dukes of Bourbon, Brittany, and Burgundy, 5 Oct. 1465. By its provisions Normandy was ceded to the duke of Berry, and an end was put to the "War of the Public Good." It was confirmed by the Treaty of Peronne, 1468.

CONGE D'ÉLIRE (permission to elect), the licence given by the sovereign as head of the church, to chapters and other bodies, to elect dignitaries, particularly bishops; the right asserted by Henry VIII., 1535. After the interdict of the pope upon England had been removed in 1214, king John made an arrangement with the elergy for the election of bishops.

CONGELATION, the act of freezing. Ice was produced in summer by means of chemical mixtures, by Mr. Walker, in 1783. Quicksilver was frozen without snow or ice, in 1787. In 1810 Leslie froze water in an air-pump by placing a vessel of sulphuric acid under it. Numerous freezing mixtures have been discovered since. Intense cold is produced by the aërification of liquefied carbonic acid gas. In 1857 Mr. Harrison patented a machine for manufacturing ice for commercial purposes, by means of ether and salt water, and made large blocks. In 1860, M. Carré devised a method of freezing to 60° below zero by making water in a close vessel absorb and give off the gasammonia. Siebe's ice-making machine, exhibited at the International Exhibition of 1862, excited much admiration.

In R. Reece's ice-making machine (made known Dec. 1368), hquefied ammonta is vaporised in a close vessel surrounded by water to be frozen. Mr. Harrison's method of freezing was applied to preservation of meat in Australia; a cargo of carenses was shipped from Norfolk, Australia, 13 July, 1873. See Ire.

CONGO RIVER, S.W. Africa. The nativeson its bank and on the creeks having rifled the Geraldine, and committed other acts of piracy, were chastised by an expedition under commodore sir Wm. Hewett, 3-11 Sept. 1875. Several villages and chiefs' houses were destroyed.

CONGREGATION OF THE LORD, a name taken by the Scotch reformers, headed by John Knox, about 1546. Their leaders (the carls of Glencairn, Argyle, Morton, and others) called "lords of the congregation," signed the first bond or covenant which united the protestants under one association, 3 Dec. 1557. Tytler.

Vitginia, on 22 July, In 1863, the emperor Napoleon invited the sovereigns of Europe to a congress, which was declined by England 25 Nov. and only conditionally acceded to by other powers. He proposed a congress on the affairs of Italy and Rome in Nov. 1867, without other. without effect.

CONGREVE ROCKETS, see Rockets.

CONIC SECTIONS. Their properties were probably known to the Greeks, four or five centuries before the Christian era, and their study was cultivated in the time of Plato, 300 n.c. The earliest treatise on them was written by Aristaeus, about 330 B.C. Apollonius's eight books were written about 240 a.c. The parabola was applied to projectiles by Galileo, the ellipse to the orbit of planets by Kepler, and to comets by Newton.

CONJURATION, see Witchcraft.

CONNAISSANCE DES TEMPS, the French nautical almanack, continuing Hecker's Ephemerides, was first published by Picard, 1679.

CONNAUGHT, W. Ireland; long a nominal kingdom, divided into counties, 1590. Prince Arthur was created duke of Connaught, 23 May, 1874; being the first royal prince whose leading title was Irish.

CONNECTICUT granted to lord Say and Broke, 1630; see America and United States.

CONNOR, Ireland. The bishopric was united to that of Down, 1442. The first prelate, Ængus Macnisius, died 507. The united sees were added to Dromore on the death of its last bishop, 1842, in according to the Link Chunk. The proposition at 1842. ance with the Irish Church Temporalities act, 1833.

CONQUEST, the era in British history, when William duke of Normandy overcame Harold II. at the battle of Hastings, 14 Oct. 1066, and obtained the crown which he asserted had been bequeathed to him by Edward the confessor (Edgar being the rightful heir). William has been erroneously styled the Conqueror, for he succeeded to the crown of England by compact. He defeated Harold, who was himself a usurper, but a large portion of the kingdom afterwards held out against him; and he, unlike a conqueror, took an oath to observe the laws and customs of the realm, in order to induce the submission of the people. Formerly our judges were accustomed to reprehend any gentleman at the bar who said casually William the conqueror, instead of William I. Selden. Maclise exhibited forty-two drawings on the events of the Norman conquest, in May, 1857. E. A. Freeman's "History of the Norman Conquest," 5 vols, 1870-6, is highly estcemed.

CONSCIENCE, LIBERTY OF, a principle of genuine Christianity; repudiated by Romanism, proclaimed by James II. for political purposes, 1687.

CONSCIENCE, COURTS OF, or OF REQUESTS for recovery of small debts, constituted by a stat. of Hen. VII. 1493, and re-organised by stat. 9 Hen. VIII. 1517. These courts were improved and amended by various acts; their jurisdiction in London reached to 5% and (until superseded by county-courts) to 40s, in other towns. The practice was by summons, and if the party did not appear, the commissioners had power to apprehend and commit; see County Courts.

CONSCIENCE CLAUSE, see Education.

CONSCIENCE MONEY. In the year ending 31 March, 1873, 9847l. were sent to the chancellor of the exchequer for unpaid income tax; 1874, 8588/.; 1877, 14,835/.; 1878, 5,572/.

CONSCRIPT FATHERS (patres conscript) the designation given to the Roman senators, because their names were written in the registers of the senate.

CONSCRIPTION, a mode (derived from the Romans) adopted for recruiting armies on the continent. On 5 Sept. 1798, a military conscription was ordained in France, comprehending all the young men from 20 to 25 years of age: from whom selections were made. A conscription for 350,000 men took place in Jan. 1813, after the disastrous Russian campaign, and in Dec, same year, another for 300,000 after the battle of Lepsie. Estimated conscription, 1703-1813, 4,103,000. The law of 1818 (modified in 1824, 1832, and 1868) required a certain annual contingent for each department. The conscription was enlarged and modified by the army bill which was enacted in Feb. 1868. The reorganisation of the army began in 1871, after the fatal war with Germany. Substitutes were allowed under certain conditions. Conscription for Great Britain was advocated and strongly opposed in 1875. See Militia.

CONSECRATION. Aaron and his sons were consecrated priests, 1490 B.C. (Lev. viii.) The Jewish tabernacle was dedicated, 1490 B.C., and Solomon's temple, 1004 B.C. (1 Kings viii.) The consecration of churches began in the 2nd century. Anciently the consecration of popes was deferred until the emperor had given his assent to their election. Gregory IV. desired to have his election confirmed by the emperor Louis, in 828. Hénault. The consecration of churches, places of burial, &c., is admitted in the reformed religion. An act relating to the consecration of churchyards, passed 20 Aug. 1867, was amended in 1868. A form of consecration was adopted by convocation, but not sanctioned by the crown, April, 1712. It is generally used but is not compulsory.—Burn. The form of consecrating bishops in the church of England is set forth in the prayer-book of 1549 - Stow.

CONSERVATION OF FORCE. The doctrine that no physical force can be created or destroyed, but may be transferred, is maintained by Faraday, Grove, Helmholtz, Tyndall, and other philosophers; see Correlation.

CONSERVATIVES, a name of modern date, is given to, and accepted by a political party, whose leading principle is the preservation of our national institutions, since 1830. Conservative in popular language is now opposed to Liberal. Sir Robert Peel acknowledged himself a conservative when reproached by the Irish party in parliament with being an Orangeman; but the party that afterwards separated from him called their principles conservative in contradistinction to his,—his policy and measures being changed.—The Conservative Club was founded in 1840; see Protectionists and Clubs. The party in the north of the United States which supported the president in his conciliatory efforts to re-establish the Union, Jan. 1866, were termed "Conservatives." A greatmeeting of the National Union of Conservative Associations was held at the Crystal Palace, 24 June, 1872. The party in the minority at the elections in 1868 obtained a majority at those in Feb. 1874, and came into office. See Derby and Disrael.

CONSERVATOIRES, a name given to establishments for the cultivation of music and the arts on the continent. One was established at Naples in 1537. The singing school at Paris, founded in 1784, and closed in 1789, was re-opened in 1793 as the "Institut National de Musique," and after being reorganised, was re-named "Conservatoire de Musique" in 1795, and flourished under Cherubini (1822-42). "The Conservatoire des Arts et Metiens" was established in 1784. It includes a museum and library, and lectures are given to workmen there.

CONSISTORY COURT, anciently joined with the hundred court; and its original, as divided therefrom, is found in a law of William I., 1070, quoted by lord justice Coke. The chief and most ancient consistory court of the kingdom belongs to the see of Canterbury, and is called the Court of Arches (which see).

CONSOLIDATED FUND was formed by combining the "aggregate," "general," and "South Sea funds," 1786. On 5 Jan. 1816, the exchequers of Great Britain and Ireland, previously separate, were amalgamated, forming "the consolidated fund of the United Kingdom."

CONSTABLE or England, Lord High. The seventh great officer of the crown, and, with the carl marshad, formerly a judge of the court of chivalry, called, in the time of Henry IV., curia militaris, and subsequently the court of honour. The power of this officer was so great, that in 1389 a statute was passed for abridging it, and also the power of the carl marshal (which sa). The office existed before the conquest, after which it went by inheritance to the earls of Hereford and Essex, and next in the line of Stafford. In 1521 it was forfeited by Edward Stafford, duke of Buckingham, attainted for high treason, and has never since been granted to any person, otherwise than pro hão vice (for this occasion), to attend at a coronation or trial by combat. The only instance of a trial by combat being ordered since this office fell into the hands of the crown, was that commanded between lord Reay and Mr. David Ramsey, in Nov. 1631; but the king prevented it.

CONSTABLE OF SCOTLAND, LORD HIGH. The office was instituted by David I. about 1147. The holder had the keeping of the king's sword, which the king, at his promotion, delivered to him naked (and hence the badge of the lord high constable is a naked sword); and the absolute command of the king's armies while in the field, in the absence of the king. The office was conferred heritably in 1321 on sir Gilbert Hay, created carl of

Erroll, by Robert Bruce, and with his descendants it still remains, being expressly reserved by the treaty of union in 1707. The present earl of Erroll is the twenty-second lord high constable (1878).

CONSTABLES of Hundreds and Franchises, instituted in the reign of Edward I., 1285, are now called high constables. There are three kinds of constables, high, petty, and special; the high constable's jurisdiction extends to the whole hundred; the petty constable's to the parish or liberty for which he is chosen; and the special constable is appointed for particular emergencies (as in April, 1848, on account of the Chartists). The general appointment of parish constables was made unnecessary by an act passed Aug. 1872. See Special Constables and Tower.

CONSTABULARY FORCE. For that of London, see *Police*. The Constabulary of Ireland act passed in 1823, when this species of force was embodied throughout the country, Several subsequent acts were consolidated in 1836.

CONSTANCE, a city in Baden (S. Germany). Here was held the seventeenth general council, 1414-18, which condemned John Huss; and here he was burnt, 6 July, 1415; see Hussites.

CONSTANTINA, the ancient capital of Numidia, was taken by the French, 13 Oct. 1837; During the assault on 12 Oct. the French general Damremont was killed. Achmet Bey retired with 12,000 men, as the victors entered Constantina.

CONSTANTINOPLE (formerly Byzantium) (which see), now Stamboul, derives its name from Constantine the Great, who removed the seat of the Eastern Empire here, dedicating it 11 May, 330. See Eastern Empire.

CONSTELLATIONS. Arcturus, Orion, the Pleiades, and Mazzaroth are mentioned in Job ix. 9, and xxxviii. 31, about 1520 b.c. Homer and Hesiod notice constellations; but our first direct knowledge was derived from Claudius Ptolemaus, about A.D. 140. Hipparchus (about 147 B.C.) made a catalogue of forty-eight constellations, and others were added by Tycho Brahe, Hevelius, Halley, and others. The number at present acknowledged is 29 northern, 45 southern, and 12 zodiacal.

CONSTITUTION OF ENGLAND. It comprehends the whole body of laws by which the British people are governed, and to which it is presumpfively held that every individual has assented. Lord Somers. This assemblage of laws is distinguished from the term government in this respectthat the constitution is the rule by which the sovereign ought to govern at all times; and government is that by which he does govern at any particular time. Lord Bolingbroke. The king of England is not seated on a solitary eminence of power: on the contrary, he sees his equals in the co-existing branches of the legislature, and he recognises his superior in the law. Sheridan. Hallam's "Constitutional History of England" was first published in 1827; May's in 1861-3.

Attnough the operation of the first act was reported to be successful, it has been much opposed. A royal commission appointed to inquire, reported, July, 1871; and alterations have been proposed. Its repeal negatived in the Commons (308-126), 23 June, 1875; (224-102), 19 July, 1876. A new act for animals was passed 16 Aug. 1878. See Cuttle.

CONTINENTAL SYSTEM, the name given to Napoleon's plan to exclude the British merchandise from the entire continent. It began publicly with his Berlin decree in 1806, and occasioned the Orders in Council (which see).

CONTINUITY. Mr. (after sir) W. R. Grove, in his address as president of the British Association, on 22 Aug. 1866, at Nottingham, expounded the opinion held by many philosophers, that all the past changes in the world have been produced by the continuous action of the causes now in operation—that "continuity is a law of nature, the true expression of the action of Almighty Power."

CONTRABAND OF WAR, a term said to have been first employed in the treaty of Southampton between England and Spain in 1625. During the struggle between Spain and Holland, both powers acted with much rigour towards ships of neutrals conveying goods to the belligerents. This provoked the resistance of England. A mulder policy was adopted by the treaty of Pyrenecs, 1650; and by the declaration of Paris, 26 April, 1856. The subject was much discussed during the North American conflict, 1801-4.

CONTRACTORS with Government, disqualified from sitting in parliament, 1782.

CONTRIBUTIONS, VOLUNTARY, to a vast amount have been several times made by the British people in aid of the government. One, in 1798, to support the war against France, amounted to two millions and a half sterling. Several men of wealth, among others sir Robert Peel, of Bury, Lancashire, subscribed each 10,000l.: and 200,000l. were transmitted from India in 1799; see Patriotic Fund. For India, &c., see Mansian House.

CONTROL, BOARD OF. Mr. Pitt's bill, establishing this board for the purpose of aiding and controlling the executive government of India, and of superintending the territorial concerns of the company, was passed 18 May, 1784. Act amended and the board remodelled, 1793. The president of the board was a chief minister of the crown, and necessarily one of the members of the cabinet. This board was abolished in 1858, when the government of India was transferred from the company to the crown, see India Bills, and India.

CONTROL DEPARTMENT, in the British army, was divided into the commissariat and transport department, and the ordnance store department; the old title was abolished; order issued II Dec. 1875.

CONVALESCENT INSTITUTION (Metropolitan), at Walton-on-Thames, with children's branches at Hendon and Mitcham, was established in 1840. A convalescent hospital for the east of London was founded at Snaresbrook in 1806, greatly due to the exertions of Mr. and Mrs. Charlesworth, Mrs. Gladstone, and Miss Catherine Marsh. The principle has been since much adopted.

CONVENTICLES, private assemblies for religious worship, held by Dissenters from the established church; but first applied to the schools of Wiekliff. They were strictly forbidden by Elizabeth in 1593, and by Charles II., 1664; and persons attending them were liable to severe punishment. The statutes were repealed by the toleration act, 24 May, 1689.

CONVENTION PARLIAMENTS, as-

CONVENTION PARLIAMENTS, assembled without the king's writ upon extraordinary occasions. One on 25 April, 1660, voted the restoration of Charles II. A second met 22 Jan. 1689; offered the crown to William and Mary 13 Feb.; and dissolved in Feb. 1690; see National Convention.

CONVENTIONS, see Treaties.

CONVENTS were first founded, according to some authorities, 270. The first in England was erected at Folkstone, by Eadbuld, in 630. Camden. The first in Scotland was at Coldingham, where Ethelreda took the veil in 670. They were founded

earlier in Ireland. They were suppressed in England in various reigns, particularly in that of Henry VIII. A very great number have been suppressed in Europe in the present century. The king of Prussia secularised all the convents in the duchy of Prosen. Don Pedro put down 300 convents in Portugal in 1834; and Spain abolished 1800 convents. Many were abolished in Italy and Sicily in 1800, 1861, and 1866, and many in Russia 31 July, 1832, and Nov. 1864.

In 1597 lady Mary Percy founded a convent at Brussels, which flourshed there till 1794, when the nuns were compelled to remove to England—They were received by bishop Milner, and placed at Winchester, at which place they remained till their removal to East Bergholt, in Suffolk, June, 1857.—This was the first English conventual establishment founded on the continent after the Reformation

By the Emancipation act of 1829, to Geo IV., the establishment of convents and other religious communities in the United Kingdom was probibited, but this enactment has been a dead letter . (82)

CONVICTS, see Transportation.

CONVOCATION, a general assembly of the clergy of the nation, convened by the sovereign's writ, to consult on the affairs of the church; the writ is directed to the archbishop of each province, requiring him to summon all the bishops, archdeacons, &c. The convocation is divided into two houses, the upper, consisting of bishops; and lower, of deans, prebendaries, archdeacons, and members elected from the inferior elergy. The clergy were summoned to meet the king by writ, 23 Edw. 1. 1294. The power of the convocation was limited by a statute of Henry VIII., in whose reign the convocation was reorganised. The two houses of convocation were deprived of various privileges in 1716, and ceased to meet. Formal meetings of the clergy have been held annually during the sitting of parliament since 1854, and fruitless attempts have been made to obtain the power of dealing summarily with ecclesiastical affairs; but in Feb. 1872, convocation was authorised to deliberate respecting alterations in the Liturgy; upon which it acted, 5 March.

CONVOLVULUS. The Canary Convolvulus (Convolvulus canariensis) came to England from the Canary Isles, 1690. The many-flowered, 1779.

COOKERY, an art connected with civilised life. Animals were granted as food to Nonh, 2348 B.C., the eating of blood being expressly forbidden (Gen. ix. 3, 4). In 1898 B.C. a calf was cooked by Abraham to entertain his guests (Gen. xviii. 7, 8). "The Forme of Cury" (i.e. cookery) is duted 1390. An English cookery-book was printed 1498; see Cottager's Stove.

Military Coolery.—Capt. Grant devised a system of cooking for the camp at Aldershot, which has continued in successful operation for the service of between 12,000 and 14,000 men From April to August, in 1857, the plan was subjected to the severe test of cooking for 92,000 men, who marched in and out of the encampment during that period. The consumption of fuel requisite

for this system of cooking was one half-pound of coal per man per day, and the official report states the cost to be one halfpenny per man per week for the three daily meals.

Gary means. Self-supporting Cooking Depôts for the working classes were set up at Glasgow (by Mr. Thomas Corbett), 21 Sept. 1860; and proved successful in Manchester, London, and other places soon after.

Three medals were awarded to the Norwegian self-acting cooking apparatus (Sorenson's patent) at the Paris Exhibition, 1867. Cooking is effected by boiling water, the heat of which is maintained by enclosing it in a non-conducting substance.

COOK'S VOYAGES. James Cook, accompanied by Mr. (afterwards sir) Joseph Banks, sailed from England in the *Endearour* on his first voyage, 30 July, 1768; and returned home after having circumnavigated the globe, arriving at Deal 12 June, 1771. The chief object of the expedition, at the request of the Royal Society, was the observation of the transit of Venus over the sun's disk, which was effected, 3 June, 1769. Captain Cook sailed to exchected, 3 June, 1769. Gaptain Gook salted to explore the southern hemisphere, 13 July, 1772, and returned 30 July, 1775. In his last expedition (begun 12 July, 1770) he was killed by the savages of Owhyhee, 14 Feb. 1779. His ships, the Resolution and Discovery, arrived at Sheerness, 4 Oct. 1780.

COOLIES, the hill tribes of India, have been recently much employed as labourers in Australia and California, especially since 1861; and about 30,000 of them were conveyed by M. Kootmanschap, to assist in making the great Pacific railway. His to assist in making the great radius rations. His proposal in 1869 to replace the negroes in the Southern States of North America for the cultivation of cotton, was not accepted. "The Coolie, his Rights and Wrongs," by E. Jenkins, was published 1871. Coolie enigration has been the subject of negotiation between the British and Chinese governments since 1855.

CO-OPERATIVE SOCIETIES are com-posed of working men, having for their object the sale of articles of daily consumption to the members sate of arriers of daily consumption to the memorrs at low prices. The Rochdale Equitable Pioneers Society began in 1844, with a capital of 28l. In 1860, the business done amounted to 152,063l, the profits being 15,006l. These societies (332 in 1862) are registered pursuant to 13 and 14 Vict. c. 115 (1849). On 31 Dec. 1860, 749 industrial, provident, and co-operative societies were registered. In 1853 the rajah brought his daughter to be educated in England, where she was baptized. She married a col. Campbell, and died a few years after.

COPENHAGEN (Denmark), built by Waldemar I., 1157, made the capital, 1443; the university founded 1479. In 1728, more than seventy of its streets and 3785 houses were burnt. Its palace, valued at four millions sterling, was wholly burnt, Feb. 1794, when 100 persons lost their lives. In a fire which lasted forty-eight hours, the arsenal, admiralty, and fifty streets were destroyed, June, 1795. A new national theatre was founded by the king, 18 Oct. 1872.—Copenhagen was bombarded by the English under lord Nelson and admiral Parker; and in their engagement with the Danish fleet of twenty-three ships of the line, eighteen were taken or destroyed by the British, 2 April, 1801. Again, after a bombardment of three days, the city and Danish fleet surrendered to admiral Gambier and lord Catheart, 7 Sept. 1807. The capture consisted of eighteen sail of the line, fifteen frigates, six brigs, and twenty-five gun-boats, and immense naval stores. See Denmark.

We read in the Scriptures of two vessels of fine copper (or brass), "precious as gold," 457 B.c. (Ezra viii. 27). The mines of Fahlun, in Sweden, are most surprising exeavations. In England, copper-mines were discovered in 1561, and there are upwards of fifty mines in Cornwall, where mining has been increasing since the reign of William III. In 1857, 75,832 tons of copper ore were imported, and 25,241 tons extracted. In 1865, 198,298 tons of copper ore were extracted from British mines, and 11,888 tons smelted 82,562 tens were imported. In 11,380 tons sincinca 22,502 tens were imported. In 1856, 24,257 tons of pure copper (worth 2,983,6114.), in 1870, 8291 tons (worth 644,0654.); in 1875, 4332 tons (worth 388,9844.); in 1876, 4694 (worth 392,3004.) were produced in the United Kingdom. The Burra-Burra copper-mines, in S. Australia, discovered 1842, brought great prosperity.

CORCYRA (now Corfu, chief of the Ionian Isles), a colony founded by the Corinthians about 734 B.C. It had frequent wars with the mother country; one about the possession of Epidamnus (431 B.C.) led to the Peloponnesian war. It was subdued by the Spartans in 373, and by the Romans, 230. At the decline of the eastern empire it fell into the hands of the Venetians about A.D. 1149. The Turks attacked Corfu in 1716, but were gallantly repulsed. It was taken from the French by the allied Russian and Turkish fleets 3 March, 1799, and formed (with the other isles) into the Ionian republic; see Ionian Isles.

CORNWALL, S. W. extremity of England, originally called Kernou, a term connected with the Latin cornu, a horn, probably in allusion to its numerous promontories. On the retreat of the ancient Britons, Cornwall is said to have been formed into a kingdom, and to have existed many years under different princes, among whom were Ambrosius Aurelius, and the celebrated Arthur. Cornwall is said to have been made an earldom by Alfred. The eldest son of the British sovereign is born duke of Cornwall. See Stannary Courts.

The British army, about 15,000 men, under the command of sir John Moore, had just accomplished their retreat when they were attacked by the French, whose force exceeded 20,000: the enemy were completely repulsed, but the loss of the British in the battle was immense, 16 Jan. 1809. COSTERMONGERS, itinerant dealers in fruit, vegetables, tish, &c., deriving their name, it is said, from costard, a favourite apple. The London costermongers are useful in relieving the markets when glutted; and it was said in 1860, that 3,000,000l, passed through their hands annually. Previous to fasting and thanksgiving days, they sell the appointed forms of prayers in great numbers. On 22 Nov. 1800, they held a meeting in order to represent to the city authorities the hardships they felt by the police restricting their means of livelihood; and the Metropolitan Streets Act was modified, 7 Dec. 1867.

Their moral and physical condition has been much improved of late years, greatly through the instrumentality of the earl of Shaftesbury, who constituted humself a costerinonger, and owned a barrow in 1874.

COTTAGE. The term was originally applied to a small house without land, 4 Edw. I. 1275. "No man may build a cottage, except in towns, unless he lay four acres of land thereto," &c., 31 Eliz. 1589. This statute was repealed, 15 Geo. III. 1775. By returns to the tax office, in 1780, the number of cottages was 284,459. The number in 1800 was 428,214; the number in 1840 was about 770,000. In 1860 the public attention was much drawn to the deplorable state of cottages in many parts of the country, and the law of settlement was altered in 1865. Mr. Disraeli said that "every cottage should have a tank, an oven, and a porch."

COTTON, a vegetable wool, the produce of the Gossypium, a shrub indigenous to the tropical regions of India and America. Indian cotton cloth is mentioned by Herodotus, was known in Arabia in the time of Mahomet, 627, and was brought into Europe by his followers. It does not appear to have been in use among the Chinese till the 13th century; to them we are indebted for the cotton fabric termed nankeen. Cotton was the material of the principal articles of clothing among the Americans when visited by Columbus. It was grown and manufactured in Spain in the 10th century; and in the 14th century was introduced into Italy. Indian muslins, chintzes, and cottons were so largely imported into England in the 17th century, that in 1700 an act of parliament was passed, prohibiting their introduction. Cotton became the staple commodity of England in the present century. American Cotton. Previous to 1795, our cotton fibre came from the East and West Indies, the Leyant, and a little from the United States. About 1786, the growth of cotton began in Georgia. In 1793, Eli Whitney, an American, invented the sow-yen, a machine by which cotton wool is separated from the pod and cleaned with great case and expedition.\(^*\) This led to such increased cultivation that the United States soon exported 1,500,000 lb. of cotton .

II. 1662, to sir William Davenant, whose company was denominated the "duke's servants," as a compliment to the duke of York, aftervants," as a compliment to the duke of Tork, area-wards James II.; see under Theatres.—The theatre was burnt down 5 March, 1856, during a bal masqué held by Mr. Anderson, the wizard of the north. The present theatre by E. Barry was opened 15 May, 1858. The Floral Hall adjoining it was opened 7 March, 1860, with the volunteers' ball.

COVENTRY ACT passed, to prevent malicious maining and wounding, 6 March, 1671, in consequence of sir John Coventry, K.B., M.P., being maimed in the streets of London, by sir Thomas Sandys and others, adherents of the duke of Monmouth, 21 Dec. 1670. Repealed 1828.

Godiva, on condition of her riding naked through the ordative of condition of the rining maked amongst one streets, about 1057. Processions in her memory took place in 1851; 23 June, 1802; 4 June, 1866; 20 June, 1870; and 4 June, 1877. A parlament was held here in the reign of Henry IV. called parliamentum indoctum, or the unlearned parliament, because lawyers were excluded, 1404; and in the reign of Henry VI. another met, called parliamentum diabolicum, from the acts of attainder passed against the duke of York and others, 20 Nov. 1459. The town was sur-rounded with strong walls, three miles in circumference, and twenty-six towers, which were de-molished by order of Charles II. in 1662. The ribbon makers here suffered much from want of work in the winter of 1860-1. An industrial exhi-bition here was opened by earl Granville, 19 June; closed by the earl of Clarendon, 21 Oct. 1867.
The prince and princess of Wales were warmly received 7 Nov. 1874. The Bisnopaic was

but with great opposition from the monks of Coventry. Coventry merged into the bishopric of Luchfield (which see). COW-POCK INOCULATION; see Small Pox and Vaccination.

The prince and princess of wates were warmly received 7 Nov. 1874. The BISHOPRIC was founded by Oswy, king of Mercia, 656, and had the double name of Coventry and Lichfield, which was reversed by later bishops. It was so wealthy, that king Offa, by the favour of pope Adrian, made it archiepiscopal, but this title was laid aside on the death of that king. In 1075

the see was removed to Chester; in 1102 to Coventry;

and afterwards to its original foundation, Lichticid,

CRABS. The size at which they are to be sold is determined by the Fisheries Act, 1877.

CRACOW, a city in Austrian Poland. The Poles elected Cracus for their duke, who built Cracow with the sporls taken from the Franks about 700. It was their capital, 1320-1609. Cracow was taken by Charles XII. in 1702, and taken and retaken several times by the Ru sians and other confederates. The sovereign was crowned at Cracow until 1764. The Russians, who had taken it 1768, were expelled by Kosciusko, 24 March, 1794; but it surrendered to the Prussians, 15 June same year, and in 1795 was awarded to Austria. Cracow was formed into a republic, June, 1815. Occupied by 10,000 Russians, who followed here the defeated Poles, Sept. 1831. Its independence was extinguished: and it was seized by the emperor of Austria, and incorporated with his empire, 16 Nov. 1846, which was protested against by England, France, Sweden, and Turkey; see *Poland*. A dreadful fire laid the greater part of the city in ashes, 18 July, 1850. The discovery on 22 July, 1869, of Barbare Abryk, a nun, secluded for 21 years in a convent cell, led to violent rioting.

CRANES are of very early date, for the engines of Archimedes may be so called. In 1857 a crane had been erected at Glasgow capable of lifting 50 See Derricks.

CRANIOLOGY (or PHRENOLOGY), the study of the external form of the human skull, as indicative of mental powers and moral qualities. Dr. Gall, the propounder, was a German physician, born March, 1758, and his first observations were among his schoolfellows. Afterwards he studied the heads of criminals and others, and eventually reduced his ideas to a system, marking out the skull like a map. His first lecture was given at Vienna

in 1796; but in 1802 the Austrian government prohibited his teaching. In 1800 he was joined by Dr. Spurzheim; and in 1810-12 they published at Paris their work on the "Anatomy and Physiology of the Nervous System, and of the Brain in particular." Gall died in 1828. The researches of Gall and Spurzheim led to increased study of the brain. Combe's "Phrenology," first published in 1810, is the popular English work on this subject. Phrenological societies were formed early in London and Edinburgh.

Phrenology was refuted by Lord Jeffrey in the Edinburah Review, in 1826, and more recently by Dr W B Carpenter. Professor Ferrier reported the results of researches tending to prove localisation of certain faculties in the brain to the British Association, Sept. 1873.

CRANNON or CRANON, Thessaly, N. Greece. Near here the Macedonians under Antipater and Craterus defeated the confederated Greeks, twice by sea, and once by land, 322 n.c. The Athenians demanded peace, and Antipater put their orators to death, among whom was Hyperides, who, that he might not betray the secrets of his country when under torture, cut out his tongue, and Demosthenes is said to have taken poison shortly after.

CRAONNE (N. France). Here Victor and Ney defeated the Prussians under Blucher after a severe contest, 7 March, 1814.

CRAPE. It is said some crape was made by Ste. Badour, when queen of France, about 680. It is said to have been first made at Bologna.

CRAYFORD (Kent). Hengist the Saxon is said to have defeated the Britons here, 457.

CRAYONS, coloured substances made into paste, and dried into pencils, were known in France about 1422; and improved by L'Oriot, 1748.

CREASOTE, or Kreasote (discovered by Reichenbach about 1833), a powerful antiseptic and coagulator of albuminous tissue, is obtained by the destructive distillation of wood and other organic matters. It has been used for the preservation of meat, timber, &c.

CREATINE (from the Greek kreas, flesh), the chemical principle of flesh, was discovered in 1835 by E. Chevreul, and has been investigated by Liebig, Gregory, and others.

CREATION OF THE WORLD. The date given by the English bible, and by Usher, Blan, and some others, is 4001 B.C. There are about 140 different dates assigned to the Creation, varying from 3616 to 6984 B.C. Dr. Hales gives 5411; see

CRECHES, establishments for temporarily receiving the young children of working mothers; begun at Paris, about 1844; in London (in Rathbone-place, &c.) about 1863.

CRECY, or CRESSY (N. France), where Edward III. and his son, Edward the Black Prince, and an army of about 36,800, obtained a great victory

over Philip, king of France, with about 130.000, 26 Aug. 1346. John, king of Bohemia (nearly blind); James, king of Majorca; Ralph, duke of Lorraine (sovereign princes); and a number of French nobles, together with 30,000 private men, were slain, while the loss of the English was very small. The crest of the king of Bohemia (three ostrich feathers, with the motto Ich dien—in English, "I serve") has since been adopted by princes of Wales.

CRÉDIT FONCIER, &c. A plan of providing loans to landowners was introduced by Fredenick the Great of Prussia, in 1763, in some of the Prussian provinces, as the best method of alleviating the distresses of the landed interest caused by his wars. The system consists of lending money to Landowners on the security of their estates, and providing the loan capital by the issue of debentures charged upon the aggregate mortgaged estates. There are two modes of carrying out this scheme:

(1) by means of an association of landowners; (2) by means of a proprietary public company. The former obtains in Eastern Prussia, but the latter is exclusively found in Western Europe.

Crédit Foncter companies have been founded in Hamburg (1782), Western Pruss a (1787), Belgium (1841), France (1852), England (1864). Similar companies were formed in all the states of Europe, in India, and in our colonies and dependencies. Henriques.

CRÉDIT MOBILIER: a joint-stock company with this name was established at Paris by Isaac and Emile Péreire, and others, 18 Nov. 1852.

It took up or originated trading enterprises of all kinds, applying to them the principle of commondite, or hunted habilities; and was authorised to supersede or buy in any other companies (replacing their shares or bonds in its own scrip), and also to carry on the ordinary business of banking. The funds were to be obtained by a paid-up capital of 24 millions sterling the issue of obligations at not less than 45 days' date or sight, and the receipt of money on deposit or current account. The society apparently prospected; but was considered by experienced persons a near approach to Law's bank of 1716.

Several of the directors failed, Sept 1857, no dividend part May, 1858 Many companies based on its principles established

CREMONA (N. Italy), a city founded by the Romans, 221 n.c. It became an independent republic in 1107, but was frequently subjugated by its neighbours, Milan and Venice, and partook of their tortunes. In Nov. 1859 it became part of the kingdom of Italy.

CRESCENT, a symbol of sovereignty among the Greeks and Romans, and the device of Byzantium, now Constantinople, whence the Turks adopted it. The Crescent has given name to three orders of knighthood; founded by Charles I. of Naples, 1268; by Réné of Anjou, in 1448; by the sultan Selim, in 1801; the last is still in existence.

CRESPY (N. France). Here was signed a treaty between Charles V. of Germany and Francis

1. of France, 18 Sept. 1541. The former renounced Burgundy, and the latter Italy.

CRESTS are ascribed to the Carians. Richard I. (1189) had a crest on the helmet resembling a plume of feathers. The English kings had generally crowns above their helmets; that of Richard 11. 1377, was surmounted by a lion on a cap of dignity; see Crecy. Alexander III. of Scotland, 1249, had a plume of feathers; and the helmet of Robert I. was surmounted by a crown, 1306; and that of James 1. by a lion, 1424. In the 15th and 16th centuries, the crest was described to be a figure placed upon a wreath, coronet, or cap of maintenance. Gwillim.

CRETE, now Candia (which see).

CREVANT-SUR-YONNE (N. France), was besieged by John Stuart, earl of Buchan, with a French army, July, 1423, and relieved by the earl of Salisbury with an army of English and Burgundians. After a severe contest, the French were totally defeated.

CRICKET, an ancient English game, said to be identical with the "club ball" of the 14th century. Rules were laid down in 1774 by a committee of noblemen and gentlemen, including the duke of Dorset and sir Horace Mann. In 1861 the All England Eleven gained and lost games in Australia; in Sept. 1868, they beat the New York Twenty-two. In 1873-4 they were beaten at Melbourne. The cleven Australians visited England, 1878, and after gaining ten games, and losing five, gained one against "Players of All England," 3 Sept.

CRIME. About 1856 it was computed that a fifteenth part of the population of the United King-dom lived by crime. The increase in education and manufactures is gradually reducing this proportion. From 1848 to 1865 there had been no commitment for political offences, such as treason or sedition. The returns of thirty-two years showed that crime absolutely and relatively diminished (Sept. 1866). See Murder, Executions, Trials, Poisoning, France,

CRIMEA, or CRIM TARTARY, a peninsula in the Euxine or Black Sea, the ancient Taurica Chersomesus, colonised by the Greeks about 550 B.C. The Milesians founded the kingdom of Bospoius, now Kertch, which about 108 B.C. formed part of the dominion of Mithridates, king of Pontus, whose descendants continued to rule the country under Roman protection till the irruption of the Goths, Huns, &c. about A.D. 258. About 1237 it fell into the hands of the Mongols under Genghis Khan; soon after the Venetians established commercial stations, with a lucrative trade, but were supplanted by the Genoese, who were permitted to rebuild and fortify Kaffa, about 1261. In 1475 Mahomet II. expelled the Genoese, and subjected the peninsula to the Ottoman yoke; permitting the government to remain in the hands of the native khans, but closing the Black Sea to Western Europe. In 17: by the intervention of the empress Catherine II., the Crimea recovered its independence: but on the abdication of the khan in 1783, the Russians took possession of the country, after a war with Turkey, and retained it by the treaty of Jassy, 9 Jan. 1792. The Crimea (now Taurida), was divided into eight governments in 1802. War having been declared governments in 1602. Wat having been declared against Russia by England and France, 28 March, 1854, large masses of troops were sent to the East, which, after remaining some time at Gallipoli, and other places, sailed for Varna, where they disembarked 29 May. An expedition against the Crimea barriag been determined as the sailed Particle. having been determined on, the allied British, French, and Turkish forces, amounting to 58,000 men (25,000 British), commanded by lord Raglan and marshal St. Arnaud, sailed from Varna, 3 Sept. and landed on the 14th, 15th, and 16th, without opposition, at Old Fort, near Eupstoria, about 30 miles from Sebastopol. On the 20th they attacked the Russians, between 40,000 and 50,000 strong

(under prince Menschikotf), entrenched on the heights of Alma, supposed to be unassailable. After a sharp contest the Russians were totally routed. See Alma and Russo-Turkish War. Peace was proclaimed in April, 1856, and the allies quitted the Crimea 12 July following.

CRIMINAL LAWS OF ENGLAND. Their great severity, pointed out by sir Samuel Romilly, sir James Mackintosh, and others, about 1818, was considerably mitigated by sir R. Peel's acts, passed 1820-8. The criminal law was consolidated by 24 and 25 Vict. cc. 94-100, 1861. Some defects were amended by an act passed in 1867.

CRIMISUS, a river in Sicily, near which Timoleon defeated the Carthaginians, 339 s.c.

CRIMPING-HOUSES were used to entrap persons into the army; hence the name of "crimp sergeant." Some of them in London were destroyed by the populace, in consequence of a young man who had been enticed into one being killed in endeavouring to escape, 16 Sept. 1794.

CRINOLINE (a French word, meaning stuff made of crin, hair) is the modern name of the "fardingale" of the time of queen Elizabeth, hoop-like petticoats made of whalebone, &c., revived in France and England since 1855. They have frequently occasioned loss of life, by coming in contact with fire and machinery. In No. 116 of the Tatter, published 5 Jan. 1710, is an amusing trial of the hooppetticoat then in fashion.

CRIPPLEGATE (London), was so-called from the lame beggars who sat there, so early as the year 1010. The gate was new built by the brewers of London in 1244; and was pulled down and sold for 9tt. in July, 1760. The poet Milton was buried in the church near it, 12 Nov. 1674. See London.

CRIPPLES' HOME, Marylebone-road, established 1851, for crippled girls to be taught autable trades. The Cripples' Nursery, Old Quebecstreet and Margate, was established 1862.

CRISPIN AND CRISPIANUS are said to have been two saints, born at Rome, from whence they travelled to Soissons, in France, to propagate the Christian religion. They worked as shoemakers; but the governor of the town discovering them to be Christiaus, ordered them to be beheaded, about 288. Their day is 25 Oct.

CRITERION THEATRE, Regent's Circus, Piccadilly, opened by Spiers and Pond, 21 March, 1874.

CRITH (from the Greek krithē, a barleycorn or small weight,) a term suggested by Dr. A. W. Hofmann (about 1864) to express the volume-weight of gases; a cube containing I litre of hydrogen (cco896 gramme) to be the unit. Hydrogen being 1 crith, oxygen will be 16, nitrogen 14 criths.

CRITICS. The first society of them was formed 276 n.c. Blair. Varro, Cicero, Apollonius, and Aristarchus were ancient crities. In modern times the Journal des Sçavans was the earliest periodical critical work. It was originated by Denis de Sallo, ecclesiastical councillor in the parliament of France, and was first published at Paris, 30 May, 1655, and is still continued. Jenn Le Clerc's "Ars Critica," published 1696, is said to be the earliest systematic treatise. The first work of this kind in England

was the Review of Daniel Defoe (the term being invented by himself), published in Feb. 1703. The Works of the Learned began 1710, and the Waies of Literature in 1714; discontinued in 1722. See Reviews.

The legality of fair criticism was established in the English courts, in Feb. 1794, when an action that excited great attention, brought by an author against a reviewer lot a severe critique upon his work, was determined in favour of the defendant on the principle that criticism is allowable, however sharp, if just, and not malicious. See Trials, 1875.

CROATIA, conquered by Coloman, king of Hungary, in 1102, was with that country united to Austria in 1526. The Croatian diet was abolished in Nov. 1861. The Croats protested against incorporation with Hungary, 25 May, 1867, and their diet (including Croatia and Slavonia), at Agram, was dissolved 27 May. The union of Croatia with Hungary was recognised by a Croatian deputation 27 May, 1868, and Croatian delegates entered the Hungarian diet 24 Nov. The emperor and empress visited Agram 9-10 March, 1869.

CROSIER, a staff surmounted by a cross, borne before an archbishop, was in use in the 4th century. The bearing a crosser before ecclesiastics is mentioned in the life of St. Casarca of Arles about 500.

CROSS. That on which the Redeemer suffered on Mount Calvary, was said to have been found at Jerusalem, with two others, deep in the ground, by St. Helena, 3 May, 328 (termed the Internation of the Cross); Christ's being distinguished from those of the thieves by a sick woman being cured by touching it. It was carried away by Chosroes, king of Persia, on the plundering of Jerusalem; but was recovered by the emperor Heraclius (who defeated him in battle), 14 Sept. 615, and that day has since been commemorated as "the festival of the Exaltation of the Cross," established in 642.

It is asserted by church writers that a great shining cross was seen in the heavens by Constantine, and that it led him to adopt it on his standard, with the inscription "In how signo errors;" "Under this, sign thou shalt conquer" With this (Labarum) he advanced to Rome, where he vanquished Maxentius, 27 Oct 312. The revenue of the duchy of Cornwall belongs to the prince of Wales even during his minority. Henry VII. DANCE OF DEATH. The triumph of death over all ranks of men was a favourite subject with the artists of the middle ages, and appears in rude carvings and pictures in various countries.

The Choren Machabarorum or Danse Macabre, the first printed representation, published by Guyot Marchand, a bookseller of Paris 148 Holbein's Dance of Death (concerning the authorship of which there has been much controversy), printed at Lyons in 1538, and at Basil Many editions have since appeared; one with an introduction and notes published by Mr. Russell Smith The term Dance of Death was also applied to the frenzied movements of the Flagellants, who had sometimes skeletons demeded on their clothing

Smith

The term Dance of Death was also applied to the frenzied movements of the Flagellants, who had sometimes skeletons depicted on their clothing about the end of the 14th century.

Dancing mania, accompanied by aberration of mind and distortions of the body, was very prevalent in Germany in 1374, and in the 16th century in Italy, where it was fermed Tarantism, and erroneously supposed to be caused by the bite of the Tarantula spider. The music and songs employed for its cure are still preserved.

DANCING was invented by the Curctes, 1534 B.C. Eusebius. The Greeks combined the dance with their dramas, and pantomimic dances were introduced on the Roman stage, 22 B.C. Usher. Dancing by cinque paces was introduced into England from Italy, A.D. 1541. In modern times the French introduced ballets analogues in their musical dramas. The country dance (contre-danse) is of French origin, but its date is not precisely known. Spelman. See Morice Dance, Quadrille, and Waltz.

DANE-GELD, or DANEGELT, a tribute paid to the Danes to stop their ravages in England; first raised by Ethelred II. in 991, and again in 1003; and levied after the expulsion of the Danes to pay fleets for clearing the seas of them. The

tax was suppressed by Edward the Confessor in 1051; revived by William I. 1068; and formed part of the revenue of the crown, until abolished by Stephen, 1136. Every hide of land, i.e. as much as one plough could plough, or as Bede says, as much as could maintain a family, was taxed at first 1s., afterwards as much as 7s. Camden says that once 24,360l. was raised.

DANES, or NORTHMEN; see Denmark. During their attacks upon Britain and Ireland they made a descent on France, where, in 895, under Rollo, they received presents under the walls of Paris. They returned and ravaged the French territories as far as Ostend in 896. They attacked Italy in 903. Neustria was granted by the king of France to Rollo and his Normans (North-men), hence Normandy, in 911. The invasions of England and Ireland were as follows:—

DANNEWERKE, or DANNAWIRKE, a series of earthworks, considered almost impregnable, stretching across the long narrow peninsula of Schleswig, Holstein, and Jutland—said to have been constructed during the "stone age," long before the art of metal-working. It was rebuilt in 937 by Thyra, queen of Gormo the old, for which she

was named "Dannabod," the pride of the Danes. It was repaired by Olaf Tryggveson between 995 and 1000. Near here the Prussians, helping the duchies, defeated the Danes, 23 April, 1848. The retreat of the Danes from it, 5 Feb. 1864, occasioned much dissatisfaction at Copenhagen.

DANTE'S DIVINA COMMEDIA was first printed in 1472. He was born 14 May, 1265, died at Ravenna, 14 Sept. 1321. A festival in his May, 1865, when a large statue of Dante by Pazzi of Kavenna was uncovered.

DANTZIC (N. Germany), a commercial city in 997; according to some authorities, built by Waldemar I. in 1165. Poland obtained the sovereignty of it in 1454. It was seized by the king of Prussia, and annexed in 1793. It sur-rendered to the French, May, 1807; and by the treaty of Tilsit was restored to independence, under the protection of Prussia and Saxony, July, 1807. Dantzic was besieged by the allies in 1812; and surrendered I Jan. 1814. By the treaty of Paris it surrendered I Jan. 1814. By the treaty of Paris it reverted to the king of Prussia. By the Vistula breaking through its dykes, 10,000 head of cattle and 4000 houses were destroyed, and many lives lost, 9 April, 1829.

DANUBE (German, Donau; anciently Ister, in its lower part), the largest river in Europe, except the Wolga, rises in the Black Forest and falls into the Black Sea. Trajan's bridge at Gladova was destroyed by Adrian, to prevent the barbarians entering Dacia. Steam navigation was projected on this river by count Szchenyi, in 1830, and in that year the first steam-boat was launched at Vienna, and the Austrian company was formed shortly after. The Bavarian company was formed 1836. A canal between the Danube and the Maine was completed by Louis I. of Bavaria. Charlemagne, in the 8th century, contemplated uniting the Danube and Rhine by a canal. At the peace of 30 March, 1856, the free navigation of the Danube was secured, and an independent European commission appointed to make it navigable from Isaktchi to the sea, which has worked with good effect. The British government, in 1808, lent 135,000l. to complete the works. The treaty respecting the navigation of the Danube renewed for twelve years, 13 March, 1871. The river suddenly took possession of a new bed near Vienna, 17 April, which was formally opened 30 May, 1875.

In the Russo-Turkish war the Russians crossed the Danube and entered Bulgaria. (See Russo-Turkish War, H.).

DARDANELLES. Two castles (Sestos, in Roumania, and Abydos, in Natolia), built by the sultan Mahomet IV. in 1659, commanding the entrance of the strait of Gallipoli, named Dardanelles from the contiguous town Dardanus.-The passage of the strait was achieved by the British squadron under sir John Duckworth, 19 Feb. 1807; but he repassed them with great loss, 2 March, the castles of Sestos and Abydos hurling down stones of many tons' weight, upon the British ships. The allied English and French fleets passed the Dardanelles at the sultan's request, Oct. 1853; see Hellespont and Xerxes.

DARIEN, ISTHMUS OF, central America, discovered by Columbus, 1494. In 1694, William Paterson, founder of the Bank of England, pub-

lished his plan for colonising Darien. A company was formed in 1695, and in 1698-9, three expeditions sailed thither from Scotland, where 400,000l. had been raised. The first consisted of 1200 young men of all classes, besides women and children. The enterprise not having been recognised by the English government, the settlements were threatened by the Spaniards, to whom they were finally surrendered, 30 March, 1700. Paterson and a few survivors from famine and disease, had set off shortly before the arrival of the second expedition. Several years after, 398,0851. were voted by parliament to the survivors as "Equivalent money." 18,000l. were also voted to Paterson; but the bill was rejected in the house of lords. See Panamá.

DARK AGES, a term applied to the Middle Ages; according to Hallam, comprising about 1000 years—from the invasion of France by Clovis, 486, to that of Naples by Charles VIII. 1495. During this time learning was at a low ebb.

DARMSTADT, sec Hesse Darmstadt.

DARTFORD (Kent). Here commenced the insurrection of Wat Tyler, 1381. A convent of nuns, of the order of St. Augustin, endowed here by Edward III. 1355, was converted by Henry VIII. into a royal palace. The first paper-mill in England was erected at Dartford by sir John Spielman, a German, in 1590 (Slow), and about the same period was erected here the first mill for splitting iron bars. The powder-mills here were blown up four times between 1730 and 1738. Various explosions have since occurred, in some cases with loss of life to many persons: 12 Oct. 1790; 1 Jan. 1795; and others recently.

DARTMOOR PRISON, founded Mar. 1806. Seven prisoners of war were shot 6 April, 1815, after an insurrection. The autumn military manœuvres at Dartmoor, Aug. 1873, were unsuccessful through bad weather.

DARTMOUTH (Devon). Burnt by the French in the reigns of Richard I. and Henry IV. In a third attempt (1404), the invaders were defeated by the inhabitants, assisted by the valour of the women. The French commander, Du Chastel, three lords, and thirty-two knights, were made prisoners. In the war of the parliament, Dartmouth was taken after a siege of four weeks, by prince Maurice, who garrisoned the place for the king (1643); but it was retaken by general Fairfax by storm in 1646.

DATES were affixed to grants and assignments 18 Edw. I. 1290. Before this time it was usual at least to pass lands without dating the deed of conveyance. Lewis. Numerous instruments of assignment enrolled among our early records establish this fact. The date is determined by the names of this fact. The date is determined by the names of the parties, particularly that of the grantor: the possession of land was proof of the title to it. *Hardie*. A useful glossary of the dates given in old charters and chronicles will be found in Nicolas's "Chronology of History." J. J. Bond's "Handy-Book for Verifying Dates," published 1866.

After forming part of the kingdom of Arles, it was much subdivided among counts. One of these, Humbert II. ceded Dauphine and the Viennois to Philip VI., in 1343, for his eldest son, on the condition that the prince should be styled dauphine, which took effect in 1349, when Humbert became a monk. DAY. Day began at sunrise among most of the northern nations, at sunset among the Athenians and Jews; and among the Romans at midnight as with us. The Italians in some places, reckon the day from sunset to sunset, making their clocks strike twenty-four hours round. The Chinese strike twenty-four hours round. divide the day into twelve parts of two hours each. The astronomical day begins at noon, is divided into twenty-four hours (instead of two parts of twelve hours), and is the mode of reckoning used in the Nautical Almanac. Thus the astronomical day 8 Dec. begins at noon of 8 Dec. and ends at noon

DEBATING SOCIETIES; several formed in the last century. The celebrated Oxford Union Society was founded in 1823, and many orators have been trained by it.

DEBTORS have been subjected to imprisonment in almost all countries and times. In the eighteen months subsequent to the panic of Dec. 1825, as many as 101,000 writs for debt were issued in England. In the year ending 5 Jan. 1830, there were 7114 persons sent to the several prisons of London; and on that day, 1547 of the number were yet confined. On the 1st of Jan. 1840, the number of prisoners for debt in England and Wales was 1732; in Ireland the number was under 1000; and in Scotland under 100. The operation of statutes of relief, and other causes, considerably reduced the number of imprisoned debtors. When the new Bankruptey act (abolishing imprisonment for debt except when fraudulently contracted) came into operation in Nov. 1861, a number of debtors who had been confined were released. Arrest of Absconding Debtors bill, 14 & 15 Vict. 52, 1852. In 1863 nearly 18,000 persons were imprisoned by order of the county courts: average time, 15 days, amount of debt, 3, 10s. By an act passed 9 Aug. 1860, the imprisonment of fraudulent debtors was abolished, with certain exceptions, and nearly a hundred debtors were released by a judge's order in Jun. 1870. An act to facilitate the arrest of absconding debtors, passed 9 Aug. 1870. Imprisonment for debt in Ireland was abolished by an act passed 6 Aug. 1872. See Arrest, King's Bench, Bankrupts, Insolvents, and National Debt.

DECCAN (Dekhan or Dakhan), S. India, was invaded by the Mahometans in 1204. The first independent sultan was Alaudin. The natives revolted, and the dynasty of Bahmani was founded by Hasan Ganga in 1347. About 1686-90, Aurungzebe I. recovered the Deccan, but soon lost great part of it to the Mahrattas. The Nizam al Mulk, his viceroy, became independent in 1717. A large part of the Deccan was ceded to the English in 1818.

Nuna introduced January and February before March, and thenceforward December became the twelfth of the year. The English commenced their year on the 25th December, until the reign of William I.; see 1car.

The laws they drew up were approved by the senate and general assembly of the people, written on ten metallic tables, and set up in the place where the people met (comitium). Two more tables were added, 450 B.C. The Decemviri at first ruled well, but the conduct of Appius Claudius towards Virginia occasioning an insurrection, they were forced to resign; and consuls were again appointed, 449 B.C.

DECORATIVE ART. Its principles, enunciated by A. W. Pugin, in his "Designs," in 1835, have been advanced by Owen Jones, Redgrave, and others. Owen Jones's elaborate "Grammar of Ornament," was published in 1856. A Decorative Art society, founded in 1844, existed for a short time only.

DE COURCY'S PRIVILEGE, that of standing covered before the king, granted by king John to John de Courey, baron of Kingsale, and his successors, in 1203. DECRETALS. They formed the second part of the canon law, or collection of the pope's edicts and decrees and the decrees of councils. The first acknowledged to be genuine is a letter of Siricius to Himerus, a bishop of Spain, written in the first year of his pontificate, 385. Hovet. Certain false decretals were used by Gregory IV. in 837. The decretals of Gratian, a Benedictine (a collection of canons), were compiled in 1150. Hénault. Five books were collected by Gregory IX. 1227; a sixth by Boniface VIII. 1297; the Clementines by Clement V. in 1313; employed by John XXII. in 1317; the Extravagantes range from 1422 to 1483.

The Christians under Constantine built new churches and dedicated them with great solemnity, in A.D. 331, et seq. The dedication of BOOKS (by authors to solicit patronage or testify respect) existed in the time of Macenas, 17 B.C., the friend and counsellor of Augustus, and a patron of Horace (Ode I. 1).

DEED, a written contract or agreement. The formula, "I deliver this as my act and deed," occurs in a charter of 933. Fosbrooke. Deeds in England were formerly written in Latin or French; the earliest known instance in English is the indenture between the abbot of Whitby and Robert Bustard, dated at York in 1343; see English.

DEEP-SEA SOUNDINGS. Much new and interesting information respecting the animal life and temperature of the deep sea has been acquired by the dredgings on the coast of Norway by M. Sars, and by those of Dr. W. B. Carpenter and prof. (aft. sir) Wyville Thomson on our own coasts, near the Faroc isles, in 1868 and 1869, and in the Mediterranean by Dr. Carpenter in 1870. Living animals have been found at a depth of three miles. On 21 Dec. 1872, Dr. Wyville Thomson and a party of scientific men sailed in H.M.S. Challenger (Capt. G. S. Nares), to examine into the physical and biological condition of the great ocean basins and the direction of their currents. Deepest sounding then known was taken in the Atlantic, north of St. Thomas's, 3875 fathoms (4 miles, 710 yards),

24 March, 1873. On to Dec. 1874, capt. Thompson succeeded capt. Nares, who took the command of the new Arctic expedition. The Challenger returned, with valuable collections, 25 May, 1876, after a voyage of above 80,000 miles. The "Voyage" was published by sir C. Wyville Thomson in Dec. 1877. A Norwegian expedition explored the northern seas 16 July—18 Aug. 1877.

DEER are mentioned in a will of one Athelstan, dated 1045. Professor Owen thinks that fallow deer are not native, but were introduced here at an early period. There are now in England 334 deer parks, the oldest being probably lord Abergavenny's at Eridge, Sussex. See Evelyn Shirley's "Account of Deer Parks," July, 1867. 1658 deer in the royal parks, 1873.

They subsequently become religious parties (Catholic and Presbyterion. became religious parties, Catholic and Presbyterian, distinguished as Defenders and Peep-o'-day-boys: the latter were so named because they usually visited the dwellings of the Defenders at daybreak in search of arms; see Diamond.

DEGREES. Eratosthenes attempted to determine the length of a geographical degree about 250 B.C. Snellius; see Latitude and Longitude. Collegiate degrees are coeval with universities. Masters and doctors existed, 826. Those in law are traced up to 1149; in medicino, to 1384; in music, to 1463. Middle class examinations for degrees were instituted at Oxford, 18 June, 1857; at Cambridge, 24 Nov. 1857; and girls were allowed to compete for degrees, Oct. 1863. DEISM, THEISM, OF MONOTHEISM (Latin, deus; Greek, theos, God), the belief in one God, in opposition to polytheism and to the doctrine of the Trinity. About the middle of the 16th century some gentlemen of France and Italy termed themselves deists, to disguise their opposition to Christianity by a more honourable appellation than that of Atheism (which see). The most distinguished deists were Herbert, baron of Cherbury, in 1624; Hobbes, Tindal, Morgan, lord Bolingbroke, Gibbon, Hume, Holcroft, Paine, and Godwin. The "Progressive Brahmins," termed the Brahmo Somaj, or Theistic Church of India, opened a place of worship at Calcutta, 24 Aug. 1869. Their leader, Baboo Keshub Chunder Sen, was received at a public meeting in London as a reformer, 12 April, 1870, and subsequently preached in a Unitarian chapel, Finsbury, London. Stow. This court was abolished in 1832, and appeals now lie to the Judicial Committee of the Privy Council, according to 3 & 4 Will. IV. c. 41 (1833); and 6 & 7 Viet. c. 38 (1843). See Arches.

DELFT (S. Holland), a town founded by Godfrey le Bossu, about 1074; famous for "lelft earthenware;" first manufactured here about 1310. The sale of delft greatly declined after the introduction of potteries into Germany and England. DELHI, the once great capital of the Mogul empire, and chief seat of the Mahometan power in India; it was taken by Timour in 1398. It is now in decay, but contained a million of inhabitants in 1700. In 1739, when Nadir Shah invaded Hinduston heaters when the season of the state of the season of the state of the season of the state of the season of th dostan, he entered Delhi; 100,000 of the inhabitants perished by the sword, and plunder to the amount of 62,000,000l. sterling is said to have been collected. Similar calamities were endured in 1761, on the invasion of Abdalla, king of Candahar. In 1803, the Mahrattas, aided by the French, took Delhi; but were defeated by general Lake, II Sept., and the aged Shah Aulum, emperor of Hindostan, was-restored to his throne with a pension; see *India*, 1803. On 10 May, 1857, a mutiny arose in the sepoy regiments at Mecrut. It was soon checked; but the fugitives fled to Delhi on 11 May, and, combined with other troops here, seized the city; proclaimed a descendant of the Mogul king, and committed frightful atrocities. The rebels were anxious to possess the chief magazine, but after a gallant defence it was exploded by order of lieut. Willoughby, who died of his wounds shortly after. The other heroes of this exploit were lieutenants

Forrest and Rayner, and the gunners Buckley and Scully. Delhi was shortly after besieged by the British, but was not taken till 20 Sept. following. The final struggle began on the 14th; brigadier (since sir R.) Archdale Wilson being the commander. Much heroism was shown; the gallant death of Salkeld at the explosion of the Cashmere gate created much enthusiasm. The old king and his sons were captured soon after: the latter were shot, and the former after a trial was sent for life to Rangoon, where he died 11 Nov. 1862. See India, 1857. A camp formed at Delhi by the earl of Mayo, the viceroy, Dec. 1871, was visited by the king of Siam, Jan. 1872. The prince of Wales visited Delhi, 11 Jan. 1876. Queen Victoria was prochimed empress of India here with much magnificence, many Indian princes being present, 1 Jan. 1877.

"DELICATE INVESTIGATION" into the conduct of the princess of Wales (afterwards queen of England, as consort of George IV.), was commenced by a committee of the privy council, under a warrant of inquiry, dated 29 May, 1806. The members were lord Grenville, lord Erskine, earl Spencer, and lord Ellenborough. The inquiry, of which the countess of Jersey, sir J. and lady Douglas, and other persons of rank, were the prompters, led to the publication called "The Book;" afterwards suppressed. The charges against the princess were disproved in 1807 and in 1813; but not being permitted to appear at court, she went on the continent in 1814; see Queen Caroline.

DELPHI (N. Greece), celebrated for its enigmatical oracles delivered by the Pythia or priestess in the temple of Apollo, which was built, some say, by the council of the Amphictyons, 1263 n.c. The Pythian games were first celebrated here 586 n.c. The temple was burnt by the Pisistratide, 548 n.c. A new temple was raised by the Alemsonidæ. The Persians (480 n.c.) and the Gauls (279 n.c.) were deterred from plundering the temple by awful portents. It was; however, robbed and seized by the Phocians 357 n.c., which led to the sacred war, and Nero carried from it 300 costly statues, A.D. 67. The oracle was consulted by Julian, but silenced by Theodosius.

DELPHIN CLASSICS, a collection of thirtynine Latin authors in sixty volumes, made for the use of the dauphin (in usum Delphini) son of Louis XIV., and published in 1674-91. Ausonius was added in 1730. The due de Montausier, the young prince's governor, proposed the plan to Huet, bishop of Avranches, the dauphin's preceptor; and he, with other learned persons, including Madame Dacier,* edited all the Latin classics except Lucan. Each author is illustrated by notes and an index of words. An edition of the Delphin classics, with additional notes, &c., was published by Mr. Valpy of London, 1818, et seq.

In the reign of Ogyges, king of Attica, 1764 n.c., a deluge so inundated Attica, that it lay waste for nearly 200 years. *Blair*. Buffon thinks that the Hebrew and Grecian deluges were the same, and arose from the Atlantic and Bosphorus bursting into the valley of the Mediterranean.

The deluge of Deucalion, in Thessaly, is placed 1503 B.C. according to Ensebias. It was often confounded by the ancients with the general flood: but considered to be merely a local inundation, occasioned by the overflowing of the river Pencius, whose course was stopped by an earthquake between the mounts Olympus and Ossa. Deucalion, who then reigned in Thessaly, with his wife Pyrrha, and some of their subjects, are stated to have saved themselves by climbing up mount Parmassus.

A general deluge was predicted to occur in 1524, and arks were built; but the season happened to be a fine and dry one.

DEMERARA AND ESSEQUIBO, colonies in British Guiana, South America, founded by the Dutch, 1580, were taken by the British, under major-general Whyte, 22 April, 1796, but were restored at the peace of Amiens, March, 1802. They again surrendered to the British under general Grinfield and commodore Hood, Sept. 1803, and became English colonies in 1814. John Scott was appointed governor, 31 Dec. 1868; James R. Longden, 1874; Cornelius Henderickson Kortright, 1877.

DEMOCRATS, advocates for government by the people themselves (demos, people, and kratein, to govern), a term adopted by the French republicans in 1790 (who termed their opponents aristocrats, from aristos, bravest or best). The name Democrats was adopted by the pro-slavery party in N. America (the southern states), and the abolitionists were called Republicans. Into these two great parties a number of smaller ones were absorbed at the presidential election in 1856. In 1860, the Republicans formed "Wide-awake" clubs for electioneering purposes, and succeeded in getting their candidate, Abraham Lincoln, elected president, 4 Nov., which led to civil war; see United States, 1860.

In the autumn of 1874, the democrats, free-traders, and opponents of negro-rule, once more obtained the majority in the elections for the next congress; a reaction in their favour against the republicans, protectionists, then powerful, see *United States*, 1875-7.

DENAIN (N. France). Here marshal Villars defeated the Imperialists, 24 July, 1712.

* This beautiful and gifted woman translated Callimachus at the age of 23; and also Anacreon, Sappho, Plautus, Terence, and Homer. She died in 1720. DENARIUS, the chief silver coin among the Romans, weighing the seventh part of a Roman ounce, and value $7\frac{3}{4}d$. sterling, first coined about 269 B.C., when it exchanged for ten ases (see As). In 216 B.C. it exchanged for sixteen ases. A pound weight of silver was coined into 100 denavit. Digby. A pound weight of gold was coined into twenty denarii aurei in 206 B.C.; and in Nero's time into forty-five denarii aurei. Lempriere.

DENHAM MURDERS, see Trials, 1870.

DENIS, Sr., an ancient town of France, near Paris, famous for its abbey and church; the former abolished at the revolution, the latter the place of sepulture of the French kings, from its foundation by Dagobert, about 630; the remains of the saint Denis were placed there in 636. On 6, 7, 8 Aug. 1793, the republicans demolished most of the royal tombs, and in Oct. following, the bodies were taken from coffins and east into a pit; the lead was melted, and the gold and jewels taken to Paris. By a decree of Bonaparte, dated 20 Feb. 1806, the church (which had been turned into a cattle-market) was ordered to be cleansed out and redecorated as "the future burial-place of the emperors of France." On the return of the Bourbons, more restorations were effected, and the due de Berri and Louis XVIII. were buried here. The damage sustained in the war of 1870-1 has been well repaired.

DENISON'S ACT (18 & 19 Vict. c. 34), provides "for the education of the children of persons in receipt of out-door relief:" passed 26 June, 1855.

DENMAN'S ACT, LORD, 6 & 7 Vict. c. 85 (1843), relates to juries and witnesses.

DENMARK (N. Europe). The most ancient inhabitants were Cimbri and Teutones, who were driven out by the Jutes or Goths. The Teutones settled in Germany and Gaul; the Cimbrians invaded Italy, where they were defeated by Marius. The peninsula of Jutland obtained its name from the Jutes; and the name of Denmark is supposed to be derived from Dan, the founder of the Danish monarchy, and mark, a German word signifying country. For their numerous invasions of Britain, &c., see Danes. Population of the kingdom of Denmark in 1860, 1,600,551; of the duchies of Schleswig, Holstein, and Lauenburg, 1,004,473; of the colonies, 120,283. By the treaty of peace, signed 30 Oct. 1864, the duchies were taken from Denmark; Schleswig and Holstein were to be made independent, and Lauenburg was to be incorporated, by its desire, with Prussia. For the result, see Gastein and Prussia, 1866. Population of the monarchy, 1870, 1,784,741; 1876, 1,903,000; of the colonies, 1860, 127,401; 1876, 129,000.

"DIES IRÆ" ("Day of Wrath"), a Latin mediaval hymn on the day of judgment, is ascribed to various authors, amongst others to pope Gregory the Great (died about 604); St. Bernard (died 1153); but is generally considered to have been composed by Thomas of Celano (died 1255), and to have been used in the Roman service of the mass before 1385.

"Dieu et mon droit" appears to have been first assumed as a motto by Henry VI. (1422-1461); see Semper Eadem.

DIFFUSION OF GASES. In 1825, Doberoiner observed the transmission of hydrogen gas through a crack in a glass vessel, and professor Thomas Graham discovered the passage of gases through porous porcelain, graphite, and other substances, and established laws in 1832, and to him we are indebted for the discovery of Atmolysis and Dialysis. He died 16 Sept. 1869.

DIFFUSION OF USEFUL KNOWLEDGE SOCIETY, which published a number of books relating to history, science, and literature, and an relating to instory, science, and interature, and an atlas, in a cheap form, ridiculed as the "Sixpenny Sciences," was established by Lord Brougham, Mr. William Tooke, Mr. Charles Knight, and others. It published its "Library" 1827-48, and patronised the publication of the Penny Magazine and the Penny Cyclopædia. Its proceedings were suspended in 1846. DIGEST. The first collection of Roman laws DIGISST. The first confection of rooman awas under this title was prepared by Alfrenus Varus, the civilian, of Cremona, 66 n.c. Quintil. The "Digest," so called by way of eminence, was the collection made by order of the emperor Justinian, 529: it made the first part of the Roman law and the first volume of the civil law. Quotations from it are marked with a ff. Pardon. DIGITS, any whole number under 10: 1, 2, &c., are the nine digits. Arithmetical figures were known to the Arabian Moors about 900; and were introduced by them into Spain in 1050, and thence into England about 1253. In astronomy, the digit is a measure used in the calculation of eclipses, and is the twelfth part of the luminary eclipsed; see Figures.

DIJON, E. France, the ancient capital of Burgundy, is said to have been founded by Julius Cæsar, fortified by the emperor Marcus Aurelius, and named Divio, about 274. It has been several times captured in war; and a castle was creeted here by Louis XI. Dijon became the capital of the dukes of Burgundy about 1180. The members dine together from time to time at the Thatched-house tavern, St. James's. Mr. R. P. Pullan, on behalf of this society, excavated the temple of Bacchus at Teos, of Apollo Smintheus in the Troad, and of Minerva Polias at Priene, between 1861-70.

DIOCESE. The first division of the Roman empire into dioceses, at that period civil governments, is ascribed to Constantine, 323; but Strabo remarks that the Romans had the departments called dioceses long before. In England the principal dioceses are coeval with the establishment of Christianity; of 28 dioceses, 20 are suffragan to the diocese of Canterbury, and six to that of York; see Hishops, and the sees severally. Diocesan conferences of the clergy and laity now frequent.

DIOCLETIAN ERA (called also the era of Martyrs, on account of the persecution in his reign) was used by Christian writers until the introduction of the Christian era in the 6th century, and is still employed by the Abyssinians and Copts. It dates from the day on which Diocletian was proclaimed emperor at Chalcedon, 29 Aug. 284.

DIORAMA. This admired exhibition was first opened by MM. Bouton and Daguerre in Paris, 11 July, 1822; in London, 29 Sept. 1823. It was not successful commercially here, and was sold in 1848. The building in Regent's-park was purchased by sir S. M. Peto, in 1855, to be used as a Baptist chapel.

DIPHTHERIA (from the Greek diphthera, leather), a disease resembling croup which has the essential character of developing a false membrane on the mucous membrane connected with the throat. It was named diphtheritis by Brétonneau of Tours in 1820. From its prevalence in Boulogne, it has been termed the Boulogne sore-throat; many persons were affected with it in England at the beginning of 1858.

DIPLOMATICS, the foreign term for the science of palmography or ancient writings. Valu-

able works on this subject have been compiled by Mabillon (1681), De Vaines (1774), Astle (1781), De Wailly (1838), and other antiquaries.

"DIRECTORY FORTHE PUBLIC WORSHIP OF GOD" was drawn up at the instance of the parliament by an assembly of divines at Westminster in 1644, after the suppression of the Book of Common Prayer. The general hints given were to be managed with discretion; for the Directory prescribed no form of prayer or manner of external worship, and enjoined the people to make no responses except Amen. It was adopted by the parliament of Scotland in 1645, and many of its regulations are still observed by presbyterians.

DIRECTORY, THE FRENCH, established by the constitution of the 5th of Fructidor, an HI. (22 Aug. 1795), and nominated 1 Nov., was composed of five members (MM. Lépeaux, Letourneur, Rewbel, Barras, and Carnot). It ruled in conjunction with two chambers, the Council of Ancients and Council of Five Hundred (which see), at the revolution of the 18th of Brumaire (9 Nov. 1799). It was deposed by Bonaparte, who, with Cambacénès and Lebrun, assumed the government as three consuls, himself the first, (13 Dec. 1799); see Consuls.

DIRECTORY, the first London, is said to have been printed in 1677. The "Post-office Directory" first appeared in 1800.

DISCIPLES OF CHRIST (sometimes called CAMPHELLITES)* profess adherence to pure Scriptural doctrine and practice, reject human creeds and formularies, and admit to their communion all who recognise Christ's obedience and death, as "the only meritorious cause of the sinner's acceptance with God;" and are baptised by immersion in his name.

DISCIPLINE, ecclesiastical, originally conducted spiritually according to the divine commands in Matt. xviii. 15, 1 Cor. v., 2 Thess. iii. 6, and other texts, was gradually changed to a temporal character, as it now appears in the Roman, Greek, and other churches. The "First Book of Discipline" of the presbyterian church of Scotland was drawn up by John Knox and four ministers in Jan. 1500-1. The more important "Second Book" was prepared with great care in 1578 by Andrew Melville and a committee of the leading members of the general assembly. It lays down a thoroughly presbyterian form of government, defines the position of the ecclesiastical and civil powers, &c.

DISESTABLISHMENT. See Church of Ireland.

DISPENSARIES, to supply the poor with medical advice and medicines, began in London. The Royal General Dispensary, London, was established in St. Bartholomew's Close, in 1770. It relieved about 20,000 persons in 1861; about 17,000 in 1866. Western Dispensary, 1789. Garth's satiric poem, "The Dispensary," published 1699.

• The term Campbellite originated through their first church at Brush Run, in America, having been set up by a Scotch presbyterian preacher from ireland, named Thomas Campbell, and his son Alexander. In 1812 they renounced intant baptism, and were rebaptized by imnersion. Their number in America is said to be about 600,000; and in the United Kingdom, where the movement began independently and simultaneously, about 5000. They have also a number of churches in the British colonies.

DISPENSATIONS, coclesiastical, were first granted by pope Innocent III. in 1200. These exemptions from the discipline of the church, with indulgences, absolutions, &c., led eventually to the Reformation in Germany in 1517.

DISPENSING POWER OF THE CROWN for setting aside laws or their power) asserted by some of our sovereigns, especially by Charles II. (in 1672 for the relief of nonconformists) and by James II. in 1686, was abolished by the bill of rights, 1689. It has been on certain occasions exercised, as in the case of embargoes upon ships, the Bank Charter act, &c.; see Indomnity.

DISSENTERS, the modern name of the Paritins and Nonconformists (which see). In 1851, in London, the number of chapels, meeting-houses, &c., for all classes of dissenters amounted to more than 554. (The Church of England had 458; Roman Catholics, 35.) The great act (9 Geo. IV. c. 17) for the relief of dissenters from civil and religious disabilities was passed 9 May, 1828. By this act, called the Corporation and Test Repeal act, so much of the several acts of preceding reigns as imposed the necessity of receiving the sacrament of the Lord's Supper as a qualification for certain offices, &c., was repealed. By 6 & 7 Will. IV. c. 85 (1836), dissenters acquired the right of solemnising marriages at their own chapels, or at a registry office; see Worship.

DIVINATION was forbidden to the Jews, n.c. 1451. (Deut. xviii. 9.) It was common among their neighbours: and is described by Ezchiel (ххі. 21) 493 в.с.

DIVINE RIGHT OF KINGS, the absolute and unqualified claim of sovereigns to the obedience of their subjects, a doctrine totally foreign to the genius of the English constitution, was defended by many persons of otherwise opposite opinions, e.g., by Hobbes the free-thinker (1642), by Salmasius (1640), by sir Robert Filmer (about 1653), in his Patriarcha, published in 1680, and by the High Church party generally about 1714, but opposed by Milton (1651), Algernon Sydney, and others.

DIVING-BELL (first mentioned, though obscurely, by Aristotle, about 325 B.C.) was used in Europe about A.D. 1509. It is said to have been used on the coast of Mull, in searching for the wreck of part of the Spanish Armada, before 1662. Halley (about 1721) greatly improved this machine, and was, it is said, the first who, by means of a diving-bell, set his foot on the ground at the bottom of the sea. Smeaton made use of the diving-bell in improving Ramsgate harbour, 1779-88. Mr. Spalding and his assistants going down in a divingbell in Ireland were drowned, i June, 1783. Royal George man-of-war, which was sunk off Portsmouth in 1782, was first surveyed by means of a diving-bell in May, 1817. Latterly it has been employed in submarine surveys and harbour works. The "talpa marina," or sea-mole, a diving machine for laying down torpedoes, &c., being a cylinder provided with compressed air sufficient for two persons for 50 hours, was invented by Toselli, a Venetian, and was successfully tried in the bay of Naples, 26 Aug. 1871. Diving Dress, a close dress made by Mr. Siebe about 1836; used by sir C. W. Pasley in 1838. M. Cabirol, maker of one, died Dec. 1874.

DIVINING ROD (virgula divina, baculatorius), formed of wood or metal, was formerly believed, even by educated persons, to have the property of indicating the position of minerals and springs of water. Instance were alleged in 1851 by Dr. II. Mayo, in his work on "Popular Superstitions."

DIVINITY, see Theology.

DIVORCE was permitted by the law of Moses (Deut. xxiv. 1), 1451 n.c., but forbidden by Christ except for unchastity (Matt. v. 31, 32). It was put in practice by Spurius Carvilius Ruga at Rome, 234 n.c. At this time morals were so debased that 3000 prosecutions for adultery were enrolled. Divorces are of two kinds; one, à vinculo matrimonii (total divorce), the other a mensa et thoro (from board and bed). Divorces were attempted to be made of more easy obtainment in England in 1539. The Judicature act, 1873, constituted the probate, divorce, and admiralty division of the High Court of Justice, with two judges. See Supreme Court and Probate.

Other courts being held here, the whole place received the appellation of "Doctors' Commons." The original college was destroyed in the great fire of 1666; in 1672 it was rebuilt on the old site. After the great fire, until 1672, the society held its courts at Exeter-house in the Strand. It was incorporated by charter in June, 1768. Coote. The buildings of the College of Advocates, which included all the courts of Doctors' Commons, (arches, admiralty, consistory, &c.) were purchased by the Metropolitan Board of Works, and were pulled down in April, 1867, for the new Queen Victoria Street; some new buildings were creeted. In 1276 the corporation of London gave the Dominicans two streets near the Thames, where they erected a large convent, whence that part is still called Blackfriars. A Dominican establishment at Haverstock hill, near London, was consecrated to Oct. 1867.

DORCHESTER (Oxfordshire) was once a bishopric, founded about 636. The first bishop Birinus, the apostle of the West Saxons (which see), was succeeded in 650 by Agilbert. In 659 the see was divided by the king. Dorchester remained with Agilbert, and Wina, established at Winchester, in 660 obtained the whole. The see of Dorchester was revived about 764. In 1072 the bishop Remigius de Feschamp removed the see to Lincoln.

DORCHESTER (Dorsetshire), the Roman Durnovaria, the Saxon Dornceaster. Here are found remains of a Roman theatre and of a British camp. Hero Jefferies held his "bloody assize" (after Monmouth's rebellion) 3 Sept. 1685. Much excitement was caused by six labourers of Dorchester being sentenced to transportation 17 March, 1834, for administering illegal oaths.

DORIANS, Greeks, who claimed descent from Dorus, son of Hellen; see *Greece*. The return of the Dorians, maned Heraelidæ, to the Peloponnesus is dated 1104 B.C. They sent out many colonies. To them we owe the Doric architecture, the second of the five orders.

DORKING, Surrey, an ancient town; the manor having been given by the Conqueror to call Fitzwarren. An imaginary battle of Dorking in which the German invaders totally defeat the British army is the subject of a clever article, attributed to col. George Chesney, in Blackwood's Magazine for May, 1871. It provoked much controversy, and caused the publication of several pamphlets.

DORMANS (N. E. France). The Huguenots and their allies, under Montmorency, were here defeated by the duke of Guise, 10 Oct. 1575.

DORT, or DORDRECHT, an ancient town in Holland. Here happened an inundation of the Meuse in 1421, through the breaking down of the dykes. In the territory of Dordrecht 10,000 persons perished; and more than 100,000 round Dollait, in Friesland, and in Zealand. The independence of the thirteen provinces was declared here in 1572, when William Primee of Orange was made stadf-holder. A Protestant synod sat at Dort 13 Nov. 1618, to 25 May 1619; to which deputies were sent from England, and from the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Anninius, principally upon points of justification and grace. This synod condemned the tenets of Arminius.

DOUAY (N. France), the Roman Duacum, was taken from the Flemings by Philip the Fair in 1297; restored by Charles V. in 1368. It reverted to Spain, from which it was taken by Louis XIV. m 1667. It was captured by the duke of Marlborough in June 1710; and retaken by the French 8 Sept. 1712. This town gives its name to the Roman Catholic English version of the Bible authorised by the pope, the text being explained by notes of Roman divines. The Old Testament was published by the English college at Douay in 1609; the New had been published at Rheims in 1582. The English college for Roman Catholics was founded in 1568 by William Allen, afterwards cardinal. Dodd.

DOURO, a river (separating Spain and Portugal), which, after a desperate struggle between Wellington's advanced guard under Hill, and the French under Soult, was successfully crossed by the former on 12 May, 1809. So sudden was the movement, that Wellington at 4 o'clock sat down to the dinner prepared for the French general. Alison.

DOVER (Kent), the Roman Dubris. Near here Julius Casar is said to have first landed in England, 26 Aug., 55 B.C., and its original eastle to have been built by him soon after; but this is disputed. The works were strengthened by Alfred and succeeding kings, and rebuilt by Henry II. The earliest named constable is Leopoldus de Bertie, in the reign of Ethelred II., followed by earl

Godwin, Odo the brother of William I., &c. In modern times, this office, and that of warden of the Cinque Ports, have been frequently conferred on the prime minister for the time being,—c.g., lord North, Mr. Pitt, lord Liverpool, and the duke of Wellington. The earl of Dalhousie, late governorgeneral for India, appointed in Jan. 1853, died 19 Dec. 1860. Lord Palmerston, appointed constable March, 1861, died 18 Oct. 1865. At the instance of John de Courey, the conqueror of Ulster, the cathedral, consecrated to the Trinity, was re-dedicated to St. Patrick about 1183. The sepulchre of St. Patrick (buried here in 493, in the abbey of Saul, founded by himself) brought this place into great repute. The see was united with that of Connor in 1441 (see Commer); and the see of Dromore was united to both by the Irish Church Temporalities act, 3 & 4 Will. IV. c. 37, Aug. 14, 1833. The cathedral of Downpatrick was destroyed by lord Grey, lord deputy of Ireland; for this and other crimes he was impeached and beheaded in 1541. Beatson.

DRAFTS (or cheques). In 1856, drafts crossed with a banker's name were made payable only to or through the same banker. This act was passed in consequence of a decision to the contrary in the case of Carlon v. Ireland, 12 Dec., 1855. In 1858 the crossing was made a material part of a cheque, but bankers are not held responsible when the crossing does not plainly appear, and a penny stamp was ordered to be affixed to drafts on bankers, commencing 25 May. In the case of Simmonds v. Taylor, May, 1858, it had been decided that the crossing formed no part of the draft. The crossing had been crased, and the money paid to the holder of the draft, who had stolen it.

The Draconard were horse-soldiers, who bore dragons for ensigns. The first regiment of dragoons was raised in England, it is believed, in 1681. "King Charles II. at the Restoration established a regiment of Life Guards, to which he added a regiment of Horse Guards, and two regiments of Foot Guards; and a third regiment of Foot Guards was raised at Coldstream, on the borders of Scotland." Captain Carling.

Cornelius Vermuyden, the Dutch engineer, was invited to England in 1621, and amidst much opposition, he and his successors drained the districts termed the Great Levels; see Levels. In the present century great progress has been made in drainage. In 1861 was passed "an act to amend the laws relative to the drainage of land for agricultural purposes;" see Sewers.

DREAMS are mentioned in Scripture, c. y., Joseph's and Pharaoh's, 1715 B. c. (Gen. xxxvii. and xli.), and Nebuchadnezzar's, 603 and 570 B. C. (Daniel ii. and iv.). The first attempt to interpret dreams and omens is ascribed to Amphictyon of Athens, 1497 B. C.

Thomas, lord Lyttelton, dreamt that a young female, dressed in white, solemnly wained him of his dissolution in three days from that time. On the third day his lordship had a party to spend the evening with him, and about the time predicted, he observed to the company present, that "he believed he should jockey the ghost." but in a few minutes afterwards he was seized with a sudden faintness, carried to bed and rose no more. He died 27 Nov. 1779, aged 35. [The whole story is now discreditéd]

Excess in dress among the early Romans was restrained by sumptuary laws: and also in England by numerous statutes, in 1363, 1465, 1570, &c. (see Cap). Stow. F. W. Fairholt's "Costume in England" (1846), contains a history of dress with numerous illustrations derived from MSS., the works of Strutt, &c. J. R. Planche's elaborate "Cyclopædia of Costume," first appeared in 1876. A "dress-making company" was established in London, 6 Feb. 1865, with the view of improving the condition of the workwomen.

Dresden china was invented by John Frederick Bottger (or Bottcher), an apothecary's boy, about 1709. He died 13 Match, 1719. A costly service, each piece equisitely painted, with battles, &c., was presented to the duke of Wellington by the king of Prussia, in 1816.

Sir Walter Raleigh wore a white satin-pinked vest, close-sleeved to the wrist, and over the body a doublet finely sleeved to the wrist, and over the body a doublet finely flowered, and embrodered with pearls, and in the feather of his hat a large ruby and pearl drop at the bottom of the sprig in place of a button. His breeches, with his stockings and rublon garters, fringed at the end, all white, and buff shoes, which, on great court days, were so gorgeously covered with precious stones as to have exceeded the value of 6600l. and he had a suit of amour of solid silver, with sword and belt because ith diamonds rubnes and beats. blazing with diamonds, rubies, and pearls,

King James's favourite, the duke of Buckingham, had his diamonds tacked so loosely on, that when he chose to shake a few off on the ground, he obtained all the tame he desired from the pickers-up, who were generally les

The court dress of civilians, previously that of the time of the Georges, was modified by the lord chamberlain,

The Bloomer Costeme, introduced into America in 1849, by Mis Ann Bloomer, and worn there by many of the women. It resembled made attric, being an open-fronted jacket and loose trowsers, the latter wide like those of the Turk, but gathered in at the ankles. The Bloomer dress was adopted by a few temales in the west of London, in August, 1851, but though recom-mended by some American ladies in popular lectures, it was soon totally discontinued.

DREUX (N. W. France). Here Montmorenci defeated the Huguenots under Condé, 19 Dec. 1562. Here is the burying-place of the Orleans family since 1816. The duke of Guise, aged 18, the last surviving child of the due d'Aumale, was buried here 27 July, 1872. The bodies of king Louis Philippe and others of his family were brought here from England and buried, 9 June, 1876.

DRILL REVIEW of children; see Education, 1870.

DRILLING-MACHINES, in agriculture. One was invented by Jethro Tull, early in the last century.

DRINKING-FOUNTAINS. Many were erected in Liverpool in 1857. An association for their erection in London was formed in April, 1859, by lord John Russell, the earl of Cariisle, Mr. S. Gurney, and others. The first of the numerous Gurney, and others. The first of the numerous fountains since erected is that near St. Sepulchre's church, Skinner-street, 21 April, 1859. The magnificent fountain in Victoria-park, London, was inaugurated by the donor, Miss (afterwards baroness) Burdett-Coutts, 28 June, 1862. A remarkable drinking-fountain (the gift of the mahamida of Victoria Coutts) rajah of Vizianigram), was inaugurated in Hydepark, 29 Feb. 1868; another in Regent's-park, the gift of a Parsee, Aug. 1869.—324 in the metropolis, June, 1877.

DROGHEDA (Central Ireland, E.), formerly Tredagh, a place of great importance, having the privilege of coining money. Here was passed Poynings' law (which see) in 1494. In the reign of Edward VI. an act was passed for the foundation of a university here. The town was besieged several times in the contests between 1641 and 1691, and Cromwell took it by storm, and put the governor, sir A. Aston, and the whole of the garrison, to the sword, 12 Sept. 1649. More than 3000 men, most of them English, perished. It surrendered to William III. in 1690.

DROMORE, BISHOPRIC OF (N. E. Ireland), founded by St. Coleman, first bishop, about 550. By an extent returned 15 James I., this see was valued in the king's books at 50%. Jeremy Taylor was bishop of Down and Connor in 1660, and of this see in 1661. In 1842 Dromore was united to Down by the Irish Church Temporalities act of 1833.

DRONTHEIM, capital of Norway, founded by Olaf I. about 998.

DROWNING, an ancient punishment. The Britons inflicted death by drowning in a quagmire, before 450 n.c. Stow. It is said to have been inflicted on eighty intractable bishops near Nicomedia, A.D. 370; and to have been adopted as a punishment in France by Louis XI. The wholesale drownings of the royalists in the Loire at Nantes, by command of the brutal Carrier, Nov. 1793, were termed Noyades. 94 priests were drowned at one time. He was condemned to death in Dec. 1794. Societies for the recovery of drowning persons were first instituted in Holland, in 1767. The second society is said to have been formed at Milan, in 1768; the third in Hamburg, in 1771; the fourth at Paris, in 1772; and the fifth in London, in 1774. The motto of the Royal Humane Society in England is: Lateat scintillula forsan—"A small spark may perhaps lie hid." François Texier, of Dunkerque, after saving 50 lives at different times, was drowned in a storm, Oct. 1871.

DRUGS, sales regulated by Sale of Food and Drugs Act, passed 11 Aug. 1875. See *Pharmacy*.

DRUIDS. Priests, among the ancient Germans, Gauls, and Britons, so named from their veneration for the oak (Brit. derw). They administered sacred things, were the interpreters of the gods, and supreme judges. They headed the Britons who opposed Cassar's first landing, 55 n.c., and were exterminated by the Roman governor, Suctomus Paulinus, A.D. 61.

DRUM: the invention is ascribed to Bacchus, who, according to Polyaenus, "gave his signals of battle with cymbals and drums." It was used by the Egyptians; and brought by the Moors into Spain, 1713. The drum, or drum capstan, for weighing anchors, was invented by sir S. Morland, in 1685. Anderson.

DRUMCLOG (W. Scotland). Here the covenanters defeated Graham of Claverhouse, on I June, 1679. An account of the conflict is given by Walter Scott, in "Old Mortality."

DRUMCONDRA, see Roman Catholic.

DRUMMOND LIGHT; see Lime-light.

DRUNKARDS were to be excommunicated in the early church, 59 (1 Cor. v. 11). In England, a canon law forbade drunkenness in the clergy, 747. Constantine, king of Scots, punished it with death, 870. By 21 James I., c. 7, 1023, a drunkard was liable to a penalty of five shillings, or six hours in the stocks. See Temperance and Tee-totaller.

DRURY-LANE THEATRE derives its origin from a cock-pit, which was converted into a theatre in the reign of James I. It was rebuilt and called the Phenix; and Charles II. granted an exclusive patent to Thomas Killigrew, 25 April, 1662. The actors were called "the king's servants," and ten of them, called gentlemen of the great chamber, had an annual allowance of ten yards of

scarlet cloth, with lace; see under Theatres. Drury-lane Theatrical Fund, established, 1766.

DRUSES, a warlike people dwelling among the mountains of Lebanon, derive their origin from a fanatical Mahometan seet which arose in Egypt about 996, and fled to Palestine to avoid persecution. They now retain hardly any of the religion of their ancestors: they eat pork and drink wine, and do not practise circumcision, pray, or fast. In the middle of 1800, in consequence of disputes (in which doubtless both parties were to blame), the Druses attacked their neighbours the Maronites (which see), whom they massacred, it was said, without regard to age or sex. Peace was made in July; but in the meantime a religious fury seized the Mahometan population of the neighbouring cities, and a general massacre of Christians ensued. Fuad Pacha with Turkish troops, and general Hautpoul with French auxiliaries, invaded Lebanon in Aug. and Sept. The Druses surrendered, giving up their chiefs, Jun. 1801. See Damascus and Syria.

DUALIN, a new explosive substance (said to be from four to ten times more powerful than gunpowder), composed of varying proportions of cellulose (woody fibre), nitro-starch, nitro-mannite, and nitro-cellulose; invented by Carl Ditmar, a Prussian, and made known in 1870. This name is also given to another explosive compound, invented by Mr. Nobel, composed of ammonia and sawdust, acted on by nitro-sulphuric acid.

DUALISM, a term applied to the principles of the advocates for a separate government of Hungary under the emperor of Austria; effected in 1867.

DUBLIN, capital of Ireland, anciently called Asheled, said to have been built 140. Auliana, daughter of Alpinus, a lord or chief among the Irish, having been drowned at the ford where now Whitworth-bridge is built, he changed the name to Auliana, by Ptolemy called Eblana (afterwards corrupted into Dublana). Alpinus is said to have brought "the then rude hill into the form of a town," about 155; see Ireland and Trinity Colleges.

The site was given by William the Lion (reigned 1165— 1214), to his brother David, earl of Huntingdon, who built or strengthened the castle, and erected a large church, the tower of which, 156 feet high, still remains. The town was taken by the English Monk in 1651; and visited by queen Victoria in 1844. It has thriven since 1815, through its extensive linen manufactories; at one of these (Edwards's) a steam explosion took place on 15 April, 1859, when twenty persons were killed. The earliest recorded claim for the bacon was in 1445, since when to 1855 it is said to have been demanded only five times,

The last claimants previous to 1855 were John Shakeshanks and his wife, 20 June, 1751; they made a large sum by selling shees of the flitch to witnesses of the

DYEING is attributed to the Tyrians, about 1500 B.C. The English sent their goods to be dyed in Holland, till the art was brought to them it is said in 1608. "Two dyers of Exeter were flogged for teaching their art in the north" (of England), 1028. A statute against abuses in dycing passed in 1783. The art has been greatly improved by chemical research. A discovery of Dr. Stenhouse in 1848, led to M. Marnas procuring mauve from lichens; and Dr. Hofmann's production of aniline from coal-tar, has led to the invention of a number of beautiful dyes (mauve, magenta, red, green, black, &c.); see Antline.

EAGLE.

EARTHQUAKES.

EAGLE, an ancient coin of Ireland, made of a base metal, and current in the first years of Edward I. about 1272, was so named from the figure impressed upon it. The American gold coinage of eagles, half eagles, and quarter eagles, began 6 Dec. 1792; an eagle is of the value of 10 dollars, or about 2l. 1s.—The standard of the cagle was borne by the Persians, at Cunaxa, 401 n.c. The Romans carried gold and silver eagles as ensigns, and sometimes represented them with a thunderbolt in their talons, on the point of a spear, 102 B.C. Charlemagne added the second head to the eagle for his arms, to denote that the empires of Rome and Germany were united in him, A.D. 802. The eagle was the standard of Napoleon I. and Napoleon III.; as well as of Austria, Russia, and Prussia; see Knighthood.

In 1672, Charles II. granted to Henry lord Howard the dignity of hereditary earl marshal. The earl marshal's count was abolished in 1641. (See Howard)

Earl Marisch L. of Scotland was an officer who com-

manded the cavalry, whereas the constable commanded the whole army; but they seem to have had a joint command, as all orders were addressed to "our constable and manischal." It was reserved at the Union, and when the heritable jurisdictions were bought, it reverted to the crown, being forfeited by the rebellion of George Keith, carl manschal, in 1715

EBELIANS, a German revivalist sect, which began at Konigsberg in Prussia, about 1836, its leaders being archdeacon Ebel and Dr. Diestel, who were tried and condemned for unsound doc-trine and impure lives in 1839. The sentence was annulled in 1842, it is said by royal influence. The sect is popularly termed "Mucker," German for hypocrites. Their theory and practice of spiritual marriage is described by Mr. Hepworth Dixon in his "Spiritual Wives," 1868.

EBIONITES, heretics, in the 1st century, a branch of the Nazarenes, were of two kinds: one believed that Our Saviour was born of a virgin, observed all the precepts of the Christian religion, but added the ceremonies of the Jews; the other believed that Christ was born after the manner of all mankind, and denied his divinity. Photinus revived the sect in 342.

The present Ecclesiastical Commissioners (bishops, deans, and laymen) for the management of church property, were appointed in Feb. 1835; incorporated in 1836; and their proceedings regulated in 1840 and 1841. The law relating to them was amended in 1868.

ECCLESIASTICAL COURTS. There existed no distinction between lay and ecclesiastical ECCLESIASTICAL courts in England until 1085, after the Norman conquest: see Arches and Consistory Courts. Till the establishment of the Divorce and Probate courts (which see) in 1857, the following were the causes cognisable in ecclesiastical courts: blasphemy, apostasy from Christianity, heresy, schism, ordinations, institutions to benefices, matrimony, divorces, bastardy, tithes, incest, fornication, adultery, probate of wills, administrations, &c.

ECCLESIASTICAL DILAPIDATIONS, law respecting amended, by acts passed in 1871 and 1872.

ECCLESIASTICAL GAZETTE, Church of England semi-official journal; sent gratuitously to all dignitaries and incumbents; established to July, 1838.

The time which clapses between the utterance of a sound and its return must be more than one-twelfth of a second, to form an echo. The whispering gallery of St. Paul's is a well-known example. The *Echo*, independent evening paper, price \$\frac{1}{d}\$., established Dec. 1868.

ECKMÜHL (Bavaria), the site of a battle between the main armies of France (75,000) and Austria (40,000); Napoleon and marshal Davoust (hence prince d'Eckmühl) defeated the archduke Charles, 22 April, 1809.

ECLECTICS (from Greek, eklego, I choose), ancient philosophers (called Analogetici, and also Thislacthes, the lovers of truth), who, without attaching themselves to any sect, chose what they judged good from each: of them was Potamon of Alexandria, about A.D. I. Also a Christian sect, who considered the doctrine of Plato conformable to the spirit of Christianity.

ECLIPSE (the race-horse), see Races.

ECLIPSES. Their revolution was calculated by Calippus, the Athenian, 336 n.c. The Egyptians said they had accurately observed 373 eclipses of the sun, and 832 of the moon, in the period from Vulcan to Alexander, who died 323 B.c. The theory of eclipses is said to have been known to the Chinese before 120 B.C. The first eclipse recorded happened 19 March, 721 R.C., at 8h. 40m.
P.M., according to Ptolemy; it was lunar, and was observed with accuracy at Babylon. A list of eclipses to the year 2000 is given in "L'Art de Vérifier les Dates."

Janssen invented a method of studying the phenomena of the sun at any time, by employing several spectroscopes, whereby the spectrum is lengthened and the dazzling brillancy diminished. Mr. Joseph Norman Lockyer had suggested a similar method of observation in 1866, but did not use it till 20 Oct. 1868, being then not aware of M. Janssen's discovery. ECONOMIC MUSEUM (or Museum of Domestic and Sanitary Economy), at Twickenham, open free, was established chiefly by the agency of Mr. Thos. Twining, in 1800. It originated from the Paris exhibition of 1855.

ECONOMIST, London weekly journal, devoted to financial matters, first appeared 2 Sept. 1812.

ECORCHEURS (Flayers), bands of armed adventurers who desolated France and Belgium during the 15th century, beginning about 1435. Amongst their leaders were Chabannes, comte de Dammartin, the bastard of Armagnac, and Villandras; and they at one time numbered 100,000. They are said to have stripped their victims to their shirts, and flayed the cattle. They were favoured by the English invasion and the civil wars.

ECUADOR, see Equator.

EDDAS (thought formerly to mean Oldemoder, or "mother of mothers," by others, "art,") two books of songs and sagas (prose and verse) containing the Scandinavian mythology (or history of Odin, Thor, Frea, &c.), written by skalds or bards about the 11th or 12th centuries. Translations have been made into French, English, &c. MSS. of the Eddas exist at Copenhagen and Upsal.

EDDYSTONE (or EDYSTONE) LIGHT-HOUSE, off the port of Plymouth, erected by the Trinity-house to enable ships to avoid the Eddystone rock. The first lighthouse was commenced under Mr. Winstanley, in 1696; finished in 1690; and destroyed in the dreadful tempest of 27 Nov. 1703, when Mr. Winstanley and others perished. It was rebuilt by act of parliament, and all ships were ordered to pay one penny per ton inwards and outwards towards supporting it, 1708. This lighthouse was burnt 4 Dec. 1755; and one on a better plan, erected by Mr. Smeaton, finished 9 Oct. 1750. The woodwork of this, burnt in 1770, was replaced by stone.

EDEN, ship burnt; see Wrecks, 1873.

EDESSA (now Orfah), a town in Mesopotamia, said by some, to have been built by Nimrod; by Appian, to have been built by Seleueus. It became famous for its schools of theology in the 5th century. It was made a principality by the crusaders, and was taken by the Saracens, 1145; by Nur-ed-deen, in 1144; and the Turks in 1184. Its ancient kings or rulers were named Abgarus and Mannus.

EDGECOTE, see Banbury.

EDGEHILL FIGHT (23 Oct. 1642), Warwickshire, between the royalists under prince Rupert and the parliament army under the earl of Essex, was the first important engagement in the civil war. Charles I. was present, and the earl of Lindsay, who headed the royal foot, was mortally wounded. The king lost 5000 dead. The action was indecisive, though the parliament claimed the victory.

EDICTS, public ordinances and decrees, usually set forth by sovereigns; originated with the Romans. The PERPETUAL EDICT: Salvius Julianus, of Milan, a civilian at Rome (author of

several treatises on public right), was employed by the emperor Adrian to draw up this body of laws for the practors, promulgated 132.

EDICT OF NANTES, by which Henry IV. of France granted toleration to his protestant subjects, 13 April, 1598, was confirmed by Louis XIII. in 1610, and by Louis XIV. in 1652. It was revoked by Louis XIV. 22 Oct. 1685. This act cost France 50,000 Protestant families, and gave to England and Germany thousands of industrious artisans. It also caused a fierce insurrection in Languedoc. See Camisards. Some of the refugees settled in Spitalfields, where their descendants yet remain; others settled in Soho and St. Gilcs's, and pursued the art of making crystal glasses, and carried on the silk manufacture and jewellery; then little understood in England.

EDINBURGH, the metropolis of Scotland, derives its name—in ancient records June Edin, "the hill of Edin"—from its castle, founded or rebuilt by Edwin, king of Northumbria, who, having greatly extended his dominions, creeted it for the protection of his newly acquired territories from the incursions of the Scots and Picts, 626. But it is said the castle was first built by Camelon, king of the Picts, 330 n.c. It makes a conspicuous appearance, standing on a rock 300 feet high at the west end of the town, and, before the use of great guns, was a fortification of considerable strength.

EDINBURGH, BISHOPRIC OF, was created by Charles I, when in Scotland in 1633; and William Forbes, minister of Edinburgh, first bishop. The king allotted the parishes of the shires of Edinburgh, Linlithgow, Haddington, and a part of Berwick and of Stirlingshire, to compose the sec. The sixth and last prelate was Alexander Ross, who was ejected on the abolition of episcopacy, at the period of the revolution, in 1689. Edinburgh became a post-revolution bishopric in 1720; see Bishops.

EDINBURGH REVIEW (by Francis Jeffrey, rev. Sydney Smith, Henry Brougham, and other whigs) published first on 10 Oct. 1802.

EDINBURGH UNIVERSITY. A college was commenced by the town council of Edinburgh, in 1581, for which queen Mary had given the site of ancient religious houses, and Robert Reid, bishop of Orkney, the funds in 1558. In 1582 the university was chartered by James VI. afterwards James I. of England. The first principal was appointed in 1585. The foundation-stone of the new buildings was laid by Francis, lord Napier, grandmaster of the masons of Scotland, 16 Nov. 1789. In 1845, the library contained upwards of 80,000 volumes, besides numerous curious and rare MSS. and documents. Dr. Lyon Playfair elected the

first M.P. for Edinburgh and St. Andrew's university in conformity with the act of 1868, 4 Dec. 1868. Great movement to extend the university; meeting in London: large subscriptions, 7 Dec. 1874.

EDUCATION, the art of developing the physical, intellectual, and moral faculties of man, has occupied the greatest minds in all ages: Socrates, Plato, Aristotle, Ciecro, Quintilian, Bacon, Milton, Locke, Rousseau, &c. In England the carliest schools for the lower classes were those attached to the monasteries; for the higher classes halls and colleges were gradually founded; see Arts, Schools, Oxford, Cambridge, Endowed Schools, &c.

EGYPTIAN ERA, &c. The old Egyptian year was identical with the era of Nabonassar, beginning 26 Feb. 747 B.C., and consisted of 365 days only. It was reformed 30 B.C., at which period the commencement of the year had arrived, by continually receding to the 29 Aug., which was determined to be in future the first day of the year. To reduce to the Christian era, subtract 746 years 125 days. ELECTORS OF GERMANY. In the reign of Conrad I. king of Germany (912-918), the dukes and counts, from being merely officers, became gradually independent of the sovereign, and subsequently elected him. In 919 they confirmed the nomination of Henry I. duke of Saxony by Conrad as his successor. In the 13th century seven princes (the archbishops of Mentz, Treves, and Cologne, the king of Bohemia, the electors of Brandenburg and Saxony, and the elector Palatine), assumed the exclusive privilege of nominating the emperor. Robertson. An eighth elector (Bavaria) was made in 1648; and a nmth (Hanover) in 1692. The number was reduced to eight at 1777 (by the elector palatine acquiring Bavaria) and increased to ten at the peace of Luneville, in 1801. On the dissolution of the German empire, the crown of Austria was made hereditary, 1804-1806; see Germany.

ELECTRICITY, from the Greek ēlektros, electrum, amber. The electrical properties of rubbed amber are said to have been known to Thales, 600 B.C.; see Magnetism.

FRICTIONAL OR STATIC ELECTRICITY
Gilbert records that other bodies besides amber
generate electricity when jubbed, and that all substances may be attracted Otto von Guericke constructed the first electric machine (a globe of sulphur), about Boyle published his electrical experiments Stephen Gray, aided by Wheeler, discovered that the human body conducts electricity, that electricity acts at a distance (motion in light bodies being produced by frictional electricity at a distance of 666 feet), the fact of electric induction, and other phenomena Dufay originated his dual theory of two electric fluids: one vitreons, from rubbed glass, &c., the other resinous, from rubbed amber, resin, &c.: and showed that two bodies similarly electrified repel each other, and attract bodies oppositely clectrified, about

ELEGY. Elegiac verse (consisting of a hexameter and pentameter alternately) was the first variation from the hexameter or epic measure, used by Tyrtæus and other early poets. The elegies of Ovid and Catullus are celebrated. Gray's "Elegy, written in a country churchyard," was published in 1749.

ELEMENTS were formerly reckoned as four: earth, air, fire and water. Lavoisier enunciated the principle that all bodies which cannot be proved to be compounded are elements and to be treated as such. See Table, and separate articles. The chemical elements now are stated to be 66 (1878).

ELEPHANT, in the earliest times trained to ar. The history of the Maccabees informs us, that " to every elephant they appointed 1000 men armed with coats of mail, and 500 horse: and upon the elephants were strong towers of wood, &c." The clephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size, presented by the king of France to our Henry III. in 1238. Baker's Chron. Polyænus states that Cæsar Baker's Chron. Polyænus states that Casar brought one to Britain 54 B.C., which terrified the inhabitants greatly. 13 elephants in lord mayor's procession, 9 Nov. 1876 See Knighthood.

ELEUSINIAN MYSTERIES. The institution of these annual secret religious ceremonies (in honour of Ceres) at Athens, is attributed to (in honour of Ceres) at Athens, is attributed to Cadmus, 1550; to Erechtheus, 1399; or to Eumolpus, 1356 b.c. If any one revealed them, he was to be put to death. They were introduced from Eleusis into Rome, lasted about 1800 years, and were abolished by Theodosius A.D. 389. The laws were—To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilisation of mankind one of the honoficial effects of the Eleusian mysteries. of the beneficial effects of the Eleusinian mysteries.

ELGIN MARBLES, derived chiefly from the Parthenon, a temple of Minerva, on the Acropolis at Athens, of which they formed part of the frieze and pediment, the work of Phidias, under the govern-ment of Pericles, about 440 B.C. Thomas lord Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; and from him they were purchased by the British government for 35,000l. and placed in the British Museum, in 1816. The ship conveying them was wrecked near Cerigo, and Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and recovered them from the sea

ELGUETA, N. Spain; near here the Carlists defeated the republicans under gen. Sorna, and took 600 prisoners, 5-6 Aug. 1873.

ELIS, a Greek state termed the "Holy Land," in the Peloponnesus, founded by the Heraclidæ, 1103 B.C. Here Iphitus revived the Olympic games, 884, which were regularly celebrated after Corobus gained the prize in 776. Elis surrendered many towns to the Spartans in war, 400. After various changes, Elis joined the Achaean league, 274; and with the rest of Greece was subjugated by the Romans in 146.

ELLORA or ELORA, Central India; remarkable for its very ancient rock-cut temple; excavated according to Hindoo legends nearly 7000 years ago; but more probably about 800 A.D. The town was but more probably about 800 A.D. The town was ceded to the British by Holkar in 1818, and transferred by them to the Nizam of the Deccan in 1822.

ELMINA, and Dutch Guinea, W. Africa, were ceded by the Dutch government by treaty, signed Feb. 1872, and consolidated with the West African settlements; first governor, Mr. Pope Hennessy, April, 1872. See Ashantees.

ELOPEMENT. A wife who departs from her husband, loses her dower by the statute of Westm. 1285-unless her husband, without coercion of the church, be reconciled to her. Earlier laws punished clopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, "by a river issuing from two fountains," in the 5th century, and placed over it St. Asicus, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardearn, Drumelive, and others of less note, were also annexed to Elphin, which became one of the richest sees in Ireland. It is valued in the king's books, by an extent returned 28 Eliz., at 103l. 18s. sterling. The see was united to Kilmore in 1841, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELY, an island in Cambridgeshire, on which a church was built about 673, by Etheldreda, queen of Egfrid, king of Northumberland; she also founded a religious house, filled it with virgins, and became herself first abbess. The 1200th anniversary was celebrated 17-21 Oct. 1873; about 60,000% had then been spent on the restoration of the cathedral. The Danes ruined the convent about 870; but a monastery was built in 879, on which king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby it became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108, and his successor Hervaus was the first prelate, 1109. It is valued in the king's books at 2134. 18s. 5d.; present stated income, 5500l.

EMBALMING. The ancient Egyptians believing that their souls, after many thousand years, would reinhabit their bodies, if preserved entire, embalmed the dead. Some of the bodies, called mammies, buried 3000 years ago are still perfect.
"The physicians embalmed Israel," 1689 n.c. Gen.
1. 2; see Mummes. Carbolic acid was successfully employed by professor Seely in America, in 1868.

The most perfect specimens of modern embalming are preserved in the museum of the royal college of surgeons, one being the body of the wife of Van Butchell, pre served by John Hunter by injecting camphorated spirits of wine, &c., into the atteries and veins; and the other the body of a young woman, who died about 1780 of consumption, in the Lock hospital. The method of embalming royal personages in modern times is fully described in Hunter's "Posthumous Works," He died in 1793 During the American War (1861-5) soldiers' bodies were embalmed and sent home. During the American War (1861-5), many

EMBANKMENTS of earth were erected by the ancients for preservation from their enemies and the inundations of the tide. Those of the Egyptians and Babylonians are described by Herodotus and Strabo. To the Romans are attributed the first dykes of Holland, and the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale's "History of Embanking" first appeared in 1662; see Drainage, Levels, and Thames. Since 1830, millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish embargar, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, 14 Jan. 1801; see Armed Neutrality.

EMBER WEEKS, instituted, it is said, by pope Callixtus I. (219-223), to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. the English church the Ember days are the Wednesday, Friday, and Saturday, after the following days—the first Sunday in Lent, Whit-sunday, 14 Sept. (Holy Cross), and 13 Dec. (St. Lucia).

EMBROIDERY is usually ascribed to the Phrygians: but the Sidonians excelled in it, and it

is mentioned in 1491 n.c. Exodus xxxv. 35 and xxxviii. 23. See Bageux Tapestry. Embroidery is now done by machinery. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804. Heilman's embroidery machine was patented by Köchlin. Berlin Wool-work has been much improved of late years by the production of more elegant patterns, first published by Mr. Wittich in Berlin, about 1810.

EMERALD, a precious stone, of a green colour, found in the East and in Peru. It has been erroneously alleged that there were no true emeralds in Europe before the conquest of Peru; but there is one in the Paris Museum, taken from the mitre of pope Julius II. who died in 1513, and Peru was not conquered till 1545.

EMIGRANTS. The French aristocracy and clergy (émigrés) began to leave their country in July, 1789, at the breaking out of the revolution: their estates were confiscated in Dec. A large number returned in 1802, by an amnesty granted after the peace of Amiens. Many were indemnified after the restoration in 1815.

EMIGRATION. Phonician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea; see Magna Gracia, Marseilles, &c. The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819. Regulations for emigration were made in 1831, and in Jan. 1840, the Colonial Land and Emigration Board was established. Emigration much promoted through want of employment in London, 1869-70.

The "Society of the Sons of St. George," at Philadelphia, which was established to succour emi-grants, still exists. It published a letter dissuad-

EMLY, an Irish see, said to have been founded by St. Patrick. Emly was called Imelaca-lbair: St. Ailbe was the first bishop in 448. In 1568, the see was united to Cashel (which see). It is now an inconsiderable village.

EMMANUEL HOSPITAL, Westminster, founded in 1594 by lady Anne Dacre for aged people and children. Its original annual income had increased from 3604, to about 4000l. in 1870, when changes in the disposition of the funds were proposed by the Charity Commissioners, and opposed.

EMPRESS OF INDIA (Imperatrix India), addition to the royal titles, proclaimed in London, 1 May, 1876.

ENAMELLING was practised by the Egyptians, Chinese, and other nations, and was known in England in the time of the Saxons. At Oxford is an enamelled jewel, which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about 887. Limoges channelled ware was popular in the 16th century. Magnificent specimens by Lepec, Elkington, Emanuel, and others, appeared at the exhibition at Paris, 1867. See Mosaic. On 19 June, 1862, madame Rachel (Levison or Leverson) sued captain Carnegie for 928l. for enamelling his wife's face, and was nonsuited; see Trials, 1868. She was convicted of fraud in 1878; see Trials.

Chiar-oscuro engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491 (see Zine, &c.)

ENLISTMENT. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less than twenty-four hours after, and they are then at liberty to withdraw upon their returning the enlistment or bounty money, and 21s. costs. Enlistment is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines; and in 1867, to twelve years; see Army, 1867, and Foreyn Enlistment.

ENNISKILLEN (N. W. Ircland). The dragoon regiment, the "Inniskillingers," was originally recruited here.

EPIGRAMS derive their origin from the inscriptions placed by the ancients on tombs. Marcus Valcrius Martialis, the Latin epigrammatist, who flourished about A.D. 83, is allowed to have ex-

Horace Walpole, renowned for his letters, was born 5 Oct. 1717; died 2 March, 1797. The collection entitled "Elegant Epistles," commencing with Cicero, was published in 1790. It ends with an essay on letter writing by Dr. Johnson.

EPITAPHS were inscribed on tombs by the Egyptians, Jews, Greeks, and Romans. Mr. T. J. Pettigrew published a collection entitled "Chronicles of the Tombs," in 1857.

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctual points, the day and night are equal all over the globe. This occurs twice in the year: about 21 March, the rernal equinox, and 22 Sept., the autumnal equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the precession of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for eases respecting sums under 500l. See Supreme Court, in which law and equity are combined.

ERASTIANISM, the opinions of Thomas Licber (latinised *Erastus*), a German physician (1524-83), who taught that the chugch had no right to exclude any person from church ordinances, to inflict excommunication, &c. Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage are now termed Erastians.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife was to be henceforth received in his court. The errors must be corrected with the pen. It is so in the army courts.

ERFURT (Central Germany), was founded in 476; and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitalated to Murat, when 14,000 Prussian troops surrendered, 16 Oct. 1806. In this city Napoleon and Alexander met, and offered peace to England, 27 Sept. 1808. The French retreated to Erfurt from Leipsic, 18 Oct. 1813. A German parliament met here in March and April, 1850.

ERICSSON'S CALORIC ENGINE, sec Heat, note.

ERIVAN (Armenia), in the 16th century the residence of the shahs of Persia, was taken by the Turks in 1553 and 1582; but recovered by Abbas the Great, 1604. After being several times captured, it was ceded to Persia, 1769. It was taken by Paskiewitch in 1827, and annexed to Russia by treaty in Feb. 1828.

ERZEROUM (Asiatic Turkey), a city built by Theodosius II., 415; taken by the Seljuk Turks in the 13th century, and by the Ottoman Turks in 1517. It was captured by the Russian general Paskiewitch, June, 1829, but restored in 1830. It was almost totally destroyed by carthquakes, 2 June to 17 July, 1859.

ESCOMBRERA BAY, BATTLE OF; see Spain, 11 Oct. 1873.

ESCURIAL, properly ESCORIAL (25 miles N.W. of Madrid), the magnificent palace of the sovereigns of Spain, termed the eighth wonder of the world, was commenced by Philip II. in 1563, and completed in 1586, at a cost of about 10,000,000. It is built in the form of a gridiron in honour of St. Lawrence, on whose day (10 Aug. 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos the total length of all its rooms and apartments is above 120 English miles. The Escurial comprises a church, mausoleum, monastery, palace, library, and museum. It was struck by lightning and caught fire 11.30 p.m. 1 Oct. 1872, and was much damaged; but the grand library and other treasures were preserved.

ESPARTO, from the Latin spartum, stipa tenacissima of Linneuus, a Spanish grass used by Romans for whip-thongs, and now largely employed in paper-making. In 1856 about 50 tons, in 1870 above 100,000 tons, were imported into Britain. The price has risen from 4l. to 10l. per ton. Living plants were received at Newcastle, July, 1867.

ESPIERRES (Belgium). At Pont-à-Chin, near this village, the French, under Pichegru, attacked the allied English and Austrian army (100,000 men), commanded by the duke of York, and were repulsed after a long and desperate engagement, losing the advantages gained by the victory at Turcoing, 22 May, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578, and abolished in 1791. ESQUIRES, among the Greeks and Romans, were armour-bearers to, or attendants on a knight. In England the king created esquires by putting about their necks the collars of SS, and bestowing upon them a pair of silver spurs. John de Kingston was created a squire by patent, 13 Richard II., 1389-90.

"ESSAYS AND REVIEWS," by six clergymen and one laymin of the church of England (the Rev. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo vol. in March, 1860. The book did not excite much attention at first, but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation 24 June, 1864. The ecclesiastical courts sentenced the revs. R. Williams and H. B. Wilson to suspension for one year, and costs, 15 Dec. 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, 8 Feb. 1864. The most remarkable amongst the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, now abp. of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce). The election of Dr. Temple to the see of Exeter was much opposed on account of his essay in this collection; see Church of England, 1869.

ESTE, HOUSE OF. Boniface, count of Lucca and duke of Tuscany, about 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II. marquis of Italy and lord of Este, born about 996, who married—first, Cunegonda of the house of Guelf, by whom he had Guelf, duke of Bavaria, the ancestor of the house of Brunswick (see Bavaria and Brunswick); and secondly, Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

ESTHONIA or REVEL, a Russian province, said to have been conquered by the Teutonic knights in the 12th century; after various changes it was ceded to Sweden by the treaty of Oliva, 3

May, 1660, and finally to Russia by the peace of Nystadt, 30 Aug. 1721, having been conquered by Peter in 1710.

ETATS, see States.

ETCHING, see Engraving.

ETHER was known to the earliest chemists. Nitric other was first discovered by Kunkel, in 1681; and muriatic other, from the chloride of tin, by Courtanyaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by inhaling ether the patient is rendered unconscious of pain, is due to Dr. Charles T. Jackson, of Boston, U. S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice, under Dr. Jackson's directions (1846); see Chloroform, and Amylene. The term "ether" was applied to the transparent celestial space by the German astronomer Encke, about 1829, when studying the elements of Pons' comet, discovered in

ETHICS (Greek term for Morals). The works of Plato, Aristotle, and Confucius, contain heathen systems; the New Testament is that of Christianity. Paley's Moral Philosophy appeared in 1785, and Whewell's Elements of Morality in 1845.

ETHIOPIA. The name was applied anciently rather vaguely to countries the inhabitants of rather vaguety to countries in maintains of which had sin-hirin complexions, in Asia and Africa; but is now considered to apply properly to the modern Nubia, Sennaar, and Northern Abyssinia. ETHNOLOGY, a branch of Anthropology, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind, to each other is of recent origin. Balbi's Ethnographic Atlas was published in 1826, and Dr. Prichard's great work, Researches on the Physical History of Mankind, 1841-7. The Ethnological Society, established in 1843, published transactions. On 17 Jan. 1871.; it was amalgamated with the Anthropological Society, (which see) and named the Anthropological Institute. Dr. R. G. Latham's works, on the Ethnology of the British Empire, appeared in 1851.2. Professor T. H. Huylay gave courses of 1851-2. Professor T. H. Huxley gave courses of lectures on Ethnology at the Royal Institution, London, May and June, 1866, 1867.

COLLEGE (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanbery, confessor to Henry VI. (bishop of Bangor, in 1448), was nominated the first provost. One of the provosts, William Waynflete, (bishop of Win-chester, 1447) greatly promoted the erection of the buildings. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, were formerly elected, on the first Tuesday in August, to King's College, Cambridge, and removed there when there were vacancies, according to seniority. The establishment of the Montem is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill once in three years; the donations collected on the road (sometimes as much as 8001.) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The monten was discontinued in 1847. The college system was modified by the Public Schools act, 1868. In 1873 election Saturday ceased, the scholars to be students at Cambridge being chosen there.

ETRURIA (or Tuscia, hence the modern name Tuscany), a province of Italy, whence the Romans, in a great measure, derived their laws customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydian. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porsena of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veil was taken by Camillus, 396 B.C. A truce between the Romans and Etrurians for forty years was concluded, 351 n.c. The latter and their allies were defeated at the Vadimonian lake, 310, with the Boil their allies, 283 n.c., and totally lost their independence about 265 n.c. The years and other independence about 265 n.c. The vases and other works of the Etrus-cans still remaining show the degree of their civilisation. Napoleon I. established kingdom of Etruria, 1801, and suppressed it 1807, see Tuscany.— Etruria, Staffordshire, the site of Josiah Wedgwood's porcelain works, &c., was founded in 1771.

EUBCEA, the largest island in the Ægean sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, and was its most valuable possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Cheronea, 338, it became subject to Macedon. It was made independent by the Romans in 194; but was afterwards incorporated in

the province of Achaia. It now forms part of the kingdom of Greece.

EUCALYPTUS GLOBULUS, or Blue Gum Tree, a very fast growing Tasmanian evergreen, of the order Myrtacea. From the extraordinary power of its roots of absorbing moisture, and the salutury aromatic odour of its leaves, it has been found highly beneficial in counteracting the malaria of marshy districts of hot climates, and hence has been named the fever-destroying tree. M. Ramel first sent seeds from Melbourne to Paris in 1854, and subsequently seeds were distributed over the south of Europe, the north and south of Africa, and elsewhere.

So rapid is the growth of this tree, that a forest may so rapid is the growth of this tree, that a forest may be formed in twenty years. It sometimes reaches the height of 350 feet, with a circumference of 100 feet, rivalling Wellingtonia gigantea, which see.

The timber, bark, and oils of the Eucalyptus are highly valuable, and professor Bentley says that the genus is one of the most important to man in the vegenable lengths.

EUCHARIST, thanksgiving, an early name for the Lord's Supper; see Sacrament.

EUCLID'S ELEMENTS. Euclid, a native of Alexandria, flourished about 300 B.C. The Elements are not wholly his; for many of the demonstrations were derived from Thales, Pythagoras, Eudoxus, and others; Euclid reduced them to order, and probably inserted many theorems of his own. The Elements were first printed at Basil by Simon Grynaus, in 1533.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it; one was invented by Dr. Priestley, in 1772.

EUNUCHS, first mentioned among the Egyptians and Assyrians, and said to have been first employed by Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the later Eastern empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, 14 Sept. 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It was attacked 17 Feb. 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which, however, was Selim Pasha, the commander of the Egyptian contingent.

EUPHRATES VALLEY RAILWAY, as a speedy means of reaching India, has been much advocated, especially by the late general Chesney, who published his survey of the Euphrates and Tigris in 1850. A parliamentary commission reported on it, Aug. 1872, when it was also considered at the meeting of the British association at Brighton. The construction would cost from five to ten millions sterling, and its advantages are considered rather hypothetical by the best judges.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from 'Euphues; the Anatomy of Wit," by John Lyly, published in 1581.

EURASIAN PLAIN, the great central plain of Europe and Asia, so named by ethnologists (1865).

EUROPE, the smallest of the three divisions of the old continent, really an appendage of Asia; area, nearly 3,800,000 square miles; population, 301,700,000 (1872); 310,675,966 (1877). For the history, see Grecce, Rome, and the modern kingdoms.

It was recovered by the French under the marquis de Bouillé, 26 Nov. same year; captured by the British, 1801, 1810; restored to the Dutch, 1814.

EUTAW SPRINGS (S. Carolina). Here the Americans were defeated by the British under Arnold, 8 Sept. 1781.

EUTYCHIANS, so called from Eutyches, an abbot of Constantinople, who asserted in 446 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradieus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EVANGELICAL, a term applied to a portion of the clergy of the church of England (also called the low church), who profess to preach the gospel more purely than their brethren termed the high church party; see Church of England.

The Evangeheal Alliance was founded by sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of Protestant Christians against Romanism and infidelity. It holds annual meetings. EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, 4 Aug. 1205, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know him, but was saved by exclaiming, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

EVIL MAY-DAY (I May, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to West-minster; but they crying "mercy, mercy!" were all pardoned by the king, Henry VIII.

EVOLUTION THEORY includes the nebular theory and Mr. Darwin's doctrine of natural selection; see Development, and Progressionists.

In 1877 three forms of evolution were discussed:-That of all animals gradually from the lowest form, the amedia, up to man, in opposition to the Biblical account of the creation; 2. that of every animal from protoplasm in a cell, or egg; 3. that of all the parts of an animal from its blood.

EXCHANGE, formerly Bourse, the Royal Exchange being "Britain's Burse;" that at Paris is still named "La Bourse," from bursa, a purse. One called Collegium Mercatorum existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent; see Royal Exchange, and Bills of Exchange.

EXCHEQUER, an ancient institution, consisting of officers with financial and judicial functions: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above

the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of the last chancellor of the exchequer who acted judicially (in 1735). The legal function of the chancellor was abolished by the Judicature act, Aug. 1873. The exchequer stopped payment from Jan. to 24 May, Charles 11. 1673. Stow. The English and Irish exchequers were consolidated in 1816; see Chancellors of the Exchequers, and Tally Office.

EXCHEQUER BILLS The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1697, and first cir-culated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer,

they usually bear a premum. Amount in circulation, 56,974,780l. in 1817, in 1854, 16,008,70ol.
Robert Aslett, a cashier of the bank of England, tried for embezzling exchequer bills, and found not guilty, on account of the invahility of the bills, though the actual loss to the bank amounted to 342,6971., 18 July.

1803. Mr. Beaumont Smith tried for forging exchequer bills to the amount of 350,000.; pleaded guitty; sentenced to transportation, 4 Dec. 1847. EXCHEQUER BONDS, a species of public securities, intro-duced by Mr. W. E. Gladstone, in 1853, have not been

well received.

Tellers of the Exchequer. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1826, or by surrender or abolition, in Oct. 1834), there were the four lucrative offices of tellers of the exchequer, also abolished, 10

Oct. 1834.

John Jeffreys Pratt, earl, afterwards marquis Camden, was appointed a teller of the exchequer, in 1780, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income (amounting in the whole to upwards of a quarter of a million sterling) and placed it at the service of the state, as it annually accrued.

COMPTROLLER-GENERAL OF THE EXCHEQUER. OMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. EXCHEQUER, COURT OF (Curia Regis), instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the common pleas until they were separated, 16 John, 1215. Coke's Reports. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.* Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common law between subject and subject. The judges are styled barons, first appointed 1234. There are a chief and four puisne barons: the fifth judge having been added 23 July, 1830. The office of Cursitor Baron was abolished in 1856. For changes, see Supreme Court. The ancient court sat for last time, 10 July, 1875. The Exchequer division of the high court of justice now consists of the chief baron and four other judges (1878).

* In process of time the court of exchequer became gradually enlarged in its jurisdiction, until at length it was not merely a revenue court and one at common law between subject and subject, but one in which suits in equity were also instituted. In fact, until the act 5 Vict. c. 5 (1841), the court of exchequer possessed a triple jurisdiction; but by this statute its equity business was transferred to the court of chancery.

EXCISE. The system was established in England by the Long Parliament in 1643, duties being levied on wines, beer, &c., and tobacco, to support the army against Charles I. It was continued under Charles II. The present system was settled about 1733. The old excise office was built on the site of Gresham college in 1774; the present is at Somerset-house. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782; but received them again in 1868. In 1849 the boards of excise, stamps and taxes, were united, as "the board of commissioners of inland rerenue." Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others, of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 & 18 Vict. c. 27, July 3, 1854. The excise duties were further modified in 1800; see Revenue.

EXCLUSION BILL (to exclude the duke of York, afterwards James II., from the throne), was passed by the commons, but rejected by the lords in 1680. The revival of the question led to the dissolution of parliament in 1681.

EXCOMMUNICATION, or separation from Christian communion (Matt. xviii. 17; 1 Cor. v., &c.), was instituted to preserve the purity of the church. The Roman church excommunicated by Bell, Book, and Candle (which see). See Interdict.

Gregory VII. excommunicated the emperor Henry IV., and absolved his subjects from their allegiance.

Innocent III. excommunicated John of England, placing the country under an interdict Gregory IX. excommunicated the emperor Frederick II. four times between. 1228-45

Louis XII. of France was excommunicated by Julius II. 1510; Luther by Leo X. 1521; Henry VIII. of England by Paul III. in 1533; and Elizabeth by Pius V. 25 April, 1570

The emperor of France, the king of Sardinia, and others, were virtually excommunicated (but not by name) on account of the annexation of the Romagna by Sardinia. 29 March, 1860

EXECUTIONS, see Crime. In the reign of Henry VIII. (38 years) it is said that no less a number than 72,000 criminals were executed. Stow. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe, the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to

312; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London (formerly generally at Tyburn) was in front of Newgate from 1783 to 1868, when an act was passed directing executions to take place within the walls of prisons. The dissection of the bodies of executed persons was abolished in 1832, see *Death*, 1868.

EXETER (Devonshire), said to have been named Augusta from having been occupied by the second Augusta legion commanded by Vespasian: its present name is derived from Executive. It was for a considerable time the capital of the West Saxon kingdom. The histiopric anciently comprised two sees: Devonshire (founded about 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin, and afterwards at St. German's. About 1040 the sees were united. St. Petroc was the first bishop of Cornwall, before 900; Eadulphus, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan: Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see, 1049; the see was valued in the king's books at 500l. per annum. Present stated income, 2700l.

EXETER CHANGE (London), was built about 1680, on part of the site of Exeter house, the palace of Walter Stapleton, bishop of Exeter and lord treasurer in 1310, behended by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquis of Exeter near its site, opened in 1845, was pulled down in 1802, for the Strand Music-hall, now Gaiety theatre.

EXETER COLLEGE (Oxford) was founded by Walter Stapleton, bishop of Exeter in 1314. The college buildings mainly consist of a quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious and philanthropic institutions, concerts, oratorios, and musical socioties, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c. See under Music. Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the church of England, on Sundays.

EXHIBITION OF 1851 (THE GREAT EXHIBITION). The original idea of a National Exhibition* is attributed to Mr. F. Whishaw, secretary

* Industrial exhibitions began with the French: Expositions having been organised and opened at Paris in 1798, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage in 1828, near Charingcross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at

of the Society of Arts in 1844. It was not taken up still 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the under-taking."

The Exhibition opened by her majesty i May, The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defied calculation.

The palace continued open above 23 weeks, altogether 144 days (r May to 15 Oct.) within which time it was visited by 6, 170,000 persons, averaging 43,536 a day, whose admission at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,107% including season tickets, leaving a surplus, after payment of expenses, of about 150,000l.†

The greatest number of visitors in one day was 109,760 (8 Oct.), and at one time (20'clock, 7Oct.) there were 93,000, these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but within a windowed and floored and rooted building. There is no like yast assemblage recorded in either ancient or modern annals. as having been gathered together, it may be said,

EXHIBITION OF 1862 (INTERNATIONAL). A proposal in 1858 for another great exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772.784 square feet, or about 19 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. EXTRADITION TREATY, between Great Britain and France, 1843. In Dec. 1865, the French government gave notice of withdrawing from it in six months. It was renewed, with modifications, for six months, 21 May, 1866. A new act was passed, 9 Aug. 1870; amended in 1873. Similar treaties have been concluded with other powers; with Austria, 3 Dec. 1873; Switzerland, 4 April, 1874; Holland, Aug. 1874.

In 1866, M Lamrand, charged with forgery and fraud against the Bank of France, fled to America. He was jurisued, and was arrested at Montreal, on 1 Aug, under the governor-general's warrant. On 15 Aug, while his examination was still pending, he petitioned the governor-general not to warrant his suirender before he could apply for a writ of habors corpus, and was assured on 17 Aug, that ample time should be allowed for this purpose On 22 Aug, he was finally committed; and on 24 Aug, his petition for a writ of habors corpus was presented to judge Dimmond, twenty-four hours' house having been given to the representatives of the crown and the Bank of France. After arguments had been heard and the case adjourned until the following day, he was surreputiously carried off the same night by train to Quebec, and hurried on board a steamer bound for Europe, by virtue of an extradition warrant, purporting to be signed by the governor-general at Ottawa, on 23 Aug. He was conveyed to France, and on 5 Dec, was truel, found guilty, and condemned to ten years' imprisonment. These circumstances led to much discussion, and the Canadian authorities were censured for uregularity and want of discretion. The discussion ended by Lamirand declining Bittsh intervention.

EYLAU (Prussia), where, on 7-8 Feb. 1807, the French defeated the Russians in one of the most bloody contests of the war. Napoleon commanded in person. Both armies by this and other battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel.

EYRE (old French for ire, to go on), the itinerant court of justices, the justices in eyre, was instituted by Henry II. 1176; and when the forest laws were in force, its chief-justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is said to have been in 1671. Beatson.

FABII. A noble family at Rome, said to have derived their name from faba, a bean, because some of their ancestors cultivated this pulse; or to have descended from Fabius, a son of Hercules. They made war against the Veientes, and in an engagement near the Gremera, all the grown up males of the family (306 men) were slain in a sudden attack, 477 B.C. From one, whose tender age had detained him at Rome, arose the noble Fabii of the following ages. Fabius Cauctator (the delayer) kept Hannibal in check for some time without coming to an engagement, 217-216 B.C.

FABLES. "Jotham's fable of the trees (Judges ix., about 1209 B.c.) is the oldest extant, and as beautiful as any made since." Addison. Nathan's fable of the poor man (2 Sam. xi., about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanserit. The fables of Vishnoo Sarma, or Pilpay, are the most beautiful, if not the most ancient in the world. Sir William Jones. Professor Max Müller traced La Fontaine's fable of the Milkmaid to a very early Sanserit collection. Esop's fables (which see) supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (Coray), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of Æsop. The fables of La Fontaine (1700) and Gay (1727) are justly celebrated.

FACIAL ANGLE (that contained by one line drawn horizontally from the middle of the ear to the edge of the nostrils, and another from the latter point to the ridge of the frontal bone) was invented by Peter Camper to measure the elevation of the forchead. In negroes this angle is about 70°; in Europeans varies from 75° to 85°. Camper died 7 April, 1789. His book on "Characteristic Marks of Countenance" was published in 1791.

FACTIONS of the Circus among the Romans, were parties that fought on chariots in the circus, and who were distinguished by colours, as green, blue, red, and white; Domitian added gold and scarlet, about A.D. 90.

Nika sedition.—In Jan. 532, a conflict took place at Constantinople, lasting five days, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora. The blues and greens united for a day or two against the emperor, taking Nika (lovercome) for a watchword. The blues soon turned, and massacred nearly all the greens. The conflict was suppressed by Belisarius with difficulty, and the games were abolished for a time.

FACTORIES, supplied with machinery for producing manufactures, have immensely increased in this country since 1815. The Factory act, regulating the hours of labour, &c., was passed in 1833 and amended 1834 and 1844. Similar acts have been passed since; and an act for the extension of the principles of the Factory acts was passed in 1867 in relation to women and children employed in manual labour; short time on Saturdays was enacted. Other acts were passed in 1870-1878. By an act passed 30 July, 1874, the hours of employment of women and children are regulated, and reference made to education.

FACULTIES, COURT OF, giving powers to the archbishops of Canterbury and York, 25 Hen. VIII. cap. 21, 1534.

FAENZA, central Italy, the ancient Faventia, submitted to the emperor Frederick I., 1162; was taken by Frederick II., 12 April, 1241; held by the pope, 1275; by the Bolognese, 1282; by Cæsar Borgia, 1501; by Venice, 1504; by the papacy, 1509; by the French, 1512. After various changes early in the 16th century it was acquired by the papacy and retained till the annexation by Sardinia, 1859. Farence pottery owes its name to this place, where it was invented.

FAIRLOP OAK, with a trunk 48 feet in circumference, the growth of five centuries, in Hainault forest, Essex, was blown down in Feb. 1820. Beneath its branches an annual fair was long held on the first Friday in July, which originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon.

FAIROAKS, near the Chickahominy, Virginia, the site of two sanguinary indecisive battles between the Confederates, under general Joseph Johnson, and the Federal army of the Potomac, under general M'Clellan, 31 May and 1 June, 1862.

FAIRS AND WAKES, of Saxon origin, were instituted in Italy, about 500; in England by Alfred, 886. Spelman. Wakes were established by order of Gregory VII. in 1078, and termed Feriæ, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, &c. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror. Many statutes were made for the regulation of fairs (1328—1868). The "Fairs Act," passed 25 May, 1871, provides for the abolition of fairs; in 1872, Charlton and Blackheath fairs, and in 1873 Clapham fair, were abolished as nuisances.

FALCK LAWS, see Prussia, 1873.

FALCONRY OR HAWKING in England cannot be traced with certainty before the reign of king Ethelbert, the Saxon monarch, 858. Pennant. The grand seignior at one time kept six thousand falconers in his service. Juliana Berners' book on "Hawkynge and Huntynge" was printed in 1496; see Angling. Recent attempts have been made to revive falconry. Hawking was practised in Thrace. Aristotle.

FALCZI, on the Pruth, Turkey. Here was concluded a *Peace* between Russia and Turkey, 21 July, 1711, the Russians giving up Azof, and all the possessions on the Black Sea to the Turks. The Russians were saved from imminent destruction by the address of Catherine the empress. In 1712 the

war was renewed, and terminated by the peace of Constantinople, 16 April, 1712.

FALERII, a city of the Falisci, an Etruscan people who joined the Veientes against Rome, and were beaten by Cornelius Cossus, 437 n.c. It is recorded that when the city was besieged by Camillus in 304, a schoolmaster offered to betray to him the children of the principal citizens. On his refusal, the citizens from gratitude surrendered. They opposed Rome during the first Punic war; and in 241 the city was taken and destroyed.

FALERNIAN WINE, celebrated by Virgil and Horace, was the produce of Falernus, or, as called by Martial, Mons Massicus, in Campania. Horace in his Odes boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from the same consuls, 14 B.C.

FALKIRK (Stirlingshire, Scotland)), the site of a victory by the English under Edward 1. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 Scots were slain, 22 July, 1298. A battle was fought at Falkirk Muir between the royal forces under Hawley, and prince Charles Edward Stuart, in which the former were defeated, 17 Jun. 1746.

FALKLAND ISLANDS, a group in the South Atlantic, belonging to Great Britain, seen by Americus Vespucius, 1502, and visited by Davis, 1592; explored by Hawkins, 1504; taken possession of by France, 1704. The French were expelled by the Spaniards; and in 1771, Spain resigned them to England. Not having been colonised by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America, the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. Governors, Wm. Cleaver F. Robinson, 1866; col. George A. K. D'Arey, 1870; Thos. F. Callaghan, 1876.
